Trauma Intensive Care Samuel A. Tisherman, Raquel M. Forsythe, John A. Kellum. 2013-07-11 An ideal resource for intensivists caring for trauma victims in the ICU, Trauma Intensive Care provides point-of-care guidelines for establishing the priorities of care, minimizing complications, and returning patients to the best possible functional outcome.

Analysis of Modern Paints Tom Learner. 2004 Outlines the techniques that are currently employed to analyze the synthetic resins used in modern painting materials, such as pyrolysis-gas chromatography-mass spectrometry, Fourier transform infrared spectroscopy, and direct temperature-resolved mass spectrometry. For each technique, results are given for standard samples of the principal classes of synthetic binding media, various pigments and extenders, tube paint formulations, and microscopic paint fragments taken from actual works of art.

Sticking to the Point: A rational methodology for the step by step formulation & administration of an acupuncture treatment Bob Flaws. 1989 A new, revised edition of the first book for students and practitioners which explains how to do TCM style acupuncture. This book explains in depth how to do a complex, individualized TCM pattern discrimination, how to arrange and make sense of a welter of confusing signs and symptoms, and how to think using TCM terms and statement of fact. Western students and beginning practitioners will find this book an invaluable aid in honing their ability to understand and use TCM. Although specifically about acupuncture, the method presented in this book can be used to erect a TCM treatment plan using any Chinese modality Chinese herbs, Chinese dietary therapy, tui na or Chinese massage, or qi gong, Chinese energy exercises. Included in this book are the functions of the main points of acupuncture and the functions of the main two and three point combinations.

Pulmonary Infection Mięczyński Pokorski. 2015-06-16 The respiratory tract is a frequent target of infections caused by a wide range of organisms. The book provides reader-friendly information on aspects of pulmonary infections, including comprehensive accounts of bacterial and viral diseases, therapeutic approaches, molecular and classical culture-related techniques of diagnosis and explaining the basic cell biological mechanism. The role of oxidative stress, both helpful in fighting invading pathogens and detrimental in yielding to infection is detailed as it is often undervalued and needs focus. The chapters encompass latest developments and applications in bacteriology and virology, preventive and therapeutic tips, and raise attention to implementation of proper antibiotic policies by medical institutions to decrease resistance to antimicrobials. The perennial problem of low influenza vaccination coverage rate is rationalized. The volume will be of interest to both clinicians and biomedical researchers engaged in this exciting field.

Intracellular Messengers Alan A. Boulton, Glen B. Baker, Colin W. Taylor. 1992-02-27 This timely new volume in the highly acclaimed Neuromethods series focuses on major new advances in understanding the signaling mechanisms employed by neural tissues. Chapters, contributed by experts in the field, provide thorough, up-to-date coverage of a variety of topics and techniques, including: single-cell imaging technology • phosphorylation of target proteins • analysis of phosphoinositides and inositol phosphates • inositol trisphosphate and intracellular calcium • guanine nucleotide-binding proteins • ion channel gating • measurement of intracellular calcium with fluorescent calcium indicators • protein kinase C • synthetic analogs of intracellular messengers • cyclic nucleotides • caged intracellular messengers • intracellular regulators and components of the exocytotic pathway • intracellular messengers in vertebrate and invertebrate photoreceptors. Neuromethods 20 • Intracellular Messengers is an essential resource for neurobiologists at all levels of research.

Pseudomonas syringae and related pathogens Nicola Sante Iacobellis, Alan Collmer, Steven W. Hutcheson, John W. Mansfield, Cindy E. Morris, Jesús Murillo, Norman W. Schaad, David E. Stead, Giuseppe Surico, Matthias S. Ullrich. 2013-06-29 This volume mainly reports on new and recent advancements on different aspects of Pseudomonas syringae, a plant pathogenic bacterial species that include a high number of pathogens of important crops, which is an interesting model organism in plant pathology. In addition some related fluorescent Pseudomonas spp., responsible of new and emerging diseases, as well as some pathogens previously included in the above genus and now classified in the genera Ralstonia, Acidovorax are also considered. The tremendous recent advancements on: the ecology and epidemiology and, in particular, the adaptation of P. syringae to stresses and adverse environmental conditions; the function and regulation of genes involved in the production of phytotoxins and on their mechanism of action in the interaction with the host cells; the structure, function and regulation of type three secretion system (TTSS) and the transport of the effectors proteins in the host cells; the possibility to control diseases through the induction of the systemic acquired resistance (SAR); the development of molecular techniques for the highly specific and sensible identification and detection of pathogens; the determination of the causal agents of new and emerging diseases as well the classification of the different pathovars of P. syringae; are reported in 76 chapters cured by leading scientist in the respective fields.

