A Little Bit of Dinosaur Elleen Hutcheson,Darcy Pattison.2021-12-23 Did you know that you have a little bit of dinosaur in you? And it's your mother's fault. She fed you that cheese sandwich, which had a calcium atom that used to be in the bones of a T-rex. This humorous story follows a calcium atom as it journeys from dry bones to your jawbone! Inspired by U.S. environmentalist Aldo Leopoldo, this story follows a little bit of dinosaur, a calcium atom, as it travels over time from a dinosaur to a child. In his 1949 classic, A Sand County Almanac, Leopoldo beautifully discussed how man and nature are interconnected. This amazing circle of life is illustrated with humour and a touch of empathy. Sisters Elleen Hutcheson and Darcy Pattison team up to bring Leopoldo's circle of life to kids. Hutcheson is a high school biology teacher; five of Pattison's picture books have been named NSTA Outstanding Science Trade Books. Each is shaking her finger at their mother wondering why she fed them that cheese sandwich.

Walking with Dinosaurs Annual 2001 BBC Worldwide.2000

Walking with Beasts Tim Haines,Daren Horley.2001 Since the dinosaurs died out over 65 million years ago our planet has been dominated by mammals. A succession of bizarre evolutionary specimens have come and gone - from walking whales to sabre-toothed cats - yet many of these magnificent creatures have never been visualised before. Now, for the first time, spectacular and unfamiliar animals are recreated and set in the context of their world.Walking with Beasts - A Prehistoric Safari reveals the extraordinary ancestors of modern mammals and the arrival of man, bringing to life the roots of our heritage. Following on from the hugely-acclaimed Walking with Dinosaurs, Walking with Beasts recreates the creatures and landscapes of post-dinosaur Earth; transporting us to the icy plains of the mammoth, dark forests stalked by giant carnivorous birds and deserts dominated by 15 tonne Indricotheres.From the tiny fruit-eating primate Apidium, to the powerful chalicotheres, whose curved claws forced them to walk on their knuckles, the lives of these little known creatures are vividly brought to life. Meet the bizarre hose-nosed Macrauchenia, and the Doedicurus, a giant armadillo with a spiked club for a tail; run with cat-sized horses and rhino-sized carnivorous pigs, hunt with the skull-crushing Andrewsarchus, and walk with the very first humans.Illustrated boxes describe the latest scientific evidence that led to the reconstructions of these creatures, while character boxes provide information on behaviour and habitats. The text is illustrated throughout with ground-breaking computer graphic images to offer a unique record of lost worlds never seen before and reveal many of the most spectacular periods in Earth's history.

**Dinosaurs** Leslie Mertz.2015-07-07 With each step you take, whether it's outside your back door, at the edge of a nearby pond, or along a path in a national park, you may be setting down your foot in the same place that a dinosaur once did. Just imagine, dinosaurs roaming the same earth we live on today! What an amazing place our planet must have been during the time of those mighty creatures. There were enormous plant-eating dinosaurs, perhaps gathered in herds, grazing in a forest-surrounded meadow. And there were packs of small but fast and smart meat-eating dinosaurs that searched for an opportunity to attack their prey. And there was the ultimate predator in the Tyrannosaurus rex, causing other dinosaurs to flee wherever he went. The Fact Atlas series welcomes you to the world of dinosaurs, vanished now but for the efforts of scientists, museums, and your own imagination. With a little help from this fact-filled dinosaur book, the prehistoric world comes alive with dinosaurs big and small, scary and just plain fascinating. This book offers a history of dinosaurs that challenges young readers to question and research what these prehistoric creatures were really like and why. Illustrations accompany dino statistics to help kids build the closest possible understanding to what it was like when dinosaurs roamed the earth. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

**Walking with Dinosaurs** Timothy D. Haines,Dorling Kindersley Publishing Staff.2000-09-01 Based on one of the most ambitious television ventures ever undertaken, Walking With Dinosaurs: A Natural History takes you back to a time when super-beasts ruled the world. This full-color, hardcover edition captures the awesome nature of the Discovery Channel program in 288 action-packed pages. Through expertly-written text and state-of-the-art computer graphics, this book vividly depicts the age of the dinosaur. More than 225 million years ago, in the middle of the Triassic period, dinosaurs began to roam the Earth. But 170 million years later they had disappeared. How and why this happened continue to be among the world's greatest mysteries. The dinosaur era was one of the most amazing periods in the Earth's history. It saw, for example, the emergence of the first flowering plants and birds and the creation of the continents. But perhaps its most exciting characteristic was the dominance of the Earth by these most spectacular of creatures ...the dinosaurs. Walking with Dinosaurs: A Natural History re-creates the age of these super-beasts, vividly depicting the landscape in which they lived and the brutal lifestyle they endured. From the smallest dinosaurs (such as Coelophysis, an early carnivore) to the giants (including the fearsome carnivore Tyrannosaurus Rex and the gentle herbivore Diplodocus), the lives of these awe-inspiring creatures are dramatically brought to life in words and pictures. What did they eat? How did they mate? How did they survive attack? Complete with up-to-the-minute scientific debate on such controversial issues as whether dinosaurs were warm- or cold-blooded and whether they hunted alone or in packs, and illustrated with stunning visual images in which classic natural history photography is combined with state-of-the-art computer graphics, Walking With Dinosaurs: A Natural History is as real as it gets!

**Walking with Dinosaurs** David M. Martill,Michael J. Benton,Darren Naish.2001 The Evidence goes beyond the fascinating material in Walking with Dinosaurs, the best-selling book that accompanied the phenomenally successful TV series. The Evidence covers the methods of the research processes that formed the backbone of the series. How was the information obtained, what suppositions have been made, and how did this translate to the programs? Around 250 million years ago dinosaurs first began to walk the earth, dominating the planet until their extinction 65 million years ago. In this incredible Mesozoic period lasting 170 million years, these creatures were the dominant animals on land. Walking with Dinosaurs-The Evidence explores the archeologists' and scientists' discoveries and shows how they piece together the lives of these fascinating creatures. Comprehensively illustrated, the book explains how the bones of dinosaurs and the ground in which they're found in can lead to conclusions about feeding habits, movement, mating, habitat, and the climate of the time.
