**Making and Unmaking Nations** Scott Straus.2015-03-15

Winner of the Grawmeyer Award for Ideas Improving World Order, 2018 Winner of the Joseph Leggold Prize Winner of the Best Books in Conflict Studies (APSA) Winner of the Best Book in Human Rights (ISA) In *Making and Unmaking Nations*, Scott Straus seeks to explain why and how genocide takes place—and, perhaps more important, how it has been avoided in places where it may have seemed likely or even inevitable. To solve that puzzle, he examines postcolonial Africa, analyzing countries in which genocide occurred and where it could have but did not. Why have there not been other Rwandas? Straus finds that deep-rooted ideologies—how leaders make their nations—shape strategies of violence and are central to what leads to or away from genocide. Other critical factors include the dynamics of war, the role of restraint, and the interaction between national and local actors in the staging of campaigns of large-scale violence. Grounded in Straus's extensive fieldwork in contemporary Africa, the study of major twentieth-century cases of genocide, and the literature on genocide and political violence, *Making and Unmaking Nations* centers on cogent analyses of three nongenocide cases (Côte d'Ivoire, Mali, and Senegal) and two in which genocide took place (Rwanda and Sudan). Straus's empirical analysis is based in part on an original database of presidential speeches from 1960 to 2005. The book also includes a broad-gauge analysis of all major cases of large-scale violence in Africa since decolonization. Straus's insights into the causes of genocide will inform the study of political violence as well as giving policymakers and nongovernmental organizations valuable tools for the future.

*Brickyards to Graveyards* Villia Jefremovas.2012-02-01 Explores how the conditions that shaped Rwanda's labor organization and industries also shaped Rwanda's genocide.

Humanitarian Intervention and Safety Zones C.

McQueen.2016-02-25 Neither willing to engage in a meaningful way to save targeted civilians in Iraq, Bosnia and Rwanda nor to stand entirely aside as massive violations of humanitarian law occurred, states embraced safety zones as a means to 'do something' whilst avoiding being drawn into open warfare. *Humanitarian Intervention and Safety Zones: Iraq, Bosnia and Rwanda* explores why and how effectively safety zones were implemented as a way to protect civilians and displaced persons in three of the most important conflicts of the 1990s. It shows how states consistently sought to reconcile their political and humanitarian interests, a process which often led to problematic and ambiguous outcomes, and assesses in fascinating detail the difficulties and controversies surrounding the use of such zones, variously called safe havens, safe areas, secure humanitarian areas, and zones humanitaires sûres . The book also asks whether or not such zones could serve as precedents for possible future attempts to ensure the safety of civilians in complex humanitarian emergencies.

**Austrian Lives** Günter Bischof, Fritz Plasser, Eva Maltchnig. 2012  
We also suggest that the intellectual biographies of thinkers and professionals are fertile soil for biographical study. Moreover, the prosopographical study of common folks in the Austrian population lifts these lives from the dark matter of anonymous masses and gives rich insight into the lives that ordinary Austrians have been leading. We present an array of political lives, including that of Ignaz Seipel and Therese Schlesinger-Eckstein, as well as Lives of the Mind which capture the lives of fascinating intellectual figures in pre- and post-World War II Vienna such as Viktor Frankl and Eugenie Schwarzwald. The approaches to writing biography taken in this volume also suggest that much work needs to be done to shed light on the lives of ordinary Austrians. In this volume we have biographical accounts detailing the lives of soldiers, prisoners of war, and farming families.

**Urban Life in Post-Soviet Asia** Catharine Alexander, Victor Buchli, Caroline Humphrey. 2007-09-12  
Capturing a unique historical moment, this book examines the changes in urban life since the collapse of the Soviet Union from an ethnographic perspective, thus addressing significant gaps in the literature on cities, Central Asia and post-socialism. It encompasses Tashkent, Almaty, Astana and Ulan-Ude: four cities with quite different responses to the fall of the Soviet Union. Each chapter takes a theme of central significance across this huge geographical terrain, addresses it through one city and contextualizes it by reference to the other sites in this volume. The structure of the book moves from nostalgia and memories of the Soviet past to examine how current changes are being experienced and imagined through the shifting materialities, temporalities and

political economies of urban life. Privatization is giving rise to new social geographies, while ethnic and religious sensibilities are creating emergent networks of sacred sites. But, however much ideologies are changing, cities also provide a constant lived mnemonic of lost configurations of ideology and practice, acting as signposts to bankrupted futures. *Urban Life in Post-Soviet Asia* provides a detailed account of the changing nature of urban life in post-Soviet Asia, clearly elucidating the centrality of these urban transformations to citizens' understandings of their own socio-economic condition.

