ROUTLEDGE ENCYCLOPEDIA OF INTERPRETING STUDIES Franz Pochhacker. 2015-09-25 The Routledge Encyclopedia of Interpreting Studies is the authoritative reference for anyone with an academic or professional interest in interpreting. Drawing on the expertise of an international team of specialist contributors, this single-volume reference presents the state of the art in interpreting studies in a much more fine-grained matrix of entries than has ever been seen before. For the first time all key issues and concepts in interpreting studies are brought together and covered systematically and in a structured and accessible format. With all entries alphabetically arranged, extensively cross-referenced and including suggestions for further reading, this text combines clarity with scholarly accuracy and depth, defining and discussing key terms in context to ensure maximum understanding and ease of use. Practical and unique, this Encyclopedia of Interpreting Studies presents a genuinely comprehensive overview of the fast growing and increasingly diverse field of interpreting studies.

Vom Hylealischen, Das Ist Pri-materialischen Catholischen Oder Allgemeinen Natürlichen Chaos Der Naturgemässen Alchymiae Und Alchymisten Heinrich Khunrath. 2023-07-18 This influential work on alchemy offers a unique perspective on the natural world and the role of alchemists in understanding its mysteries. With detailed descriptions of a variety of alchemical processes and techniques, this book is an important historical document and an informative read for anyone interested in the history of science. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Translation and Music Sebnem Susam-Sarajeva. 2016-04-08 Popular and multimodal forms of cultural products are becoming increasingly visible within translation studies research. Interest in translation and music, however, has so far been relatively limited, mainly because translation of musical material has been considered somewhat outside the limits of translation studies, as traditionally conceived. Difficulties associated with issues such as the 'musicality' of lyrics, the fuzzy boundaries between translation, adaptation and rewriting, and the pervasiveness of covert or unacknowledged translations of musical elements in a variety of settings have generally limited the research in this area to overt and canonized translations such as those done for the opera. Yet the intersection of translation and music can be a fascinating field to explore, and one which can enrich our understanding of what translation is and how it relates to other forms of expression. This special issue is an attempt to open up the field of translation and music to a wider audience within translation studies, and to an extent, within musicology and cultural studies. The volume includes contributions from a wide range of musical genres and languages: from those that investigate translation and code-switching in North African rap and rai, and the intertextual and intersemiotic translations revolving around Mahler's lieder in Chinese, to the appropriation and after-life of Kurdish folk songs in Turkish, and the emergence of rock'n roll in Russian. Other papers examine the reception of Anglo-American stage musicals and musical films in Italy and Spain, the concept of 'singability' with examples from Scandinavian languages, and the French dubbing of musical episodes of TV series. The volume also offers an annotated bibliography on opera translation and a general bibliography on translation and music.

Duden Redaktion Naturwissenschaft und Medizin des. 1979-01-01 Der vorliegende Medizin-Duden ist eine Gemeinschaftsarbeit des Biblio graphischen Instituts und des Georg Thieme Verlags. Er basiert auf einer Materialsammlung, die Hermann Lichtenstern im Rahmen seiner Tätigkeit als wissenschaftlicher Lektor innerhalb eines Zeitraums von fast 20 Jahren angelegt hat. Die einzelnen Wortartikel wurden in kollegialer Zusammenarbeit zwischen Medizinern und Philologen ausgearbeitet. Die Zusammenarbeit stand immer unter dem Leitgedanken, in diesem Buch die langjährige Erfahrung des Georg Thieme Verlags auf medizinisch-fachsprachlichem Gebiet und die reiche philologische Erfahrung der Dudenredaktion zum Vorteil des Benutzers miteinander zu verbinden. Das Buch ist für einen breiten Personenkreis gedacht. Es soll sowohl den erfahrenen Arzt als auch den medizinisch interessierten Laien ansprechen. Das aber bringt eine gewisse Schwierigkeit mit sich. Das Buch muß nämlich einerseits dem Arzt über den selbstverständlichen Umfang seines Fachwissens hinaus jederzeit zusätzliche Informationen liefern können, ohne sich in die beschreibende Einzeldarstellung eines Speziallexikons zu verlieren. Es soll andererseits ein geeignetes Nachschlagewerk für den Laien sein, das medizinische Fachausdrücke, denen er im täglichen Leben begegnet, in knapper und leicht verständlicher Form erklärt.

