Shaping Summertime Experiences National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Summertime Experiences and Child and Adolescent Education, Health, and Safety.2019-12-30 For children and youth, summertime presents a unique break from the traditional structure, resources, and support systems that exist during the school year. For some students, this time involves opportunities to engage in fun and enriching activities and programs, while others face additional challenges as they lose a variety of supports, including healthy meals, medical care, supervision, and structured programs that enhance development. Children that are limited by their social, economic, or physical environments during the summer months are at higher risk for worse academic, health, social and emotional, and safety outcomes. In contrast, structured summertime activities and programs support basic developmental needs and positive outcomes for children and youth who can access and afford these programs. These discrepancies in summertime experiences exacerbate pre-existing academic inequities. While further research is needed regarding the impact of summertime on developmental domains outside of the academic setting, extensive literature exists regarding the impact of summertime on academic development trajectories. However, this knowledge is not sufficiently applied to policy and practice, and it is important to address these inequalities. Shaping Summertime Experiences examines the impact of summertime experiences on the developmental trajectories of school-age children and youth across four areas of well-being, including academic learning, social and emotional development, physical and mental health, and health-promoting and safety behaviors. It also reviews the state of science and available literature regarding the impact of summertime experiences. In addition, this report provides recommendations to improve the experiences of children over the summertime regarding planning, access and equity, and opportunities for further research and data collection.

Inside the patches on the quilt below, draw a face showing different emotions you have felt. **Make No Bones About It!** Do your friends sometimes do or say things that make you feel uncomfortable? Maybe they say unkind things to other classmates. Or maybe they take the seat you were saving for someone and won't move when you ask them. Do you feel like you should speak up about it, but are afraid? Here are some steps to take to help you speak up. **A Skeleton of My Former Self** Independence is when you are able to take care of yourself. You are able to plan and make important decisions for yourself, and you can make those decisions without falling apart or depending on others to bail you out emotionally. You are courteous, honest and respectful of yourself and others. You are willing to take responsibility for your feelings, thoughts and actions. You rely on others for help when necessary, but do not cling to other people.

Transforming the Workforce for Children Birth Through Age 8 National Research

Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success.2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Does Age Matter? Jennifer Betters-Bubon.2008

Educating the Student Body Committee on Physical Activity and Physical Education in the School Environment, Food and Nutrition Board, Institute of Medicine.2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health

burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Dear Children of the World Cynthia Tatum Robinson.2022-07-06 *Dear Children of the World* - A letter of hope for elementary-aged children written to gently spark conversation and encourage healing following a traumatic event in our world. Includes a mental health resource guide for parent use. We live in a big beautiful world, but when violence and tragedy strike, a child's perception of life may become tainted. As parents and caregivers, how do we help elementary-aged children understand the unfortunate realities of our world without destroying their hope for the future? *Dear Children of the World* reminds young readers of the simple wonders that make our lives beautiful. This book also gently explains that we will experience times when the choices of others make us sad and cause us to forget how beautiful our world really is. This short but meaningful read will help spark that tough conversation with young children following traumatic news events close to home or across the globe. *Dear Children of the World* is written in a subtle way to allow adults the flexibility to expand the dialogue at a level appropriate for their own child. The end-of-book parent resource guide includes best practices recommended by mental health counselors for youth experiencing any crisis situation. Overall, the ultimate goal is to help children feel secure and loved while allowing them space to process their emotions.

professionals, how to screen, assess, and monitor suicide risk, create collaborative safety plans, and plan for reentry after a suicidal crisis. The authors expand this new edition with detailed case examples and innovative approaches such as upstream prevention strategies, usable handouts, and internet resources to effectively work with youth facing a suicidal crisis as well as students, families, and school staff who have suffered a suicide loss. Updates include expanding the literature on cyberbullying and social media, the higher risk of suicide in ethnoracial minoritized youth and LGBTQ+ students, and the role of suicide in school violence. This book is essential reading for school-based administrators, crisis team members, and mental health professionals as well as for outside providers who work collaboratively with school districts.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children. 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. **Parenting Matters** identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Forest Born Shannon Hale. 2010-07-05 Rin, Razo's little sister, is haunted by the forest she has always loved. When Razo invites her back to the city to be one of Queen Ani's waiting women, she happily accepts . . . only to end up on the adventure of her lifetime, following the queen, Enna and Dasha into the countryside in search of a fire-starting enemy that no one can see. As she learns more about the three women's magical talents, she finds her own strength comes from places both expected - the forest - and unexpected - the sound of her own voice. A brilliant addition to the Books of Bayern, this book is a treat for fans of this series, and stands alone for readers who might be discovering the joys of Shannon Hale's writing for the first time.
