

Understanding Second Language Acquisition By Lourdes Ortega

Studies of Fossilization in Second Language Acquisition Zhaohong Han, Terence Odlin. 2006 This volume, as a sequel to *Fossilization in Adult Second Language Acquisition* by Han (2004), brings together a collection of most recent theoretical and empirical studies on fossilization, a classic problem of second language acquisition. It covers a wide range of perspectives and issues. The analyses discussed herein address key concerns of many second language researchers and teachers with regard to just how far anyone can go in learning a new language.

A Philosophy of Second Language Acquisition Marysia Johnson. 2008-10-01 How does a person learn a second language? In this provocative book, Marysia Johnson proposes a new model of second language acquisition (SLA)—a model that shifts the focus from language competence (the ability to pass a language exam) to language performance (using language competently in real-life contexts). Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition. She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer: the speaker encodes a message, the hearer decodes the sent message. Such models establish a strict demarcation between learners' mental and social processes. Yet the origin of second language acquisition is located not exclusively in the learner's mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings, says the author. Drawing on Vygotsky's sociocultural theory and Bakhtin's literary theory, she constructs an alternative framework for second language theory, research, teaching, and testing. This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal (social) plane and the intrapersonal (individual) plane. Johnson's model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance. Original and controversial, *A Philosophy of Second Language Acquisition* offers:

- an introduction to Vygotsky's sociocultural theory and Bakhtin's literary theory, both of which support an alternative framework for second language acquisition;
- an examination of the existing cognitive bias in SLA theory and research;
- a radically new model of second language acquisition.

Key Questions in Second Language Acquisition Bill VanPatten, Megan Smith, Alessandro G. Benati. 2019-12-05 An introduction to the key questions that drive the field of L2 acquisition research, including its historical foundations.

Theories in Second Language Acquisition Bill VanPatten, Jessica Williams. 2014-12-22 The second edition of *Theories in Second Language Acquisition* seeks to build on the strengths of the first edition by surveying the major theories currently used in second language acquisition research. This volume is an ideal introductory text for undergraduate and graduate students in SLA and language teaching. Each chapter focuses on a single theory, written by a leading scholar in the field in an easy-to-follow style – a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. This text is designed to provide a consistent and coherent presentation for those new to the field who seek basic understanding of theories that underlie contemporary SLA research. Researchers will also find the book useful as a quick guide to theoretical work outside their respective domains.

The Handbook of Second Language Acquisition Catherine J. Doughty, Michael H. Long. 2008-04-15 The *Handbook of Second Language Acquisition* presents an integrated discussion of key, and sometimes controversial, issues in second language acquisition research. Discusses the biological and cognitive underpinnings of SLA, mechanisms, processes, and constraints on SLA, the level of ultimate attainment, research methods, and the status

of SLA as a cognitive science. Includes contributions from twenty-seven of the world's leading scholars. Provides an invaluable resource for all students and scholars of human cognition, including those in linguistics, psychology, applied linguistics, ESL, foreign languages, and cognitive science.

Crosslinguistic Influence in Second Language Acquisition Rosa Alonso. 2016-01-11 This volume provides an unprecedented insight into current approaches to crosslinguistic influence (CLI). The collection investigates a range of themes including linguistic relativity, the possible contributions of neurolinguistics, the problem of cognitive development and the role of the frequency of structures in acquisition from distinct, overlapping and complementary perspectives. Chapters focusing on vocabulary, morphosyntactic categories, semantic structures, and phonetic and phonological structures feature in the volume, as do over 20 languages, in order to offer new insights into both theoretical and empirical issues in CLI, including the consequences of great or little similarity in structures between languages. The relevance of CLI research for teaching is discussed in a number of chapters, as is the phenomenon of multilingualism. The collection will appeal to researchers, graduate and postgraduate students, teachers and professionals interested in the field of CLI in SLA.

The Cambridge Handbook of Bilingualism Annick De Houwer, Lourdes Ortega. 2018-11-30 The ability to speak two or more languages is a common human experience, whether for children born into bilingual families, young people enrolled in foreign language classes, or mature and older adults learning and using more than one language to meet life's needs and desires. This Handbook offers a developmentally oriented and socially contextualized survey of research into individual bilingualism, comprising the learning, use and, as the case may be, unlearning of two or more spoken and signed languages and language varieties. A wide range of topics is covered, from ideologies, policy, the law, and economics, to exposure and input, language education, measurement of bilingual abilities, attrition and forgetting, and giftedness in bilinguals. Also explored are cross- and intra-disciplinary connections with psychology, clinical linguistics, second language acquisition, education, cognitive science, neurolinguistics, contact linguistics, and sign language research.

