Whatever the Weather Steve Parker, Jen Metcalf. 2021-09-14
Weather (working title) explains how weather works. Why is it raining? Where does the fog come from? What happens in a thunderstorm? How does geography affect the weather? The book features fun facts, trivia, and anecdotes, e.g. where did El Niño get its name from or how you can tell the temperature by a cricket's chirp. It covers questions like how does forecasting work or what instruments scientists use. It shows a weather station and discovers wind from sand storms, hurricanes to thunderstorms to explaining clouds and cloud formations, to the ice sheets at the ends of the world

The Plant Stem Fritz H. Schweingruber, Annett Börner. 2018-06-13
This unique and attractive open access textbook combines the beauty of macroscopic pictures of plant stems with the corresponding colorfully stained images of anatomical microstructures. In contrast to most botanical textbooks, it presents all the stem characteristics as photographs and shows the microscopic reality. The amount of text is reduced to a minimum, and the scientific information is highlighted with short legends and labeled photographs, allowing readers to focus on the pictures to easily understand how the anatomical structures relate to genetic, ecological, decomposition and technical

influences. It includes a chapter devoted to simple anatomical preparation techniques, and further chapters showing the cell content, cell walls, meristematic tissues and stem structures of all major taxonomic units and morphological growth forms in various ecological and climatic regions from subarctic to equatorial latitudes, as well as structures of fossil, subfossil and technically altered wood. This textbook appeals to students and researchers in the fields of plant anatomy, taxonomy, ecology, dendrochronology, history, plant pathology, and evolutionary biology as well as to technologists.

The Compatriots Andrei Soldatov, Irina Borogan. 2019-10-08 The authors of *The Red Web* examine the shifting role of Russian expatriates throughout history, and their complicated, unbreakable relationship with the mother country--be it antagonistic or far too chummy. The history of Russian espionage is soaked in blood, from a spontaneous pistol shot that killed a secret policeman in Romania in 1924 to the attempt to poison an exiled KGB colonel in Salisbury, England, in 2017. Russian émigrés have found themselves continually at the center of the mayhem. Russians began leaving the country in big numbers in the late nineteenth century, fleeing pogroms, tsarist secret police persecution, and the Revolution, then Stalin and the KGB--and creating the third-largest diaspora in the world. The exodus created a rare opportunity for the Kremlin. Moscow's masters and spymasters fostered networks of spies, many of whom were emigrants driven from Russia. By the 1930s and 1940s, dozens of spies were in New York City gathering information for Moscow. But the story did not end with the collapse of the Soviet Union. Some émigrés have turned into assets of the resurgent Russian nationalist state, while others have taken up the dissident challenge once more--at their personal peril. From Trotsky to Litvinenko, *The Compatriots* is the gripping history of Russian score-settling around the world.

Meine Grosseltern Mats Staub. 2010 Memories of grandparents

are above all childhood memories of old people. Yet what do we know of the time when our grandparents were young? They are our most personal link to a past that we only know from films and books. But how did our grandparents live and love back then? What exactly remains from a life? In his long-term project 'Meine Grosseltern Erinnerungsbüro (My Grandparents/Memory Bureau)', Mats Staub pursues these questions by speaking with grandchildren and presenting their memories in a site-specific installation. This project has evolved into a continually growing international archive of subjective histories accompanied by a collection of photographs showing grandparents when they were young. The photographs include souvenir pictures taken by amateur photographers and ritualized photography aimed at capturing surroundings, people and objects in a certain moment.

The New Wild: Life in the Abandoned Lands Christopher Thomson.2018-04-16 The New Wild: Vita nelle terre abbandonate, un libro-film in tre lingue - Nuovi e sorprendenti paesaggi emergono in tutta Europa mentre le popolazioni rurali invecchiano e scivolano a valle. Dove i terreni agricoli rimangono incolti si reinsedia una natura autodeterminata: crescono alberi dove un tempo c'erano campi, e i selvatici vagano liberi tra i ruderi. Distanti dall'attrazione dei nostri centri economici, le regioni marginalizzate stanno assistendo all'inizio di un crollo demografico e culturale. Interi stili di vita diventano storie, le storie diventano Storia e, a mano a mano che la città si espande, i ricordi cominciano a svanire. Qualcosa però cresce dalle spaccature della rovina, e tra le fessure di più grandi cambiamenti si incrociano storie minori: da un'abbandonata valle alpina un paese ci offre, nel suo precario tentativo di sopravvivere, una serie di riflessioni sul nostro mutevole rapporto

con la campagna e con il mondo naturale tutto.

