Lequeu Philippe Duboy.1987 Jean-Jacques Lequeu does in fact hide behind the most enigmatic and controversial smile in the history of art, writes Philippe Duboy in a book that is one of the most tantalizing examples of architectural investigation ever produced. It is an extraordinary compilation - part speculative biography, part meticulous research, with hundreds of intriguing drawings, many in color - that unravels the mystery of this eighteenth-century maverick artist whose drawings have established him variously as a visionary architect associated with Boullée and Ledoux, forerunner of surrealism, and inventor of bad taste. Lequeu's architectural drawings from the legendary portfolios Architecture civile and Nouvelle methode are presented here in their entirety, along with his Lewd Figures, perhaps the oddest feature of the whole collection. The drawings are accompanied by long captions, misspelt and ungrammatical, but written in a flawless bureaucratic hand. The artist's marginalia provide insights into his visions, which seem dominated by an obsession with petrified forms and a recurring preoccupation with sex. Interleaved with the drawings are curious autobiographical papers. And it is here that Duboy's investigation of Lequeu begins to reveal strange clues. He discovers that Lequeu was not

an architect at all but a government bureaucrat, a draftsman who ended up living in a brothel. Between the brothel and the obscure office from which he was eventually fired, he produced his encyclopedia of the universe - bizarre portraits of nuns baring their breasts and other lewd figures, and architectural fantasies of vast imaginary cities. Duboy takes his study further, into the realm of Charles Fourier and his brother-in-law Anthelme Brillat-Savarin and from there to the world of the dadaists, surrealists, and futurists, particularly the circles of Marcel Duchamp and Le Corbusier. He suggests that Duchamp and Raymond Rousell tampered with the Lequeu drawings to concoct a character and oeuvre even more puzzling. There are glimpses of Duchamp's convolutions of mind that will stir a reassessment of his work. Duchamp emerges here, for the first time, as an intrepid and unwavering despiser of Le Corbusier. Twentieth-century reputations are as much at stake in this study as those of the eighteenth-century artist, notes Robin Middleton. Philippe Duboy is Professor of the History of Cities, Paris-Belleville School of Architecture.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success.2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and

the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Federal Response to Hurricane Katrina .2006 The objective of this report is to identify and establish a roadmap on how to do that, and lay the groundwork for transforming how this Nation- from every level of government to the private sector to individual citizens and communities - pursues a real and lasting vision of preparedness. To get there will require significant change to the status quo, to include adjustments to policy, structure, and mindset--P. 2.

Owners of the Map Claudio Sopranzetti.2018 On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the

entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

think, plan and improvise. Here you will find practical advice on how to use your head as well as your hands when operating on a massively bleeding trauma patient. The first part of this book presents some general principles of trauma surgery. The second part is about trauma surgery as a contact sport. Combinatory Linguistics Cem Bozsahin. 2013-01-01 The book examines to what extent the mediating relation between constituents and their semantics can arise from combinatory knowledge of words. It traces the roots of Combinatory Categorical Grammar, and uses the theory to promote a Humean question in linguistics and cognitive science: Why do we see limited constituency and dependency in natural languages, despite their diversity and potential infinity? A potential answer is that constituents and dependencies might have arisen from a single resource: adjacency. The combinatory formulation of adjacency constrains possible grammars.

Divine Names on the Spot II F Porzia, C Bonnet. 2023-09-14 English summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an archipelago, images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the Mapping Ancient Polytheisms project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les récits sont intimement liés et volontiers polysemiques. En tant qu'éléments d'information sur les dieux, ils véhiculent des fragments de connaissance et constituent autant de tentatives d'interprétation de la complexité multiforme du monde divin. Dans ce que Robert Parker décrit comme un archipel, les images et les récits sont comme des boussoles qui facilitent la cartographie des dieux. Les différentes contributions rassemblées dans ce volume, traitant des mondes grec et

semitique (les deux principaux domaines abordés dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces différentes sémantiques, afin de mettre en évidence les spécificités et les points communs entre langage onomastique et langage iconographique.
