Ours Once More Michael Herzfeld.2020-06-16 When this work - one that contributes to both the history and anthropology fields - first appeared in 1982, it was hailed as a landmark study of the role of folklore in nation-building. It has since been highly influential in reshaping the analysis of Greek and European cultural dynamics. In this expanded edition, a new introduction by the author and an epilogue by Sharon Macdonald document its importance for the emergence of serious anthropological interest in European culture and society and for current debates about Greece's often contested place in the complex politics of the European Union.

The Gardens of Adonis Marcel Detienne.1994-04-24 Rich with implications for the history of sexuality, gender issues, and patterns of Hellenic literary imagining, Marcel Detienne's landmark book recasts long-standing ideas about the fertility myth of Adonis. The author challenges Sir James Frazer's thesis that the vegetation god Adonis-- whose premature death was mourned by women and whose resurrection marked a joyous occasion-- represented the annual cycle of growth and decay in agriculture. Using the analytic tools of structuralism, Detienne shows instead that the festivals of Adonis depict a seductive but impotent and fruitless deity--whose physical ineptitude led to his death in a boar hunt, after which his body was found in a lettuce patch. Contrasting the festivals of Adonis with the solemn ones dedicated to Demeter, the goddess of grain, he reveals the former as a parody and negation of the institution of marriage. Detienne considers the short-lived gardens that Athenian women planted in mockery for Adonis's festival, and explores the function of such vegetal matter as spices, mint, myrrh, cereal, and wet plants in religious practice and in a wide selection of myths. His inquiry exposes, among many things, attitudes toward sexual activities ranging from perverse acts to marital relations.

The Foul and the Fragrant Alain Corbin.1986 In a book whose insight and originality have already had a dazzling impact in France, Alain Corbin has put the sense of smell on the historical map. He conjures up the dominion that the combined forces of smells--from the seductress's civet to the ubiquitous excremental odors of city cesspools--exercised over the lives (and deaths) of the French in the eighteenth and nineteenth centuries.

Death in the Andes Mario Vargas Llosa.2011-03-04 Set in an isolated, rundown community in the Peruvian Andes, Vargas Llosa's novel tells the story of a series of mysterious disappearances involving the Shining Path guerrillas and a local couple performing cannibalistic sacrifices with strange similarities to the Dionysian rituals of ancient Greece. Part detective novel and part political allegory, it offers a panoramic view of Peruvian society; not only of the current political violence and social upheaval, but also of the country's past and its connection to Indian culture and pre-Hispanic mysticism.

Origins Lewis Dartnell.2019-05-14 A New York Times-bestselling author explains how the physical world shaped the history of our species When we talk about human history, we often focus on great leaders, population forces, and decisive wars. But how has the earth itself determined our destiny? Our planet wobbles, driving changes in climate that forced the transition from nomadism to farming. Mountainous terrain led to the development of democracy in Greece. Atmospheric circulation patterns later on shaped the progression of global exploration, colonization, and trade. Even today, voting behavior in the south-east United States ultimately follows the underlying pattern of 75 million-year-old sediments from an ancient sea. Everywhere is the deep imprint of the planetary on the human. From the cultivation of the first crops to the founding of modern states, Origins reveals the breathtaking impact of the earth beneath our feet on the shape of our human civilizations.

Cultural Memory and Biodiversity Virginia D. Nazarea.2006-01-26 Seed and gene banks have made great strides in preserving the biological diversity of traditional agricultural plant species, but they have tended to ignore a serious component: the knowledge about those crops and methods of farming held by the people who have long raised them. Virginia Nazarea now makes a case for preserving cultural memory along with biodiversity. By exploring how indigenous people farm sweet potatoes in Bukidnon, Philippines, she discovers specific ways in which the conservation of genetic resources and the conservation of culture can support each other. Interweaving a wealth of ecological and cognitive data with oral history, Nazarea details a memory banking protocol for collecting and conserving cultural information to complement the genetic, agronomic, and biochemical characterization of important crops. She shows that memory banking offers significant benefits for local populations--not only the preservation of traditional knowledge but also the maintenance of alternatives to large-scale agricultural development and commercialization. She also compares alternative forms of germplasm conservation conducted by a male-dominated hierarchy with those of an informal network of migrant women. Cultural Memory and Biodiversity establishes valuable guidelines for people who aspire to support community-based in situ conservation of local varieties. Perhaps more important, it shows that the traditional methods of local farmers are often as important as the advanced methods encouraged by advocates of modernization.

