How to Be Italian Maria Pasquale.2021-11-02 What does it mean to be Italian? Is it pausing to enjoy an aperitivo or gelato? A passeggiata down a laneway steeped in history? An August spent tanning at the beach? This book is a celebration of the Italian lifestyle – an education in drinking to savour the moment, travelling indulgently, and cherishing food and culture. A lesson in the dolce far niente: the sweetness of doing nothing. We may not all live in the bel paese, but anyone can learn from the rich tapestry of life on the boot. From the innovation of Italian fashion and design, the Golden Age of its cinema to the Roman Empire’s cultural echoes (and some very good espresso), take a dip into the Italian psyche and learn to eat, love, dress, think, and have fun as only the Italians can.

Cooking Couture Gisella Borioli,Giovanni Gastel,Matias Perdomo.2013 What happens when cuisine blends with haute couture. Can you describe an item of clothing in terms of its flavor, its odor? Or the taste of a fabric, that desire which makes your mouth water? Sampling a dish of the latest creative cuisine, can you be surprised by its fanciful texture, enchanted by its masterly form? In short, can the language of the contemporary world, so accustomed to collusions, mixtures, contrasts and allusions, come up with new recipes that bring together two such apparently incompatible worlds as designer clothing and signature cuisine? Let's try to combine, for once, fashion and food in their most up-to-date interpretations. The collection of haute couture dishes invented by Matias Perdomo, one of the most inventive of the latest generation of chefs, holds a dialogue with the creations of a dozen contemporary designers. Ennio Capasa, Angela Missoni, Agatha Ruiz de la Prada, Dean and Dan Caten, Prada, Giorgio Armani, Anna Molinari, Donatella Versace, Marni, Dolce and Gabbana, and Antonio Marras have given Matias the cues for his unexpected creations.

Alternative Food Networks Alessandro Corsi, Filippo Barbera, Egidio Dansero, Cristiana Peano. 2018-10-17 In recent years, Alternative Food Networks (AFNs) have been a key issue both in the scientific community and in public debates. This is due to their profound implications for rural development, local sustainability, and bio-economics. This edited collection discusses what the main determinants of the participation of operators – both consumers and producers – in AFNs are, what the conditions for their sustainability are, what their social and environmental effects are, and how they are distributed geographically. Further discussions include the effect of AFNs in structuring the food chain and how AFNs can be successfully scaled up. The authors explicitly take an interdisciplinary approach to analyse AFNs from different perspectives, using as an example the Italian region of Piedmont, a particularly interesting case study due to the diffusion of AFNs in the area, as well as due to the fact that it was in this region that the 'Slow Food' movement originated.

Homosexuality and Italian Cinema Mauro Giori. 2017-11-18 This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Geography and Revolution David N. Livingstone,Charles W. J. Withers.2010-08-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

Innovation Contested Benoît Godin.2015-01-09 Innovation is everywhere. In the world of goods (technology), but also in the world of words: innovation is discussed in the scientific and technical literature, but also in the social sciences and humanities. Innovation is also a central idea in the popular imaginary, in the media and in public policy. Innovation has become the emblem of the modern society and a panacea for resolving many problems. Today, innovation is spontaneously understood as technological innovation because of its contribution to economic progress. Yet for 2,500 years, innovation had nothing to do with economics in a positive sense. Innovation was pejorative and political. It was a contested idea in philosophy, religion, politics and social affairs. Innovation only got de-contested in the last century. This occurred gradually beginning after the French revolution. Innovation shifted from a vice to a virtue. Innovation became an instrument for achieving political and social goals. In this book, Benoît Godin lucidly examines the representations and meaning(s) of innovation over time, its diverse uses, and the contexts in which the concept emerged and changed. This history is organized around three periods or episteme: the prohibition episteme, the instrument episteme, and the value episteme.

Ardeth #03 (II - Fall 2018) AA.VV..2018-11-30 The discussion of architecture, with all the visibility of its objects, tends to downplay the invisible flows of money that sustain its production. It is as if the dependency on economic forces is too much to face up to; better then to celebrate the catalytic genius of the architectural hero and then the glorious outputs, and try to ignore everything else that goes on in between. This issue intends to probe the in-between space of the operations of architecture, examining the intersection of the projects of architecture with economies, and with their associated social and political contexts and implications. It is only through a better understanding of the way that contemporary economics cut across architectural operations that one can learn to deal with these dominant forces in a resistive and transformational manner.

Critique of Architecture Douglas Spencer.2021-01-18 Critique of Architecture offers a renewed and radical theorization of the relations between capital and architecture. It explicates the theoretical gymnastics through which architecture legitimates its services to neoliberalism, examines the discipline's production of platforms for happily compliant consumers, and challenges its entrepreneurial self-image. Critique of Architecture also addresses the discourse of autonomy, questioning its capacity to engage effectively with the terms and conditions of capitalism today, analyses the post-political turns of contemporary architecture theory, and reckons with the legacies and limitations of critical theory.
