Walking the High Line Joel Sternfeld, Adam Gopnik, John R. Stilgoe. 2009 This is the first book of Sternfeld's largely unseen early colour photographs. In 1969 Sternfeld began working with a 35 mm camera and Kodachrome film, and *First Pictures* contains works from this time until 1980. Here Sternfeld develops traits that appear in his mature work: irony, a politicised view of America, concern for the social condition. But there are also pictures that bear little relation to his later work: colour arrangements that parallel those of Eggleston, as well as street photography which Sternfeld ceased making in 1976. The photographs in *First Pictures* were made at a time when colour photography was struggling to assert itself against the authoritative black and white tradition, making this book a revelation both in Sternfeld's oeuvre and in the history of contemporary photography.

Multiaged Silviculture Kevin Laughlin O'Hara. 2014 This book presents the latest scientific and management information on multiaged silviculture, an emerging strategy for managing forestry systems worldwide. Over recent decades, forest science and management have tended to emphasize plantation silviculture. Whilst this clearly meets our wood production needs, many of the world's forests need to be managed far less intensively and more flexibly in order to maintain their natural ecosystem functions together with the values inherent in those processes. Developing multiaged management strategies for these complex forest ecosystems represents a global challenge to successfully integrate available science with sustainable management practices. *Multiaged Silviculture* covers the ecology

and dynamics of multiaged stands, the management operations associated with regeneration, tending, and stocking control, and the implications of this strategy on production, genetic diversity, and stand health. It is primarily aimed at graduate level students and researchers in the fields of forestry and silviculture, but will also be of relevance and use to all professional foresters and silviculturists.

Ask A North Korean Daniel Tudor. 2018-03-20 In his new book, *Ask a North Korean*, Daniel Tudor--a former Economist journalist and current Korean beer entrepreneur-- wants people to understand the true lives of everyday North Koreans. Using translated essays written by defectors, the book covers topics from politics to pornography. -- *The Boston Globe* Understanding North Korean Through the Eyes of Defectors. The weekly column *Ask A North Korean*, published by NK News, invites readers from around the world to pose questions to North Korean defectors. Adapted from the long-running column, these fascinating interviews provide authentic firsthand testimonies about life in North Korea and what is really happening inside the Hermit Kingdom. North Korean contributors to this book include: Seong who went to South Korea after dropping out during his final year of university. He is now training to be an elementary school teacher. Kang who left North Korea in 2005. He now lives in London, England. Cheol who was from South Hamgyeong in North Korea and is now a second-year university student in Seoul. Park worked and studied in Pyongyang before defecting to the U.S. in 2011. He is now studying at a U.S. college. *Ask A North Korean* sheds critical light on all aspects of North Korean politics and society and shows that, even in the world's most authoritarian regime, life goes on in ways that are very different from what outsiders may think.

High Mountain Conservation in a Changing World Jordi

Catalan,Josep M Ninot,M. Mercè Aniz.2017-08-03 This book

provides case studies and general views of the main processes involved in the ecosystem shifts occurring in the high mountains and analyses the implications for nature conservation. Case studies from the Pyrenees are preponderant, with a comprehensive set of mountain ranges surrounded by highly populated lowland areas also being considered. The introductory and closing chapters will summarise the main challenges that nature conservation may face in mountain areas under the environmental shifting conditions. Further chapters put forward approaches from environmental geography, functional ecology, biogeography, and paleoenvironmental reconstructions.

Organisms from microbes to large carnivores, and ecosystems from lakes to forest will be considered. This interdisciplinary book will appeal to researchers in mountain ecosystems, students and nature professionals. This book is open access under a CC BY license.

