*Principles of Macroeconomics* Robert H. Frank. 2005 Market feedback tells us that relevance of the material covered, clarity, pacing and even a bit of “show and tell” will draw students into the text and provide the motivation to learn economics. Frank and Bernanke, *Macroeconomics, Second Canadian Edition*, addresses these needs by focusing on the following: • Active learning approach:

New concepts are introduced by means of simple examples, usually numerical, which are developed step-by-step in the text. Many examples are followed by exercises that allow students to test their understanding. The worked examples (the show and tell) put the theory into practice. This system also includes exercises, similar to the worked examples, for students to practice on. Solutions to the Exercises are found at the end of each chapter. • Economics reflect the real world: Through the Economic Naturalist feature (minicases), students are encouraged to become economic naturalists who employ basic economic principles to understand and explain what they see around them. These examples show students the relevance of economics to their world. Core concepts are reinforced in the discussion of each of these minicases. Additional Economic Naturalist examples are found on the Student web page and in the Instructor's Manual. • Core Principles: A set of six core principles are integrated throughout the text to ensure that students develop a strong understanding of these core economic ideas. • Accessible text with electronic support: The Online Learning Centre provides faculty and students with a comprehensive set of resources to engage student's in the study of economics.

Mankiw accomplishes this by writing a brief text which explains economics by the rules rather than the exceptions, and by balancing application with theory. He reveals to students how economics has relevance in their everyday lives, and through a strong policy orientation, shows them economics in action in the broader social arena. His conversational writing style succeeds in presenting the politics and science of economic theories to tomorrow's decision-makers.
