Community Punishment Gwen Robinson,Fergus McNeill.2015-10-16 In *Community Punishment: European perspectives*, the authors place punishment in the community under the spotlight by exploring the origins, evolution and adaptations of supervision in 11 European jurisdictions. For most people, punishment in the criminal justice system is synonymous with imprisonment. Yet, both in Europe and in the USA, the numbers of people under some form of penal supervision in the community far exceeds the numbers in prison, and many prisoners are released under supervision. Written and edited by leading scholars in the field, this collection advances the sociology of punishment by illuminating the neglected but crucial phenomenon of 'mass supervision'. As well as putting criminological and penological theories to the test in an examination of their ability to explain the evolution of punishment beyond the prison, and across diverse states, the contributors to this volume also assess the appropriateness of the term 'community punishment' in different parts of Europe. Engaging in a serious exploration of common themes and differences in the jurisdictions included in the collection, the authors go on to examine how 'community punishment' came into being in their jurisdiction and how its institutional forms and practices have been legitimated and re-legitimated in response to shifting social, cultural and political contexts. This book is essential reading for academics and students involved in the study of both community punishment and comparative penology, but will also be of great interest to criminal justice policymakers, managers and practitioners.

Analysis and Simulation of a New Code Tracking Loop for GPS Multipath Mitigation Mark C. Laxton.1996-12-01 This thesis proposes a new direct sequence spread spectrum (DS/SS) code phase tracking loop which mitigates the effects of multipath interference on code phase tracking error; such errors can translate to significant range measurement errors in DS/SS ranging systems such as Global Positioning System (GPS). The new code tracking loop, called the modified RAKE delay lock loop (MRDLL), uses maximum likelihood (ML) signal parameter estimation to determine the amplitude, carrier phase, and relative propagation delay of both a direct path and a reflected signal; a multiple correlator code phase tracking loop then exploits these ML signal estimates to remove the tracking error introduced by the reflection. A preliminary analysis showed that the MRDLL's linear tracking region varied with the reflected signal parameters; therefore, an adaptive loop controller (ALC) was introduced to allow the loop designer to fix dynamic specifications such as loop natural frequency. Analysis and computer simulations demonstrated that, when multipath was present, the MRDLL exhibited a significantly lower steady-state code phase tracking error than that of the standard noncoherent delay lock loop (NCDLL), which is typically used in GPS receivers. In an ideal multipath-free environment, the NCDLL is still the best choice for code phase tracking. This GPS receiver design technology will benefit the entire aviation community by eliminating or reducing the dominant source of error in differential GPS-based instrument landing systems, resulting in improved ILS safety, reliability, and integrity. In relative GPS applications, such as precision

guided munitions, lethality is improved via elimination of multipath contribution to targeting error. In all GPS applications, the (no longer dominant) error contribution of multipath can be eliminated, yielding enhanced performance.

Ask a Manager Alison Green. 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Building a Dedicated GSM GPS Module Tracking System for Fleet Management Franjieh El Khoury, Antoine Zghelb. 2018-02-14 This book shows how to build an INFelecPHY GPS Unit (IEP-GPS) tracking system for fleet management that is based on 3G and GPRS modules. This model should provide reliability since it deals with several protocols: 1) HTTP and HTTPS to navigate, download and upload in real time the information to a web server, 2) FTTP and FTTPS to handle in a non-real time the files to the web application, and 3) SMTP and POP3 to send and receive email directly from the unit in case of any alert. Similar to a mobile device, but without screen for display, it is multifunctional because it links to a GPRS module, a camera, a speaker, headphone, a keypad and screen.

Innovative Web Applications for Analyzing Traffic Operations Natasha Petrovska,Aleksandar Stevanovic,Borko Furht.2016-06-17 In response to the need to improve road traffic operation, researchers implement advanced technologies and integration of systems and data, and develop state-of-the-art applications to assist traffic engineers. This SpringerBrief introduces three novel Web applications which can be an exceptional resource and a good visualization tool for traffic operators, managers, and analysts to monitor the congestion, and analyze incidents and signal performance measures. The applications offer more detailed analysis providing users with insights from different levels and perspectives. The benefit of providing these automated and interactive visualization tools is more efficient estimation of the local transport networks' performance, thus facilitating the decision making process in case of emergency events.