The Wood John Lewis-Stempel.2018-03-08 'BRITAIN'S FINEST LIVING NATURE WRITER' - THE TIMES A SUNDAY TIMES

BESTSELLER and BBC Radio 4 'Book of the Week' from

'indisputably, one of the best nature-writers of his generation'

(Country Life) Written in diary format, The Wood is the story of English woodlands as they change with the seasons. Lyrical and

informative, steeped in poetry and folklore, The Wood inhabits

the mind and touches the soul. For four years John Lewis-Stempel

managed Cockshutt wood, a particular wood - three and half

acres of mixed woodland in south west Herefordshire - that

stands as exemplar for all the small woods of England. John

coppiced the trees and raised cows and pigs who roamed free

there. This is the diary of the last year, by which time he had

come to know it from the bottom of its beech roots to the tip of its

oaks, and to know all the animals that lived there - the fox, the

pheasants, the wood mice, the tawny owl - and where the best

bluebells grew. For many fauna and flora, woods like Cockshutt

are the last refuge. It proves a sanctuary for John too. To read

The Wood is to be amongst its trees as the seasons change,

following an easy path until, suddenly the view is broken by a

screen of leaves, or your foot catches on a root, or a bird startles

overhead. This is a wood you will never want to leave.

Flora and Vegetation of the Czech Republic Milan Chytrý, Jiří

Danihelka, Zdeněk Kaplan, Petr Pyšek.2017-11-10 This book

provides basic information on the botanical diversity in the Czech Republic and relates the patterns in flora and vegetation to environmental factors, biogeographical history and human impact. Focusing on vascular plants, bryophytes and lichens, it summarizes the data on taxonomic diversity and provides details of relict, endemic, rare, alien and other biogeographically important species. Main vegetation types are characterized in terms of their structure, distribution, ecology and dynamics, emphasizing the long-term vegetation changes since the late Pleistocene, historical impact of humans on vegetation and current changes in vegetation including the impact of alien species. Special attention is paid to the conservation of threatened plant species and their habitats and ecological restoration. An account of the history of botanical research in this country is also provided. The book is illustrated with numerous maps, graphs and photographs of plant species and communities. The book is an essential reference for any biogeographer, botanist and plant ecologist who is working in Central Europe or is searching for both general and more specific information on this part of the world.

TRANSPOSITIONES 2023 Vol. 2, Issue 2: Netzwerke des Lebendigen: Multispecies agencies und Formexperimente in hybriden Genres Gabriele Dürbeck,Urte Stobbe,Evi Zemanek.2023-10-09 Ausgehend von einer posthumanistischen Perspektive untersucht das Themenheft literarische, mediale und performative Darstellungsweisen von Netzwerken des Lebendigen. Die Annahme einer Wirkmacht von Pflanzen, Pilzen, Flechten und Tieren in ihren transkorporalen Wechselwirkungen mit den Menschen provoziert sowohl neu zu denkende artenübergreifende Beziehungsgeflechte als auch ästhetische Formexperimente. Indem die Beiträge miteinander verflochtene,

responsive und andere zwischenartliche Verbindungen untersuchen, stellen sie erstens die bisherigen anthropozentrischen Hierarchisierungen in Frage. Zweitens zeigen sie, wie die vielfältigen Formexperimente in Literatur, Fotografie, Video, Film und Performance die Grenzen herkömmlicher Genres erweitern und westliche Kategorien unterlaufen. Drittens werden neue Übergänge zwischen Kunst, Forschung und Vermittlung erprobt. Und zuletzt beleuchten die Beiträge, wie die Aufmerksamkeit auf naturkulturelle Wechselwirkungen und Metamorphosen zu einer Transformation des Subjekts führt und die Kreativität beflügelt.

Bruno Pelassy Bruno Pelassy, Musée d'art moderne et d'art contemporain (Nice, France). 2003 Artiste autodidacte issu d'une formation de styliste, Bruno Pelassy commence vers 1990, à confectionner des bijoux, puis d'impossibles parures entrelacées de perles de verre et de cristal, exposées dans des reliquaires. Il reprend ensuite ce travail pour le compte de la haute couture et réalise une collection de bijoux et d'accessoires. Dès 1994, il s'intéresse aux mécanismes électroniques distribués par l'industrie du jouet pour constituer un étrange univers animé, peuplé de Bestioles dérangeantes. Puis ce sont des Créatures, qui à partir de 2001 s'exhibent en aquarium, gracieuses formes organiques constituées de soie, perles et silicone.

It has been tested on students, unfamiliar with neural networks, who were able to pick up enough details to successfully complete their masters or final year undergraduate projects. The text also presents a comprehensive treatment of a class of neural networks called common bandwidth spherical basis function NNs, including the probabilistic NN, the modified probabilistic NN, and the general regression NN.

Enlightening the World Philipp Blom. 2005-06-11 During the sixteen years it took to write, compile, and produce all twenty-seven volumes, the writers had to defy authorities and face exile, jail, and censorship, as well as numerous internal falling-outs and philosophical differences. Encyclopedie's editors and contributors daily skirted danger based solely on their belief systems.

Compiling this collection made them - the Encyclopedists, as they came to be called - the most feared men in all of Versailles and the intellectual leaders of the French Revolution. In *Enlightening the World*, novelist and historian Philipp Blom breathes new life into the sixteen-year struggle to create the Encyclopedie, by portraying the men who wrote it, the powerful forces that tried to suppress it, and the tremendous impact it had on the world.-- BOOK JACKET.

