Research in Scientific Feng Shui and the Built Environment Michael Y. MAK, Albert Ting-pat SO. 2009-02-01 Feng Shui is a body of ancient Chinese knowledge that aims at creating a harmony between environment, buildings and people. It represented the most significant set of architectural theory and practice in Chinese history. Feng Shui knowledge reflected the traditional Chinese attitudes towards the natural and built environment. With a desire to improve the relationship between human and the environment, there is an increasing interest for architects, building professionals and other property practitioners to apply the concepts of Feng Shui in building design. As Feng Shui knowledge represents a holistic view in creating harmonized built environment, research into the application of Feng Shui to the built environment needs to be addressed.