Bicycle Design Tony Hadland,Hans-Erhard Lessing.2016-10-07

An authoritative and comprehensive account of the bicycle's two-hundred-year evolution. The bicycle ranks as one of the most enduring, most widely used vehicles in the world, with more than a billion produced during almost two hundred years of cycling history. This book offers an authoritative and comprehensive account of the bicycle's technical and historical evolution, from the earliest velocipedes (invented to fill the need for horseless transport during a shortage of oats) to modern racing bikes, mountain bikes, and recumbents. It traces the bicycle's development in terms of materials, ergonomics, and vehicle physics, as carried out by inventors, entrepreneurs, and

manufacturers. Written by two leading bicycle historians and generously illustrated with historic drawings, designs, and photographs, *Bicycle Design* describes the key stages in the evolution of the bicycle, beginning with the counterintuitive idea of balancing on two wheels in line, through the development of tension-spoked wheels, indirect drives (employing levers, pulleys, chains, and chainwheels), and pneumatic tires. The authors examine the further development of the bicycle for such specific purposes as racing, portability, and all-terrain use; and they describe the evolution of bicycle components including seats, transmission, brakes, lights (at first candle-based), and carriers (racks, panniers, saddlebags, child seats, and sidecars). They consider not only commercially successful designs but also commercial failures that pointed the way to future technological developments. And they debunk some myths about bicycles—for example, the mistaken but often-cited idea that Leonardo sketched a chain-drive bike in his notebooks. Despite the bicycle's long history and mass appeal, its technological history has been neglected. This volume, with its engaging and wide-ranging coverage, fills that gap. It will be the starting point for all future histories of the bicycle.

Microbial Environmental Genomics (MEG) Francis

Martin, Stephane Uroz. 2022-12-15 This volume guides researchers on how to characterize, image rare, and hitherto unknown taxa and their interactions, to identify new functions and biomolecules and to understand how environmental changes condition the activity and the response of the organisms living with us and in our environment. Chapters cover different organism types (i.e., archaea, bacteria, fungi, protists, microfauna and microeukaryotes) and propose detailed protocols to produce high quality DNA, to analyse active microbial communities directly involved in complex interactions or processes through stable isotope probing, to identify and characterize of new functional genes, to image in situ interactions and to apply

bioinformatics analysis tools to complex metagenomic or RNAseq sequence data. Written in the successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Microbial Environmental Genomics (MEG): Methods and Protocols, Second Edition* aims to serve as a primary research reference for researchers in microbiology working to in the expanding field of molecular ecology and environmental genomics.

Sport Tourism Ricardo Melo, Claude Sobry. 2017-05-11 This volume provides important theoretical and applied insights into sport tourism. A collective work written by specialists in the field of sport tourism, it provides new insights into this rapidly expanding field, which is in constant change and challenged by globalization. The book is composed of four parts, each enclosing three chapters, including an initial introductory chapter. The first part of the book (re)thinks sport tourism in the globalized world; the second explores new challenges for global and local event sport tourism; the third section addresses issues related to sport tourism development in a globalized world; and the fourth part is dedicated to understanding participation in sport tourism activities. Altogether these chapters investigate some of the most important current research interests about sport tourism, and some of the challenges faced in a globalized world. As such, it represents a valuable reference for researchers, professors and professionals and an instructive text for students, providing an important understanding into this dynamic field. This book will interest academics dedicated to the study of sport tourism, events, management, and development, and will also be useful for professionals of public and private sector organizations operating within the field of sport tourism.

The Birth of Dirt Frank Berto. 2014-11 This is the story of the

birth of the mountain bike and the new off-road sport which spurred its development. It also settles once and for all the oft-disputed question, 'who invented the mountain bike?' The expert author has left no stone unturned to get to the facts, including taped interviews with all the major players from Gary Fisher and Charlie Kelly to Joe Breeze and Tom Ritchey - and many other luminaries in the history of the sport. Illustrated with 160 period action photographs and technical drawings.--Amazon website.

The Making of Modern Colombia David Bushnell.1993-02-09
Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

Adventure and Extreme Sports Injuries Omer Mei-Dan, Mike Carmont.2012-11-13 Adventure and extreme sports are increasing in popularity and it is not surprising that commercial adventure tourism and the accompanying life style and fashion, have become increasingly important to world economy. These unique sports involve not only major physical endurance and mental challenges but interaction and bonding with nature. They also tend to attract and excite audiences, both at the event and in

