Botticelli Past and Present Ana Debenedetti, Caroline Elam. 2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. Botticelli Past and Present engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

A Grammar of Luwo Anne Storch.2014-10-15 This book is a description of Luwo, a Western Nilotic language of South Sudan. Luwo is used by multilingual, dynamic communities of practice as one language among others that form individual and flexible repertoires. It is a language that serves as a means of expressing the Self, as a medium of art and self-actualization, and sometimes as a medium of writing. It is spoken in the home and in public spaces, by fairly large numbers of people who identify themselves as Luwo and as members of all kinds of other groups. In order to provide insights into these dynamic and diverse realities of Luwo, this book contains both a concise description and analysis of the linguistic features and structures of Luwo, and an approach to the anthropological linguistics of this language. The latter is presented in the form of separate chapters on possession, number, experiencer constructions, spatial orientation, perception and cognition. In all sections of this study, sociolinguistic information is provided wherever this is useful and possible, detailed information on the semantics of grammatical features and constructions is given, and discussions of theory-oriented approaches to various linguistic features of Luwo are presented.

Early Printed Narrative Literature in Western Europe Bart Besamusca, Elisabeth de Bruijn, Frank Willaert. 2019-11-05 The essays in this volume are concerned with early printed narrative texts in Western Europe. The aim of this book is to consider to what extent the shift from hand-written to printed books left its mark on narrative literature in a number of vernacular languages. Did the advent of printing bring about changes in the corpus of narrative texts when compared with the corpus extant in manuscript copies? Did narrative texts that already existed in manuscript form undergo significant modifications when they began to be printed? How did this crucial media development affect the nature of these narratives? Which strategies did early printers develop to make their texts commercially attractive? Which social classes were the target audiences for their editions? Around half of the articles focus on developments in the history of early printed narrative texts, others discuss publication strategies. This book provides an impetus for cross-linguistic research. It invites scholars from various disciplines to get involved in an international conversation about fifteenth- and sixteenth-century narrative literature.

The Spirit of Cities Daniel A. Bell, Avner de-Shalit. 2013-10-27 A lively and personal book that returns the city to political thought Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. *The Spirit of Cities* revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at

nine modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. *The Spirit of Cities* is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of civicism, the pride city dwellers feel for their city and its ethos over that of others.

The Impact of Latin Culture on Medieval and Early Modern Scottish Writing Ian Johnson, Alessandra Petrina.2018-04-30 In the late medieval and early modern periods, Scottish latinity had its

distinctive stamp, most intriguingly so in its effects upon the literary vernacular and on themes of national identity. This volume shows how, when viewed through the prism of latinity, Scottish textuality was distinctive and fecund. The flowering of Scottish writing owed itself to a subtle combination of literary praxis, the ideal of eloquentia, and ideological deftness, which enabled writers to service a burgeoning national literary tradition.

Doctoral Dissertations on South Asia, 1966-1970 Frank Joseph Shulman.2020-09-24 This volume gathers the harvest of recent doctoral dissertations on South Asia, principally from North America and Western Europe, but exclusive of theses from universities in South Asia itself. The yield—1305 dissertations based on research carried out during the early and middle nineteen-sixties and brought to completion between 1966 and 1970—is even greater than one would have guessed, eloquent testimony to the expansion of South Asian studies in the West over the last decade. Doctoral Dissertations on South Asia seeks to be a comprehensive compilation of recently completed theses dealing in whole or in part with the former civilizations and the contemporary affairs of Ceylon, India, Nepal and Pakistan. At the same time, this work provides striking testimony of the dynamic growth of Asian Studies outside the subcontinent and particularly in the United States, Great Britain, Germany and France, where most of the major centers of scholarship are presently found. It is an interdisciplinary work covering the natural sciences as well as the humanities and social sciences.

Expanding the Lexicon Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-Froemel. 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

Ruckers Grant O'Brien. 1990-08-23 The name of Ruckers is as important to early keyboard instruments as Stradivarius is to strings. This book describes in close detail the art and technique of the Ruckers family, who produced harpsichords and virginals throughout a period of over 100 years. Dr O'Brien provides detailed information about the construction and decoration of Ruckers harpsichords and virginals, as well as the numbering, pitch, stringing, and the determination of the original state of their instruments. Like Stradivarius violins, Ruckers instruments were later altered, and the nature and musical significance of these alterations are discussed, as is the influence of the Ruckers style on later building practice. The instruments in their original and altered states are considered in relation to the music of the time and to contemporary performance practice. The text

is richly illustrated with diagrams and pictures of original instruments, and with plan-view photographs reproduced at a scale of 1:10. The book also contains a partially illustrated catalogue of authentic and fake instruments, followed by extensive appendices.

