Farthest North Fridtjof Nansen.1898 In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go farthest north. They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

The Fall of the University of Cape Town David Benatar.2021-11-09 Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this

fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux progressivism.

Food Security and Safety Olubukola Oluranti Babalola.2021-09-01 This book focuses on food security and safety issues in Africa, a continent presently challenged with malnutrition and food insecurity. The continuous increase in the human population of Africa will lead to higher food demands, and climate change has already affected food production in most parts of Africa, resulting in drought, reduced crop yields, and loss of livestock and income. For Africa to be food-secure, safe and nutritious food has to be available, well-distributed, and sufficient to meet people's food requirements. Contributors to Food Security and Safety: African Perspectives offer solutions to the lack of adequate safe and nutritious food in sub-Saharan Africa, as well as highlight the positive efforts being made to address this lack through a holistic approach. The book discusses the various methods used to enhance food security, such as food fortification, fermentation, genetic modification, and plant breeding for improved yield and resistance to diseases. Authors emphasize the importance of hygiene and food safety in food preparation and preservation, and address how

the constraints of climate change could be overcome using smart crops. As a comprehensive reference text, *Food Security and Safety: African Perspectives* seeks to address challenges specific to the African continent while enhancing the global knowledge base around food security, food safety, and food production in an era of rapid climate change.

Leonardo Pisano (Fibonacci) L. E. Sigler.2014-06-28 The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Academic Literacy Development Laura-Mihaela Muresan, Concepción Orna-Montesinos. 2021-03-11

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Vusi Vusi Thembekwayo.2018 I have learned the truth about the world: that it isn't as round as a tennis ball, and it isn't shaped like itself. It is shaped the way we shape it, according to the way we see it, the way we mould it to our ambitions and our destiny. I know the colour of who I am. I am a black man, running for my life, for my freedom, for opportunity born from struggle, possibility born from sacrifice. And I am running too, for my father, who never became what he hoped to be, and who never got to see what his children would one day become. 'Maverick. Leadership genius. Self-made millionaire. Dragon. The rock star of public speaking. Vusi Thembekwayo has been called many things. Join him in his inspiring journey from the township to the top echelons of South African business, to becoming one of youngest directors of a listed company and CEO of a boutique investment firm. As a 'Dragons' Den' judge and a sought-after public speaker across the globe, Vusi doesn't just talk business - he lives it. Now you can learn the secret of his success and how to shape your own destiny.--

Stalking the Riemann Hypothesis Dan Rockmore.2006-05-09 For 150 years the Riemann hypothesis

has been the holy grail of mathematics. Now, at a moment when mathematicians are finally moving in on a proof, Dartmouth professor Dan Rockmore tells the riveting history of the hunt for a solution. In 1859 German professor Bernhard Riemann postulated a law capable of describing with an amazing degree of accuracy the occurrence of the prime numbers. Rockmore takes us all the way from Euclid to the mysteries of quantum chaos to show how the Riemann hypothesis lies at the very heart of some of the most cutting-edge research going on today in physics and mathematics.
