*Information Materials* Manuel Kretzer.2016-11-03 This book considers the potential of new, smart materials and their use in architecture. It begins with an overview of current global tendencies (technological, demographic, and socio-anthropological) and their relevance for architectural design. Expanding upon approaches for flexible design solutions to address change and uncertainty, Dr. Kretzer begins by exploring adaptive architecture and proceeds to introduce the topic of "information materials," which encompasses smart and functional materials, their current usage, and their potential for the creation of future spaces. The second chapter provides a comprehensive overview of architectural materials, past and present, split into the topics: natural, industrial, synthetic, digital, and information materials. Chapter three introduces an educational approach for the mediation of information material usage in design courses and student workshops. The final section provides detailed information on a range of emerging material phenomena, including aerogels, bioluminescence, bio plastics, dye-sensitized solar cells, electroluminescent displays, electroactive polymers, soft robotics, and thermochromics. Each section explains its respective history, working principles, fabrication and (potential) usage in architecture and design, and provides hands-on tutorials on how to self-produce these materials, and displays class-tested experimental installations. The book concludes with an outlook into the domain of synthetic biology and the prospects of a "living" architecture. It is ideal for students of structural materials engineering, architecture, and urban planning; professionals working these in areas, as well as materials science/engineering and architecture educators.

*New Organic Architecture* David Pearson.2001 New Organic Architecture is a manifesto for building in a way that is both aesthetically pleasing and kinder to the environment. It illuminates key themes of organic architects, their sources of inspiration, the roots and concepts behind the style, and the environmental challenges to be met. The organic approach to architecture has an illustrious history, from Celtic design, Art Nouveau, Arts and Crafts, to the work of Antoni Gaudí and Frank Lloyd Wright. Today there is a response to a new age of information and ecology; architects are seeking to change the relationship between buildings and the natural environment. In the first part of his book, David Pearson provides a history and assessment of organic architecture. The second part comprises statements from thirty architects from around the world whose work is based on natural or curvilinear forms rather than the straight-line geometrics of modernism. Each statement is accompanied by full-color illustrations of one or several of the architects' built projects.

**PUSAT KOMUNITAS MOTOR DI MAKASSAR DENGAN PENDEKATAN ARSITEKTUR METAFORA** Giat Ganianto. Bangunan pusat komunitas motor akan menjadi ikon baru kota Makassar sebagai kotakomunitas motor terbanyak di Sulawesi Selatan yang memiliki berbagai fasilitas terkait sepeda motor. Untuk itu, penulis mengaplikasikan pendekatan Arsitektur Metafora Kombinasi (combined metaphors), dimana akan memberikan desain yang lebih ekspresif dengan menerapkan perumpamaan dari aktifitas komunitas motor yang dikombinasikan dengan objek sepeda motor ke dalam wujud bangunan sehingga paengunjung dapat lebih mudah memahami bahwa bangunan tersebut merupakan wadah komunitas motor.

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution Ratri Wulandari, Idhar Resmadi, Vika Harisianti, Rahmiati Aulia, Riky Taufik Afif, Gema Ari Prahara, Aulia Ibrahim Yeru.2021-08-25 The 7th Bandung Creative Movement conference presented the theme Dynamics of Industrial Revolution 4.0 which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that is more ecologically 'smart.' We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward discussions on dynamic changes, ups and downs, innovations, relations of industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.

UTILITAS BANGUNAN Yoyok Rahayu Basuki. Utilitas bangunan adalah suatu kelengkapan fasilitas bangunan yang digunakan untuk menunjang tercapainya unsur-unsur kenyamanan, kesehatan, keselamatan, kemudahan, komunikasi, dan mobilitas dalam bangunan.

*Human Dimension and Interior Space* Julius Panero, Martin Zelnik.2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Penataan parkir : mewujudkan penataan lingkungan kota Fedrickson Haradongan.2023-05-16 Akibat dari kompleksnya sistem dan prosedur yang harus dilakukan maka penambahan penduduk di kota-kota besar seringkali tidak diikuti dengan perluasan kota. Di samping bertambahnya jumlah penduduk, penambahan jumlah kendaraan juga menyebabkan wilayah kota semakin padat, sesak dan macet, sementara itu sistem transportasi dan lalu lintas yang ada pada umumnya belum efektif untuk mengendalikannya.

