Economic Evaluation in Clinical Trials Henry A. Glick,Jalpa A. Doshi,Seema S. Sonnad,Daniel Polsky.2014-10-02 It is becoming increasingly important to examine the relationship between the outcomes of a clinical trial and the costs of the medical therapy under study. The results of such analysis can affect reimbursement decisions for new medical technologies, drugs, devices or diagnostics. It can aid companies seeking to make claims about the cost-effectiveness of their product, as well as allowing early consideration of the economic value of therapies which may be important to improving initial adoption decisions. It is also vital for addressing the requirements of regulatory bodies. Economic Evaluation in Clinical Trials provides practical advice on how to conduct cost-effectiveness analyses in controlled trials of medical therapies. This new edition has been extensively rewritten and revised; topics discussed range from design issues such as the types of services that should be measured and price weights, to assessment of quality-adjusted life years. Illustrative materials, case histories and worked examples are included to encourage the reader to apply the methods discussed. These exercises are supported with datasets, programmes and solutions made available online.

The Book of Salsa César Miguel Rondón.2008 Rondón tells the engaging story of salsa's roots in Puerto Rico, Cuba, Colombia, the Dominican Republic, and Venezuela, and of its emergence and development in the 1960s as a distinct musical movement in New York. Rondón presents salsa as a truly pan-Caribbean phenomenon, emerging in the migrations and interactions, the celebrations and conflicts that marked the region. Although salsa is rooted in urban culture, Rondón explains, it is also a commercial product produced and shaped by professional musicians, record producers, and the music industry. --from publisher description.

NISTIR 7867 Rev. 2012 Usability of PIV Smartcards for Logical Access U.s. Department of Commerce.2014-10-09 Homeland Security Presidential Directive 12 (HSPD-12) requires all Federal agencies to standardize and enhance the security of their facilities and information resources by adopting a secure multi-factor authentication (MFA) system [16]. This system employs personal identity verification (PIV) cards (a type of smartcard) and personal identification numbers (PINs). The cards are to be used for federal employee, associate, and contractor identification; physical access to federal facilities; and logical access to federal information systems. Specifications for the PIV cards and associated organizational systems are described in FIPS-201 [10]. Such PIV cards have already been widely deployed across Federal agencies (to 89 % of the Federal workforce as of the end of 2011 [12]), including the National Institute of Standards and Technology (NIST).