*The Balkans Since 1453* L.S. Stavrianos.2000-05 With a new introduction by TRAIAN STOIANOVICH A monumental work of scholarship, *The Balkans Since 1453* stands as one of the great accomplishments of European historiography. Long out of print, Stavrianos' opus both synthesizes the existing literature of Balkan studies since World War I and demonstrates the centrality of the Balkans to both European and world history, a centrality painfully apparent in recent years. At last, the cornerstone book for every student of Balkan history, culture and politics is now available once again.

**Ethnic Diversity in Europe** David Turton, Julia González.2000-01-01 Ethnic diversity is on increase in Europe; at the same time, there is evidence of growing anti-immigrant feeling in some countries, such as Spain (especially in the Southern provinces). In order to build a politically united and democratic Europe, the accommodation of ethnic diversity and the integration of ethnic minorities are both key challenges. This book tries to explain ethnic problems in Europe.

**Building Europe** Cris Shore.2013-11-05 The development of the European Union has been one of the most profound advances in European politics and society this century. Yet the institutions of Europe and the 'Eurocrats' who work in them have constantly attracted negative publicity, culminating in the mass resignation of the European Commissioners in March 1999. In this revealing

study, Cris Shore scrutinises the process of European integration using the techniques of anthropology, and drawing on thought from across the social sciences. Using the findings of numerous interviews with EU employees, he reveals that there is not just a subculture of corruption within the institutions of Europe, but that their problems are largely a result of the way the EU itself is constituted and run. He argues that European integration has largely failed in bringing about anything but an ever-closer integration of the technical, political and financial elites of Europe - at the expense of its ordinary citizens. This critical anthropology of European integration is essential reading for anyone with an interest in the culture and politics of the EU.

War, Women, and Power Marie E. Berry.2018-03-15 Rwanda and Bosnia both experienced mass violence in the early 1990s. Less than ten years later, Rwandans surprisingly elected the world's highest level of women to parliament. In Bosnia, women launched thousands of community organizations that became spaces for informal political participation. The political mobilization of women in both countries complicates the popular image of women as merely the victims and spoils of war. Through a close examination of these cases, Marie E. Berry unpacks the puzzling relationship between war and women's political mobilization. Drawing from over 260 interviews with women in both countries, she argues that war can reconfigure gendered power relations by precipitating demographic, economic, and cultural shifts. In the aftermath, however, many of the gains women made were set back. This book offers an entirely new view of women and war and includes concrete suggestions for policy makers, development organizations, and activists supporting women's rights.

*After Oppression* Vesselin Popovski,Mónica Serrano.2012 Jan Swafford's biographies of Charles Ives and Johannes Brahms have established him as a revered music historian, capable of bringing his subjects vibrantly to life. His magnificent new biography of Ludwig van Beethoven peels away layers of legend to get to the living, breathing human being who composed some of the world's most iconic music. Swafford mines sources never before used in English-language biographies to reanimate the revolutionary ferment of Enlightenment-era Bonn, where Beethoven grew up and imbibed the ideas that would shape all of his future work. Swafford then tracks his subject to Vienna, capital of European music, where Beethoven built his career in the face of critical incomprehension, crippling ill health, romantic rejection, and fate's hammer, his ever-encroaching deafness. Throughout, Swafford offers insightful readings of Beethoven's key works. More than a decade in the making, this will be the standard Beethoven biography for years to come.

Rwanda Since 1994 Hannah Grayson,Nicki Hitchcott.2019-05-17 Over the past 25 years, Rwanda has undergone remarkable shifts and transitions: culturally, economically, and educationally the country has gone from strength to strength. While much scholarship has understandably been retrospective, seeking to understand, document and commemorate the Genocide against the Tutsi, this volume gathers diverse perspectives on the changing social and cultural fabric of Rwanda since 1994.

