When eleven-year-old Stella Rodriguez shows up at NASA to request that her recording be included in Carl Sagan's Golden Record, something unexpected happens: A black hole follows her home, and sets out to live in her house as a pet. The black hole swallows everything he touches, which is challenging to say the least—but also turns out to be a convenient way to get rid of those items that Stella doesn't want around. Soon the ugly sweaters her aunt has made for her all disappear within the black hole, as does the smelly class hamster she's taking care of, and most important, all the reminders of her dead father that are just too painful to have around. It's not until Stella, her younger brother, Cosmo, the family puppy, and even the bathroom tub all get swallowed up by the black hole that Stella comes to realize she has been letting her own grief consume her. And that's not the only thing she realizes as she attempts to get back home. This is an astonishingly original and funny adventure with a great big heart.

**Bringing Columbia Home** Michael D. Leinbach,Jonathan H. Ward.2018-01-23 Voted the Best Space Book of 2018 by the Space Hipsters The dramatic inside story of the epic search and recovery operation after the Columbia space shuttle disaster. On February 1, 2003, Columbia disintegrated on reentry before the nation's eyes, and all seven astronauts aboard were lost. Author Mike Leinbach, Launch Director of the space shuttle program at NASA's John F. Kennedy Space Center was a key leader in the search and recovery effort as NASA, FEMA, the FBI, the US Forest Service, and dozens more federal, state, and local agencies combed an area of rural east Texas the size of Rhode Island for every piece of the shuttle and her crew they could find. Assisted by hundreds of volunteers, it would become the largest ground search operation in US history. This comprehensive account is told in four parts: Parallel Confusion Courage, Compassion, and Commitment Picking Up the Pieces A Bittersweet Victory For the first time, here is the definitive inside story of the Columbia disaster and recovery and the inspiring message it ultimately holds. In the aftermath of tragedy, people and communities came together to help bring home the remains of the crew and nearly 40 percent of shuttle, an effort that was instrumental in piecing together what happened so the shuttle program could return to flight and complete the International Space Station. Bringing Columbia Home shares the deeply personal stories that emerged as NASA employees looked for lost colleagues and searchers overcame immense physical, logistical, and emotional challenges and worked together to accomplish the impossible. Featuring a foreword and epilogue by astronauts Robert Crippen and Eileen Collins, and dedicated to the astronauts and recovery search persons who lost their lives, this is an incredible, compelling narrative about the best of humanity in the darkest of times and about how a failure at the pinnacle of human achievement became a story of cooperation and hope.

Multimodal Literacies Across Digital Learning Contexts Maria Grazia Sindoni,Ilaria Moschini.2021-11-29 This collection critically considers the question of how learning and teaching should be conceived, understood, and approached in light of the changing nature of learning scenarios and new pedagogies in this current age of multimodal digital texts, practices, and communities. The book takes the concept of digital artifacts as being composed of multiple meaning-making semiotic resources, such as visuals, music, and design, as its point of departure to explore how diverse communities interact with these tools and develop and explore their understanding of digital practices in learning contexts. The first section of the volume examines different case studies in which involved participants learn to grapple with the introduction of digital tools for learning in children’s early years of schooling. The second section extends the focus to secondary and higher education settings as digital learning tools grow more complex as do students, parents, and teachers’ interactions with them and the subsequent need for new pedagogies to rethink these multimodal artifacts. A final section reflects on the implications of new multimodal tools, technologies, and pedagogies for teachers, such as on teacher training and community building among educators. In its in-depth look at multimodal approaches to learning as meaning-making in a digital world, this book will be of interest to students and scholars in multimodality, English language teaching, digital communication, and education.