Behavioral Architecture Clovis Heimsath.1977 Based on a new concept in architecture, this volume shows how to use the findings of behavioral psychology to create more meaningful architectural designs. It is one of the first synthesis by a practicing architect of what has been learned about the interaction of architecture and human behavior. In the process the author looks at old problems in new ways, adding a new dimension to present architectural practices ... Although its approach to architecture is unique, the book is primarily a practical work. Its main points are solidly supported by a detailed behavioral design process model--a step-by-step procedure for using behavior in contemporary design--Jacket.

**Architects' Data** Ernst Neufert, Peter Neufert. 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

**Buildings for the Performing Arts** Ian Appleton. 2012-05-31 This Design and Development Guide is an essential book for those who are involved in the initiation, planning, design and building of facilities for the various performing arts, from local to metropolitan locations. It includes the stages in the development, decisions to be taken, information requirements, feasibility and advice necessary in the design and development of a new or adapted building. Part one of this guide provides the background information about the organisation of the performing arts, the prevailing issues, the client and various building types. In the second part, the author deals with the components of design and development, identifying the roles of the client, advisors and consultants, the stages to be achieved, including client's proposal feasibility, the process of briefing, design and building and eventually hand-over and opening night, with a consideration of the building use. Studies include the assessment of demand, site requirements, initial brief, building design and financial viability. Information requirements, as design standards, for the auditorium and platform/stage, and the support facilities, are included. Separate studies focus on the adaptation of existing buildings and provision for children and young persons. THE CONTENT COVERS A WIDE RANGE OF PERFORMING ARTS (CLASSICAL MUSIC, POP/ROCK, JAZZ, MUSICALS, DANCE, DRAMA) AND PROVIDES INFORMATION ON EACH AS AN ART FORM AND NECESSITIES TO HOUSE PERFORMANCES.

**Pemanfaatan Alun-Alun Kota Sebagai Area UMKM** Ar. Atiek Untarti, Ir., M.Ars., IAI., Nabila Tsaltsa Angganararas, S.Ars.. 2023-11-17 Buku yang berjudul Pemanfaatan Alun-Alun Kota Sebagai Area UMKM merupakan karya dari Atiek Untarti & Nabila Tsaltsa Angganararas. UMKM adalah salah satu unsur penyumbang terbesar bagi perekonomian daerah. Di mana perkembangan suatu kota, salah satunya ditentukan oleh pembangunan ekonomi di dalamnya. Untuk mewujudkan UMKM yang dapat mendukung pembangunan ekonomi kota, UMKM harus memiliki tempat yang cocok dan lokasi yang berpotensi untuk memasarkan produknya sehingga dapat menarik banyak investor maupun pengunjung yang akan membuat perputaran penjualan dapat berjalan dengan lancar dan memajukan UMKM daerah ke pasar internasional. UMKM tentunya membutuhkan lebih banyak tempat yang layak untuk menampung UMKM yang belum memiliki tempat. Salah satunya adalah dengan cara menggunakan kembali beberapa bangunan yang tidak terpakai dan terbengkalai. Karena beberapa lokasi di mana bangunan yang tidak layak ini berdiri, sebenarnya merupakan kawasan yang berpotensi tinggi, yang mungkin saja dapat mendukung keberlangsungan UMKM daerah. Apabila UMKM berkembang dengan pesat, bukan tidak mungkin apabila UMKM daerah dapat memasuki pasar internasional di masa mendatang. Pemanfaatan lahan kosong dan bangunan terbengkalai juga termasuk ke dalam rencana rekonstruksi tata kota. Karena merancang suatu bangunan yang digunakan sebagai wadah baru bagi UMKM dapat menumbuhkan dan mengembangkan usaha di tempat yang lebih baik, serta membuat fungsi bangunan menjadi berkarakter yang sesuai dengan kriteria-kriteria dalam strategi arsitektur kontemporer bertepatan dengan desain universal yang sudah ditetapkan. Buku ini terdiri dari beberapa pembahasan, diantaranya: · Rekonstruksi Tata Kota Sebagai Wadah UMKM · DARGO Plaza Sebagai Area UMKM · Desain Universal dan Studi Preseden · Tindak Lanjut Perancangan · Ulasan Perancangan · Konsepsi Perancangan Spesifikasi Buku : Kategori : Arsitektur Penulis : Ar.
