Computational Intelligence Dinesh C.S. Bisht, Mangey Ram. 2020-08-10 Computational intelligence (CI) lies at the interface between engineering and computer science; control engineering, where problems are solved using computer-assisted methods. Thus, it can be regarded as an indispensable basis for all artificial intelligence (AI) activities. This book collects surveys of most recent theoretical approaches focusing on fuzzy systems, neurocomputing, and nature inspired algorithms. It also presents surveys of up-to-date research and application with special focus on fuzzy systems as well as on applications in life sciences and neuronal computing.

A Listening Community Aquinata Böckmann. 2015-04-08 This new book by Sister Aquinata Böckmann discusses the Prologue and chapters 1, 2, and 3 of the Rule of St. Benedict. In a lectio regulae she plumbs the depths of Benedict's vision. Listen, the first word of the Prologue, is a keyword that describes the main stance of the individual monastic, the superior, and the entire community. Listening to the Scriptures and in them to Christ guides individuals and the community on how to "run on the way of God's commandments" toward the goal of communal life in and with Christ. The first three chapters of the Rule concretize the principles of this communal spirituality of listening: the importance of a rule and a pastor for maintaining the

community's attentiveness to life; the superior's responsibility to listen to individuals within the community; and the mutual listening between leader and community members, regardless of their age. As in her earlier books Sister Aquinata proves to be a true guide into the spirit of Benedict's Rule, which provides sound principles for listening in common in a community of life.

Autologous Blood Concentrates Arun K. Garg.2018-01-22 One of the main purposes of this book is to help establish standardized terminology to describe the various techniques and procedures for using platelet-rich plasma (PRP) in a variety of regenerative therapies. Such terminology has been lacking in the field until fairly recently. My hope is that such standardization will allow skeptics and advocates within and outside the medical community to debate the legitimacy of PRP use.

Models and Algorithms of Time-Dependent Scheduling

Stanisław Gawiejnowicz.2020-06-13 This is a comprehensive study of various time-dependent scheduling problems in single-, parallel- and dedicated-machine environments. In addition to complexity issues and exact or heuristic algorithms which are typically presented in scheduling books, the author also includes more advanced topics such as matrix methods in time-dependent scheduling, time-dependent scheduling with two criteria and time-dependent two-agent scheduling. The reader should be familiar with the basic notions of calculus, discrete mathematics and combinatorial optimization theory, while the book offers introductory material on theory of algorithms, NP-complete problems, and the basics of scheduling theory. The author includes numerous examples, figures and tables, he presents different classes of algorithms using pseudocode, he completes all chapters with extensive bibliographies, and he closes the book with comprehensive symbol and subject indexes. The previous

edition of the book focused on computational complexity of time-dependent scheduling problems. In this edition, the author concentrates on models of time-dependent job processing times and algorithms for solving time-dependent scheduling problems. The book is suitable for researchers working on scheduling, problem complexity, optimization, heuristics and local search algorithms.

The Reception of Plato's ›Phaedrus‹ from Antiquity to the

Renaissance Sylvain Delcomminette, Pieter d'Hoine, Marc-Antoine Gavray. 2020-07-06 This volume explores the tremendous influence of Plato's Phaedrus on the philosophical, religious, scientific and literary discussions in the West. Ranging from Plato's first readers, over the Church Fathers and the Platonic commentators, to Byzantine and Renaissance thinkers, the papers collected here introduce the reader to the first two millennia of the dialogue's reception history. Thirteen contributions by both junior and established scholars study the engagement with the Phaedrus by such major figures as Aristotle, Galen, Origen, Clemens of Alexandria, Plotinus, Augustine, Proclus, Psellus, Ficino, Erasmus, and many others. Together, they cover the wide range of topics discussed in the dialogue: the value of myth and allegory, religion and theology, love and beauty, the soul and its immortality, teaching and learning, metaphysics and epistemology, rhetoric and dialectic, as well as the role and the limits of writing. By placing the dialogue in this broad perspective, the volume will appeal to readers interested in the Phaedrus itself, as well as to classicists, literary theorists, and historians of philosophy, science and religion concerned with the dialogue's reception history and its main protagonists.