the media. They are exciting to watch and redraw the boundaries of human achievement with the accompanying risks of injury and death. Adventure sports are usually performed in beautiful, exciting and remote locations or in extreme environments far away from medical assistance. Extreme sports usually involve an element of increased risk. These risks are highlighted by the media, usually after a reported accident or fatality but may vary according to the involvement of the participant; the weekend recreational adventure sports athlete or the experienced professional. A wide variety of sports fall into the category of adventure and extreme sports and with an increasing number of disciplines, this field is ever expanding. Sports are performed in contact with the “ground”; mountain running and biking, rock climbing, ice climbing and mountaineering. In the air: skydiving and base jumping. On water: surfing, white water kayaking and rafting, board sailing and diving. And also involve mechanical vehicles and animals! Some sports may be performed as a combination of few disciplines, such as water and air, e.g. kite surfing, and as so involve very unique mechanisms of injury. Sports events can also be merged to form a multi-sport race comprising many disciplines lastly from single to multi day races. Sports may involve competition with others, against the environment or with oneself, frequently the most ferocious adversary. Adventure sports are becoming increasingly popular in the general public and a few take these sports to an extreme level with the accompanying risks. Those that do, bring such time and dedication that they become professional in terms of training, preparation and finance. More and more people are enjoying adventure sports and unfortunately increased numbers are becoming injured as a result. Future research is progressing alongside the sport development, to allow the sport mechanisms, injury patterns and predisposing factors to be better understood. It is the hope of all researchers to make the sports safer without detracting from their adventurous nature. The aim and scope of

our book would be to bring the sports medicine involved in each of these sports into one volume. We would explain each sport including subtle similarities and differences, the common injury mechanisms, patterns of injury and treatment options. Additional chapters would include the mental characteristics of adventure racers and extreme sports athletes, together with the complexities of competing in hot and cold extreme environments. The book will present chapters focussing on the sports listed below, concentrating on published literature and newly formed studies by experts in the fields of injury epidemiology, prevention, management and rehabilitation.

Extreme Sports Medicine Francesco Feletti. 2016-09-19 This technically oriented book on medicine as applied to extreme sports offers broad coverage of the field extending well beyond the usual focus on major trauma and acute injuries. In addition to the injuries and diseases associated with individual extreme sports, this book also addresses the topics of psychology, dermatology, ophthalmology, infectious diseases, physiology, nutrition, training, injury prevention strategies, rehabilitation, doping, treatment in hostile environments, and legal aspects. Innovative and less frequently considered topics are also discussed, such as recent advances in protective equipment and materials, the effects of exposure on whole-body vibration, and cold exposure risk management. More than 60 of the most authoritative experts from across the world have contributed to this book, drawing on their personal experiences and including practical examples whenever relevant. Both subject matter and illustrations have been selected with the utmost care, the latter including photographs of world-class athletes. The book's multidisciplinary approach to the subject ensures that it will be relevant to a wide readership.

Women and Migration in Rural Europe Karin Wiest. 2016-04-08 Fundamental societal changes in the globalising European countryside impact women's migration decisions. The chapters in this volume represent diverse attempts to explain women's movements from rural areas, taking prevailing labour market conditions as well as gender relations into account. Utilising empirical findings from countries including Austria, Germany, Hungary, Poland, Romania and Spain, this collection particularly aims to build bridges between research following the 'cultural turn' and functionalist explanations which refer to material and practiced ruralities. The international range of contributors to *Women and Migration in Rural Europe* focus on societal constructions of gender and rurality, and in doing so, address various female perspectives on rural life. The analysis of the different working and living conditions in different parts of rural Europe reveals distinct obstacles but also prospects for young women. Importantly, the book includes policy implications with respect to the challenges of demographic change, questions of gender equality and women's contribution to rural development.