Integrative Economic Ethics Peter Ulrich. 2010-09-09 Integrative Economic Ethics is a highly original work that progresses through a series of rational and philosophical arguments to address foundational issues concerning the relationship between ethics and the market economy. Rather than accepting market competition as a driver of ethical behaviour, the

author shows that modern economies need to develop ethical principles that guide market competition, thus moving business ethics into the realms of political theory and civic rationality. This book was in its fourth edition in the original German in 2008, this English translation of Peter Ulrich's development of a fresh integrative approach to economic ethics will be of interest to all scholars and advanced students of business ethics, economics, and social and political philosophy.

Overcoming School Refusal Joanne Garfi.2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long

term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

A Vision of Light Judith Merkle Riley.2006-05-23 The first book in the series, this bestselling novel introduces Margaret of Ashbury, a fourteenth-century Englishwoman with mystical abilities Margaret of Ashbury wants to write her life story. However, like most women in fourteenth-century England, she is illiterate. Three clerics contemptuously decline to be Margaret's scribe, and only the threat of starvation persuades Brother Gregory, a Carthusian friar with a mysterious past, to take on the task. As she narrates her life, we discover a woman of startling resourcefulness. Married off at the age of fourteen to a merchant reputed to be the Devil himself, Margaret was left for dead during the Black Plague. Incredibly, she survived, was apprenticed to an herbalist, and became a midwife. But most astonishing of all, Margaret has experienced a Mystic Union—a Vision of Light that endows her with the miraculous gift of healing. Because of this ability, Margaret has become suddenly different—to her tradition-bound parents, to the bishop's court that tries her for heresy, and ultimately to the man who falls in love with her.

Cacti of the Trans-Pecos & Adjacent Areas A. Michael

Powell,James F. Weedon.2004 A Southwest Book of the Year * 2005 Southwest Book Award [A] monumental study. --Review of Texas Books A reliable and handy general reference for those with an interest in cacti inside and outside this region. Recommended. --Choice These authors have . . . provided the world with the much needed scientific clarification on this family of succulent plants that humans have loved and hated for thousands of years. --Sida Information: Wow! . . . For both lay readers and for researchers looking for lots of data about the cacti of this rich flora, this book offers fascinating details

presented in a very readable fashion. --Cactus and Succulents Journal This will be the standard reference for decades to come.-- Southwest Books of the Year Of the 132 species and varieties of cacti in Texas, about 104 of them occur in the fifteen counties of the Trans-Pecos region. This volume includes full descriptions of those many genera, species, and varieties of cacti, with sixty-four maps showing the distribution of each species in the region. The descriptions follow the latest findings of cactus researchers worldwide and include scientific names; common names; identifying characters based on vegetative habit, flowers, fruit, and seeds; identification of flowerless specimens; and phenology and biosystematics. The introduction--full of details about the biology and morphology of the family Cactaceae, the uses of cacti, and the horticulture and conservation of cacti--is an important reference for general readers. More than three hundred beautiful full-color photographs of the cacti in flower and in fruit, all cross-referenced to their description in the text, highlight the book. A glossary of cactus terms, an exhaustive list of literature, and a thorough index complete the book.

Atlas of Stem Anatomy in Herbs, Shrubs and Trees Fritz Hans Schweingruber, Annett Börner, Ernst-Detlef Schulze.2012-09-07 This work, published in two volumes, contains descriptions of the wood and bark anatomies of 3000 dicotyledonous plants of 120 families, highlighting the anatomical and phylogenetic diversity of dicotyledonous plants of the Northern Hemisphere. The first volume principally treats families of the Early Angiosperms, Eudicots, Core Eudicots and Rosids, while the second concentrates on the Asterids. Presented in Volume 2 are microsections of the xylem and phloem of herbs, shrubs and trees of 1000 species and ca. 35 families of various life forms of the temperate zone along altitudinal gradients from the lowland at

the Mediterranean coast to the alpine zone in Western Europe. Special attention is given to the very diverse family of Asteraceae. The global perspective of the findings is underlined by the analysis of 400 species from the Caucasus, the Rocky Mountains and Andes, the subtropical zone on the Canary Islands, the arid zones in the Sahara, in Eurasia, Arabia and Southwest North America, New Zealand and the boreal and arctic zones in Eurasia and Canada. The presence of annual rings in all life forms demonstrates that herbs and dwarf shrubs are an excellent tool for the reconstruction of annual biomass production and the interannual dynamic of plant associations. The common principle of the anatomical expression of secondary growth is a key factor in understanding evolution and adaptation processes in all life forms, from the 3 cm tall crepide pigmea (*Crepis pygmaea*) in the alpine zone to the 40 m tall ash (*Fraxinus excelsior*) in Central European riparian forests. The study opens vast fields of research for dendrochronology, wood anatomy, taxonomy and ecology.