Caption Collage Kate Clem. 2021-08-24 Caption Collage:

Preposterous Poetry. This collection of abstract poetry is not only about detachment from the digital social media space, its main settings is the scrolling space itself - it is abrupt, blurry, and has no start or finish line. The captions come originally from my social

media account and are glued into poetry based on my artistic taste: think of it as an artful collage made from words on a canvas. The captions have been written over the period of 5 years. For me, they were always little works of art! In this collection they are no longer descriptions to photos but poems, with its own meaning and existence - no longer secondary. Detached from the whole combination with the photo where together they made sense, those newly collided lines become standalone carriers of new meanings - therefore, preposterous. The abstractions behind each poem carry vivid realisation of a blurry connotation behind existence in today's social media space and outside of it. I have always prioritised words, so in the world where words don't matter, here is a space for them to grow into something more powerful than a caption; an art object, a poem, a work of 5 years of my life that took place in front of everyone and everyone was looking but not actually seeing. Few people notice the caption under a photo, so here is a space for captions to exist on their own, independently. Photos are captions to my wor(L)ds. P.S. In the process of detachment of the captions from photos, no posts were damaged.

The Politics of British Stand-up Comedy Sophie Quirk.2018-11-11

This Palgrave Pivot questions how a new generation of alternative stand-up comedians and the political world continue to shape and influence each other. The Alternative Comedy Movement of the late 1970s and 1980s can be described as a time of unruly experimentation and left-wing radicalism. This book examines how alternative comedians continue to celebrate these characteristics in the twenty-first century, while also moving into a distinct phase of artistic development as the political context of the 1970s and 1980s loses its immediacy. Sophie Quirk draws on original interviews with comedians including Tom Allen, Josie Long, John-Luke Roberts and Tony Law to chart how alternative comedians are shaped by, and in turn respond to, contemporary political challenges from neoliberalism to Brexit, class controversy to commercialism. She argues that many of our assumptions about comedy's politics must be challenged and updated. This book is essential reading for anyone who wants to understand the working methods and values of today's alternative comedians.

Sovereign Authority and the Elaboration of Law in the Bible

and the Ancient Near East Dylan R. Johnson.2020-08-04 Five Pentateuchal texts (Lev 24:10-23; Num 9:6-14; Num 15:32-36; Num 27:1-11; Num 36:1-12) offer unique visions of the

elaboration of law in Israel's formative past. In response to individual legal cases, Yahweh enacts impersonal and general statutes reminiscent of biblical and ancient Near Eastern law collections. From the perspective of comparative law, Dylan R. Johnson proposes a new understanding of these texts as biblical rescripts: a legislative technique that enabled sovereigns to enact general laws on the basis of particular legal cases. Typological parallels drawn from cuneiform and Roman law illustrate the complex ideology informing the content and the form of these five cases. The author explores how latent conceptions of law, justice, and legislative sovereignty shaped these texts, and how the Priestly vision of law interacted with and transformed earlier legal traditions.

resource in early childhood literacy. It provides a broad insight into current research on the potential of digital media in inclusive settings by integrating multiple perspectives from different scientific fields: (psycho)linguistics, cognitive science, language didactics, developmental psychology, technology development, and human-machine interaction. Drawing on a large body of research, it shows that crucial early experiences in communication and social learning are the basis for later academic skills. The book is structured to display children's first developmental steps in learning in interaction with digital media and highlight various domains of early digital media use in family, kindergarten, and primary schools. This book will appeal to practitioners, academics, researchers, and students with an interest in early education, literacy education, digital education, the sociology of digital culture and social interaction, school reform, and teacher education.

History, Metaphors, Fables Hans Blumenberg.2020-06-15 History, Metaphors, and Fables collects the central writings by Hans Blumenberg and covers topics such as on the philosophy of language, metaphor theory, non-conceptuality, aesthetics, politics, and literary studies. This landmark volume demonstrates Blumenberg's intellectual breadth and gives an overview of his thematic and stylistic range over four decades. Blumenberg's early philosophy of technology becomes tangible, as does his critique of linguistic perfectibility and conceptual thought, his theory of history as successive concepts of reality, his anthropology, or his studies of literature. History, Metaphors, Fables allows readers to discover a master thinker whose role in the German intellectual post-war scene can hardly be overestimated.