Understanding Second Language Process Zhaohong Han, Eun Sung Park. 2008 This is a collection of 11 analytical and empirical studies on the process of second language acquisition, probing a wide array of issues, from transfer appropriate processing to L2 default processing strategies, among hearing or deaf learners of a variety of target languages.

Second Language Acquisition Lourdes Ortega. 2011

The Routledge Handbook of Second Language Acquisition and Individual Differences Shaofeng Li, Phil Hiver, Mostafa Papi. 2022-05-31 The Routledge Handbook of Second Language Acquisition and Individual Differences provides a thorough, in-depth discussion of the theory, research, and pedagogy pertaining to the role individual difference (ID) factors play in second language acquisition (SLA). It goes beyond the traditional repertoire and includes 32 chapters covering a full spectrum of topics on learners' cognitive, conative, affective, and demographic/sociocultural variation. The volume examines IDs from two perspectives: one is how each ID variable is associated with learning behaviors, processes, and outcomes; the other is how each domain of SLA, such as vocabulary or reading, is affected by clusters of ID variables. The volume also includes a section on the common methods used in ID research, including data elicitation instruments such as surveys, interviews, and psychometric testing, as well as methods of data analysis such as structural equation modeling. The book is a must-read for any second language researcher or applied linguist interested in investigating the effects of IDs on language learning, and for any educator interested in taking account of learners' individual differences to maximize the effects of second language instruction.

Teaching and Learning Second Language Listening Christine C. M. Goh, Larry Vandergrift. 2012-04-23 This reader-friendly text, firmly grounded

in listening theories and supported by recent research findings, offers a comprehensive treatment of concepts and knowledge related to teaching second language (L2) listening, with a particular emphasis on metacognition. The metacognitive approach, aimed at developing learner listening in a holistic manner, is unique and groundbreaking. The book is focused on the language learner throughout; all theoretical perspectives, research insights, and pedagogical principles in the book are presented and discussed in relation to the learner. The pedagogical model—a combination of the tried-and-tested sequence of listening lessons and activities that show learners how to activate processes of skilled listeners – provides teachers with a sound framework for students' L2 listening development to take place inside and outside the classroom. The text includes many practical ideas for listening tasks that have been used successfully in various language learning contexts.

The Longitudinal Study of Advanced L2 Capacities Lourdes Ortega, Heidi Byrnes. 2009-05-07 Researchers and educators routinely call for longitudinal research on language learning and teaching. The present volume explores the connection between longitudinal study and advanced language capacities, two under-researched areas, and proposes an agenda for future research. Five chapters probe theoretical and methodological reflections about the longitudinal study of advanced L2 capacities, followed by eight chapters that report on empirical longitudinal investigations spanning descriptive, quasi-experimental, qualitative, and quantitative longitudinal methodologies. In addition, the co-editors offer a detailed introduction to the volume and a coda chapter in which they explore what it would take to design systematic research programs for the longitudinal investigation of advanced L2 capacities. The scholars in this volume collectively make the argument that second language acquisition research will be the richer, theoretically and empirically, if a trajectory toward advancedness is part of its conceptualization right from the beginning and, in reverse, that advancedness is a particularly interesting acquisitional level at which to probe contemporary theories associated with the longitudinal study of language development. Acknowledging that advancedness is increasingly important in our multicultural societies and globalized world, the central question explored in the present collection is: How does learning over time evolve toward advanced capacities in a second language?

The Multilingual Turn Stephen May. 2013-07-24 Drawing on the latest developments in bilingual and multilingual research, *The Multilingual Turn* offers a critique of, and alternative to, still-dominant monolingual theories, pedagogies and practices in SLA, TESOL, and bilingual education. Critics of the 'monolingual bias' argue that notions such as the idealized native speaker, and related concepts of interlanguage, language competence, and fossilization, have framed these fields inextricably in relation to monolingual speaker norms. In contrast, these critics advocate an approach that emphasizes the multiple competencies of bi/multilingual learners as the basis for successful language teaching and learning. This volume takes a big step forward in re-situating the issue of multilingualism more centrally in applied linguistics and, in so doing, making more permeable its key sub-disciplinary boundaries - particularly, those between SLA, TESOL, and bilingual education. It addresses this issue head on, bringing together key international scholars in SLA, TESOL, and bilingual education to explore from cutting-edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory, pedagogy, and practice in each of these fields.

