Reorganizing Government Alejandro Camacho,Robert Glicksman.2019-08-27 A pioneering model for constructing and assessing government authority and achieving policy goals more effectively Regulation is frequently less successful than it could be, largely because the allocation of authority to regulatory institutions, and the relationships between them, are misunderstood. As a result, attempts to create new regulatory programs or mend under-performing ones are often poorly designed. Reorganizing Government explains how past approaches have failed to appreciate the full diversity of alternative approaches to organizing governmental authority. The authors illustrate the often neglected dimensional and functional aspects of inter-jurisdictional relations through in-depth explorations of several diverse case studies involving securities and banking regulation, food safety, pollution control, resource conservation, and terrorism prevention. This volume advances an analytical framework of governmental authority structured along three dimensions—centralization, overlap, and coordination. Camacho and Glicksman demonstrate how differentiating among these dimensions better illuminates the policy tradeoffs of organizational alternatives, and reduces the risk of regulatory failure. The book also explains how differentiating allocations of authority based on governmental function can lead to more

effective regulation and governance. The authors illustrate the practical value of this framework for future reorganization efforts through the lens of climate change, an emerging and vital global policy challenge, and propose an “adaptive governance” infrastructure that could allow policy makers to embed the creation, evaluation, and adjustment of the organization of regulatory institutions into the democratic process itself.

Portraits of Empires Robyn Dora Radway.2023-10-03 In the late 16th century, hundreds of travelers made their way to the Habsburg ambassador's residence, known as the German House, in Constantinople. In this centrally located inn, subjects of the emperor found food, wine, shelter, and good company—and left an incredible collection of albums filled with images, messages, decorated papers, and more. *Portraits of Empires* offers a complete account of this early form of social media, which had a profound impact on later European iconography. Revealing a vibrant transimperial culture as viewed from all walks of life—Muslim and Christian, noble and servant, scholar and stable boy—the pocket-sized albums containing these curiosities have never been fully connected to the abundant archival records on the German House and its residents. Robyn Dora Radway not only introduces these objects, the people who filled their pages, and the house at the center of their creation, but she also presents several arguments regarding chronologies of exchange, workshop practices, the curation of social networks and visual collections based on status, and the purposes of these highly individualized material portraits. Featuring 162 fascinating color images, *Portraits of Empires* reconstructs the world of Habsburg subjects living in Ottoman Constantinople using a rich and distinctive set of objects to raise questions about imperial belonging and the artistic practices used to articulate it.