Historical journey in a linguistic archipelago Emilie Aussant, Jean-Michel Fortis. This volume offers a selection of papers presented during the 14th International Conference on the History of the Language Sciences (ICHoLS XIV, Paris, 2017). Part I brings together studies dealing with descriptive concepts. First examined is the notion of “accidens” in Latin grammar and its Greek counterparts. Other papers address questions with a strong echo in today’s linguistics: localism and its revival in recent semantics and syntax, the origin of the term “polysemy” and its adoption through Bréal, and the difficulties attending the description of prefabs, idioms and other “fixed expressions”. This first part also includes studies dealing with representations of linguistic phenomena, whether these concern the treatment of local varieties (so-called patois) in French research, or the import and epistemological function of spatial representations in descriptions of linguistic time. Or again, now taking the word “representation” literally, the visual display of grammatical relations, in the form of the first syntactic diagrams. Part II presents case studies which involve wider concerns, of a social nature: the “from below” approach to the history of Chinese Pidgin English underlines the social roles of speakers and the diversity of speech situations, while the scrutiny of Lhomond’s Latin and French textbooks demonstrates the interplay of pedagogical

practice, cross-linguistic comparison and descriptive innovation. An overview of early descriptions of Central Australian languages reveals a whole spectrum of humanist to positivist and antihumanist stances during the colonial age. An overarching framework is also at play in the anthropological perspective championed by Meillet, whose socially and culturally oriented semantics is shown to live on in Benveniste. The volume ends with a paper on Trần Đức Thảo, whose work is an original synthesis between phenomenology and Marxist semiology, wielded against the “idealistic” doctrine of Saussure.

The Emergence of Pressure Blade Making Pierre M. Desrosiers.2012-03-13 Human development is a long and steady process that began with stone tool making. Because of this skill, humans were able to adapt to climate changes, discover new territories, and invent new technologies. Pressure knapping is the common term for one method of creating stone tools, where a larger device or blade specifically made for this purpose is used to press out the stone tool. Pressure knapping was invented in different locations and at different points in time, representing the adoption of the Neolithic way of life in the Old world. Recent research on pressure knapping has led for the first time to a global thesis on this technique. The contributors to this seminal work combine research findings on pressure knapping from different cultures around the globe to develop a cohesive theory. This contribution to this volume represents a significant development to research on pressure knapping, as well as the field of lithic studies in general. This work will be an important reference for anyone studying the Paleolithic, Mesolithic, and Neolithic periods, lithic studies, technologies, and more generally, cultural transmission.

illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.

Nobiltà Di Dame Fabritio Caroso.1986 Fabritio Caroso was dancing master to some of the greatest princely families of Italy, and Nobiltà di dame, his sumptuous collection of ballroom dances and their music, reflects an age that believed that the person of high rank should be a work of art, uniting strength and beauty. Caroso's detailed instructions (including rules for steps, style and etiquette, and forty-eight actual choreographies) are unequalled by any contemporary manual in their specificity and clarity. Most dances are preceded by an engraving showing the opening position and illustrating many aspects of dress, posture, and gesture. A full scholarly apparatus, giving new information unavailable elsewhere, makes the book even more valuable to dancers and to students of dance and music at the junction of the Renaissance and Baroque eras.

Driving Europe Frank Schipper.2008 Today we can hardly imagine life in Europe without roads and the automobiles that move people and goods around. In fact, the vast majority of movement in Europe takes place on the road. Travelers use the car to explore parts of the continent on their holidays, and goods travel large distances to reach consumers. Indeed, the twentieth century has deservedly been characterized as the century of the car. The situation looked very different around 1900. People crossing national borders by car encountered multiple hurdles on their way. Technically, they imported their vehicle into a neighboring country and had to pay astronomical import duties. Often they needed to pass a driving test in each country they visited. Early on, automobile and touring clubs sought to make life easier for traveling motorists. International negotiations tackled the problems arising from differing regulations. The resulting volume describes everything from the standardized traffic signs that saved human lives on the road to the Europe bus taking tourists from Stockholm to Rome in the 1950s. *Driving Europe* offers a highly original portrait of a Europe built on roads in the course of the twentieth century.

Not all free books are copyright free. There are other reasons publishers may choose to make a book free, such as for a promotion or because the author/publisher just wants to get the information in front of an audience. Here's how to find free books (both public domain and otherwise) through Google Books. eBookLobby is a free source of eBooks from different categories like, computer, arts, education and business.
