**International Criminal Justice and the Politics of Compliance** Christopher K. Lamont.2016-04-22 International Criminal Justice and the Politics of Compliance provides a comprehensive study of compliance with legal obligations derived from the International Criminal Tribunal for the former Yugoslavia's (ICTY) Statute and integrates theoretical debates on compliance into international justice scholarship. Through the use of three models of compliance based on coercion, self-interest and norms, Christopher Lamont explores both the domestic politics of war crimes indictments and efforts by external actors such as the European Union, the United States and the Tribunal itself to induce compliance outcomes. He examines whether compliance outcomes do or do not translate into a changed normative understanding of international criminal justice on the part of target states.

**Growing in the Shadow of Antifascism** Kata Bohus,Peter Hallama,Stephan Stach.2022-07-26 Reined into the service of the Cold War confrontation, antifascist ideology overshadowed the narrative about the Holocaust in the communist states of Eastern Europe. This led to the Western notion that in the Soviet Bloc there was a systematic suppression of the memory of the mass murder of European Jews. Going beyond disputing the mistaken opposition between “communist falsification” of history and the “repressed authentic” interpretation of the Jewish catastrophe, this work presents and analyzes the ways as the Holocaust was conceptualized in the Soviet-ruled parts of Europe. The authors provide various interpretations of the relationship between antifascism and Holocaust memory in the communist countries, arguing that the predominance of an antifascist agenda and the acknowledgment of the Jewish catastrophe were far from mutually exclusive. The interactions included acts of negotiation, cross-referencing, and borrowing. Detailed case studies describe how both individuals and institutions were able to use anti-fascism as a framework to test and widen the boundaries for discussion of the Nazi genocide. The studies build on the new historiography of communism, focusing on everyday life and individual agency, revealing the formation of a great variety of concrete, local memory practices.

**Collective Memories in War** Elena Rozhdestvenskaya,Victoria Semenova,Irina Tartakovskaya,Krzysztof Kosela.2015-12-14 This edited collection offers an empirical exploration of social memory in the context of politics, war, identity and culture. With a substantive focus on Eastern Europe, it employs the methodologies of visual studies, content and discourse analysis, in-depth interviews and surveys to substantiate how memory narratives are composed and rewritten in changing ideological and political contexts. The book examines various historical events, including the Russian-Afghan war of 1979-89 and World War II, and considers public and local rituals, monuments and museums, textbook accounts, gender and the body. As such it provides a rich picture of post-socialist memory construction and function based in interdisciplinary memory studies.

**Veterans, Victims, and Memory** Joanna Wawrzyniak.2015-12-15 In the vast literature on how the Second World War has been remembered in Europe, research into what happened in communist Poland, a country most affected by the war, is surprisingly scarce. The long gestation of Polish narratives of heroism and sacrifice, explored in this book, might help to understand why the country still finds itself in a -mnemonic standoff- with Western Europe, which tends to favour imagining the war in a civil, post-Holocaust, human rights-oriented way. The specific focus of this book is the organized movement of war veterans and former prisoners of Nazi camps from the 1940s until the end of the 1960s, when the core narratives of war became well established.

**South Africa's Struggle to Remember** Kim Wale.2016-04-14 Transitional justice studies typically focuses on how nations remember, face and deal

with histories of past violence. This book, however, shifts the frame from national discourses of transitional justice onto local memory actors who attempt to engage with these broader systems of meaning from below. The case study is based on the memory struggles of individuals and groups who are attempting to gain access to the discourses and benefits associated with dominant memory identities of 'victim' and 'veteran' in the context of post-transition South Africa. They share a common history of squatter resistance in the Western Cape in the 1980s and a common struggle for inclusion in dominant memory frameworks. The main theme of this book is the politics of memory, as it relates to the conversation between national and local memory. Integrated within this theme is the further theme of alternative histories and counter-memories of struggle from below. In focusing on counter memories of violence and transition this book aims to tell a different version of South African liberation history in relation to the dominant narrative. It analyses local memory actors' attempts to bring their lived histories into conversation with national discourses of reconciliation and the national liberation struggle. In doing so it unpacks a memory paradox occurring within these narratives, which highlights the politics of inclusion and exclusion within the frames of transitional justice knowledge. On the one hand this alternate story exposes the paradox between local and national memory while on the other hand it brings into focus the local experience of the intersection between international transitional justice discourses and national transition politics. This book will be of local and international interest to scholars and students in the field of transitional justice, memory politics, national liberation struggle and South African historiography. It will also be of interest to a broader South Africa public, as it offers a deeper understanding of South Africa's history, which challenges taken for granted transitional justice frames of knowledge.

