Dispossessing the Wilderness Mark David Spence.1999-04-15 National parks like Yellowstone, Yosemite, and Glacier preserve some of this country's most cherished wilderness landscapes. While visions of pristine, uninhabited nature led to the creation of these parks, they also inspired policies of Indian removal. By contrasting the native histories of these places with the links between Indian policy developments and preservationist efforts, this work examines the complex origins of the national parks and the troubling consequences of the American wilderness ideal. The first study to place national park history within the context of the early reservation era, it details the ways that national parks developed into one of the most important arenas of contention between native peoples and non-Indians in the twentieth century.

The Endangered Species Act Stanford Environmental Law Society.2001 This handbook is a guide to the federal Endangered Species Act, the primary U.S. law aimed at protecting species of animals and plants from human threats to their survival. It is intended for lawyers, government agency employees, students, community activists, businesspeople, and any citizen who wants to understand the Act--its history, provisions, accomplishments, and failures.

Bringing Nature Home Douglas W. Tallamy.2009-09-01 “With the twinned calamities of climate change and mass extinction weighing heavier and heavier on my nature-besotted soul, here were concrete, affordable actions that I could take, that anyone could take, to help our wild neighbors thrive in the built human environment. And it all starts with nothing more than a seed. Bringing Nature Home is a miracle: a book that summons butterflies. —Margaret Renkl, The Washington Post As development and habitat destruction accelerate, there are increasing pressures on wildlife populations. In his groundbreaking book Bringing Nature Home, Douglas W. Tallamy reveals the unbreakable link between native plant species and native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals. Luckily, there is an important and simple step we can all take to help reverse this alarming trend: everyone with access to a patch of earth can make a significant contribution toward sustaining biodiversity by simply choosing native plants. By acting on Douglas Tallamy's practical and achievable recommendations, we can all make a difference.

America's National Park System Lary M. Dilsaver.2016-02-18 Now in a fully updated edition, this invaluable reference work is a fundamental resource for scholars, students, conservationists, and citizens interested in America's national park system. The extensive collection of documents illustrates the system's creation, development, and management. The documents include laws that established and shaped the system; policy statements on park management; Park Service self-evaluations; and outside studies by a range of scientists, conservation organizations, private groups, and businesses. A new appendix includes summaries of pivotal court cases that have further interpreted the Park Service mission.

Confinement and Ethnicity Jeffery F. Burton,Mary M. Farrell,Lord,Richard W. Lord.2011-07-01 Confinement and Ethnicity documents in unprecedented detail the various facilities in which persons of Japanese descent living in the western United States were confined during World War II: the fifteen “assembly centers” run by the U.S. Army’s Wartime Civil Control Administration, the ten “relocation centers” created by the War Relocation Authority, and the internment camps, penitentiaries, and other sites under the jurisdiction of the Justice and War Departments. Originally published as a report of the Western Archeological and Conservation Center of the National Park Service, it is now reissued in a corrected edition, with a new Foreword by Tetsuden Kashima, associate professor of American ethnic studies at the University of Washington. Based on archival research, field visits, and interviews with former residents, Confinement and Ethnicity provides an overview of the architectural remnants, archeological features, and artifacts remaining at the various sites. Included are numerous maps, diagrams, charts, and photographs. Historic images of the sites and their inhabitants -- including several by Dorothea Lange and Ansel Adams -- are combined with photographs of present-day settings, showing concrete foundations, fence posts, inmate-constructed drainage ditches, and foundations and parts of buildings, as well as inscriptions in Japanese and English written or scratched on walls and rocks. The result is a unique and poignant treasure house of information for former residents and their descendants, for Asian American and World War II historians, and for anyone interested in the facts about what the authors call these “sites of shame.”

Building the National Parks Linda Flint McClelland.1998 The Office of Strategic Services, the forerunner of the Central Intelligence Agency, was founded in 1942 by William 'Wild Bill' Donovan under the direction of President Roosevelt, who realized the need to improve intelligence during wartime. A rigorous recruitment process enlisted agents from both the armed services and civilians to produce operational groups specializing in different foreign areas including Italy, Norway, Yugoslavia and China. At its peak in 1944, the number of men and women working in the service totaled nearly 13,500. This intriguing story of the origins and development of the American espionage forces covers all of the different departments involved, with a particular emphasis on the courageous teams operating in the field. The volume is illustrated with many photographs, including images from the film director John Ford who led the OSS Photographic Unit and parachuted into Burma in 1943.