Physician's Guide to the Treatment and Follow-Up of Metabolic Diseases Nenad Blau, Georg F. Hoffmann, J.V. Leonard, Joe T. R. Clarke. 2006-01-16 This reference provides concise information on the treatment and management of inherited metabolic diseases for the clinician. World experts cover all commonalities of therapy giving practical advice and guidance for daily practice. All established treatment protocols in this quickly developing area of medicine are clearly described, including follow-up protocols and monitoring. Alternative and experimental therapies are also described and evaluated. Numerous tables, figures, and several indices (symptom, disease name, tests, etc.) allow rapid access to specific details. This book is invaluable to anyone dealing with patients with inherited metabolic diseases, pediatricians, internists, neurologists, and clinical geneticists.

Fetal and Neonatal Physiology Richard A. Polin. 1992 Forlagetets beskrivelse: This two-volume book comprises an up-to-date reference text on fetal and neonatal physiology. It contains 190 chapters written by experts in each field which provide essential background information as well as contemporary viewpoints and research. The purpose of this second edition is to bring current information to readers and to enlarge the original scope with a more comprehensive approach. It is targeted to fellows, nurses, and other personnel training in fetal and neonatal medicine as well as to established investigators. Overall, the volumes accomplish their purpose. The topics are appropriately divided and indexed and nearly all of the chapters can be read at a single sitting. The illustrations are good, but their impact would have been improved by using more color. Chapters related to my specialty were well written and highly readable. These included placental development, developmental hematopoiesis, and developmental immunobiology. Disappointingly, immune relationships between the mother and baby during pregnancy, now a matter of considerable interest to fetal and neonatal physiologists, are not discussed. Nor were interactions between the immune, endocrine, and nervous systems highlighted. Although the book suffers from the previously mentioned problems and other minor deficiencies, it is nonetheless a notable achievement and is likely to be a standard volume on the shelves of novice and experienced physiologists.

Making the Patient Your Partner Thomas Gordon,W. Sterling Edwards.1997-07-30 Health professionals need to learn the communication skills that will create collaborative and mutually satisfying relationships with patients. The failure of doctors to relate effectively to patients results in noncompliance, malpractice suits, longer stays in hospitals and other negative outcomes. Interpersonal skills can be easily learned by studying the techniques described by Gordon and Edwards. Using cases, interviews, dialogues, and vignettes, the authors provide effective models or blueprints for health professionals to follow. Gordon is a psychologist who has pioneered internationally recognized effectiveness training programs widely used by teachers, parents, salesmen, managers, and other professionals. He has published six books that have sold over five million copies in 17 languages. In this work, he has enlisted the expertise of Edwards, a highly respected medical doctor and educator, to provide the necessary insider's view of the health profession. Together they make a convincing case for doctors to develop closer and more collaborative relationships with patients.

Clinical Behavioral Medicine for Small Animals Karen L. Overall.1997 The book focuses on diagnostic and treatment approaches for the major classes of behaviour problems that are seen in cats and dogs. Each kind of problem, from aggressive behaviour to self-mutilation and elimination disorders is discussed, offering step-by-step guidelines. Contemporary pharmacological treatments are also examined.

Nutrition of Normal Infants Samuel J. Fomon.1993 Assembles and interprets information relevant to growth and nutrition of normal, term infants in industrialized countries. Discusses such topics as infant feeding and evolution, trends in infant feeding since 1950, size and growth, estimated requirements and recommended dietary intakes, water and renal solute load, vitamins, minerals, micronutrients, human milk and breast feeding, infant formulas, cow milk and beikost, recommendations for feeding normal infants, etc.

Acute Management of the Burned Patient J. A. Jeevendra Martyn.1990 A text which covers all major aspects of anaesthesia and critical care of the burned patient. Neonatal Pain Giuseppe Buonocore,Carlo V. Bellieni.2008-02-13 This is the first book dealing with fetal pain and its consequences and with pain in premature babies. The volume gives an overview of the current knowledge in this field. An international team of renowned specialists evaluates neonatal and fetal pain from the different points of view, and possible consequences of pain - even psychological - on the brain. This book will be an invaluable resource for professionals and for post-graduate students in all disciplines.