**South Africa's 'Border War'** Gary Baines.2014-02-27 South Africa's 'Border War' provides a timely study of the 'war of words' waged by retired South African Defence Force (SADF) generals and other veterans against critics and detractors. The book explores the impact of the 'Border War' on South African culture and society during apartheid and in the new dispensation and discusses the lasting legacy or 'afterlife' of the war in great detail. It also offers an appraisal of the secondary literature of the 'Border War', supplemented by archival research, interviews and an analysis of articles, newspaper reports, reviews and blogs. Adopting a genuinely multidisciplinary approach that borrows from the study of history, literature, visual culture, memory, politics and international relations, South Africa's 'Border War' is an important volume for anyone interested in the study of war and memory or the modern history of South Africa.

**Transitional Justice and the Politics of Inscription** Joseph Robinson.2017-08-04 Taking Northern Ireland as its primary case study, this book applies the burgeoning literature in memory studies to the primary question of transitional justice: how shall societies and individuals reckon with a traumatic past? Joseph Robinson argues that without understanding how memory shapes, moulds, and frames narratives of the past in the minds of communities and individuals, theorists and practitioners may not be able to fully appreciate the complex, emotive realities of transitional political landscapes. Drawing on interviews with what the author terms memory curators, coupled with a robust analysis of secondary literature from a range of transitional cases, the book analyses how the bodies of the dead, the injured, and the traumatised are written into - or written out of - transitional justice. The author argues that scholars cannot appreciate the dynamism of transitional memory-space unless they first engage with the often silenced or marginalised voices whose memories remain trapped behind the antagonistic politics of fear and division. Ultimately challenging the imperative of national reconciliation, the author argues for a politics of public memory that incubates at multiple nodes of social production and can facilitate a vibrant, democratic debate over the ways in which a traumatic past can or should be remembered.

**Social Memory and War Narratives** C. Weber.2015-04-23 The Vietnam War has had many long-reaching, traumatic effects, not just on the

veterans of the war, but on their children as well. In this book, Weber examines the concept of the war as a social monad, a confusing array of personal stories and public histories that disrupt traditional ways of knowing the social world for the second generation.

Suffering Soldiers John Phillips Resch.1999 THIS BOOK EXAMINES how the moral sentiment of gratitude, as expressed in the image of the suffering soldier, transformed the memory of the Revolutionary War, political culture, and public policy in the early American Republic. This popular depiction removed the stigma of vice and treason from the Continental Army, legitimized the army as a republican institution, and credited it with securing independence. By glorifying the now aged, impoverished, and infirm Continental soldiers as republican warriors, the image also accentuated the nation's guilt for its ingratitude toward the veterans.Using Peterborough, New Hampshire, as a case study, John Resch shows that the power of the suffering soldier image lay partly in its reflection of reality. The citizen-soldiers from Peterborough who fought in the Continental Army did indeed represent a cross-section of the town, and they experienced greater postwar deprivation and alienation than their peers who had not gone to war. Personal and political sympathy toward the veterans eventually led to the passage of the 1818 Revolutionary War Pension Act, which attracted more than 20,000 applications. Resch shows how veterans -- through their appearances in civic celebrations and as pension claimants -- reified the image of the suffering soldier who deserved his country's honor and respect. The War Department gave him exactly that by its liberal administration of the pension program.