*Encyclopedia of Transitional Justice* Lavinia Stan,Nadya Nedelsky.2022 This comprehensive three-volume reference work

The Encyclopedia of Transitional Justice, which offers 287 entries written by 166 scholars and practitioners drawn from diverse jurisdictions, includes detailed country studies; entries on transitional justice institutions and organizations; descriptions of transitional justice methods, processes, and practices; examinations of key debates and controversies; and a glossary of relevant terms and concepts. ### **International Law and the Classification of Conflicts**

Elizabeth Wilmshurst. 2012-08-02 This book comprises contributions by leading experts in the field of international humanitarian law on the subject of the categorisation or classification of armed conflict. It is divided into two sections: the first aims to provide the reader with a sound understanding of the legal questions surrounding the classification of hostilities and its consequences; the second includes ten case studies that examine practice in respect of classification. Understanding how classification operates in theory and practice is a precursor to identifying the relevant rules that govern parties to hostilities. With changing forms of armed conflict which may involve multi-national operations, transnational armed groups and organized criminal gangs, the need for clarity of the law is all-important. The case studies selected for analysis are Northern Ireland, DRC, Colombia, Afghanistan (from 2001), Gaza, South Ossetia, Iraq (from 2003), Lebanon (2006), the so-called war against Al-Qaeda, and future trends. The studies explore the legal consequences of classification particularly in respect of the use of force, detention

in armed conflict, and the relationship between human rights law and international humanitarian law. The practice identified in the case studies allows the final chapter to draw conclusions as to the state of the law on classification.

### **Complementarity in the Rome Statute and National**

**Criminal Jurisdictions** Jann K. Kleffner.2008-12-18 This book provides an in depth-examination of the principle of complementarity in the Rome Statute of the International Criminal Court and the implications of that principle for the suppression of genocide, crimes against humanity and war crimes on the domestic level. The book is set against the general background of the suppression of these crimes on the domestic level, its potential and pitfalls. It traces the evolution of complementarity and provides a critical and comprehensive analysis of the provisions in the Rome Statute and the Rules of Procedure and Evidence relevant to complementarity. In so doing, it addresses both substantive and procedural aspects of admissibility, while taking account of the early practice of the ICC. Further attention is devoted to the question whether and to what extent the Rome Statute imposes on States Parties an obligation to investigate and prosecute core crimes domestically. Finally, the book examines the potential of the complementary regime to function as a catalyst for States to conduct domestic criminal proceedings vis-à-vis core crimes.

*Austro-Hungarian Red Book* Austro-Hungarian Monarchy. Ministerium des K. und K. Hauses und des Äussern.1915

*International Institutions and Socialization in Europe* Jeffrey T. Checkel.2007-02-19 Since the path-breaking work of Karl Deutsch on security communities and Ernst Haas on European integration, it has been clear that international institutions may create senses of community and belonging beyond the nation state. Put differently, they can socialize. Yet the mechanisms underlying such dynamics have been unclear. This volume explores these mechanisms of international community building, from a resolutely eclectic stand point. Rationalism is thus the social theory of choice for some contributors, while others are more comfortable with social constructivism. This problem-driven perspective and the theoretical bridge building it are the cutting edge in international relations theory. By providing more fined-grained arguments on precisely how international institutions matter, such an approach sheds crucial light on the complex relationship between states and institutions, between rational choice and social constructivism, and, in our case, between Europe and the nation state.

Nationalism and Archaeology in Europe Margarita Díaz-Andreu, Timothy Champion.2014-10-24 Archaeologists from many

different European countries here explore the very varied relationship between nationalistic ideas and archaeological activity through the course of the nineteenth and twentieth centuries. The resurgence of nationalism was one of the most prominent features of the European political scene in the 1990s, when this book was originally published. The past provides a large supply of ideas and images to support the claims of national identity deeply rooted in remote generations. The remote past revealed by archaeology also plays a part – heroes, heroines, golden ages long disappeared, objects to admire, and sites to provoke the memory, all called on to further the cause of nationalism. Drawing on the authoritative insights of the indigenous contributors, this book examines the issues throughout modern Europe. All of the chapters share a concern to see archaeology and the study of the past as intimately related to contemporary social and political questions. The present shapes the way we think about the past but the past also provides us with evidence for thinking about the present. These issues are timeless and this comprehensive examination of a host of issues remains important for historians and those pursuing nationalistic politics.