Second Language Needs Analysis Michael H. Long. 2005-11-03 No language teaching program should be designed without a thorough analysis of the students' needs. The studies in this volume explore Needs Analysis in the public, vocational and academic sectors, in contexts ranging from service encounters in coffee shops to foreign language needs assessment in the U.S. military. In each chapter, the authors explicitly discuss the methodology they employed, and in some cases also offer research findings on that methodology. Several studies are task-based, making the collection of special interest to those involved in task-based language teaching. Contributions include work on English and other languages in both second and foreign language settings, as well as a comprehensive overview of methodological issues in Needs Analysis by the editor.

Research Methods in Second Language Acquisition Alison Mackey, Susan M. Gass. 2011-12-12 *Research Methods in Second Language Acquisition*

“With its cornucopia of information, both thorough and practical, this book is a must for our methodology shelves. Its study questions and project suggestions will be a boon for many research methods courses.” Robert M. DeKeysevr, University of Maryland “This guide to collecting, coding and analyzing second language acquisition data will be an essential reference for novice and experienced researchers alike.” Peter Robinson, Aoyama Gakuin University “Comprehensive and technically up-to-date, yet accessible and cogent! This guide covers a variety of topics, such as second language writing and reading, meta-analyses, research replication, qualitative data collection and analysis, and more. Each chapter of this volume offers background, step-by-step guidance, and relevant studies to create comprehensive coverage of each method. This carefully selected and edited volume will be a useful text for graduate students and scholars looking to keep pace with the latest research projects and methodologies in second language acquisition.

Second Language Acquisition Rod Ellis.1997 This book offers a succinct theoretical introduction to the basic concepts in language testing in a way that is easy to understand. In the Japanese context, this book is highly recommended for university faculty members involved in obtaining assessment literacy, teachers who want to validate their exploratory teaching and testing, or applied linguistics students new to the language testing field. The book is divided into four main sections. The first provides an overview of the principles of language testing. The next contains short extracts from the testing literature with questions which stimulate further thinking. Section 3 is a list of references with brief annotations and Section 4 a glossary of referenced testing terms.

Understanding Second Language Acquisition Rod Ellis.2015 The core foundations of applied linguistics have long been located in exploring language as it is used in the world and in finding solutions to language-based problems. Modern applied linguistics is interdisciplinary and wide-ranging, being informed by research spanning psycholinguistics, sociolinguistics, education, corpus linguistics, cognitive linguistics, and other areas of the cognitive, learning, and information sciences. The goal of the OUP Applied Linguistics Series is to influence the quality of language education through publishing and disseminating relevant scholarship and research.

Usage-Based Perspectives on Second Language Learning Teresa Cadierno, Søren Wind Eskildsen.2015-10-16 This edited volume brings together perspectives that find mutual kinship in a view of language as an embodied, semiotic, symbolic tool used for communicative and interactional purposes and an understanding of language use as the preeminent condition for language learning – perspectives that we conjoin under the umbrella term of usage based perspectives.

Understanding Second Language Acquisition, Second Edition Lourdes Ortega.2016-01-01 Second Language Acquisition is a theoretical, experimental and fast-paced field of study which looks at, and seeks to understand, how native speakers of one language learn to speak another language fluently. *Understanding Second Language Acquisition* provides an approachable but authoritative introduction to this area of linguistics. The essentials are clearly explained with pointers for further study. The author focuses on the key notions involved rather than arguing for a particular theoretical position. This second edition is fully up-to-date and includes the latest empirical developments and theoretical refinements in second language acquisition, such as new sections on age and learner-language development. New features also include end-of-chapter questions for revision and

further discussion, and a full glossary of terms. The extensive online resources have been updated and expanded to include more powerpoint slides for lecturers and reading suggestions for students, and are available at www.routledge.com/cw/ortega. This is the ideal book for anyone looking for an accessible but comprehensive introduction to second language learning.