Veterans' Policies, Veterans' Politics Stephen R Ortiz.2012-11-04 The study of military veterans and politics has been a growing topic of interest, but to date most research on the topic has remained isolated in specific, unconnected fields of inquiry. *Veterans' Policies, Veterans' Politics* is the first multidisciplinary, comprehensive examination of the American veteran experience. Stephen Ortiz has compiled some of the best work on the formation and impact of veterans' policies, the politics of veterans' issues, and veterans' political engagement over the course of the twentieth and twenty-first centuries in the United States. By examining the U.S. government's treatment of veterans vis-à-vis such topics as health care, disability, race, the GI Bill, and combat exposure, the contributors reveal how debates regarding veterans' policies inevitably turn into larger political battles over citizenship and the role of the federal government. With the conflicts in Afghanistan and Iraq now the longest military operations in U.S. history and the numbers of veterans returning from overseas deployment higher than they've been in a generation, this is a timely and necessary book.

**The Politics of Veteran Benefits in the Twentieth Century** Martin Crotty, Neil J. Diamant, Mark Edele.2020-10-15 What happened to veterans of the nations involved in the world wars? How did they fare when they returned home and needed benefits? How were they recognized—or not—by their governments and fellow citizens? Where and under what circumstances did they obtain an elevated postwar status? In this sophisticated comparative history of government policies regarding veterans, Martin Crotty, Neil J. Diamant, and Mark Edele examine veterans' struggles for entitlements and benefits in the United States, the United Kingdom, Japan, Taiwan, the Soviet Union, China, Germany, and Australia after both global conflicts. They illuminate how veterans' success or failure in winning benefits were affected by a range of factors that shaped their ability to exert political influence. Some veterans' groups fought politicians for improvements to their postwar lives; this lobbying, the authors show, could set the foundation for beneficial veteran treatment regimes or weaken the political forces proposing unfavorable policies. The authors highlight cases of veterans who secured (and in some cases failed to secure) benefits and status after wars both won and lost; within both democratic and authoritarian

politics; under liberal, conservative, and even Leninist governments; after wars fought by volunteers or conscripts, at home or abroad, and for legitimate or subsequently discredited causes. Veterans who succeeded did so, for the most part, by forcing their agendas through lobbying, protesting, and mobilizing public support. The Politics of Veteran Benefits in the Twentieth Century provides a large-scale map for a research field with a future: comparative veteran studies.

*The My Lai Massacre in American History and Memory* Kendrick Oliver.2006 This book examines the response of American society to the My Lai massacre and its ambiguous place in American national memory. The author argues that the massacre revelations left many Americans untroubled. It was only when the soldiers most immediately responsible came to be tried that opposition to the conflict grew, for these prosecutions were regarded by supporters of the war as evidence that the national leaders no longer had the will to do what was necessary to win.

**Black Veterans, Politics, and Civil Rights in Twentieth-Century America** .2023-05-15 This collection examines the lives of African American soldiers and the sociopolitical world they constructed upon returning to the United States. Affective Communities in World Politics Emma Hutchison.2016-03-11 Emotions underpin how political communities are formed and function. Nowhere is this more pronounced than in times of trauma. The emotions associated with suffering caused by war, terrorism, natural disasters, famine and poverty can play a pivotal role in shaping communities and orientating their politics. This book investigates how 'affective communities' emerge after trauma. Drawing on several case studies and an unusually broad set of interdisciplinary sources, it examines the role played by representations, from media images to historical narratives and political speeches. Representations of traumatic events are crucial because they generate socially embedded emotional meanings which, in turn, enable direct victims and distant witnesses to share the injury, as well as the associated loss, in a manner that affirms a particular notion of collective identity. While ensuing political orders often re-establish old patterns, traumatic events can also generate new 'emotional cultures' that genuinely transform national and transnational communities.

**Memorials as Spaces of Engagement** Quentin Stevens,Karen A. Franck.2015-08-11 Memorials are more diverse in design and subject matter than ever before. No longer limited to statues of heroes placed high on pedestals, contemporary memorials engage visitors in new, often surprising ways, contributing to the liveliness of public space. In *Memorials as Spaces of Engagement* Quentin Stevens and Karen A. Franck explore how changes in memorial design and use have helped forge closer, richer relationships between commemorative sites and their visitors. The authors combine first hand analysis of key examples with material drawn from existing scholarship. Examples from the US, Canada, Australia and Europe include official, formally designed memorials and informal ones, those created by the public without official sanction. *Memorials as Spaces of Engagement* discusses important issues for the design, management and planning of memorials and public space in general. The book is organized around three topics: how the physical design of memorial objects and spaces has evolved since the 19th century; how people experience and understand memorials through the activities of commemorating, occupying and interpreting; and the issues memorials raise for management and planning. *Memorials as Spaces of Engagement* will be of interest to architects, landscape architects and artists; historians of art, architecture and culture; urban sociologists and geographers; planners, policymakers and memorial sponsors; and all those concerned with the design and use of public space.

