Reason and Rationality Jon Elster.2009 One of the world's most important political philosophers, Jon Elster is a leading thinker on reason and rationality and their roles in politics and public life. In this short book, he crystallizes and advances his work, bridging the gap between philosophers who use the idea of reason to assess human behavior from a normative point of view and social scientists who use the idea of rationality to explain behavior. In place of these approaches, Elster proposes a unified conceptual framework for the study of behavior. Drawing on classical moralists as well as modern scholarship, and using a wealth of historical and contemporary illustrations, Reason and Rationality marks a new development in Elster's thinking while at the same time providing a brief, elegant, and accessible introduction to his work.

The Gunpowder Plot John Gerard.1897

The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Big Business and the Wealth of Nations Alfred D. Chandler,Franco Amatori,Takashi Hikino.1997 Written in nontechnical terms, Big Business and the Wealth of Nations explains how the dynamics of big business have influenced national and international economies in the twentieth century. A path-breaking study, it provides the first systematic treatment of big business in advanced, emerging, and centrally planned economies from the late nineteenth century, when big businesses first appeared in American and West European manufacturing, to the present. These essays, written by internationally known historians and economists, help one to understand the essential role and functions of big businesses, past and present.

The Autobiography of a Hunted Priest John Gerard.2012-01-01 Truth is stranger than fiction. And nowhere in literature is it so apparent as in this classic work, The Autobiography of a Hunted Priest. This autobiography of a Jesuit priest in Elizabethan England is a most remarkable document and John Gerard, its author, a most remarkable priest in a time when to be a Catholic in England courted imprisonment and torture; to be a priest was treason by act of Parliament. Smuggled into England after his ordination and dumped on a Norfolk beach at night, Fr. Gerard disguised himself as a country gentleman and traveled about the country saying Mass, preaching and ministering to the faithful in secret always in constant danger. The houses in which he found shelter were frequently raided by priest hunters; priest-holes, hide-outs and hair-breadth escapes were part of his daily life. He was finally caught and imprisoned, and later removed to the infamous Tower of London where he was brutally tortured. The stirring account of his escape, by means of a rope thrown across the moat, is a daring and magnificent climax to a true story which, for sheer narrative power and interest, far exceeds any fiction. Here is an accurate and compelling picture of England when Catholics were denied their freedom to worship and endured vicious persecution and often martyrdom. But more than the story of a single priest, The Autobiography of a Hunted Priest epitomizes the constant struggle of all human beings through the ages to maintain their freedom. It is a book of courage and of conviction whose message is most timely for our age.

Painting in Renaissance Venice Peter Humfrey.1995-01-01 The Renaissance was a golden age in the long history of Venetian painting, and the art that came from Venice during that era includes some of the most visually exciting works in the whole of western art. This attractive book - a comprehensive account of painting in Venice from Bellini to Titian to Tintoretto - is an accessible introduction to the paintings of this period. Peter Humfrey surveys the development of a distinctly Venetian artistic tradition from the middle years of the fifteenth century to the end of the sixteenth century. He discusses the work of Jacopo and Giovanni Bellini, Giorgione, Titian, Veronese and Tintoretto as well as the paintings of those less well known - such as the three Vivarini, Cima, Carpaccio, Palma Vecchio, Lorenzo Lotto and Jacopo Bassano. Humfrey analyses these painters' works in terms of their pictorial style, technique, subject matter, patronage and function. He also sets the art against the background of the political, social and religious conditions of Renaissance Venice, as outlined in his Introduction. The book includes an appendix that provides brief biographies of thirty-six of the most important painters active in Renaissance Venice.

Hannibal Barca Captivating History.2019-09-17 One of the names most synonymous with brilliant military strategy is Hannibal. He was the legendary Carthaginian general who marched elephants over the snowy Alps and took on Rome, the growing power in Europe at the time. He outsmarted the best strategists that Rome had to offer and twice sat in front of the gates of Rome with his army.

The Eternal City Ferdinand Addis.2018-11-06 The magnificent and definitive history of the Eternal City, narrated by a master historian. Why does Rome continue to exert a hold on our imagination? How did the Caput mundi come to play such a critical role in the development of Western civilization? Ferdinand Addis addresses these questions by tracing the history of the Eternal City told through the dramatic key moments in its history: from the mythic founding of Rome in 753 BC, via such landmarks as the murder of Caesar in 44 BC, the coronation of Charlemagne in AD 800 and the reinvention of the imperial ideal, the painting of the Sistine chapel, the trial of Galileo, Mussolini's March on Rome of 1922, the release of Fellini's *La Dolce Vita* in 1960, and the Occupy riots of 2011. City of the Seven Hills, spiritual home of Catholic Christianity, city of the artistic imagination, enduring symbol of our common European heritage—Rome has inspired, charmed, and tempted empire-builders, dreamers, writers, and travelers across the twenty-seven centuries of its existence. Ferdinand Addis tells this rich story in a grand narrative style for a new generation of readers.