The Epilepsies 2 Roger J. Porter,David Chadwick.1997 For neurologists and other physicians who encounter neurologic disorders, a practical reference on the advances in understanding the various forms of epilepsy since the first volume was published a decade ago. Among the innovations are magnetic resonance imaging as a nearly routine diagnostic evaluation of difficult cases, a series of new anti-epileptic drugs, and a continuing expansion of knowledge about the basic mechanisms involved. Other topics include the new genetics, partial epilepsy syndrome in adults, benign and malignant syndromes of childhood epilepsy, non-epileptic seizures, pregnancy, and specialized care centers. The series is renamed from the BIMR Neurology series, itself a successor to the Modern Trends in Neurology series. Annotation copyrighted by Book News, Inc., Portland, OR.

Idiopathic Generalized Epilepsies Alain Malafosse.1994 Idiopathic generalised epilepsies are characterised by strong genetic factors and multiple clinical phenotypes; animal models of untreated epilepsies are relevant to some of the clinical syndromes found in humans. This volume is the first to confront human clinical, animal (experimental) as well as basic and applied genetic data. Main section headings: Current approaches; Familial neonatal and infantile convulsions; Absence seizures and absence epilepsy; Juvenile myoclonic epilepsy and related syndromes; Photosensitivity; Pathophysiology of convulsive seizures; Fundamental and therapeutic aspects.

Soil Survey Manual (U.S. Department of Agriculture Handbook No. 18) U.S. Department of Agriculture.2019-04-06 The Soil Survey Manual, USDA Handbook No. 18, provides the major principles and practices needed for making and using soil surveys and for assembling and using related data. The term 'soil survey' is used here to encompass the process of mapping, describing, classifying, and interpreting natural three-dimensional bodies of soil on the landscape. This work is performed by the National Cooperative Soil Survey in the United States and by other similar organizations worldwide. The Manual provides guidance, methodology, and terminology for conducting a soil survey but does not necessarily convey policies and protocols required to administer soil survey operations. The soil bodies contain a sequence of identifiable horizons and layers that occur in repeating patterns in the landscape as a result of the factors of soil formation as described by Dokuchaev (1883) and Jenny (1941).

Immigration Reconsidered Virginia Yans-McLaughlin.1990-11-15 Providing an interdisciplinary and global perspective on immigration to the United States, this collection of essays brings together the work of leading scholars in the field--including the work of such distinguished historians, sociologists, and political scientists as Charles Tilly, Philip Curtin, Kirby Miller, Sucheng Chan, Alejandro Portes, Lawrence Fuchs, and Aristide Zolberg--and represents an important step forward in the development of immigration studies. The book helps redirect thinking on the subject by giving a summary of the current state of immigration studies and a coherent new perspective that emphasizes the international dimensions of the immigrant experience from the time of the slave trade to present-day movements of Asian and Latin American peoples. Immigration Reconsidered challenges ethnocentric American or European perspectives on immigration, disputes the classical assimilation model of a linear progression of immigrant cultures toward a dominant American national character, questions human capital theory as an explanation of ethnic group achievement, reveals conflicting ethnic and racial attitudes toward immigration restriction, and examines the revival of interest in oral history, immigrant autobiographies, and other subjective documents. Offering a new approach to immigration studies for the 1990s, Immigration Reconsidered is important reading for anyone who wants to know how the America came to be as it is today.

Organic Chemistry of Museum Objects John Mills,Raymond White.2012-09-10 'The Organic Chemistry of Museum Objects' makes available in a single volume, a survey of the chemical composition, properties and analysis of the whole range of organic materials incorporated into objects and artworks found in museum collections. The authors cover the fundamental chemistry of the bulk materials such as wood, paper, natural fibres and skin products, as well as that of the relatively minor components incorporated as paint, media, varnishes, adhesives and dyes. This expanded second edition, now in paperback, follows the structure of the first, though it has been extensively updated. In addition to chapters on basic organic chemistry, analytical methods, analytical findings and fundamental aspects of deterioration, the subject matter is grouped as far as possible by broad chemical class - oils and fats, waxes, bitumens, carbohydrates, proteins, natural resins, dyestuffs and synthetic polymers. This is an essential purchase for all practising and student conservators, restorers, museum scientists, curators and organic chemists.