Contemporary Approaches to Second Language Acquisition María del Pilar García Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián. 2013-02-19 Second language acquisition (SLA) is a field of inquiry that has increased in importance since the 1960s. Currently, researchers adopt multiple perspectives in the analysis of learner language, all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings. The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA, the research carried out within them and, wherever appropriate, the implications and/or applications for theory, research and pedagogy that might derive from the available empirical evidence. The book is intended for SLA researchers as well as for graduate (MA, Ph.D.) students in SLA research, applied linguistics and linguistics, as the different chapters will be a guide in their research within the approaches presented. The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it.

Practice in a Second Language Robert DeKeyser. 2007-03-12 This volume focuses on 'practice' from a theoretical perspective and includes implications for the classroom.

Alternative Approaches to Second Language Acquisition Dwight Atkinson. 2011-03-01 This volume presents six alternative approaches to studying second language acquisition - 'alternative' in the sense that they contrast with and/or complement the cognitivism pervading the field. All six approaches - sociocultural, complexity theory, conversation-analytic, identity, language socialization, and sociocognitive - are described according to the same set of six headings, allowing for direct comparison across approaches. Each chapter is authored by leading advocates for the approach described: James Lantolf for the sociocultural approach; Diane Larsen-Freeman for the complexity theory approach; Gabriele Kasper and Johannes Wagner for the conversation-analytic approach; Bonny Norton and Carolyn McKinney for the identity approach; Patricia Duff and Steven Talmy for the language socialization approach and Dwight Atkinson for the sociocognitive approach. Introductory and commentary chapters round out this volume. The editor's introduction describes the significance of alternative approaches to SLA studies given its strongly cognitivist orientation. Lourdes Ortega's commentary considers the six approaches from an 'enlightened traditional' perspective on SLA studies - a viewpoint which is cognitivist in orientation but broad enough to give serious and balanced consideration to alternative approaches. This volume is essential reading in the field of second language acquisition.

Interlanguage ZhaoHong Han, Elaine Tarone. 2014-04-15 Few works in the field of second language acquisition (SLA) can endure multiple reads, but Selinker's (1972) *Interlanguage* is a clear exception. Written at the inception of the field, this paper delineates a disciplinary scope; asks penetrating questions; advances daring hypotheses; and proposes a first-ever conceptual and empirical framework that continues to stimulate SLA research. Sparked by a heightened interest in this founding text on its 40th anniversary, 10 leaders in their respective fields of SLA research collectively examine extrapolations of the seminal text for the past, the present, and the future of SLA research. This book offers a rare resource for novices and experts alike in and beyond the field of SLA.

Reflections on Task-Based Language Teaching Rod Ellis. 2018-06-18 Task-based language teaching is now a well-established pedagogic approach but problematic issues remain, such as whether it is appropriate for all learners and in all instructional contexts. This book draws on the author's experience of working with teachers, together with his knowledge of relevant research and theory, to examine the key issues. It proposes flexible

ways in which tasks can be designed and implemented in the language classroom to address the problems that teachers often face with task-based language teaching. It will appeal to researchers and teachers who are interested in task-based language teaching and the practical and theoretical issues involved. It will also be of interest to students and researchers working in the areas of applied linguistics, TESOL and second language acquisition.

Linguistic Relativity in SLA Zhaohong Han, Teresa Cadierno. 2010 Crosslinguistic influence is an established area of second language research, and as such, it has been subject to extensive scrutiny. Although the field has come a long way in understanding its general character, many issues still remain a conundrum, for example, why does transfer appear selective, and why does transfer never seem to go away for certain linguistic elements? Unlike most existing studies, which have focused on transfer at the surface form level, the present volume examines the relationship between thought and language, in particular thought as shaped by first language development and use, and its interaction with second language use. The chapters in this collection conceptually explore and empirically investigate the relevance of Slobin's thinking-for-speaking hypothesis to adult second language acquisition, offering compelling and enlightening evidence of the fundamental nature of crosslinguistic influence in adult second language acquisition. This is a landmark publication - the first to concertedly address the implications for SLA of Slobin's thinking-for-speaking hypothesis. Do processes of conceptualisation that L1s predispose speakers to affect their L2 production, and if so in what ways? Can we 're-think' for L2 speaking, and what cognitive abilities enable this? The research issues this book raises are fundamentally important for SLA theory and pedagogy alike. Peter Robinson, Professor of Linguistics and SLA, Aoyama Gakuin University, Tokyo, Japan Language affects how we think. Slobin's (1996) thinking-for-speaking hypothesis concerns the ways that native language directs speakers' attention to pick those characteristics of events that are readily encodable therein. In this impressive collection, Han and Cadierno marshal strong support for effects of native language upon second language use, i.e. for 'rethinking-for-speaking'. A must-read for anybody interested in linguistic relativity and transfer in SLA. Nick Ellis, Professor of Psychology, University of Michigan, USA