**Memory Crash** Georgiy Kasianov.2022-01-09 This account of historical politics in Ukraine, framed in a broader European context, shows how social, political, and cultural groups have used and misused the past from the final years of the Soviet Union to 2020. Georgiy Kasianov details practices relating to history and memory by a variety of actors, including state institutions, non-governmental organizations, political parties, historians, and local governments. He identifies the main political purposes of these practices in the construction of nation and identity, struggles for power, warfare, and international relations. Kasianov considers the Ukrainian case in the context of a global increase in the politics of history and memory, with particular emphasis on a distinctive East-European variety. He pays special attention to the use and abuse of history in relations between

Ukraine, Russia, and Poland.

**Islamophobia in Muslim Majority Societies** Enes

Bayraklı, Farid Hafez. 2018-12-21 In the last decade, Islamophobia in Western societies, where Muslims constitute the minority, has been studied extensively. However, Islamophobia is not restricted to the geography of the West, but rather constitutes a global phenomenon. It affects Muslim societies just as much, due to various historical, economic, political, cultural and social reasons. *Islamophobia in Muslim Majority Societies* constitutes a first attempt to open a debate about the understudied phenomenon of Islamophobia in Muslim majority societies. An interdisciplinary study, it focuses on socio-political and historical aspects of Islamophobia in Muslim majority societies. This volume will appeal to students, scholars and general readers who are interested in Racism Studies, Islamophobia Studies, the Middle East and North Africa (MENA) region, Islam and Politics.

*Prosecuting International Crimes* Robert Cryer. 2005-06-30 This 2005 book discusses the legitimacy of the international criminal law regime. It explains the development of the system of international criminal law enforcement in historical context, from antiquity through the Nuremberg and Tokyo Trials, to modern-day prosecutions of atrocities in the former Yugoslavia, Rwanda and Sierra Leone. The modern regime of prosecution of international crimes is evaluated with regard to international relations theory. The book then subjects that regime to critique on the basis of legitimacy and the rule of law, in particular selective enforcement, not only in relation to who is prosecuted, but also the definitions of crimes and principles of liability used when people are prosecuted. It concludes that although selective enforcement is not as powerful as a critique of international criminal law as it was previously, the creation of the International Criminal Court may also have narrowed the substantive rules of international criminal law.

*Stay the Hand of Vengeance* Gary Jonathan Bass. 2014-04-28

International justice has become a crucial part of the ongoing political debates about the future of shattered societies like Bosnia, Kosovo, Rwanda, Cambodia, and Chile. Why do our governments sometimes display such striking idealism in the face of war crimes and atrocities abroad, and at other times cynically abandon the pursuit of international justice altogether? Why today does justice seem so slow to come for war crimes victims in the Balkans? In this book, Gary Bass offers an unprecedented look at the politics behind international war crimes tribunals, combining analysis with investigative reporting and a broad historical perspective. The Nuremberg trials powerfully demonstrated how effective war crimes tribunals can be. But there have been many other important tribunals that have not been as successful, and which have been largely left out of today's debates about international justice. This timely book brings them in, using primary documents to examine the aftermath of the Napoleonic Wars, World War I, the Armenian genocide, World War II, and the recent wars in the former Yugoslavia. Bass explains that bringing war criminals to justice can be a military ordeal, a source of endless legal frustration, as well as a diplomatic nightmare. The book takes readers behind the scenes to see vividly how leaders like David Lloyd George, Winston Churchill, Franklin Roosevelt, and Bill Clinton have wrestled with these agonizing moral dilemmas. The book asks how law and international politics interact, and how power can be made to serve the cause of justice. Bass brings new archival research to bear on such events as the prosecution of the Armenian genocide, presenting surprising episodes that add to the historical record. His sections on the former Yugoslavia tell--with important new discoveries--the secret story of the politicking behind the prosecution of war crimes in Bosnia, drawing on interviews with senior White House officials, key diplomats, and chief prosecutors at the war crimes tribunal for the former Yugoslavia. Bass concludes that despite the obstacles, legalistic justice for war

criminals is nonetheless worth pursuing. His arguments will interest anyone concerned about human rights and the pursuit of idealism in international politics.