Technoscience and Cyberculture Stanley Aronowitz.2014-04-08 Technoculture is culture--such is the proposition posited in Technoscience and Cyberculture, arguing that technology's permeation of the cultural landscape has so irrevocably reconstituted this terrain that technology emerges as the dominant discourse in politics, medicine and everyday life. The problems addressed in Technoscience and Cyberculture concern the ways in which technology and science relate to one another and organize, orient and effect the landscape and inhabitants of contemporary culture.

Synthetic DNA Delivery Systems Dan Luo,W. Mark Saltzman.2003-09-30 DNA delivery into cells is a rapidly developing area in gene therapy and biotechnology. Moreover, it is a powerful research tool to determine gene structure, regulation, and function. Viral methods of DNA delivery are well-characterized and efficient, but little is known about the toxicity and immunogenecity of viral vectors. As a result, non-viral, transfection methods of DNA delivery are of increasing interest. Synthetic DNA Delivery Systems is a comprehensive and current resource on DNA transfection. The use of histidine-rich peptides and polypeptides as DNA delivery systems and self-assembled delivery systems based on cationic lipids and polymers are discussed. Targeted delivery to organelles, tumor cells and dendritic cells comprise an important topic.

The Provisions of God Agnes Amos-Coleman.2017-06-23 Let me introduce you to Mascot the cat. During a challenging season in my life two years ago this stray black-and-white cat crossed the fence from our neighbor's yard into our backyard, and never left. When my husband saw that he was old and scraggly and hungry, he decided to have compassion on the cat and give him a home. Before I knew what was going on the cat had a name-Mascot. I asked my husband why he named the cat Mascot, and he shared his reasoning: We are a bi-racial couple (black and white), and the cat is black and white, so he is our Mascot. Because of my husband's provisions to this old, ragged cat, Mascot's every need is met and his life has been totally changed. Over the past year and a half, I've closely studied the life of Mascot and my husband's interactions with him. The Holy Spirit ministered to me that the relationship between Mascot and my husband can be compared to our relationship with God. In this book you can discover faith-building principles for receiving supernatural provisions from God, and steps to sustaining your provisions. Are you waiting for God to bring provision into your life? BUY YOUR COPY NOW! And discover insights from Mascot that can help you to experience God's supernatural provision in your own life! 90% of the profit from this book will be donated to various Ministries to support Mission work. Edible Identities: Food as Cultural Heritage Ronda L. Brulotte,Michael A. Di Giovine.2016-04-29 Food - its cultivation, preparation and communal consumption - has long been considered a form of cultural heritage. A dynamic, living product, food creates social bonds as it simultaneously marks off and maintains cultural difference. In bringing together anthropologists, historians and other scholars of food and heritage, this volume closely examines the ways in which the cultivation, preparation, and consumption of food is used to create identity claims of 'cultural heritage' on local, regional, national and international scales. Contributors explore a range of themes, including how food is used to mark insiders and outsiders within an ethnic group; how the same food's meanings change within a particular society based on class, gender or taste; and how traditions are 'invented' for the revitalization of a community during periods of cultural pressure. Featuring case studies from Europe, Asia and the Americas, this timely volume also addresses the complex processes of classifying, designating, and valorizing food as 'terroir,' 'slow food,' or as intangible cultural heritage through UNESCO. By effectively analyzing food and foodways through the perspectives of critical heritage studies, this collection productively brings two overlapping but frequently separate theoretical frameworks into conversation.

Cecilia Valdés or El Angel Hill Cirilo Villaverde.2005-09-29 Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.