Research Methods for Understanding Child Second Language Development Yuko Goto Butler, Becky H. Huang. 2022-09-15 Butler and Huang's book is one of the first to focus on second language (L2) development research methods and techniques specifically targeted at children of primary and pre-primary years. The last decade has seen a growing number of L2 studies of children aged 4-12, a demographic with special developmental characteristics that confound research methods designed for studying adults. Written by experts from a variety of disciplines, this book covers major research methods and techniques in existing L2 development research, including observations, surveys, interviews, introspective methods, speech production methods, receptive methods, eye tracking, and brain imaging, as well as research methods specifically designed for L2 children with special educational needs. The book also discusses various age-related considerations and challenges if they are employed to young L2 learners. This will be essential reading for SLA, child development, and TESOL researchers, and students in these courses will benefit particularly from pedagogical material such as further readings and discussion questions.

Linguistic Complexity Bernd Kortmann, Benedikt Szmrecsanyi. 2012-05-29 Linguistic complexity is one of the currently most hotly debated notions in linguistics. The essays in this volume reflect the intricacies of thinking about the complexity of languages and language varieties (here: of English) in three major contact-related fields of (and schools in) linguistics: creolistics, indigenization and nativization studies (i.e. in the realm of English linguistics, the "World Englishes" community), and Second Language Acquisition (SLA) research: How can we adequately assess linguistic complexity? Should we be interested in absolute complexity or rather relative complexity? What is the extent to which language contact and/or (adult) language learning might lead to morphosyntactic simplification? The authors in this volume are all leading linguists in different areas of

specialization, and they were asked to elaborate on those facets of linguistic complexity which are most relevant in their area of specialization, and/or which strike them as being most intriguing. The result is a collection of papers that is unique in bringing together leading representatives of three often disjunct fields of linguistic scholarship in which linguistic complexity is seen as a dynamic and inherently variable parameter.

Complexity Theory and Language Development Lourdes Ortega, ZhaoHong Han. 2017-11-15 This volume is both a state-of-the-art display of current thinking on second language development as a complex system. It is also a tribute to Diane Larsen-Freeman for her decades of intellectual leadership in the academic disciplines of applied linguistics and second language acquisition. The chapters therein range from theoretical expositions to methodological analyses, pedagogical proposals, and conceptual frameworks for future research. In a balanced and in-depth manner, the authors provide a comprehensive and interdisciplinary understanding of second language development, with a wealth of insights that promise to break the status-quo of current research and take it to exciting new territory. The book will appeal to both seasoned and novice researchers in applied linguistics, second language acquisition, bilingualism, cognitive psychology, and education, as well as to practitioners in second or foreign language teaching of any language.

Synthesizing Research on Language Learning and Teaching John Michael Norris, Lourdes Ortega. 2006-01-01 This volume presents the first collection of work on research synthesis in applied linguistics. It introduces readers to a cutting-edge approach for reviewing and summarizing exactly what accumulated research has to say about theoretical and practical subjects. John Norris and Lourdes Ortega first elucidate the value and practice of synthesis, and they challenge all members of the research community to adopt a [synthetic ethic]. The book then features seven empirical syntheses, each modeling rigorous synthetic practice in definitively reviewing the state of knowledge and research quality in important domains. Included are five meta-analyses on: Universal Grammar; Task-Based Interaction; Corrective Feedback; Instructed Pragmatics Development; and Reading Strategy Training. Also included are a qualitative meta-synthesis on Effective Teaching for English Language Learners, and a historiographical synthesis of Proficiency Assessment practices. Rounding out the collection are commentaries by two renowned experts in language learning and teaching research: Nick Ellis and Craig Chaudron.

Theories in Second Language Acquisition Bill VanPatten, Gregory D. Keating, Stefanie Wulff. 2020-02-24 This third edition of the best-selling *Theories in Second Language Acquisition* surveys the major theories currently used in second language acquisition (SLA) research, serving as an ideal introductory text for undergraduate and graduate students in SLA and language teaching. Designed to provide a consistent and coherent presentation for those seeking a basic understanding of the theories that underlie contemporary SLA research, each chapter focuses on a single theory. Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. New to this edition is a chapter addressing the relationship between theories and L2 teaching, as well as refreshed coverage of all theories throughout the book. A key work in the study of second language acquisition, this volume will be useful to students of linguistics, language and language teaching, and to researchers as a guide to theoretical work outside their respective domains.

