Organized by body region, each chapter starts with an review of anatomy and biomechanics, description of the clinical evaluation of injuries, discussion of pathologies and related special tests, and ends with a discussion of on-field or initial management of specific injuries. I really liked the first text and this one is significantly improved. For example, the clinical findings boxes. -- Tom West, PhD, ATC, AT, Lock Haven University, Lock Haven, Pennsylvania Much improvement in this edition. Separating c-spine into its own chapter really works well for my classes. Additional illustrations and evaluation maps make this a student friendly book.