Strange Bedfellows Ina Park.2021-02-02 Joyful and funny . . . Park uses science, compassion, humor, diverse stories and examples of her own shame-free living to take the stigma out of these infections. —The New York Times With curiosity and wit, Strange Bedfellows rips back the bedsheets to expose what really happens when STDs enter the sack. Sexually transmitted diseases have been hidden players in our lives for the whole of human history, with roles in everything from World War II to the growth of the Internet to The Bachelor. But despite their prominence, STDs have been shrouded in mystery and taboo for centuries, which begs the question: why do we know so little about them? Enter Ina Park, MD, who has been pushing boundaries to empower and inform others about sexual health for decades. With Strange Bedfellows, she ventures far beyond the bedroom to examine the hidden role and influence of these widely misunderstood infections and share their untold stories. Covering everything from AIDS to Zika, Park explores STDs on the cellular, individual, and population-level. She blends science and storytelling with historical tales, real life sexual escapades, and interviews with leading scientists—weaving in a healthy dose of hilarity along the way. The truth is, most of us

are sexually active, yet we're often unaware of the universe of microscopic bedfellows inside our pants. Park aims to change this by bringing knowledge to the masses in an accessible, no-nonsense, humorous way—helping readers understand the broad impact STDs have on our lives, while at the same time erasing the unfair stigmas attached to them. A departure from the cone of awkward silence and shame that so often surrounds sexual health, *Strange Bedfellows* is the straight-shooting book about the consequences of sex that all curious readers have been looking for.

Ivory Tony Park.2020-05-17 Modern day pirates on a quest to save an African treasure Ivory Alex Tremain is a pirate in trouble. The two women in his life – one of them his financial adviser, the other his diesel mechanic – have left him. He's facing a mounting tide of debts and his crew of modern-day buccaneers, a multi-national band of ex-military cutthroats, are getting restless. They don't all share his dream of going legit, but what Alex really wants is to re-open the five-star resort hotel which once belonged to his Portuguese mother and English father on the Island of Dreams, off the coast of Mozambique. A chance raid on a wildlife smugglers' ship sets the Chinese triads after him and, to add to his woes, corporate lawyer Jane Humphries lands, literally, in his lap. Another woman's the last thing Captain Tremain needs right now – especially one whose lover is a ruthless shipping magnate backed up by a deadly bunch of contract killers. What Alex really needs is one last, big heist – something valuable enough to fulfil his dreams and set him and his men up for life. When the South African government makes a controversial decision to reinstitute the culling of elephants in its national parks, Alex finds the answer to his prayers, but at what cost?

Creating the National Park Service Horace M. Albright,Marian Albright Schenck.1999 Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical missing years in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

Wilderness by Design Ethan Carr.1999-01-01 Carr delves into the planning and motivations of the people who wanted to preserve America's scenic geography. He demonstrates that by drawing on historical antecedents, landscape architects and planners carefully crafted each addition to maintain maximum picturesque wonder. Tracing the history of landscape park design from British gardens up through the city park designs of Frederick Law Olmsted, Carr places national park landscape architecture within a larger historical context.

The Wolves of Mount McKinley Adolph Murie.2011-12-01 In the time of Lewis and Clark, wolves were abundant throughout North America from the Arctic regions to Mexico. But man declared war on this cunning and powerful animal when cattle replaced the buffalo on the western plains, reducing the wolf's range to those few areas in the Far North where economic necessity did not call for its extinction. Between 1939 and 1941, Adolph Murie, one of North America's greatest naturalists, made a field study of the relationship between wolves and Dall sheep in Mount McKinley National Park (since renamed Denali National Park) which has come to be respected as a classic work of natural history. In this study Murie not only described the life cycle of Alaskan wolves in greater detail than has ever been done, but he discovered a great deal about the entire ecological network of predator and prey. The issues surrounding the survival of the wolf and its prey are more important today than ever, and Murie helps us understand the careful balance that must be maintained to ensure that these magnificent animals prosper. Originally available only in government publications which are long out-of-print, this account of a much maligned animal is now available in its first popular edition.

Data Science for Nano Image Analysis Chiwoo Park,Yu Ding.2021-07-31 This book combines two distinctive topics: data science/image analysis and materials science. The purpose of this book is to show what type of nano material problems can be better solved by which set of data science methods. The majority of material science research is thus far carried out by domain-specific experts in material engineering, chemistry/chemical engineering, and mechanical & aerospace engineering. The book could benefit materials scientists and manufacturing engineers who were not exposed to systematic data science training while in schools, or data scientists in computer science or statistics disciplines who want to work on material image problems or contribute to materials discovery and optimization. This book provides in-depth discussions of how data science and operations research methods can help and improve nano image analysis, automating the otherwise manual and time-consuming operations for material engineering and enhancing decision making for nano material exploration. A broad set of data science methods are covered, including the representations of images, shape analysis, image pattern analysis, and analysis of streaming images, change points detection, graphical methods, and real-time dynamic modeling and object tracking. The data science methods are described in the context of nano image applications, with specific material science case studies.
