The Secret Melody Trinh Xuan Thuan,Xuan Thuan Trinh.2005 In The Secret Melody, Trinh Xuan Thuan examines our many attempts to capture the music of nature and hear the cosmic fugue. First, as prelude, he describes the many other cosmologies that preceded the modern Big Bang theory of creation - the magical universe of cavemen, the ancient Chinese idea of the universe (which Thuan compares to a gigantic bureaucracy), the mathematical universe introduced by Pythagoras, and the heliocentric universe of Copernicus - and he explores the work of Galileo, Tycho Brahe, and other early scientists. He then describes in a clear, vivid, and poetic language our current understanding of the cosmos, painting a sharp picture of how modern astronomers study the universe, the equipment they use, the most prominent scientists, and the major discoveries. A mind-boggling portrait of the cosmos emerges in these pages. And, of course, any examination of the origin and nature of the universe inevitably raises philosophical and religious questions, and Thuan examines these issues as well, presenting a provocative case for the anthropic principle (which argues that the universe has been fine-tuned to an extreme precision to produce living creatures with consciousness

and intelligence) and illuminating the place of God in a Big Bang cosmology. Here then is an intriguing look at modern cosmology, blending up-to-the-minute descriptions of the forefront of astronomy with thoughtful reflections on science's possible impact on philosophical and religious belief.

The Marvels Brian Selznick.2015-09-15 Don't miss Selznick's other novels in words and pictures, *The Invention of Hugo Cabret* and *Wonderstruck*, which together with *The Marvels*, form an extraordinary thematic trilogy! A breathtaking new voyage from Caldecott Medalist Brian Selznick. Two stand-alone stories--the first in nearly 400 pages of continuous pictures, the second in prose--create a beguiling narrative puzzle. The journey begins at sea in 1766, with a boy named Billy Marvel. After surviving a shipwreck, he finds work in a London theatre. There, his family flourishes for generations as brilliant actors until 1900, when young Leontes Marvel is banished from the stage. Nearly a century later, runaway Joseph Jervis seeks refuge with an uncle in London. Albert Nightingale's strange, beautiful house, with its mysterious portraits and ghostly presences, captivates Joseph and leads him on a search for clues about the house, his family, and the past. A gripping adventure and an intriguing invitation to decipher how the two stories connect, *The Marvels* is a loving tribute to the power of story from an artist at the vanguard of creative innovation.

Climate Change Marie-Antoinette Mélières, Chloé Maréchal.2015-02-04 This book is designed for first- and second-year university students (and their instructors) in earth science, environmental science, and physical geography degree programmes worldwide. The summaries at the end of each section constitute essential reading for policy makers and planners. It provides a simple but masterly account, with a minimum of equations, of how the Earth's climate system works, of the physical processes that have given rise to the long sequence of glacial and interglacial periods of the Quaternary, and that will continue to cause the climate to evolve. Its straightforward and elegant description, with an abundance of well chosen illustrations, focuses on different timescales, and

includes the most recent research in climate science by the United Nations Intergovernmental Panel on Climate Change (IPCC). It shows how it is human behaviour that will determine whether or not the present century is a turning point to a new climate, unprecedented on Earth in the last several million years.