Advances in Food and Beverage Labelling Paul Berryman.2014-12-03 Advances in Food and Beverage Labelling reviews recent advances in labelling research and regulation, covering issues such as nutrition and hazard information, traceability, health claims and standardisation, as well as new labelling technologies and consumer issues. The EU Food Information Regulation will come into force in December 2014 and the book is designed to provide timely and useful information to manufacturers in this area, as well as on a global scale. Part one covers the different types of information that can, or must be present on a food label. Part two looks at recent developments in food labelling technology, regulations and enforcement. Brings together contributions from industry, trade bodies, government and academia. Offers timely advice for those concerned with the legal framework for food labelling, with information about the EU Food Information Regulation, as well as the US market. Reviews issues surrounding nutrition and health claims and GM, ethical and environmental labelling.

Aerospace Navigation Systems Alexander V. Nebylov,Joseph Watson.2016-05-24 Compiled by leading authorities, Aerospace Navigation Systems is a compendium of chapters that present modern aircraft and spacecraft navigation methods based on up-to-date inertial, satellite, map matching and other guidance techniques. Ranging from the practical to the theoretical, this book covers navigational applications over a wide range of aerospace vehicles including aircraft, spacecraft and drones, both remotely controlled and operating as autonomous vehicles. It provides a comprehensive background of fundamental theory, the utilisation of newly-developed techniques, incorporates the most complex and advanced types of technical innovation currently available and presents a vision for future developments. Satellite Navigation Systems (SNS), long range navigation systems, short range navigation systems and navigational displays are introduced, and many other detailed topics include Radio Navigation Systems (RNS), Inertial Navigation Systems (INS), Homing Systems, Map Matching and other correlated-extremalsystems, and both optimal and sub-optimal filtering in integrated navigation systems.

Introduction to Information Systems R. Kelly Rainer, Brad Prince. 2017-11-30 The goal of Introduction to Information Systems is to teach undergraduate business majors how to use information technology to master their current or future jobs. Students develop a working understanding of information systems and information technology and learn how to apply concepts to successfully facilitate business processes. This product demonstrates that IT is a key component of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management.

Understanding Shadows Michael Quilligan. 2013-08-29 Vague references to the 'war on terror' and the 'threat to national security' are frequently used by venal politicians to cover-up criminal associations and covert illegal activity, ranging from money-laundering, narcotics trafficking, abduction and murder to the wholesale slaughter of non-combatant civilians - glibly dismissed as 'collateral damage' in mainstream media coverage of state terror, from the Caucuses to the Middle East and the streets of European capitals, while locally, in towns and villages that never make headlines, predatory Catholic clergy and radical Islamic academics and imams abuse trust to accommodate their personal agendas of greed, lust and revenge. The issues in *Understanding Shadows* include how the overweening pride of US and European intelligence agencies contributed to the development of the 'Islamic' bomb, and the proliferation of nuclear technology; crime and extra-judicial 'punishment' in Russia and abroad under President Putin; and how the bloody and brutal end of 'democratic Islam' in Algeria has facilitated the fear and loathing which has dominated the West's security agenda since 9/11. The arrogance and political hubris of former British PM, Tony Blair, and the corrupt use of intelligence, took the UK to war in Iraq, and was a factor in the lonely death of WMD specialist, Dr David Kelly, while 'off stage' Israel continued its colonization of occupied Arab lands and upgraded its collective punishment of Gaza. There is an account of the curious journey the CIA's USSR 'dangle', Lee Harvey Oswald, made across Cold War Europe in June 1962, while the end of the apartheid regime in South Africa provided an opportunity for self-serving, power-hungry ANC politicians to 'feather their own nests' at the expense of the impoverished majority - a depressing example of a righteous liberation struggle turned sour. Meanwhile, the 'long war' continued. Operation 'Banner' was the codename given to the longest British Army deployment since 1945. In the North of Ireland, where the 36-year period of active service is referred to as the 'Troubles', clandestine military units, including the murderous Force Research Unit, waged a 'dirty war' against the Provisional IRA in particular, and the nationalist community in general. An estimated 763 British soldiers died and over 6,000 were injured during the 'Troubles'. An awareness of the 'back stories' to these issues is an important factor for the understanding of shadows.