The Reception of Subtitles for the Deaf and Hard of Hearing in Europe Pablo Romero-Fresco. 2015 This volume looks at the quality of subtitles for the deaf and hard of hearing (SDH) in Europe, focusing on the UK, Spain, Italy, Poland, Denmark, France and Germany. Based on the EU-funded project DTV4ALL, the book analyses what viewers think about SDH, how they understand these subtitles and how they view them (with eye-tracking technology).

Meteorological Measurements and Instrumentation Giles Harrison. 2015-01-20 This book describes the fundamental scientific principles underlying high quality instrumentation used for environmental measurements. It discusses a wide range of in situ sensors employed in practical environmental monitoring and, in particular, those used in surface based measurement systems. It also considers the use of weather

balloons to provide a wealth of upper atmosphere data. To illustrate the technologies in use it includes many examples of real atmospheric measurements in typical and unusual circumstances, with a discussion of the electronic signal conditioning, data acquisition considerations and data processing principles necessary for reliable measurements. This also allows the long history of atmospheric measurements to be placed in the context of the requirements of modern climate science, by building the physical science appreciation of the instrumental record and looking forward to new and emerging sensor and recording technologies.

Oral Myofunctional Disorders Richard Howard Barrett, Marvin L. Hanson. 1978

TNM Supplement 1993 P. Hermanek, D.E. Henson, R.V.P. Hutter, Leslie H. Sobin. 2012-12-06 The fourth edition of the TNM Classification was published in 1987, 1 and a revision in 1992, 2 It was the result of efforts by all national TNM Committees towards a worldwide uniform classification. The classification criteria are identical with the fourth edition of the Manual for Staging of Cancer of the American Joint Committee on Cancer (AJCC). Although the classification has found wide acceptance, some workers have pointed out that individual definitions and rules for staging are not sufficiently detailed. This can lead to inconsistent application of the classification, the antithesis of standardization. This source of differences in interpretation applies not only to the classification of individual organs but also to the general rules of the system, especially to the definitions of the requirements for the pathological classification (pT, pN). These are specified only for carcinoma of the breast; for other sites, reference must be made back to the general rules, which can lead to variable interpretations. The TNM Project Committee of the UICC has addressed this problem and collected and considered the criticisms and suggestions from the national TNM Committees as well as from cancer registries, oncological associations and individual users. The result was the decision to complement the 4th edition of the TNM Classification 1.2. 3 with the publication of a TNM Supplement containing recommendations for the uniform use of TNM.

Researching Audio Description Anna Matamala, Pilar Orero. 2016-06-21 Audio description is one of the many services available to guarantee accessibility to audiovisual media. It describes and narrates images and sounds and resulting audio is then mixed with the original soundtrack. Audio description is a complex process that touches production, distribution and reception. *Researching Audio Description: New Approaches* gathers academic information and data from the many existing research projects, practices, and training across the world. The book has a telescopic approach, from two introductory chapters where accessibility in general is contextualised as a human right, and the basic concepts of disability and impairment are explored. Research on specific features for audio description script drafting are focused in the second part of the book, with a view to revising existing funded projects and their outcomes. The book offers a wealth of information on both the practical and philosophical, from different approaches in perception and cognition, and different research methodologies. Project information contained in the contributions identifies trends in current research-funded studies which will be valuable as a pointer towards future proposals. The book shows the dynamic state of audio description practice, training and research, while contributing towards the growing critical mass needed in building the field of accessibility studies.

Micrometeorology Thomas Foken. 2017-02-18 The book focusses on atmospheric processes, which directly affect human environments within the lowest 100-1000 meters of the atmosphere over regions of only a few kilometres in extent. The book is the translation into English of the third edition of the German book "Applied Meteorology - Micrometeorological Methods". It presents, with selected examples, the basics of micrometeorology applied to disciplines such as biometeorology, agrometeorology, hydrometeorology, technical meteorology, environmental meteorology, and biogeosciences. The important issues discussed in this book are the transport processes and fluxes between the atmosphere and the underlying surface. Vegetated and heterogeneous surfaces are special subjects. The author covers the areas of theory, measurement techniques, experimental methods, and modelling all in ways that can be used independently in teaching, research, or practical applications.