Banking Associations Sladjana Sredojevic, Milan Brkovic.2022-01-19 Banking Associations, as business associations representing the interests of its members (banks) at the national level, in today's changing regulatory and economic

environment have an increasingly important role not only in the Banking sector but in the wider economy. Their increasing importance is deriving from their mission, structure and capabilities to obtain and promote different interests in the economy and wider society. It is important to understand their mission, vision and activities and ideally to include Banking Associations in the market decision making process. Countries where that had previously been the case were observed to achieve a higher level of mutual understanding of different stakeholders, and thereby produced greater value-added.

Kant on Mind, Action, and Ethics Julian Wuerth.2014 Julian

Wuerth offers a radically new interpretation of Kant's theories of mind, action, and ethics. As the author of a Copernican turn in philosophy, Kant places the mind at the center of his philosophy, and yet his theory of the mind remains an enigma. Wuerth begins with a revolutionary new interpretation of this theory of mind. This new interpretation considers a far wider range of Kant's recorded thought from across his philosophical corpus than previous interpretations and advances in tandem with an interpretation of the foundations of Kant's transcendental idealism and his metaphysics of substance. Against traditional empiricist approaches, Wuerth demonstrates that Kant argues that we are conscious of our own noumenal substantiality and simplicity. But against rational psychologists, Kant draws on the teachings of his transcendental idealism to strip the conclusions of our noumenal substantiality and simplicity of their usefulness. In the Paralogisms and elsewhere, Kant thus argues that we are not licensed to conclude our substantiality and simplicity in a sense that entails our permanence, our incorruptibility, or our immortality. Wuerth goes on to undertake a ground-breaking study of Kant's notoriously vast, complex, and opaque account of the mind's powers, and argues that Kant structures his system of philosophy on this system of the mind's powers. He next confronts the persisting stumbling block of interpretations of Kant's ethics--

Kant's theory of action--and shows that Kant rejects intellectualist theories of action that reduce practical agents to pure reason. He argues that Kant's practical agent is shown to exercise a power of choice, or *Willkur*, subject to two irreducible conative currencies: moral motives and sensible incentives. While our intellectual nature provides us with insight into morality and in turn with moral motives, our sensible nature provides us with distinct-in-kind sensible incentives. Immoral choices at odds with the former can thus nonetheless be coherent choices in harmony with the latter. Finally, Wuerth applies these new findings about Kant's theory of mind and action to an analysis of the foundations of Kant's ethics. He rejects the dominant constructivist interpretation in favor of a moral realist one. At the heart of Kant's Enlightenment ethics is his insistence that the authority of a moral law rests in our recognition of its truth, not in an alleged commitment unfettered by truth. Kant guides us to clarity regarding the moral law, across his writings and across his various formulations of the moral law, using a single elimination of sensibility process that rejects the pretences of sensibility to isolate reason and its insights into moral right and wrong. Because moral authority issues from the cognition of pure practical reason and because sensibility can present coherent alternatives to moral choice, moral virtue requires more than mere clarity in cognition. Kant instead recognizes the centrality to moral living of the ongoing cultivation of our capacities more broadly, including our capacities for cognition, feeling, desire, and character.

Theology and Practice in Early Christianity Troy W.

Martin.2020-08-12 Early Christianity did not originate in a vacuum but in a world of linguistic, social, religious, and cultural richness and diversity. The twenty-two seminal essays in this volume - some previously published, some newly written - represent almost three decades of research by Troy W. Martin to understand how early Christianity developed in the ancient world. The broad-ranging investigations in these essays give attention not only to the linguistic and rhetorical features of early Christian texts, but also to the social, philosophical, physiological, and medical contexts in which these texts were written. The essays provide new understandings of early Christian conceptions of salvation and of the virtues of faith, hope and love that characterized early Christian communities. They include new medical and physiological explanations of early Christian sacraments, pneumatology, and eschatology and furthermore investigate early Christian communal life and practice, including the veiling of women, male/female relationships, and time-keeping. The essays include reception histories that describe their influence on subsequent research and place them within the context of contemporary research and scholarship. Those familiar with the well-trodden ground of New Testament studies will find in these essays new insights and previously unexplored comparative material for understanding early Christianity and the world in which it originated.