Reinventing the Melting Pot Tamar Jacoby.2009-04-28 Nothing happening in America today will do more to affect our children's future than the wave of new immigrants flooding into the country, mostly from the developing world. Already, one in ten Americans is foreign-born, and if one counts their children, one-fifth of the population can be considered immigrants. Will these newcomers make it in the U.S? Or will today's

realities -- from identity politics to cheap and easy international air travel -- mean that the age-old American tradition of absorption and assimilation no longer applies? Reinventing the Melting Pot is a conversation among two dozen of the thinkers who have looked longest and hardest at the issue of how immigrants assimilate: scholars, journalists, and fiction writers, on both the left and the right. The contributors consider virtually every aspect of the issue and conclude that, of course, assimilation can and must work again -- but for that to happen, we must find new ways to think and talk about it. Contributors to Reinventing the Melting Pot include Michael Barone, Stanley Crouch, Herbert Gans, Nathan Glazer, Michael Lind, Orlando Patterson, Gregory Rodriguez, and Stephan Thernstrom.

Generalized Non-Convulsive Epilepsy: Focus on GABA-B Receptors C. Marescaux, M. Vergnes, R. Bernasconi. 2013-03-08 Generalized non convulsive epilepsy (GNCE), also called absence or petit mal epilepsy, is a disease appearing during childhood. EEG, clinical, pharmacological and genetic characteristics differ from those of convulsive or focal epilepsies. No underlying structural or biochemical abnormality has been identified for generalized absence seizures and the etiology of this disorder is unknown. It is unlikely that the precise pathophysiology of GNCE can be resolved in studies that focus on humans. Therefore a number of animal models reproducing the human disease have been developed. The aim of this supplementum is to characterize such models in rodents. First, recent models are extensively described. These include the genetic model of spontaneous GNCE in Strasbourg's Wistar rats and in tottering mice as well as bilateral spike and wave discharges induced by GHB, PTZ or GABA mimetics. Second, this supplementum will also provide very recent information on putative mechanisms underlying generalized absence seizures. Third, various experimental approaches aimed at investigating the neural substrate of this particular kind of epilepsy are described with various electrophysiological, pharmacological, biochemical, metabolic, ionic and molecular data. This supplementum provides an original multidisciplinary approach to the mechanisms involved in GNCE and demonstrates that rodent models are a promising tool which complements the classical feline penicillin model.

Evidence-Based Obstetric Anesthesia Stephen H. Halpern, M. Joanne Douglas. 2008-04-15 This is the first text to systematically review the evidence for obstetric anesthesia and analgesia. Evidence-based practice is now being embraced worldwide as a requirement for all clinicians; in the everyday use of anesthesia and analgesia for childbirth, anesthetists will find this synthesis of the best evidence an invaluable resource to inform their practice. Contributions from anesthetic specialists trained in the skills of systematic reviewing provide a comprehensive and practical guide to best practice in normal and caesarean section childbirth. This book, coming from one of the world's leading obstetric centers and the cradle of evidence-based medicine, is a much needed addition to the obstetric anesthesia literature.

Idiopathic generalised epilepsies C. P. Panayiotopoulos. 2012-06-22 Idiopathic generalised epilepsies provides a concise, authoritative guide to this category of epilepsies. Each syndrome of idiopathic generalised epilepsy is detailed in regard to demographic data, clinical manifestations, aetiology, diagnosis, prognosis and management. The book finishes with a chapter on AED treatment for idiopathic generalised epilepsies. C. P. Panayiotopoulos is an internationally renowned leader and expert in the diagnosis, treatment and management of epilepsy. This pocket-sized reference work will be a valuable resource for all those involved in the care of patients with epileptic seizures.

Science-Based Dating in Archaeology M.J. Aitken. 2014-02-25 Archaeologists and archaeology students have long since needed an authoritative account of the techniques now available to them, designed to be understood by non-scientists. This book fills the gap and it offers a two-tier approach to the subject. The main text is a coherent introduction to the whole field of science-based dating, written in plain language for non-scientists. Additional end-notes, however, offer a more technical understanding, and cater for those who have a scientific and mathematical background.