Innovation in Audio Description Research Sabine Braun, Kim Starr. 2020-07-29 This state-of-the-art volume covers recent developments in research on audio description, the professional practice dedicated to making audiovisual products, artistic artefacts and performances accessible to those with supplementary visual and cognitive needs. Harnessing the power of the spoken word, the projects covered in this book illustrate the value of audiovisual content descriptions not only in relation to the role of breaking down physical, cognitive and emotional barriers to entertainment, but also in informing broader media practices such as video archive retrieval, video gaming development and application software creation. The first section maps out the field, discusses key concepts in relation to new developments and illustrates their application; the second part focuses on new audiences for AD, whilst the third part covers the impact of new technologies. Throughout this book contributors focus on methodological innovation, regarding audio description as an opportunity to engage in multi-dimensional linguistic and user-experience analysis, as it intersects with and contributes to a range of other research disciplines. This book is key reading for researchers, advanced students and practitioners of audiovisual translation, media, film and performance studies, as well as those in related fields including cognition, narratology, computer vision and artificial intelligence.

Medical Speech-Language Pathology Alex F. Johnson, Barbara H. Jacobson. 2011-01-01 The second edition of *Medical Speech-Language Pathology: A Practitioner's Guide* presents the latest information on neurological communication disorders and swallowing and voice disorders in adults. The book features complete coverage of the pathophysiology of communication disorders, describing the underlying degenerative, neurogenic, and psychogenic causes of speech-language impairments. A thorough review of the theoretical issues involved provides practitioners with the conceptual framework needed to develop effective treatments that address both functionality and the quality of life of the patient. Features: Practical approaches to the diagnosis and management of common disorders such as aphasia, dysphagia, and more Strategies for rehabilitating patients with conditions such as head and neck cancer and dementia Comprehensive discussion of service delivery issues, such as the interface between speech-language pathology and psychiatry, and approaches to patient management in acute care and intensive care settings Study questions at the end of each chapter--ideal for reviewing key concepts Extensive lists of references to aid pursuit of topics in more depth *Medical Speech-Language Pathology* serves the needs of all speech-language pathologists, otolaryngologists, neurologists, psychiatrists, researchers, and students in these specialties for a single-volume reference on all aspects of care for patients with communication disorders.

Claudian: De Raptu Proserpinae Claudian. 2004-08-26 An exhaustive study of Claudian's unfinished mythological epic, with a text, apparatus criticus, and commentary. The long introduction begins with a catalogue of manuscripts; and this leads to an investigation into the manuscript tradition and the history of the poem's transmission. Dr Hall then surveys the most important printed editions of the poem. He examines various theories of dating and discusses the sources of the story. He concludes the introduction with a brief critical assessment of the form and style of the poem. Dr Hall establishes his text after an examination of all the extant manuscripts. The apparatus, though very full, is selective in that it records readings of younger manuscripts only when they offer something new. It also ignores trifling corruptions. The commentary is similarly selective. In general, it discusses everything relevant to the establishing of the text and ignores points of purely mythological and literary interest.

Music and Translation Lucile Desblache. 2019-06-04 This book explores how transformations and translations shape musical meanings, developments and the perception of music across cultures. Starting with the concept of music as multimodal text, the author understands translation as the process of transferring a text from one language - verbal or not - into another, interlingually, intralingually or intersemiotically, as well as the products that are derived from this process. She situates music and translation within their contemporary global context, examining the tensions between local and global, cosmopolitan and national, and universal and specific settings, to arrive at a celebration of the translational power of music and an in-depth study of how musical texts are translated. This book will be of interest to translation studies scholars who want to broaden their horizons, as well as to musicians and music scholars seeking to understand how cultural exchange and dissemination can be driven by translation.