Rome's Revolution Richard Alston.2015-05-06 On March 15th, 44 BC a group of senators stabbed Julius Caesar, the dictator of Rome. By his death, they hoped to restore Rome's Republic. Instead, they unleashed a revolution. By December of that year, Rome was plunged into a violent civil war. Three men--Mark Antony, Lepidus, and Octavian--emerged as leaders of a revolutionary regime, which crushed all opposition. In time, Lepidus was removed, Antony and Cleopatra were dispatched, and Octavian stood alone as sole ruler of Rome. He became Augustus, Rome's first emperor, and by the time of his death in AD 14 the 500-year-old republic was but a distant memory and the birth of one of history's greatest empires was complete. Rome's Revolution provides a riveting narrative of this tumultuous period of change. Historian Richard Alston digs beneath the high politics of Cicero, Caesar, Antony, and Octavian to reveal the experience of the common Roman citizen and soldier. He portrays the revolution as the crisis of a brutally competitive society, both among the citizenry and among the ruling class whose legitimacy was under threat. Throughout, he sheds new light on the motivations that drove men to march on their capital city and slaughter their compatriots. He also shows the reasons behind and the immediate legacy of the awe inspiringly successful and ruthless reign of Emperor Augustus. An enthralling story of ancient warfare, social upheaval, and personal betrayal, Rome's Revolution offers an authoritative new account of an epoch which still haunts us today.

100 Geometric Games Pierre Berloquin.2015-06-03 There are three loops in a tangle of rope. How many are independent, and how many are interlocked? Two knights stand on a chessboard. How many other knights must you add so that each square is occupied or threatened by a knight? Among six seemingly identical drawings of mandalas, each rotated by multiples of 60 degrees, one is different. Which is it, and why? Challenge yourself with these mind-benders, brainteasers, and puzzles. Each of them has been carefully selected so that none will be too tough for anyone without a math background — but they're not too easy. Some are original, and all are clearly and accurately answered at the back of the book.

Increasing Returns and Economic Analysis Kenneth J. Arrow,Yew-Kwang Ng,Xiaokai Yang.1998-04-12 Selected papers from many leading Australian, American, Asian, British and European economists of an international conference at Monash University sparked by the first Australian visit by Kenneth J. Arrow, Nobel Laureate in Economics. Part 1 extends the recently emerged New Classical Economics which uses inframarginal analysis to formally examine classical economic problems of specialization with insights on trade, growth, and many other issues. Part 2 analyses the implications of increasing returns and the associated non-perfect competition on some macro problems like the effects of nominal aggregate demand on output and the price level. Part 3 analyses the relationships of information, returns to scale, and issues of resources and trade.

Four Days in September Jason R. Abdale.2016-05-31 The author of *The Great Illyrian Revolt* examines one of the Roman Empire's most pivotal defeats—a surprise attack by Germanic barbarians in 9 AD. For twenty

years, the Roman Empire conquered its way through modern-day Germany, claiming all lands from the Rhine to the Elbe. However, when at last all appeared to be under control, a catastrophe erupted that claimed the lives of 10,000 legionnaires and laid Rome's imperial ambitions for Germania into the dust. In late September of 9 AD, three Roman legions, while marching to suppress a distant tribal rebellion, were attacked in a four-day battle with the Germanic barbarians. The Romans under the leadership of the province's governor, Publius Quinctilius Varus, were taken completely by surprise, betrayed by a member of their own ranks: the German officer and secret rebel leader, Arminius. The defeat was a heavy blow to both Rome's military and its pride. Though the disaster was ruthlessly avenged soon afterwards, later attempts at conquering the Germans were half-hearted at best. *Four Days in September* thoroughly examines the ancient sources and challenges the hypotheses of modern scholars to present a clear picture of the prelude to the battle, the fighting itself and its aftermath.

Economic Laws and Economic History Charles P. Kindleberger.1997-07-24 In this volume, Charles Kindleberger makes a powerful case against the idea that any one model could be used to unlock the basic secret of economic history. It is essentially an exercise in methodology, addressed to economists and economic historians alike. He argues that too many economists discover a relationship or a uniformity in economic behaviour, develop a model, and use it to explain more than it is capable of, including, on occasion, all economic behaviour. These lectures discuss four 'laws' in economics to show how uniformities can illuminate economic history in particular aspects. They illustrate the view that the economist or economic historian seeking to test analysis against historical data should have a variety of different models, and not just one. The implication is that however scientific and technical the tools, choosing them carefully to fit particular circumstances is itself an art.

Price and Nonprice Rivalry in Oligopoly Robert E. Kuenne.2016-01-20 The theory of price and quality decision-making in industries with a few firms which recognize their mutual interdependence is of increasing interest to economists and policy makers. This book introduces a novel theory of that decision-making, based upon the notion of the industry as a community of agents who are involved in both competitive and cooperative relationships. It develops theories and illustrates methodological approaches to the analysis of price and quality decision-making in such instances of a 'rivalrous consonance of interests' among firms.
