Derived Personal Identity Verification (PIV) Credentials (DPC) Proof of Concept National Institute of Standards and Technology.2016-01-28 NISTIR 8055 January 2016 This report documents proof of concept research for Derived Personal Identity Verification (PIV) Credentials. Smart card-based PIV Cards cannot be readily used with most mobile devices, such as smartphones and tablets, but Derived PIV Credentials (DPCs) can be used instead to PIV-enable these devices and provide multi-factor authentication for mobile device users. This report captures existing requirements related to DPCs, proposes an architecture that supports these requirements, and then demonstrates how such an architecture could be implemented and operated. Why buy a book you can download for free? You can print a 250 page book, punch 3 holes and put it in a huge binder. An engineer that is paid \$75 an hour has to do this himself using a printer he shares with 100 other people - and its outta paper, and the toner is low. (Take out the toner cartridge, shake it, then put it back) If you use an ink jet printer, am pretty sure this book will save you money. Pulmonary Vascular Disorders Marc Humbert,R. Souza,Gérald Simonneau.2012 An excellent
 overview of recent advances in diagnosis, classification and treatment The pulmonary circulation is
 by nature difficult to evaluate for the clinician and a challenge to investigate by radiographic and
 hemodynamic methods. In recent years, the field has been revolutionized by major improvements in
 diagnostic approaches and therapies. Tools for the classification, diagnosis, and management of
 pulmonary embolism and pulmonary hypertension have been developed and optimized, providing
 clinicians with detailed and updated guidelines. This volume provides the latest information on the
 fast-growing and challenging field of acute and chronic pulmonary vascular disorders from some of
 the field's major leaders in research, education, and care. The topics discussed are relevant to chest

physicians, thoracic surgeons, nurses, students, and teachers, and a well-balanced mix of contributions ensures that doctors, clinicians, and institutions from all around the world will find the information presented to be both informative and useful to their situations.

Pakistan International Monetary Fund. Middle East and Central Asia Dept..2019-12-23 This paper discusses Pakistan's First Review Under the Extended Arrangement Under the Extended Fund Facility and Request for Modification of Performance Criteria. Pakistan's program is on track and has started to bear fruit. However, risks remain elevated. Strong ownership and steadfast reform

implementation are critical to entrench macroeconomic stability and support robust and balanced growth. The authorities are committed to sustaining the progress on fiscal adjustment to place debt on a downward path. The planned reforms include strengthening tax revenue mobilization, including the elimination of tax exemptions and loopholes, and prudent expenditure policies. Preparations for a comprehensive tax policy reform should start early to ensure timely implementation. The authorities have adopted a comprehensive plan to address the accumulation of arrears in the power sector. Its full implementation is key to improve collection, reduce losses, and enhance governance. Timely and regular adjustment of energy tariffs will bring the sector in line with cost recovery.

Manifestations of Stroke M. Paciaroni,G. Agnelli,V. Caso,J. Bogousslavsky.2012-02-16 Stroke is the most common neurologic disease and the leading cause of adult disability in Western countries. The initial diagnosis of stroke is clinical and needs to be done as rapidly as possible to guarantee optimal medical and interventional therapy. The emergency stroke management depends heavily upon stroke scores to quantify the damage and to speed up the diagnosis process. Unfortunately, several important stroke syndromes are not taken into consideration in these currently used stroke scores and therefore tend to be overlooked and not treated. Compiled by leading international experts, this book provides an excellent overview on current stroke syndromes, including particularly problematic clinical pictures. Thus, together with stroke scores, the publication will lead to more thorough assessments in emergency settings. This book is indispensable for neurologists, neurosurgeons, neuroradiologists and physicians involved in the care of stroke patients.