[Enhancing Health and Wellbeing in Dementia](#) Shibley Rahman. 2017-01-19 Every person living with dementia is entitled to the highest standards of wellbeing and health and social care services. This in-depth, evidence-based book identifies how outstanding quality integrated care might be achieved, whether in residential or home-based settings. Experienced dementia researcher Dr Shibley Rahman highlights the key contemporary underpinnings of integrated care that are required for wellbeing for living with dementia, including technology, staff performance, leadership, and intelligent regulation of services. The book addresses the major challenges to promoting person-centred care, and tackles difficult conversations around spirituality, sexuality and dying well. The crucial importance of promoting physical and mental health is emphasised. Taking into account recent developments in NICE guidelines and Cochrane reviews for dementia, this book presents an opportunity for all those involved in the provision

of care for people with dementia to maintain a focus on delivering the best care possible, and to engage with the wider issues surrounding wellbeing. This book will be especially useful to commissioners following the NHS 'new models of care' vanguards.

Electronically Monitored Punishment Mike Nellis, Kristel Beyens, Dan Kaminski. 2013-05-07 Electronic monitoring (EM) is a way of supervising offenders in the community whilst they are on bail, serving a community sentence or after release from prison. Various technologies can be used, including voice verification, GPS satellite tracking and - most commonly - the use of radio frequency to monitor house arrest. It originated in the USA in the 1980s and has spread to over 30 countries since then. This book explores the development of EM in a number of countries to give some indication of the diverse ways it has been utilized and of the complex politics which surrounds its use. A techno-utopian impulse underpins the origins of EM and has remained latent in its subsequent development elsewhere in the world, despite recognition that it is less capable of effecting penal transformations than its champions have hoped. This book devotes substantive chapters to the issues of privatisation, evaluation, offender perspectives and ethics. Whilst normatively more committed to the Swedish model, the book acknowledges that this may not represent the future of EM, whose untrammelled, commercially-driven development could have very alarming consequences for criminal justice. Both utopian and dystopian hopes have been invested in EM, but research on its impact is ambivalent and fragmented, and EM remains undertheorised, empirically and ethically. This book seeks to redress this by providing academics, policy audiences and practitioners with the intellectual resources to understand and address the challenges which EM poses.

Satellite Geodesy Günter Seeber. 2003-01-01 Completely revised and updated edition. The book covers the entire field of satellite geodesy (status spring/break summer 2002). Basic chapters on reference systems, time, signal propagation, and satellite orbits are updated. All currently important observation methods are included and also all newly launched satellites of interest to geodesy. Particular emphasis is given to the current status of the Global Positioning System (GPS), which covers now about one third of the book. A new chapter on Differential GPS and active GPS reference networks is included. The GPS modernization plans, GLONASS, the forthcoming European system GALILEO, modern developments in GPS data

analysis, error modelling, precise real time methods and ambiguity resolution are dealt with in detail. New satellite laser ranging missions, new altimetry missions (e.g. TOPEX/Poseidon, ERS-1/2, GFO, JASON), and new and forthcoming gravity field missions (CHAMP, GRACE, GOCE) are also considered. The book serves as a textbook for advanced undergraduate and graduate students, as well as a reference for professionals and scientists in the field of engineering and geosciences such as geodesy, surveying, geo-information, navigation, geophysics and oceanography.

Ebooks are available as PDF, EPUB, Kindle and plain text files, though not all titles are available in all formats. The store is easily accessible via any web browser or Android device, but you'll need to create a Google Play account and register a credit card before you can download anything. Your card won't be charged, but you might find it off-putting. We understand that reading is the simplest way for human to derive and constructing meaning in order to gain a particular knowledge from a source. This tendency has been digitized when books evolve into digital media equivalent - E-Books. Consider signing up to the free Centsless Books email newsletter to receive update notices for newly free ebooks and giveaways. The newsletter is only sent out on Mondays, Wednesdays, and Fridays, so it won't spam you too much. "Buy" them like any other Google Book, except that you are buying them for no money. Note: Amazon often has the same promotions running for free eBooks, so if you prefer Kindle, search Amazon and check. If they're on sale in both the Amazon and Google Play bookstores, you could also download them both. Free-Ebooks.net is a platform for independent authors who want to avoid the traditional publishing route. You won't find Dickens and Wilde in its

archives; instead, there's a huge array of new fiction, non-fiction, and even audiobooks at your fingertips, in every genre you could wish for. There are many similar sites around, but Free-Ebooks.net is our favorite, with new books added every day. Create, print, and sell professional-quality photo books, magazines, trade books, and ebooks with Blurb! Chose from several free tools or use Adobe InDesign or ...\$this_title.Authorama is a very simple site to use. You can scroll down the list of alphabetically arranged authors on the front page, or check out the list of Latest Additions at the top. Although this program is free, you'll need to be an Amazon Prime member to take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students.