The Claim Of Language Christopher Fynsk.2004 In *The Claim of Language*, Christopher Fynsk clearly and eloquently defends and rearticulates the humanities from a perspective that moves beyond the political and philosophical reductions of identity politics. Leaving aside polemics, Fynsk asserts that discourses in the humanities will find real ethical-political purchase when they

engage with the material events in art, literature, and social life that call for humanistic reflection.

Introduction to Information Retrieval and Quantum Mechanics
Massimo Melucci.2015-12-08 This book introduces the quantum mechanical framework to information retrieval scientists seeking a new perspective on foundational problems. As such, it concentrates on the main notions of the quantum mechanical framework and describes an innovative range of concepts and tools for modeling information representation and retrieval processes. The book is divided into four chapters. Chapter 1 illustrates the main modeling concepts for information retrieval (including Boolean logic, vector spaces, probabilistic models, and machine-learning based approaches), which will be examined further in subsequent chapters. Next, chapter 2 briefly explains the main concepts of the quantum mechanical framework, focusing on approaches linked to information retrieval such as interference, superposition and entanglement. Chapter 3 then reviews the research conducted at the intersection between information retrieval and the quantum mechanical framework. The chapter is subdivided into a number of topics, and each description ends with a section suggesting the most important reference resources. Lastly, chapter 4 offers suggestions for future research, briefly outlining the most essential and promising research directions to fully leverage the quantum mechanical framework for effective and efficient information retrieval systems. This book is especially intended for researchers

working in information retrieval, database systems and machine learning who want to acquire a clear picture of the potential offered by the quantum mechanical framework in their own research area. Above all, the book offers clear guidance on whether, why and when to effectively use the mathematical formalism and the concepts of the quantum mechanical framework to address various foundational issues in information retrieval.

Posthumanism in Italian Literature and Film Enrica Maria Ferrara.2020-08-10 As humans re-negotiate their boundaries with the nonhuman world of animals, inanimate entities and technological artefacts, new identities are formed and a new epistemological and ethical approach to reality is needed. Through twelve thought-provoking, scholarly essays, this volume analyzes works by a range of modern and contemporary Italian authors, from Giacomo Leopardi to Elena Ferrante, who have captured the shift from anthropocentrism and postmodernism to posthumanism. Indeed, this is the first academic volume investigating narrative configurations of posthuman identity in Italian literature and film.

Therefore, the images throughout the book display structures that have rarely been seen so clearly and in three dimensions,

including clear photographs of the pulp chamber, apical anatomy, and tooth channels. The body of work represented in this book pushes our understanding of internal dental anatomy--

Logical Inquiries Nicholas Rescher.2014-05-21 Logic is of course a general resource for reasoning at large. But in the first half of the twentieth century, it developed particularity with a view to mathematical applications, and the field of mathematical logic came into being and flourished. In the second half of the century, much the same happened with regard to philosophical applications. Hence philosophical logic. The deliberations of this book cover a varied but interrelated array of key issues in the field. They address the representation of information in linguistic formulation, and modes of cogent demonstration in logic, mathematics, and empirical investigation, as well as the role of logic in philosophical deliberations. Overall, the book seeks to demonstrate and illustrate the utility of logic as a productive resource for rational inquiry at large.

Symbiosis and Autonomy Franz Ruppert.2012-07 This is the third book by Professor Franz Ruppert to be translated into English. In it he explores the relationship between our symbiotic interconnectedness and our ability to be autonomous in our lives. The relationship between these two aspects of being is absolutely influenced by early attachment trauma, what Ruppert has termed 'symbiotic trauma': the trauma of an infant attempting to connect with a mother who is herself already traumatised. Additionally Ruppert gives a detailed account of the 'Constellation of the Intention', the process he has devised for working with the psychological splits induced by trauma. This is a particular form

of constellation that addresses issues of fragmentation. For those interested in trauma, and understanding how to work with it, this is truly groundbreaking work. Ruppert's thinking draws on many historical roots but is, even so, particularly unique. It takes us outside our normal ways of thinking about trauma, attachment and what it means to be a human being.