**Unsettled 1968 in the Troubled Present** Aleksandra Konarzewska,Anna Nakai,Michał Przeperski.2019-10-14 Why does 1968 matter today? The authors of this volume believe that it is a crucial point of reference for current developments, especially the 'illiberal turn' both in Europe and

America. If we want to understand it, we need to look back into 1968 – the year that founded the cultural and political order of today's world. The book consists of the following four sections: '1968 and transnationality', '1968 and the transformation of meanings', 'Artistic representations of 1968', and '1968 and the European contemporarity'. This is followed by an afterword from the significant keynote speaker at the conference Unsettled 1968: Origins – Myth – Impact in June 2018 in Tübingen, Germany: Irena Grudzinska-Gross, herself a Polish '68er', reflects upon the conference and leaves remarks on her 50 years of engagement with what happened in 1968.

**The Politics of War Commemoration in the UK and Russia** Nataliya Danilova.2016-01-13 This book analyses contemporary war commemoration in Britain and Russia. Focusing on the political aspects of remembrance, it explores the instrumentalisation of memory for managing civil-military relations and garnering public support for conflicts. It explains the nexus between remembrance, militarisation and nationalism in modern societies.

**Gulag Memories** Zuzanna Bogumił.2018-09-14 Though the institution of the Gulag was nominally closed over half a decade ago, it lives on as an often hotly contested site of memory in the post-socialist era. This ethnographic study takes a holistic, comprehensive approach to understanding memories of the Gulag, and particularly the language of commemoration that surrounds it in present-day Russian society. It focuses on four regions of particular historical significance—the Solovetsky Islands, the Komi Republic, the Perm region, and Kolyma—to carefully explore how memories become a social phenomenon, how objects become heritage, and how the human need to create sites of memory has preserved the Gulag in specific ways today.

The Struggle for Redress Jessie Barton-Hronešová.2020-08-05 This book explores pathways to redress for main groups of victims/survivors of the 1992-5 Bosnian war —families of missing persons, victims of torture, survivors of sexual violence, and victims suffering physical disabilities and harm. The author traces the history of redress-making for each of these groups and shows how differently they have been treated by Bosnian authorities at the state and subnational level. In Bosnia and Herzegovina, thousands of war victims have had to suffer re-traumatising ordeals in order to secure partial redress for their suffering during 1992–1995 and after. While some, such as victims of sexual violence, have been legally recognised and offered financial and service-based compensation, others, such as victims of torture, have been recognized only recently with a clear geographical limitation. The main aim of the book is to explore the politics behind recognizing victimhood and awarding redress in a country that has been divided by instrumentalized identity cleavages, widespread patronage and debilitating war legacies. It shows how war victims/survivors navigate such fragmented and challenging public landscape in order to secure their rights.

*War Veterans and Fascism in Interwar Europe* Ángel Alcalde.2017-06-07 This book explores, from a transnational viewpoint, the historical relationship between war veterans and fascism in interwar Europe. Until now, historians have been roughly divided between those who assume that 'brutalization' (George L. Mosse) led veterans to join fascist movements and those who stress that most ex-soldiers of the Great War became committed pacifists and internationalists. Transcending the debates of the brutalization thesis and drawing upon a wide range of archival and published sources, this work focuses on the interrelated processes of transnationalization and the fascist permeation of veterans' politics in interwar Europe to offer a wider perspective on the history of both fascism and veterans' movements. A combination of mythical constructs, transfers, political communication, encounters and networks within a transnational space explain the relationship between veterans and fascism. Thus, this book offers new insights into the essential ties between fascism and war, and contributes to the theorization of transnational fascism.