Audio Description Anna Maszerowska,Anna Matamala,Pilar Orero.2014-10-15 Audio description (AD) is a narrative technique which provides complementary information regarding the where, who, what and how of any audiovisual content. It translates the visuals into words. The principal function of this ad hoc narrative is to make audiovisual content available to all: be it a guided city tour of Barcelona, a 3D film, or a Picasso painting. Audio description is one of the younger siblings of Audiovisual Translation, and it is epigonic to the audiovisual translation modality chosen. This book is the first volume on the topic written in English and it brings together an international team of leading audio description teachers, scholars, and practitioners to address the basic issues regarding audio description strategies. Using one stimulus, Quentin Tarantino's film *Inglourious Basterds* (2009), the authors analysed what, when, where and how to audio describe. The book is written in a collaborative effort, following a bottom up approach. The many issues that surfaced in the process of the analysis were grouped in broader categories represented in the ten chapters this book contains. A good example of a successful international collaboration, the volume sets a robust practical and theoretical framework for the many studies on audio description to come in the future. Considering the structure of the individual contributions, the book is not only oriented towards the identification of the challenges that await the describer, but it also offers an insight into their possible solutions.

Angiotensin II Receptor Blockade Physiological and Clinical Implications Naranjan S. Dhalla,Peter Zahradka,Ian M.C. Dixon,Robert E. Beamish.1998-10-31 The relationship between angiotensin II and hypertension was established in 1898 when angiotensin II was shown to modulate systemic blood pressure. Over the intervening decades, a complete characterization of the renin-angiotensin system (RAS) has been achieved, and our understanding of its biochemistry and physiology has led to the directed development of agents such as ACE inhibitors and receptor antagonists capable of controlling hypertension. More recently, it was shown that angiotensin II is secreted within certain tissues and that these tissue-specific systems operate independently of the systemic RAS. The novel concept that angiotensin II regulates a number of cardiovascular processes that are unrelated to blood pressure has renewed the interest of both basic and clinical scientists in angiotensin II. The association between angiotensin II and cardiac growth, in particular, has indicated that therapies currently in use for hypertension may have direct application to the treatment of heart failure. The Manitoba Cardiovascular Forum on Angiotensin Receptor Blockade in Winnipeg was convened October 18-20, 1996 to examine the clinical and basic aspects of angiotensin receptor biology as they apply to hypertension and heart failure. In addition, the potential treatment of these conditions using specific angiotensin receptor antagonists was addressed within the context of their immediate therapeutic application and future potential.

