POW/MIA Issues: Appendixes Paul M. Cole.1994 This report was prepared as a part of the project The POW/MIA Issue in U.S.-North Korean Relations. The report consists of three volumes. This volume addresses American prisoners of war (POW) and missing in action (MIA) cases who were not repatriated following the Korean War, with particular emphasis on whether any American servicemen were transferred to USSR territory during the war. The author finds evidence that Americans were in fact transferred to the USSR from the Korean War zone of combat operations. The tentative identity of one individual is presented, as is an estimate that approximately 50 American POW/MIAs were transferred to Soviet territory. The report looks at evidence that Americans were transported to and retained in the People's Republic of China, concluding that with the exception of highly publicized cases that eventually led to repatriation, American servicemen were not retained in China following the war. The report also discusses the location of American remains in North Korean territory and suggests policy measures that could improve the chances of their recovery and repatriation. It concludes with recommendations for a U.S. policy toward recovering remains from North Korea. The central elements of this strategy derive from the requirement to retrieve additional identification media from North Korea. The proposed change in U.S. policy shifts priority to methods of recovering remains that will increase the possibility that remains can be confidently associated with Americans who did not return from the Korean War.

Man in Adaptation William Petersen,Yehudi A. Cohen.2022-04-13 Underlying the anthropological study of man is the principle that there is a reality to which man must adapt if he is to survive. Reproduce, and to perpetuate himself. Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world in which they seek to live. Social groups-where culture is found-must develop adaptive mechanisms in the organization of their social relations if there is to be order, regularity, and predictability in patterns of cooperation and competition and if they are to survive as viable units. This three-volume set of readings presents an introduction to anthropology that is unified and made systematic by focus on adaptations that have accompanied the evolution of man, from non-human primate to inhabitant of vast urban areas in modern industrial societies. Man in Adaptation: The Cultural Present introduces Cultural Anthropology also from the point of view of adaptation and provides coherence for the study of human societies from man's social beginnings to the present. The book deals sequentially with the more and more complex technologies and political and social structures that have enabled different societies to make effective use of the energy potentials in their habitats. This and the two companion volumes are the first attempt to unify the disparate subject matter of anthropology within a single and powerful explanatory framework. They incorporate the work of the most renowned anthropological experts on man, and they illuminate clearly one of the most important concepts around which one can build an investigation of the nature and scope of anthropology itself. For these reasons, they are recognized as indispensable reading for every professional anthropologist and as perhaps the best available means of introducing new students to the field.

Lowell Observatory Kevin Schindler.2016 Atop a mesa one mile west of downtown Flagstaff, Arizona, sits Lowell Observatory, an astronomical research facility steeped in tradition. Percival Lowell, scion of a Boston Brahmin family, initially established his observatory in 1894 to study the possibility of intelligent life on Mars. Lowell widely popularized his controversial theories, sparking debate among both the scientific community and lay public. In the following years, the observatory's astronomers made several discoveries that dramatically altered our understanding of space, including Clyde Tombaugh's discovery of Pluto in 1930 and V.M. Slipher's detection of the expanding nature of the universe in 1912. Decades later, Apollo astronauts visited as part of their training to fly to the moon. These stories and others offer a glimpse of the scientific discovery, community pride, and personal triumph that define Lowell Observatory.

Playing to Strengths Sanjay Kathuria,Priya Mathur.2019-12-03 It is widely agreed that, over the past decade, accelerating infrastructure investments in India's North Eastern Region (NER) and neighboring countries, along with connectivity agreements with Bangladesh, hold immense promise for unlocking NER's economic potential. Other global trends, such as the growing incomes and consumer awareness in India and neighboring countries; a rising preference for fresh, healthy, safe, environmentally friendly, and socially responsible products; the growing role of services in manufacturing; and increasing demand for skilled resources are also very favorable for NER. Together, these developments can help NER showcase its strengths in agriculture and services, thereby developing value chains in these sectors, which will lead to sustainable, better-paying job opportunities for the people of NER. In this context, the World Bank, in consultation with stakeholders--government, private sector, and academia--analyzed two cross-cutting constraints that are encountered across all

