**Polar Bear, Why Is Your World Melting?** Robert E. Wells.2008-09-01 In the Arctic, the summer ice is melting, making it hard for polar bears and their cubs to survive. Why is the world getting warmer? The heat of the sun is trapped by the greenhouse gases that surround Earth—carbon dioxide, methane, nitrous oxide, and water vapor. If there is just the right amount of these trapped gases, the air is warm enough for plants, animals, and people to thrive. But now there is too much greenhouse gas, especially carbon dioxide. Polar bears, and all of us, are in trouble. Robert E. Wells shows why so much carbon dioxide is going into the air and what we can do to help keep Earth cool.

Did a Dinosaur Drink This Water? Robert E. Wells.2006-01-01 It's hard to imagine—the molecules in the glass of water you just finished might have once been part of a water hole that dinosaurs drank from! In this fascinating new book about the water cycle, readers will find that while it might be hard to imagine, it's true. The author, Robert E. Wells, explains the complete water cycle and also discusses ocean currents, ocean and lake habitats, and hydroelectricity. He also touches on water pollution and our responsibility to keep our water clean. The author's bright cartoon illustrations make this information especially appealing to kids.

Freddie takes his first trip to the beach, where his superpowered shoes make him bounce on the sand. When David's sister and baby niece disappear, can Freddie find them before the monster does?

**What's Older Than a Giant Tortoise?** Robert E. Wells.2004-01-01 If medals were awarded to animals for living a long time, then a giant tortoise would certainly win one. Some giant tortoises have lived for more than 150 years! Still, there are things on this planet much older than giant tortoises. Some of the giant sequoia trees that grow in California would be more than 3,000 years old. But the trees aren't that old compared to the Barringer Crater in Arizona—that was made about 49,000 years ago. And it's almost impossible to imagine that 65 million years ago, the T. Rex dinosaur roamed this planet—but we have the skeletons to prove it!

When downloading 8075, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information.
