Canaan, Dim and Far Adam Lee Cilli.2021-03 Canaan, Dim and Far argues for the importance of Pittsburgh as a case study in analyzing African American civil rights and political advocacy in an urban setting. Focusing on the period from the Progressive Era to the end of World War II, this book spotlights neglected aspects of middle-class Black activism in the decades preceding the civil rights movement. It features a revolving cast of social workers, medical professionals, journalists, scholars, and lawyers whose social justice efforts included but also extended past racial uplift ideology and respectability politics. Adam Lee Cilli shows how these Black reformers experimented with a variety of strategies as they moved fluidly across ideologies and political alliances to find practical solutions to profound inequities. In the period under study, they developed crucial social safety supports in Black communities that buffered southern migrants against the physical, civil, and legal impositions of northern Jim Crow; they waged comprehensive campaigns against anti-Black stereotypes; and they built inroads into the industrial labor movement that accelerated Black inclusion. Committed to an expansive vision of economic and political citizenship, Pittsburgh's activists challenged white America to face its contradictions and to live up to its democratic ideals.

Livestock Erin McKenna.2018-03-15 Most livestock in America currently live in cramped and unhealthy confinement, have few stable social relationships with humans or others of their species, and finish their lives by being transported and killed under stressful conditions. In *Livestock*, Erin McKenna allows us to see this situation and presents alternatives. She interweaves stories from visits to farms, interviews with producers and activists, and other rich material about the current condition of livestock. In addition, she mixes her account with pragmatist and ecofeminist theorizing about animals, drawing in particular on John Dewey's account of evolutionary history, and provides substantial historical background about individual species and about human-animal relations. This deeply informative text reveals that the animals we commonly see as livestock have rich evolutionary histories, species-specific behaviors, breed tendencies, and individual variation, just as those we respect in companion animals such as dogs, cats, and horses. To restore a similar level of respect for livestock, McKenna examines ways we can balance the needs of our livestock animals with the environmental and social impacts of raising them, and she investigates new possibilities for human ways of being in relationships with animals. This book thus offers us a picture of healthier, more respectful relationships with livestock.

Detain and Deport Nancy Hiemstra.2019-03-15 Detention and deportation have become keystones of immigration and border enforcement policies around the world. The United States has built a massive immigration enforcement system that detains and deport more people than any other country. This system is grounded in the assumptions that national borders are territorially fixed and controllable, and that detention and deportation bolster security and deter migration. Nancy Hiemstra's multisited ethnographic research pairs investigation of enforcement practices in the United States with an exploration into conditions migrants face in one country of origin: Ecuador. *Detain and Deport's* transnational approach reveals how the U.S. immigration enforcement system's chaotic organization and operation distracts from the mismatch between these assumptions and actual outcomes. Hiemstra draws on the experiences of detained and deported migrants, as well as their families and communities in Ecuador, to show convincingly that instead of deterring migrants and improving national security, detention and deportation generate insecurities and forge lasting connections across territorial borders. At the same time, the system's chaos works to curtail rights and maintain detained migrants on a narrow path to deportation. Hiemstra argues that in addition to the racialized ideas of national identity and a fluctuating dependence on immigrant labor that have long propelled U.S. immigration policies, the contemporary emphasis on detention and deportation is fueled by the influence of people and entities that profit from them.

South Carolina Women Marjorie Julian Spruill,Valinda W. Littlefield,Joan Marie Johnson.2009 Volume One: This volume, which spans the long period from the sixteenth century through the Civil War era, is remarkable for the religious, racial, ethnic, and class diversity of the women it features. Essays on plantation mistresses, overseers' wives, nonslaveholding women from the upcountry, slave women, and free black women in antebellum Charleston are certain to challenge notions about the slave South and about the significance of women to the state's economy. South Carolina's unusual history of religious tolerance is explored through the experiences of women of various faiths, and accounts of women from Europe, the West Indies, and other colonies reflect the diverse origins of the state's immigrants.

Prophet of Discontent Jared A. Loggins,Andrew J. Douglas.2021-05-15 This book is openly available in digital formats thanks to a generous grant from the Andrew W. Mellon Foundation. Many of today's insurgent Black movements call for an end to racial capitalism. They take aim at policing and mass incarceration, the racial partitioning of workplaces and residential communities, the expropriation and underdevelopment of Black populations at home and abroad. Scholars and activists increasingly regard these practices as essential technologies of capital accumulation, evidence that capitalist societies past and present enshrine racial inequality as a matter of course. In *Prophet of Discontent*, Andrew J. Douglas and Jared A. Loggins invoke contemporary discourse on racial capitalism in a powerful reassessment of Martin Luther King Jr.'s thinking and legacy. Like today's organizers, King was more than a dreamer. He knew that his call for a "radical revolution of values" was complicated by the production and circulation of value under capitalism. He knew that the movement to build the beloved community required sophisticated analyses of capitalist imperialism, state violence, and racial formations, as well as unflinching solidarity with the struggles of the Black working class. Shining new light on King's largely implicit economic and political theories, and expanding appreciation of the Black radical tradition to which he belonged, Douglas and Loggins reconstruct, develop, and carry forward King's strikingly prescient critique of capitalist society.

Coming to Pass Susan Cerulean.2015 Ten years ago, Sue Cerulean realized the coastlines of her childhood along the New Jersey shore and of her adult years (a little-developed necklace of Gulf islands in Florida) were beginning to shift into the sea. She began to chronicle the story of her coastal areas as they are now, as they once were, and how they might be as Earth's oceans rise. Cerulean and her husband, oceanographer Jeff Chanton, have taken many field trips in various parts of these coastal areas--

Spaces of Danger Heather Merrill,Lisa M. Hoffman.2015-12-01 These twelve original essays by geographers and anthropologists offer a deep critical understanding of Allan Pred's pathbreaking and eclectic cultural Marxist approach, with a focus on his concept of "situated ignorance": the production and reproduction of power and inequality by regimes of truth through strategically deployed misinformation, diversions, and silences. As the essays expose the cultural and material circumstances in which situated ignorance persists, they also add a previously underexplored spatial dimension to Walter Benjamin's idea of "moments of danger." The volume invokes the aftermath of the July 2011 attacks by far-right activist Anders Breivik in Norway, who ambushed a Labor Party youth gathering and bombed a government building, killing and injuring many. Breivik had publicly and forthrightly declared war against an array of liberal attitudes he saw threatening Western civilization. However, as politicians and journalists interpreted these events for mass consumption, a narrative quickly emerged that painted Breivik as a lone madman and steered the discourse away from analysis of the resurgent right-wing racisms and nationalisms in which he was immersed. The Breivik case is merely one of the most visible recent examples, say editors Heather Merrill and Lisa Hoffman, of the unchallenged production of knowledge in the public sphere. In essays that range widely in topic and setting—for example, brownfield development in China, a Holocaust memorial in Germany, an art gallery exhibit in South

Africa—this volume peels back layers of “situated practices and their associated meaning and power relations.” Spaces of Danger offers analytical and conceptual tools of a Predian approach to interrogate the taken-for-granted and make visible and legible that which is silenced.
