Dynamics of Learning in Neanderthals and Modern Humans Volume 1 Takeru Akazawa, Yoshihiro Nishiaki, Kenichi Aoki.2013-12-16 This volume presents the first of two proceedings from the International Conference on the Replacement of Neanderthals by Modern Humans, which took place in Tokyo in November 2012. Focussing on a highly innovative working hypothesis called the 'learning hypothesis', which attempts to explain the replacement as a result of differences in the learning abilities of these two hominid populations, the conference served as the latest multidisciplinary discussion forum on this intriguing Palaeoanthropological issue. The present volume reports on outcomes of the conference in three major sections. Part 1 provides an archaeological overview of the processes of replacement/assimilation of Neanderthals by modern humans. Part 2 consists of archaeological and ethnographic case studies exploring evidence of learning behaviours in prehistoric and modern hunter-gatherer societies. Part 3 presents a collection of papers that directly contributes to the definition, validation and testing of the learning hypothesis

in terms of population biology and evolutionary theory. A total of 18 papers in this volume make available to readers unique cultural perspectives on mechanisms of the replacement/assimilation of Neanderthals by modern humans and suggested relationships between these mechanisms and different learning strategies.

Bryophyte Ecology A. Smith.1982-08-19 There has been an increasing interest in bryophyte ecology over the past 100 or so years, initially of a phytosociological nature but, additionally, in recent years, of an experimental nature as well. Early studies of bryophyte communities have led to detailed investigations into the relationships between the plants and their environment. Ecological papers, the large number of which is evidenced by the length of the bibliographies in the subsequent chapters, have appeared in numerous journals. Yet, apart from review chapters, by H. Gams and P. W. Richards in *Manual of Bryology*, edited b.; H. Verdoorn in 1932 and chapters in E. V. Watson's *Structure and Life of Bryophytes*, Prem Puri's *Bryophytes - A Broad Perspective* and D. H. S. Richardson's *The Biology of Mosses*, published in 1972,1973 and 1981 respectively, no general accounts of bryophyte ecology have been published. Although the Bryophyta is a relatively small division of plants, with between 14000 and 21000 species the interest that they have aroused is out of all proportion to the size either of the plants or of the division. It is evident, however, that despite their relative insignificance they play an important ecological role, especially in extreme environments and, in the case of bryophytes in tropical cloud forests and of Sphagnum, may even be a dominant factor in the ecology of the area concerned.

The Septembers of Shiraz Dalia Sofer.2007-07-24 In the aftermath of the Iranian revolution, rare-gem dealer Isaac Amin is arrested, wrongly accused of being a spy. Terrified by his disappearance, his family must reconcile a new world of cruelty and chaos with the collapse of everything they have known. As Isaac navigates the tedium and terrors of prison, forging tenuous trusts, his wife feverishly searches for him, suspecting, all the while, that their once-trusted housekeeper has turned on them and is now acting as an informer. And as his daughter, in a childlike attempt to stop the wave of baseless arrests, engages in illicit activities, his son, sent to New York before the rise of the Ayatollahs, struggles to find happiness even as he realizes that his family may soon be forced to embark on a journey of incalculable danger. A page-turning literary debut, *The Septembers of Shiraz* simmers with questions of identity, alienation, and love, not simply for a spouse or a child, but for all the intangible sights and smells of the place we call home.

From Mesmer to Freud Adam Crabtree.1993 The discovery of magnetic sleep--an artificially induced trancelike state--in 1784 marked the beginning of the modern era of psychological healing. Psychotherapist Crabtree (Centre for Training in Psychotherapy, Toronto) tells the story of the discovery of magnetic sleep and its relationship to psychotherapy. No Passion Spent George Steiner.2010-12-09 This is an extraordinary collection of essays by one of this country's most exciting and dramatic thinkers.The essays span a considerable time. But they turn on a central, compelling theme. What is meant by reading a serious text at a time when theories of language and literature question the very possibility of any agreed meaning, and at a time when

new technologies seem likely to replace books as we have known them since Gutenberg. This question is brought to bear deliberately on the touchstone examples: the Bible, Homer, Shakespeare. Also on Kierkegaard and Kafka. The closely-meshed collection ends with a series of essays on the philosophic-theological underwriting of communication, with particular reference to what language tells us of Socrates and of Jesus. These essays by George Steiner, distinguished critic and Extraordinary Fellow at Churchill College, Cambridge, seek to conjoin the themes argued in such books as *The Death of Tragedy*, *Language and Silence*, *After Babel* and *Real Presences*. They speak of a profound, if sometimes troubled, joy.

Opera In The Flesh Sam Abel.2019-06-26 Verdi, Wagner, polymorphous perversion, Puccini, Brunnhilde, Pinkerton, and Parsifal all rub shoulders in this delightful, poetic, insightful, sexual book sprung by one man's physical response to the power and exaggeration we call opera. Sam Abel applies a light touch as he considers the topic of opera and the eroticized body: Why do audiences respond to opera in a visceral way? How does opera, like no other art form, physically move watchers? How and why does opera arouse feelings akin to sexual desire? Abel seeks the answers to these questions by examining homoerotic desire, the phenomenon of the castrati, operatic cross-dressing, and opera as presented through the media. In this deeply personal book, Abel writes, 'These pages map my current struggles to pin down my passion for opera, my intense admiration for its aesthetic forms and beauties, but much more they express my astonishment at how opera makes me lose myself, how it consumes me.' In so doing, Abel uncovers what until now, through dry musicology and gossipy history, has been left behind a wall of silence: the physical and erotic nature of opera. Although Abel can speak with certainty only about his own response to opera, he provides

readers with a language and a resonance with which to understand their own experiences. Ultimately, *Opera in the Flesh* celebrates the power of opera to move audiences as no other book has done. It is indeed a treasure of scholarship, passion, and poetry for everyone with even a passing interest in this fascinating art form.

Symbols Raymond Firth.2011 This book first published in 1973 offers a broad survey of the study of symbolic ideas and behaviour. The study of symbolism is popular nowadays and anthropologists have made substantial contributions to it. Raymond Firth has long been internationally known for his field research in the Solomons and Malaysia, and for his theoretical work on kinship, economics and religion. Here from a new angle, he has produced a broad survey of the study of symbolic ideas and behaviour. Professor Firth examines definitions of symbol. He traces the history of scientific inquiry into the symbolism of religious cults, mythology and dreams back into the eighteenth century. He compares some modern approaches to symbolism in art, literature and philosophy with those in social anthropology. He then cites examples in anthropological treatment of symbolic material from cultures of varying sophistication. Finally he offers dispassionate analyses of symbols used in contemporary Western situations - from hair-styles to the use and abuse of national flags; from cults of Black Jesus to the Eucharistic rite. In all this Professor Firth combines social and political topicality with a scholarly and provocative theoretical inquiry.

Magic in the Roman World Naomi Janowitz.2002-09-11 Using in-depth examples of 'magical' practice such as exorcisms, love rites, alchemy and the transformation of humans into divine beings, this lively volume demonstrates that the word 'magic' was used widely in late antique texts as part of polemics against enemies and sometimes merely as a term for other people's rituals. Naomi Janowitz shows that 'magical' activities were integral to late antique religious practice, and that they must be understood from the perspective of those who employed them.