Quantitative Methods for Second Language Research Carsten Roever, Aek Phakiti. 2017-07-20 *Quantitative Methods for Second Language Research* introduces approaches to and techniques for quantitative data analysis in second language research, with a primary focus on second language learning and assessment research. It takes a conceptual, problem-solving approach by emphasizing the understanding of statistical theory and its application to research problems while paying less attention to the mathematical side of statistical analysis. The text discusses a range of common statistical analysis techniques, presented and illustrated through applications of the IBM Statistical Package for Social Sciences (SPSS)

program. These include tools for descriptive analysis (e.g., means and percentages) as well as inferential analysis (e.g., correlational analysis, t-tests, and analysis of variance [ANOVA]). The text provides conceptual explanations of quantitative methods through the use of examples, cases, and published studies in the field. In addition, a companion website to the book hosts slides, review exercises, and answer keys for each chapter as well as SPSS files. Practical and lucid, this book is the ideal resource for data analysis for graduate students and researchers in applied linguistics.

Key Topics in Second Language Acquisition Vivian Cook, David Singleton. 2014-04-03 This textbook offers an introductory overview of eight hotly-debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences, thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader.

Evidence-Based Second Language Pedagogy Masatoshi Sato, Shawn Loewen. 2019-05-17 Evidence-Based Second Language Pedagogy is a cutting-edge collection of empirical research conducted by top scholars focusing on instructed second language acquisition (ISLA) and offering a direct contribution to second language pedagogy by closing the gap between research and practice. Building on the conceptual, state-of-the-art chapters in *The Routledge Handbook of Instructed Second Language Acquisition* (2017), studies in this volume are organized according to the key components of ISLA: types of instruction, learning processes, learning outcomes, and learner and teacher psychology. The volume responds to pedagogical needs in different L2 teaching and learning settings by including a variety of theoretical frameworks (sociological, psychological, sociocultural, and cognitive), methodologies (qualitative and quantitative), target languages (English, Spanish, and Mandarin), modes of instruction (face-to-face and computer-mediated), targets of instruction (speaking, writing, listening, motivation, and professional development), and instructional settings (second language, foreign language, and heritage language). A novel synthesis of research in the rapidly growing field of ISLA that also covers effective research-based teaching strategies, Evidence-Based Second Language Pedagogy is the ideal resource for researchers, practitioners, and graduate students in SLA, applied linguistics, and TESOL.

The Handbook of Spanish Second Language Acquisition Kimberly L. Geeslin. 2018-08-14 Bringing together a comprehensive collection of newly-commissioned articles, this Handbook covers the most recent developments across a range of sub-fields relevant to the study of second language Spanish. Provides a unique and much-needed collection of new research in this subject, compiled and written by experts in the field Offers a critical account of the most current, ground-breaking developments across key fields, each of which has seen innovative empirical research in the past decade Covers a broad range of issues including current theoretical approaches, alongside a variety of entries within such areas as the sound system, morphosyntax, individual and social factors, and instructed language learning Presents a variety of methodological approaches spanning the active areas of research in language acquisition

Crosscurrents in Second Language Acquisition and Linguistic Theories Thom Huebner, Charles A. Ferguson. 1991-01-01 The term [crosscurrent] is defined as [a current flowing counter to another.] This volume represents crosscurrents in second language acquisition and linguistic theory in several respects. First, although the main currents running between linguistics and second language acquisition have traditionally flowed from theory to application, equally important contributions can be made in the other direction as well. Second, although there is a strong tendency in the field of linguistics to see [theorists] working within formal models of syntax, SLA research can contribute to linguistic theory more broadly defined to include various functional as well as formal models of syntax, theories of phonology, variationist theories of sociolinguists, etc.

These assumptions formed the basis for a conference held at Stanford University during the Linguistic Institute there in the summer of 1987. The conference was organized to update the relation between second language acquisition and linguistic theory. This book contains a selection of (mostly revised and updated) papers of this conference and two newly written papers.