Pediatric Swallowing and Feeding Joan C. Arvedson,Linda Brodsky,Maureen A. Lefton-Greif.2019-07-26 *Pediatric Swallowing and Feeding: Assessment and Management, Third Edition* provides information to practitioners interested in and involved with children who demonstrate swallowing and feeding disorders. Since the 2002 publication of the second edition, there has been an exponential increase in the number of medically fragile and complex children with swallowing/feeding disorders. A corresponding proliferation in the related basic and clinical research has resulted in the increased appreciation of the complicated interrelationships between structures and systems that contribute to swallowing/feeding development, function, and disorders. Case studies throughout the book provide examples for decision making and highlight salient points. New to the Third Edition: * Maureen A. Lefton-Greif, PhD, CCC-SLP, BCS-S, is welcomed as co-editor. She brings extensive research expertise and clinical practice in pediatric dysphagia and feeding. * All chapters contain significant updated evidence-based research and clinical information. * New chapters focus on the genetic testing and conditions associated with swallowing and feeding disorders, and the pulmonary manifestations and management of aspiration. * World Health Organization (WHO) description of an International Classification of Functioning, Disability, and Health (ICF) sets the stage for an in-depth discussion of clinical feeding evaluation procedures, interpretation, and management decision making. *Pediatric Swallowing and Feeding* continues to be the leading text on pediatric dysphagia that provides practical information for clinicians seeing children with swallowing and feeding disorders. The overall importance of an appropriate fund of knowledge and shared experience employing team approaches is emphasized throughout this third edition as in the earlier editions of this book. From the Foreword: The Editors have recognized the advances and changes in the understanding in the information now available for the care of pediatric swallowing and feeding challenges. They have recruited an outstanding group of contributors for this newest edition. There are numerous critically important updates and additions in the third edition. They have included World Health Organization's International Classification of Functioning, Disability and Health is the functional basis in all areas of the book. This text has its importance as there has been an increased number of children with complex medical and healthcare conditions which are risk for feeding and swallowing disorders. This edition stresses the need for team approaches and also documents the use of "virtual" teams ...*Pediatric Swallowing and Feeding: Assessment and Management, Third Edition* is the fundamental holistic source for all healthcare providers providing the care for swallowing and feeding in children. This book will be utilized by all caring for children with feeding and swallowing problems throughout the world. The previous editions have been and now this updated third edition continues to be the standard source for the information concerning diagnosis and care of these children. —Robert J. Audiovisual Translation and Media Accessibility at the Crossroads .2012-01-01 This third volume in the Media for All series offers a diverse selection of articles which bear testimony to the vigour and versatility of research and developments in audiovisual translation and media accessibility. The collection reflects the critical impact of new technologies on AVT, media accessibility and consumer behaviour and shows the significant increase in collaborative and interdisciplinary research targeting changing consumer perceptions as well as quality issues. Complementing newcomers such as crowdsourcing and potentially universal emoticons, classical themes of AVT studies such as linguistic analyses and corpus-based research are featured. Prevalent throughout the volume is the impact of technology on both methodologies and content. The book will be of interest to researchers from a wide range of disciplines as well as audiovisual translators, lecturers, trainers and students, producers and developers working in the field of language and media accessibility.

Greek Medical Manuscripts - Diels' Catalogue Alain Touwaide.2020-12-07 The medical literature of ancient Greece has been much studied during the 20th century, particularly from the 1970s on. In spite of this intense activity, the search for manuscripts still relies on the catalogue compiled in the early 1900s by a group of philologists led by the German historian of Greek philosophy and medicine Hermann Diels. However useful the so-called Diels has been and still is, it is now in need of a thorough revision. The present five-tome set is a first step in that direction. Tome 1 offers a reproduction of Diels' catalogue with an index of the manuscripts. The following three tomes provide a reconstruction of the texts contained in the manuscripts listed in Diels on the basis of Diels' catalogue. Proceeding as Diels did, these three tomes distinguish the manuscripts containing texts by (or attributed to) Hippocrates (tome 2), Galen (tome 3), and the other authors considered by Diels (tome 4). Tome 5 will list all the texts listed in Diels for each manuscript in the catalogue. The present work will be a reference for all scholars interested in Greek medical literature and manuscripts, in addition to historians of medicine, medical book, medical tradition, and medical culture.

Disability, Health and Human Development Sophie Mitra.2017-09-05 This open access book introduces the human development model to define disability and map its links with health and wellbeing, based on Sen's

capability approach. The author uses panel survey data with internationally comparable questions on disability for Ethiopia, Malawi, Tanzania and Uganda. It presents evidence on the prevalence of disability and its strong and consistent association with multidimensional poverty, mortality, economic insecurity and deprivations in education, morbidity and employment. It shows that disability needs to be considered from multiple angles including aging, gender, health and poverty. Ultimately, this study makes a call for inclusion and prevention interventions as solutions to the deprivations associated with impairments and health conditions.

Agroclimatology Jerry L. Hatfield, Mannava V. K. Sivakumar, John H. Prueger. 2020-01-22 Can we unlock resilience to climate stress by better understanding linkages between the environment and biological systems? Agroclimatology allows us to explore how different processes determine plant response to climate and how climate drives the distribution of crops and their productivity. Editors Jerry L. Hatfield, Mannava V.K. Sivakumar, and John H. Prueger have taken a comprehensive view of agroclimatology to assist and challenge researchers in this important area of study. Major themes include: principles of energy exchange and climatology, understanding climate change and agriculture, linkages of specific biological systems to climatology, the context of pests and diseases, methods of agroclimatology, and the application of agroclimatic principles to problem-solving in agriculture.
