Bee Fearless: Dream Like a Kid Mikaila Ulmer.2020-08-18 A business memoir from fifteen year-old lemonade entrepreneur and one of TIME Magazine's Top 30 Most Influential Teens, Mikaila Ulmer, and her advice for life and business. When Mikaila Ulmer was four, she was stung by a bee--twice in one week. She was terrified of going outside, so her parents encouraged her to learn more about bees so she wouldn't be afraid. It worked. Mikaila didn't just learn what an important role bees play in our ecosystem, but she also learned bees are endangered, and set out to save them. She started by selling cups of lemonade in front of her house and donating the small proceeds to organizations dedicated to bee conservation. When she realized the more lemonade she sold, the more bees she could help, Me & the Bees Lemonade was born. Now she sells her lemonade across the country. From meetings with Fortune 500 CEOs, to securing a deal on Shark Tank, to even visiting the Obama White House, Mikaila's lemonade and passion for bee conservation have taken her far. In *Bee Fearless*, part memoir, part business guide, Mikaila--now fifteen--shares her personal journey and special brand of mindful entrepreneurship and offers helpful tips and guidance for young readers interested in pursuing their own ventures, instilling in them the bee-lief that they can bee fearless and achieve their dreams too.

If Parents Cared Enough... Mary M. Hall-Rayford.2012-09-10

Everyone knows by now, or least thinks they know that a majority of students; especially inner city students fall short on standardized tests in most public schools. Media reports, as well as government entities, always infer that the fault of low-student-performance falls on the shoulders of the teachers. Really? Teachers have no control over the environment in which a child is raised. Teachers have no control over whether parents read or do not read to their children. Teachers have no control over district policies that do not add up to real school reform. Teachers have no control over legislators who care more about politics than educating children. So how is it that it is “always the teachers’ fault that students do not perform well?” Student performance in schools excel when parents are actively engaged—in creating and maintaining an environment that is conducive to learning, raising children who are respectful and responsible, getting involved in the business of learning in the schools, with the local school board, and in electing officials responsible for legislation regarding education.

Kids delivers a refreshing collection of realistic ideas to sustain the organisational and behavioural transformations of all students, particularly those who 'do it tough'; who learn and react differently. They are complex kids who find life tougher than most. Managing their emotion and behaviour presents educators with a spectacular challenge in schools today, and numbers are on the rise. Filled with inspirational case studies, this book focuses on building improved relationships, structures and behaviours, rather than seeing the student as 'the problem' that must be fixed. Highlighting the value of promoting positive connections with students of all ages, the author presents ways to incorporate inclusive ideas into everyday practice and construct pathways for students to become engaged in their learning and achieve success. This stimulating book shows teachers how to: build student connectedness to learning; set achievable goals for each individual child; support emotional stability; strengthen organisation patterns; address behavioural issues; improve homework planning; create friendships and deal with bullying. Teaching Tough Kids takes a particularly close focus on students identified with Learning Disability, Attention Deficit Disorder, Attention Deficit Hyperactivity Disorder, Oppositional Defiant Disorder and Asperger Syndrome. Another group of students with executive functioning difficulties are emerging in schools. These are the kids who have endured neglect or too much stress and uncertainty in their lives and as a result display classic symptoms of hyperactivity, hyper vigilance and impulsivity. Teaching Tough Kids will be of immense interest to teachers, student teachers, staff in Pupil Referral Units, SENCos and all those involved with Behaviour Support work.