Hemingway's Second War Alex Vernon. 2011-05-15 In 1937 and 1938, Ernest Hemingway made four trips to Spain to cover its civil war for the North American News Alliance wire service and to help create the pro-Republican documentary film *The Spanish Earth*. Hemingway's *Second War* is the first book-length scholarly work devoted to this subject. Drawing on primary sources, Alex Vernon provides a thorough account of Hemingway's involvement in the Spanish Civil War, a messy, complicated, brutal precursor to World War II that inspired Hemingway's great novel *For Whom the Bell Tolls*. Vernon also offers the most sustained history and consideration to date of *The Spanish Earth*. Directed by Joris Ivens, this film was a landmark work in the development of war documentaries, for which Hemingway served as screenwriter and narrator. Contributing factual, textual, and contextual information to Hemingway studies in general and his participation in the war specifically, Vernon has written a critical biography for Hemingway's experiences during the Spanish Civil War that includes discussion of the left-wing politics of the era and the

execution of José Robles Pazos. Finally, the book provides readings of *For Whom the Bell Tolls* both in historical context and on its own terms. Marked by both impressive breadth and accessibility, *Hemingway's Second War* will be an indispensable resource for students of literature, film, journalism, and European history and a landmark work for readers of Ernest Hemingway.

The Times Atlas of the Oceans Alastair Couper. 1983

Gay and Lesbian Identity Richard R. Troiden. 1988
In the past twelve years, research into homosexuality has undergone a major shift in emphasis. A concern with documenting the etiology, treatment, and psychological adjustment of homosexuals has been replaced by an interest in understanding how people develop homosexual identities—that is, organized perceptions of themselves as homosexuals in relation to sexual and romantic settings. People are not born with perceptions of themselves as homosexual, bisexual, or heterosexual. Sexual identities evolve slowly, over a long period of time. This book develops an ideal-typical model of homosexual identity formation that represents a synthesis of, and elaboration on, previous theorizing and research on the subject. The model draws heavily upon accounts provided by homosexuals themselves. The model developed is unique in four major ways: it is grounded in current research and theory; it describes identity formation in both lesbians and gay males; it notes similarities as well as differences between the sexes in homosexual identity development; and it explains differences between gay males and lesbians in terms of their experiences with gender-role socialization. This is the first book to differentiate analytically the constructs of self, self-concept, identity, and homosexual identity within a unified theoretical

framework. With one major exception, these conceptual distinctions have not been drawn in previous discussions of homosexual identity, and this lack has contributed to conceptual disarray. The theoretical approach adopted here is symbolic interactionism, a social-psychological perspective within the discipline of sociology. There is a sharp disagreement among theorists about the nature and meaning of homosexual identities. Do homosexuals' identities represent a confusion of being with doing, the mistaken belief that one is what one does, the equation of the entire self with one type of behavior? Do homosexual identities represent one of several major interests that are constructed socially and defined as reflecting essential facets of personality?

Strategic Sports Event Management Guy Masterman.2014-05-16
The hosting of sports events - whether large international events, or smaller niche events - can have a significant and long-lasting impact on the local environment, economy and society. Strategic Sports Event Management provides students and event managers with an insight into the strategic management of sports events of all scales and types, from international mega-events to school sports. Combining a unique conceptual framework with a practical, step-by-step guide to planning, organising, managing and evaluating events, the book explains the importance of adopting a strategic approach, showing how to implement strategies that lead to successful outcomes over the short and long-term. This fully revised and updated third edition uses international case studies in every chapter, from the NBA and NFL to Formula One and the English Premier League, offering real-world insight into both larger and smaller events. In addition, woven throughout the book are a series of in-depth studies of the London Olympic Games, the ultimate sporting event and an important point of reference for all practising and aspiring event managers. The book covers every key aspect of the sports event management process, including sports organizations, such as the

Comparative Semitic Linguistics Patrick R. Bennett.1998-01-01

As the title indicates, this unique resource is a manual on comparative linguistics, with the examples taken exclusively from Semitic languages. It is an innovative volume that recalls the earlier tradition of textbooks of comparative philology, which, however, exclusively treated Indo-European languages. It is suited for students with at least a year of a Semitic language. By far the largest component of the book are the nine wordlists that provide the data to be manipulated by the student. Says reviewer Peter Daniels, the wordlists constitute a unique resource for all of comparative linguistics--a considerable quantity of uniform data from a host of related languages. They would be useful for any class in comparative linguistics, not just for those interested specifically in Semitic. Scattered throughout the text are 25 exercises based on the wordlists that provide a good introduction to the methods of comparativists. Also included are paradigms of the phonological systems of ten Semitic languages as well as Coptic and a form of Berber. A bibliography that guides the student into further reading in Semitic linguistics completes the volume.
