Shaping Summertime Experiences National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Summertime Experiences and Child and Adolescent Education, Health, and Safety. 2019-12-30 For children and youth, summertime presents a unique break from the traditional structure, resources, and support systems that exist during the school year. For some students, this time involves opportunities to engage in fun and enriching activities and programs, while others face additional challenges as they lose a variety of supports, including healthy meals, medical care, supervision, and structured programs that enhance development. Children that are limited by their social, economic, or physical environments during the summer months are at higher risk for worse academic, health, social and emotional, and safety outcomes. In contrast, structured summertime activities and programs support basic developmental needs and positive outcomes for children and youth who can access and afford these programs. These discrepancies in summertime experiences exacerbate pre-existing academic inequities. While further research is needed regarding the impact of summertime on developmental domains outside of the academic setting, extensive literature exists regarding the impact of summertime on academic development trajectories. However, this knowledge is not sufficiently applied to policy and practice, and it is important to address these inequalities. *Shaping Summertime Experiences* examines the impact of summertime experiences on the developmental trajectories of school-age children and youth across four areas of well-being, including academic learning, social and emotional development, physical and mental health, and health-promoting and safety behaviors. It also reviews the state of science and available literature regarding the impact of summertime experiences. In addition, this report provides recommendations to improve the experiences of children over the summertime regarding planning, access and equity, and opportunities for further research and data collection.

Educating the Student Body Committee on Physical Activity and Physical Education in the School Environment, Food and Nutrition Board, Institute of Medicine. 2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. *Educating the Student Body* makes recommendations about approaches for

strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success. 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Importance of Being Little Erika Christakis. 2016-02-09 "Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important." --Washington Post What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play. --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future

seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

Parenting Matters National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Supporting the Parents of Young Children.2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Providing Mental Health Services to Youth Where They Are Harinder S. Ghuman, Mark D. Weist, Richard M. Sarles. 2013-08-21 Barriers to community mental health centers (such as stigma, waiting lists) prevent youth from receiving necessary services. Providing Mental Health Services to Youth Where They Are, identifies the reform that is needed in children's mental health service. As the issues of systems of mental health care have received increased attention, so has the recognition of the benefits of providing services to youth where they are: that is, in natural settings, such as home or school. Principles to include in systems of mental health care for youth are as equally important as actually reaching the youth: involvement of families, school staff, community leaders, and clergy. The development of programs are matched to the developmental, cultural, and other needs of youth in a community so they mesh with existing services. This book describes how these principles play out in school-, home-, and community-based mental health programs for youth.

Peaceful Parent, Happy Siblings Laura Markham. 2015-05-05 Popular parenting expert Dr. Laura Markham, author of *PEACEFUL PARENTS, HAPPY SIBLINGS*, has garnered a large and loyal readership around the world, thanks to her simple, insightful approach that values the emotional bond between parent and child. As any parent of more than one child knows, though, it's challenging for even the most engaged parent to maintain harmony and a strong connection when competition, tempers, and irritation run high. In this highly anticipated guide, Dr. Markham presents simple

yet powerful ways to cut through the squabbling and foster a loving, supportive bond between siblings, while giving each child the vital connection that he or she needs. PEACEFUL PARENT, HAPPY SIBLINGS includes hands-on, research-based advice on: • Creating deep connections with each one of your children, so that each truly believes that you couldn't possibly love anyone else more. • Fostering a loving family culture that encourages laughter and minimizes fighting • Teaching your children healthy emotional self-management and conflict resolution skills—so that they can work things out with each other, get their own needs met and respect the needs of others • Helping your kids forge a close lifelong sibling bond—as well as the relationship skills they will need for a life of healthy friendships, work relationships, and eventually their own family bonds.

Does Age Matter? Jennifer Betters-Bubon.2008

The Leader in Me Stephen R. Covey.2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
