We trust the school system to prepare our kids for the future. We get excited when they get good grades, or disappointed if they don't. In *The Learning Game*, she reveals how traditional schooling has gone wrong, and proposes a series of actionable strategies to help kids learn. What if we guide kids to think for themselves? Should we encourage kids to take risks and tackle projects of their own? How do we help kids learn to love learning? Answering these questions and many more, *The Learning Game* will arm you with practical tools to design a new approach to learning—one that leaves behind the game of school and prepares your kids for the game of life.

**The Game Believes in You** Greg Toppo.2015-04-21 What if schools, from the wealthiest suburban nursery school to the grittiest urban high school, thrummed with the sounds of deep immersion? More and more people believe that can happen - with the aid of video games. Greg Toppo's *The Game Believes in You* presents the story of a small group of visionaries who, for the past 40 years, have been pushing to get game controllers into the hands of learners. Among the game revolutionaries you'll meet in this book: \*A game designer at the University of Southern California leading a team to design a video-game version of Thoreau's *Walden Pond*. \*A young neuroscientist and game designer whose research on *Math Without Words* is revolutionizing how the subject is taught, especially to students with limited English abilities. \*A Virginia Tech music instructor who is leading a group of high school-aged boys through the creation of an original opera staged totally in the online game *Minecraft*. Experts argue that games do truly believe in you. They focus, inspire and reassure people in ways that many teachers can't. Games give people a chance to learn at their own pace, take risks, cultivate deeper understanding, fail and want to try again—right away—and ultimately, succeed in ways that too often elude them in school. This book is sure to excite and inspire educators and parents, as well as provoke some passionate debate.

The huge variety of activities means you can choose from high-energy group games full of laughter and delight, or quiet activities that kids can complete on their own. All activities highlight the skill they teach, and some are marked with a symbol whether they are good for on-the-go learning or if they incorporate movement for kids to get their wiggles out. In Zip-Line Letters, children learn letter sounds as the letters zoom across the room. In Parachute Subtraction, place foam balls in a parachute, then kids shake the parachute and practice subtraction as they count how many balls fall off. Kids will have so much fun, they won't even realize they're gaining important skills! The activities are easy to adapt for all ages and skill levels. 100 Fun & Easy Learning Games for Kids is the solution for parents—as well as teachers, caregivers or relatives—to help kids realize how fun learning can be and develop what they'll need to do well wherever life takes them.