value chains and sectors in NER: connectivity and logistics, and product standards and quality infrastructure. To ground the policy in specific contexts, the team studied four sectors in depth: fruits and vegetables, spices, bamboo and related products, and medical tourism. Playing to Strengths lays out an initial policy framework for NER that integrates demand and supply and shows that, even with a low base in manufacturing, NER can leverage its strengths in agriculture and services to step up its growth. However, implementing this framework will require a different approach to doing business compared with the existing ecosystem and its associated value chains, which are mostly geared to local and/or price-conscious consumers. In capitalizing on its advantages, NER will not only accelerate its own development, but also will play an increasingly critical role in the government of India's Act East policy.

Gender and Forests Carol J. Pierce Colfer,Bimbika Sijapati Basnett,Marlène Elias.2016-04-14 This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes. Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

A Long Fatal Love Chase Louisa May Alcott.1996-12-02 I'd gladly sell my soul to Satan for a year of freedom, cries impetuous Rosamond Vivian to her callous grandfather. Then, one stormy night, a brooding stranger appears in her remote island home, ready to take Rosamond to her word. Spellbound by the mysterious Philip Tempest, Rosamond is seduced with promises of love and freedom, then spirited away on Tempest's sumptuous yacht. But she soon finds herself trapped in a web of intrigue, cruelty, and deceit. Desperate to escape, she flees to Italy, France, and Germany, from Parisian garret to mental asylum, from convent to chateau, as Tempest stalks every step of the fiery beauty who has become his obsession. A story of dark love and passionate obsession that was considered too sensational to be published in the authors lifetime, A Long Fatal Love Chase was written for magazine serialization in 1866, two years before the publication of Little Women. Buried among Louisa May Alcott's papers for more than a century, its publication is a literary landmark—a novel that is bold, timeless, and mesmerizing.

Canada Fire George A. Rawlyk.1994-07-29 Relative to evangelicalism elsewhere in the English-speaking world, radical evangelicalism in Canada was defined centrally (often almost exclusively) by the New Birth

experience or by similar experiences, such as sanctification. Over time, however, there has been significant change regarding the centre of Canadian evangelicalism. This change, sometimes gradual and sometimes sudden, is of crucial importance in understanding all aspects of evolving Canadian Protestantism in the nineteenth and twentieth centuries. Prominent preachers such as Henry Alline, William Black, David George, Freeborn Garrettson, and Harris Harding as well as rank-and-file evangelists figure in *The Canada Fire*. Through letters, diaries, and autobiographies the actors and actresses in this unfolding religious drama speak for themselves, and their voices are permeated with vulnerability and honesty. *The Canada Fire* is not only a book about the distant past; it also throws light on the changing face of Canadian Protestantism in general, and Canadian evangelicalism in particular.

QSO Absorption Lines Georges Meylan.2013-11-11 The controversial question of whether the majority of the narrow absorption lines observed in QSO spectra represent cosmological intervening systems or ejecta from the QSO themselves is settled. QSO absorption line spectroscopy, initially a mere technique, has matured into an essential extragalactic research tool for understanding the content of the Universe at redshifts between 0 and 4, and beyond. The only previous important meeting devoted to QSO Absorption Lines was held in May 1987 at the Space Telescope Science Institute in Baltimore, Maryland, U.S.A. Since that time, nearly a decade ago, research has been extremely active in this now well-established field of astrophysics. Theoretical studies and simulations have taken advantage of the constant progress in computer technology, and during these last few years, the observational results have benefited largely from the new facilities offered by the Hubble Space Telescope in the UV wavelength range and the Keck Telescope for high-resolution spectroscopy.
