**Tiens bon !** Marcel Rufo. 2016-09-01 Parmi les innombrables patients que Marcel Rufo a rencontrés au cours de sa carrière, le pédopsychiatre a choisi sept histoires. Un cas d'autisme infantile, d'autres de handicap, de troubles alimentaires graves, de conduites à risques, de troubles de l'adoption... Sept cas cliniques qui l'ont marqué, sept patients qu'il a suivis, parfois pendant de longues années. Mais qu'y a-t-il de commun entre un autiste et un enfant adopté ? Peut-être la confiance, la croyance qu'un mieux-être est possible, quelles que soient les difficultés que l'on doit traverser. Marcel Rufo se fait dans ce livre l'avocat d'une psychiatrie optimiste, qui croit en l'avenir. Une psychiatrie ne se résumant pas à la maîtrise de la clinique, mais qui englobe le suivi et l'empathie.

Il est impossible de tout citer mais il est certain que l'ouvrage constitue un excellent document de travail pour tous ceux qui sont préoccupés par ce problème de l'hépatotoxicité tant expérimentale qu'humaine.

**Réanimation et soins intensifs en néonatalogie** Pierre-Henri Jarreau. 2016-01-05 La médecine et la réanimation néonatales se sont construites, en France, sur une triple base : le soin, l'enseignement et la recherche. Dans le droit fil de cette triple mission, le présent ouvrage dresse un panorama des connaissances et données actuelles sur les situations pathologiques, les techniques et les approches thérapeutiques relevant des soins aux nouveau-nés nécessitant une hospitalisation. Centré sur la réanimation et les soins intensifs, l'ouvrage est organisé de la façon suivante : ● principes d'organisation et prises en charge globales ; ● conséquences néonatales des pathologies et prises en charge maternelles et foetales ; ● adaptation à la vie extra-utérine et période transitionnelle : physiologie et principes de base ; ● pathologies et situations cliniques par appareil. Fruit de l'expérience de spécialistes de la discipline, qui l'enseignent et la pratiquent quotidiennement dans des secteurs de réanimation et soins intensifs, ce manuel, à la fois exhaustif et didactique, est l'outil indispensable des professionnels de santé souhaitant d'une part enrichir leur apprentissage initial ou le mettre à jour dans le cadre de leur formation continue, d'autre part disposer d'un ouvrage pratique auquel ils puissent se référer au lit du malade. Il s'adresse aux pédiatres néonatalogistes, et en particulier à ceux qui travaillent dans des secteurs de réanimation et soins intensifs, mais également à tous les intervenants concernés par la période périnatale : pédiatres de maternité, infirmières et puéricultrices, sages-femmes, gynécologues obstétriciens, ainsi qu'aux internes qui y trouveront autant un précieux outil de formation qu'une aide au quotidien.

**Traité de réhabilitation psychosociale** Nicolas FRANCK.2018-06-05 La réhabilitation psychosociale regroupe des pratiques destinées à favoriser le rétablissement des personnes ayant des troubles psychiques sévères (troubles du spectre de la schizophrénie, troubles du spectre de l'autisme, troubles bipolaires, troubles sévères de la personnalité, etc.). Elle s'appuie sur la mise en évidence de leurs ressources, y compris cognitives, et sur le renforcement de leurs capacités de décision et d'action. Ce traité témoigne de la pluralité et de l'ampleur des travaux engagés. Rassemblant une somme considérable de données, il permet d'embrasser la complexité, la diversité et la richesse de cette discipline porteuse d'espoir pour ses usagers comme pour ses professionnels. Il fait le lien entre, d'une part, les aspects théoriques et, d'autre part, les programmes d'évaluation et de soin et les organisations pratiques. Il a été rédigé sous la direction du professeur Nicolas Franck par plus de 150 auteurs. Chacun d'entre eux, qu'il s'agisse d'un professionnel (enseignant-chercheur, psychiatre, psychologue spécialisé en neuropsychologie, psychologue clinicien, ergothérapeute, infirmier ou coordonnateur de réseau), d'une personne concernée par la maladie psychique ou d'un proche, est particulièrement représentatif et reconnu dans son domaine propre. Il fait un inventaire quasi exhaustif des réflexions, des recherches et des procédés thérapeutiques (psychoéducation, remédiation cognitive, entraînement de la cognition sociale, accompagnement vers l'emploi, entraide entre pairs, etc.) déployés dans le champ de la réhabilitation psychosociale. Celle-ci devrait représenter la norme en termes de prise en charge des troubles psychiques sévères, dans la mesure où elle constitue un facteur crucial de continuité des parcours, de prévention des rechutes et d'inclusion sociale.

**Les maladies neurodégénératives et maladies apparentées en pratique** François Tison.2022-04-12 Les maladies neurodégénératives concernent plus d'un million de personnes, entraînant des troubles cognitifs importants et réduisant de manière significative la qualité de vie et l'autonomie des patients. Ces pathologies soulèvent de nombreux défis, tant sur le plan du diagnostic, de la recherche, des traitements et de la prise en charge que sur le plan médico-économique et éthique. Articulé autour de six grandes parties : • La pathogénie et la physiopathologie des affections ainsi que les processus neurodégénératifs et inflammatoires, • Les aspects transversaux sur l'évaluation des maladies neurocognitives et l'accompagnement des patients, • La maladie d'Alzheimer et les maladies associées, • La maladie de Parkinson et les maladies associées, • La sclérose en plaques et les maladies associées, • Les autres maladies neurodégénératives (sclérose latérale amyotrophique, maladie de Huntington). L'ouvrage aborde, pour chaque affection, l'éthiopathogénie, le diagnostic et l'évaluation des déficiences ainsi que les différents aspects de la prise en charge globale et coordonnée des patients, dans l'objectif d'apporter à tous ceux qui sont en charge de ces patients à la fois les connaissances de base nécessaires et communes à tous et des développements plus poussés sur des données scientifiques récentes. Exhaustif et accessible, l'ouvrage est complété d'une riche iconographie, de tableaux et de cas cliniques.

**Approche non médicamenteuse de la maladie d'Alzheimer** André Quaderi.2014-05-16 Une réponse théorique et pratique aux problèmes de l'anxiété, de l'agitation et de l'agressivité des personnes souffrant de la maladie d'Alzheimer à travers l'aménagement de l'environnement, une organisation des soins, une méthode de communication. Si la maladie d'Alzheimer et les maladies apparentées constituent aujourd'hui un secteur à part entière de la recherche scientifique, n'oublions pas qu'elles sont à l'origine une problématique essentiellement humaine. Malgré toutes les avancées accomplies, les souffrances psychiques restent encore bien trop souvent incomprises, et les acteurs de soins démunis dans la prise en charge. À partir de notions simples, cet ouvrage propose d'entrevoir le dément comme un « individu environnement », dont le soin ne pourrait être dissocié du contexte dans lequel il se déroule. Il présente une méthode de soin innovante, concentrant l'essentiel des efforts non pas sur le patient directement mais plutôt sur son environnement direct. Cette approche non médicamenteuse se décline autour de trois points essentiels et incontournables : l'architecture, l'organisation et la relation. Principalement centré sur les deux derniers points (puisque plus facilement adaptables, à domicile comme en institution), cet ouvrage développe avec clarté les principes fondamentaux du traitement, illustrant régulièrement la théorie de cas cliniques variés : entretiens, séances de groupe de médiation, sensorialisation des espaces, etc. Il offre tous les éléments nécessaires à la mise en place concrète d'une écologie humaine adaptée à cette terrible maladie.