Measuring L2 Proficiency Pascale Leclercq, Amanda Edmonds, Heather Hilton. 2014-07-01 The creation of the Common European Framework of Reference for Languages (CEFR) has given rise to interest and debate among policy makers, testers, teachers and researchers alike in the reliability and feasibility of the assessment of second language (L2) proficiency. This volume brings together concrete ideas on identifying and measuring L2 proficiency from different branches of SLA research (psycholinguistic, sociolinguistic, corpus-based, applied linguistics) to contribute to a deeper understanding of what it means to be proficient in an L2. The chapters introduce a wide range of tools that are innovative, reliable, and easy-to-use for the evaluation of learners' language level with respect to both productive and receptive skills and provide a variety of answers to the question of how to assess L2 proficiency in a valid, reliable and practical manner. The collection will therefore inspire language teachers, teacher trainers and language testing specialists and help them adapt their assessment practices when necessary, and will also be a valuable resource for postgraduate students and researchers.

Understanding Second Language Acquisition Lourdes Ortega. 2014-02-04 Whether we grow up with one, two, or several languages during our early years of life, many of us will learn a second, foreign, or heritage language in later years. The field of Second language acquisition (SLA, for short) investigates the human capacity to learn additional languages in late childhood, adolescence, or adulthood, after the first language --in the case of monolinguals-- or languages --in the case of bilinguals-- have already been acquired. *Understanding Second Language Acquisition* offers a wide-encompassing survey of this burgeoning field, its accumulated findings and proposed theories, its developed research paradigms, and its pending questions for the future. The book zooms in and out of universal, individual, and social forces, in each case evaluating the research findings that have been generated across diverse naturalistic and formal contexts for second language acquisition. It assumes no background in SLA and provides helpful chapter-by-chapter summaries and suggestions for further reading. Ideal as a textbook for students of applied linguistics, foreign language education, TESOL, and education, it is also recommended for students of linguistics, developmental psycholinguistics, psychology, and cognitive science. Supporting resources for tutors are available free at www.routledge.com/ortega.

Case Study Research in Applied Linguistics Patricia Duff. 2012-09-10 Case studies of individual language learners are a valuable means of illustrating issues connected with learning, using, and in some cases, losing another language. Yet, even though increasing numbers of graduate students and scholars conduct research using case studies or mix quantitative and qualitative methods, there are no dedicated applied linguistics research methods texts that guide one through the case study process. This book fills that gap. The volume provides an overview of case study methodology and examples of published case studies in applied linguistics, without attempting to be a comprehensive survey of the innumerable case studies that exist. The case studies presented here involve teachers and learners of English and various other languages in North America and other parts of the world. Advice is also given about how to conduct and publish case studies. *Case Study Research in Applied Linguistics* is designed for students, both undergraduate and graduate, as well as other scholars seeking to understand case study methods and their applications in research on language learners and language users in a variety of contexts. Applied linguists working in other subfields will find the volume useful in their own research and in their supervision and evaluation of others' case studies.

Theory Construction in Second Language Acquisition Geoff Jordan. 2004-02-04 Recently, many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist, scientific endeavour. The resulting epistemological arguments, plus

problems of theory proliferation, contradicting theories, and theory domain, hinder progress towards a unified theory of SLA. Theory Construction in SLA addresses these problems by returning to first principles; it asks whether there is such a thing as reliable knowledge, what is special about scientific method, and how we can best explain SLA. It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA. Part One explores the central issues in the philosophy of science, defends rationality against relativists, and offers Guidelines for theory assessment. Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines.

The Usage-based Study of Language Learning and Multilingualism Lourdes Ortega, Andrea E. Tyler, Hae In Park, Mariko Uno. 2016-05-16 When humans learn languages, are they also learning how to create shared meaning? In *The Usage-based Study of Language Learning and Multilingualism*, a cadre of international experts say yes and offer cutting-edge research in usage-based linguistics to explore how language acquisition, in particular multilingual language acquisition, works. Each chapter presents an original study that supports the view that language learning is initiated through local and meaningful communication with others. Over an accumulated history of such usage, people gradually create more abstract, interactive schematic representations, or a mental grammar. This process of acquiring language is the same for infants and adults and across varied contexts, such as the family, the classroom, the laboratory, a hospital, or a public encounter. Employing diverse methodologies to study this process, the contributors here work with target languages, including Cantonese, English, French, French Sign Language, German, Hebrew, Malay, Mandarin, Spanish, and Swedish, and offer a much-needed exploration of this growing area of linguistic research.
