

Classroom Management Jim Scrivener

Classroom Management That Works Robert J. Marzano, Jana S. Marzano. 2003-09-15 How does classroom management affect student achievement? What techniques do teachers find most effective? How important are schoolwide policies and practices in setting the tone for individual classroom management? In this follow-up to *What Works in Schools*, Robert J. Marzano analyzes research from more than 100 studies on classroom management to discover the answers to these questions and more. He then applies these findings to a series of Action Steps--specific strategies that educators can use to * Get the classroom management effort off to a good start, * Establish effective rules and procedures, * Implement appropriate disciplinary interventions, * Foster productive student-teacher relationships, * Develop a positive mental set, * Help students contribute to a positive learning environment, and * Activate schoolwide measures for effective classroom management. Marzano and his coauthors Jana S. Marzano and Debra Pickering provide real stories of teachers and students in classroom situations to help illustrate how the action steps can be used successfully in different situations. In each chapter, they also review the strengths and weaknesses of programs with proven track records. With student behavior and effective discipline a growing concern in schools, this comprehensive analysis is a timely guide to the critical role of classroom management in student learning and achievement. These solutions are based on a combination of research and the author's own experience as a public school teacher who gets up every morning and works with his own students.

Classroom Management for All Teachers Ennio Cipani.2008 This book is based on the idea that a behavior management plan can be as effective in preventing problematic classroom behavior as it is in managing it and utilizes an evidence-based approach to solving problems. It offers easy-to-implement, research-based plans for addressing problematic classroom behavior in two key areas: on-task time/assignment completion and disruption/rule violation. The author introduces a dozen behavior management plans in non-technical language. This eliminates the need for extensive training in behavior therapy or learning theory.

FEATURES: An introductory chapter addressing evidence-based practice in education-Explaining the scientific nature of the book's plans and introducing the rationale behind the use of such practice. A chapter on the beeper system for enhancing student engagement. Introduces a recently developed device, the MotivAider-explains how it works, when it is best used, and what can be expected when it is used. A common format in each plan chapter (Chapters 2 -12)-Description, terms, apparatus, baseline measurement, procedures, how it works, additional considerations, hypothetical cases, what if, and forms. Facilitates comparison among plans-helps future teachers develop their intuitive sense for what works with which learners, and why. Discussion of a dual plan strategy for addressing disruptive behavior-Teaming a plan for stopping the disruptive behavior with one for encouraging desired behavior. Illustrates the advantage in tackling certain problem behaviors on two fronts-offers specific

Teaching English in Africa Anderson, Jason.2016-04-30 Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.
