*Chemical Enhanced Oil Recovery* Patrizio Raffa, Pablo Druetta. 2019-07-22 This book aims at presenting, describing, and summarizing the latest advances in polymer flooding regarding the chemical synthesis of the EOR agents and the numerical simulation of compositional models in porous media, including a description of the possible applications of nanotechnology acting as a booster of traditional chemical EOR processes. A large part of the world economy depends nowadays on non-renewable energy sources, most of them of fossil origin. Though the search for and the development of newer, greener, and more sustainable sources have been going on for the last decades, humanity is still fossil-fuel dependent. Primary and secondary oil recovery techniques merely produce up to a half of the Original Oil In Place. Enhanced Oil Recovery (EOR) processes are aimed at further increasing this value. Among these, chemical EOR techniques (including polymer flooding) present a great potential in low- and medium-viscosity oilfields. • Describes recent advances in chemical enhanced oil recovery. • Contains detailed description of polymer flooding and nanotechnology as promising boosting tools for EOR. • Includes both experimental and theoretical studies. About the Authors Patrizio Raffa is Assistant Professor at the University of Groningen. He focuses on design and synthesis of new polymeric materials optimized for industrial applications such as EOR, coatings and smart materials. He (co)authored about 40 articles in peer reviewed journals. Pablo Druetta works as lecturer at the University of Groningen (RUG) and as engineering consultant. He received his Ph.D. from RUG in 2018 and has been teaching at a graduate level for 15 years. His research focus lies on computational fluid dynamics (CFD).

*Buen Vivir as an Alternative to Sustainable Development* Natasha Chassagne. 2023-05-31 Until recently, the concept of Buen Vivir has only been loosely articulated by practising communities and in progressive policy in countries like Ecuador. What it actually means has been unclear, and in the case of policy, contradictory. As such there has been a lack of understanding about exactly what Buen Vivir entails, its core principles and how to put it into practice. This book, based on extensive theoretical and field research of Buen Vivir as an alternative to sustainable development, fills that gap and offers a concrete way forward. It uses an ethnographic study in Cotacachi County, in Ecuador's highland communities, to explore how communities understand and practice Buen Vivir. Combining this with what we already know about the concept theoretically, the book then develops a framework for Buen Vivir with 17 principles for practice. Exploring Buen Vivir's evolution from its indigenous origins, academic interpretations, and implications for development policy, to its role in endogenous, community-led change, this book will be of interest to policy-makers and development professionals. It will also be of great value to activists, students, and scholars of sustainability and development seeking grassroots social and environmental change.

**Drugs, Lipid Metabolism, and Atherosclerosis** David Kritchevsky. 2012-12-06 This volume comprises the proceedings of the sixth International Symposium on Drugs Affecting Lipid Metabolism. Since the first of these symposia in 1960 these triennial meetings have been devoted to the exploration of new ideas, new data and new concepts related to lipid metabolism and atherosclerosis. The sixth Meeting was particularly stimulating in this regard. The concept of the protective action of HDL was thoroughly explored within the framework of its molecular biology with data on its epidemiological as well as its in vitro mechanism(s) of

action being discussed. The action of drugs on arterial and HDL metabolism was also discussed as were newer aspects of platelet aggregation, especially as related to prostaglandins. New ground was also broken in discussions of lipid mobilization and mechanisms of hypocholesteremia. We are indebted to the many organizations who contributed generously to the support of this meeting. Among the sponsors, the assistance of the Lorenzini Foundation was especially helpful. As in all meetings of this type, the hard work of the local organizing committee was instrumental in its success. We are grateful to Mrs. Caroline Hyatt and Mr. Ralph Hollerorth for their invaluable help in the secretariat. We are also deeply indebted to Miss Jane T. Kolimaga for her expert assistance in the preparation of this volume. David Kritchevsky Rodolfo Paoletti William L. **Inedible Meat by-Products** A. M. Pearson,T. R. Dutson.2013-03-13 Inedible meat, poultry and fish by-products are major contributors to the profitability of the slaughterers and processors of all types of muscle food. Although the by-products per se make important economic contributions to the productivity of the industries, their importance varies widely between classes and for different species. As important as this may be, the utilization of the otherwise waste by-products has become even more crucial from the standpoint of protecting the environment. Hence, the editors decided that a book dealing with inedible meat, poultry and fish by-products would be useful not only to slaughterers and processors, but also to those involved in research and teaching. Focusing on the advanced stages of the useful inedible products and methods involved in their production could very well lead to new and better uses for by-products as well as in improving the environment. As in past volumes of this series, the authors are leaders in their respective fields of discussion. Their expertise provides not only a background on present industrial practices but also areas and means for improving the production of by-products.

**Modern Chemical Enhanced Oil Recovery** James Sheng.2010-11-25 Crude oil development and production in U.S. oil reservoirs can include up to three distinct phases: primary, secondary, and tertiary (or enhanced) recovery. During primary recovery, the natural pressure of the reservoir or gravity drive oil into the wellbore, combined with artificial lift techniques (such as pumps) which bring the oil to the surface. But only about 10 percent of a reservoir's original oil in place is typically produced during primary recovery. Secondary recovery techniques to the field's productive life generally by injecting water or gas to displace oil and drive it to a production wellbore, resulting in the recovery of 20 to 40 percent of the original oil in place. In the past two decades, major oil companies and research organizations have conducted extensive theoretical and laboratory EOR (enhanced oil recovery) researches, to include validating pilot and field trials relevant to much needed domestic commercial application, while western countries had terminated such endeavours almost completely due to low oil prices. In recent years, oil demand has soared and now these operations have become more desirable. This book is about the recent developments in the area as well as the technology for enhancing oil recovery. The book provides important case studies related to over one hundred EOR pilot and field applications in a variety of oil fields. These case studies focus on practical problems, underlying theoretical and modelling methods, operational parameters (e.g., injected chemical concentration, slug sizes, flooding schemes and well spacing), solutions and sensitivity studies, and performance optimization strategies. The book strikes an ideal balance between theory and practice, and would be invaluable to academicians and oil company practitioners alike. Updated chemical EOR fundamentals providing clear picture of fundamental concepts Practical cases with problems and solutions providing practical analogues and experiences Actual data regarding ranges of operation parameters providing initial design parameters Step-by-step calculation examples providing practical engineers with convenient procedures

**Biochemistry of Inflammation** J. Whicher,S.W. Evans.2012-12-06 Our understanding of inflammation has increased rapidly in recent years, due in large part to the impact of molecular biology and gene identification and cloning. This book brings together ideas from a number of different biochemical disciplines which are frequently not integrated. The first chapter gives a visual overview of the subject; the remaining chapters are organized into three themes: the effector molecules, the regulatory components and the processes of inflammation itself. This book is essential reading for the busy physician or pathologist who wants to be up-to-date with the latest developments in immunology as they affect the diagnosis and treatment of many conditions.

**Troubleshooting Injection Moulding** Vanessa Goodsgip.2004 Annotation Injection moulding is one of the most commonly used processing technologies for plastics materials. Proper machine set up, part and mould design, and material selection can lead to high quality production. This review outlines common factors to check when preparing to injection mould components, so that costly mistakes can be avoided. This review examines the different types of surface defects that can be identified in plastics parts and looks at ways of solving these problems. Useful flow charts to illustrate possible ways forward are included. Case studies and a large number of figures make this a very useful report.

*Dictionary of Abbreviations in Medical Sciences* Rolf Heister.2011-12-10 Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.