*British Cultural Memory and the Second World War* Lucy Noakes,Juliette Pattinson.2013-11-21 Few historical events have resonated as much in modern British culture as the Second World War. It has left a rich legacy in a range of media that continue to attract a wide audience: film, TV and radio, photography and the visual arts, journalism and propaganda, architecture, museums, music and literature. The enduring presence of the war in the public world is echoed in its ongoing centrality in many personal and family memories, with stories of the Second World War being recounted through the generations. This collection brings together recent historical work on the cultural memory of the war, examining its presence in family stories, in popular and material culture and in acts of commemoration in Britain between 1945 and the present.

Fighting for Democracy Christopher S. Parker.2009 Fighting for Democracy shows how the experiences of African American soldiers during World War II and the Korean War influenced many of them to challenge white supremacy in the South when they returned home. Focusing on the motivations of individual black veterans, this groundbreaking book explores the relationship between military service and political activism. Christopher Parker draws on unique sources of evidence, including interviews and survey data, to illustrate how and why black servicemen who fought for their country in wartime returned to America prepared to fight for their own equality. Parker discusses the history of African American military service and how the wartime experiences of black veterans inspired them to contest Jim Crow. Black veterans gained courage and confidence by fighting their nation's enemies on the battlefield and racism in the ranks. Viewing their military service as patriotic sacrifice in the defense of democracy, these veterans returned home with the determination and commitment to pursue equality and social reform in the South. Just as they had risked their lives to protect democratic rights while abroad, they risked their lives to demand those same rights on the domestic front. Providing a sophisticated understanding of how war abroad impacts efforts for social change at home, Fighting for Democracy recovers a vital story about black veterans and demonstrates their distinct contributions to the American political landscape.

*Textbooks and War* Eugenia Roldán Vera,Eckhardt Fuchs.2018-10-04 This volume reflects on the role played by textbooks in the complex relationship between war and education from a historical and multinational perspective, asking how textbook content and production can play a part in these processes. It has long been established that history textbooks play a key role in shaping the next generation's understanding of both past events and the concept of 'friend' and 'foe'. Considering both current and historical textbooks, often through a bi-national comparative approach, the editors and contributors investigate various important aspects of the relationships between textbooks and war, including the role wars play in the creation of national identities (whether the country is on the winning or losing side), the effacement of international wars to highlight a country's exceptionalism, or the obscuring of intra-national conflict through the ways in which a civil war is portrayed. This pioneering book will be of interest and value to students and scholars of textbooks, educational media and the relationships between curricula and war.

The Politics of Trauma Jennifer Marie Beathe.2005

*Trauma and Memory* Paul S. Appelbaum,Lisa A. Uyehara,Mark R. Elin.1997-05-29 The authenticity of memories of childhood sexual abuse has become one of the major social controversies of the 1990's. As persons who report histories of abuse have sought remedies in civil and criminal

proceedings in the courts, the accuracy of their memories--particularly when they have been recalled after a period of time--has been subject to intense scrutiny. This volume brings together many of the leading participants in the debate to provide a comprehensive picture of the psychological, physiological, and legal aspects of trauma. Beginning by defining the opposing positions in the debate, the contributors then offer a variety of perspectives on the nature of memory, including reviews of some of the most exciting recent developments in this fast-growing area of investigation. Next, consideration is given to the impact of trauma on memory, both in adults and in children. With this framework in place, the authors turn to an examination of the variety of treatment approaches available to victims of trauma, who are trying to cope with the painful consequences of those events. The book argues against a unidimensional approach to trauma, calling instead for a multidisciplinary synthesis that includes developmental, neurobiological, cognitive, and psychodynamic perspectives. Chapters address the legal dilemmas for patients, mental health professionals and society as a whole that have arisen from the trauma and memory controversy. Most importantly, the editors shift the focus of their discussion from the laboratory to the courtroom and from the research journal to the psychotherapist's office, looking at the issues from every relevant angle. This is the only book in the field to treat the trauma and memory controversy comprehensively, from basic research on memory processes through clinical approaches to legal and policy issues. *Trauma and Memory* is a valuable tool for clinicians treating patients with traumatic memories. It is also intended for psychologists, physicians, social workers and lawyers who need a comprehensive reference on trauma and sexual abuse during childhood.

**Victims of Commemoration** Eray Çayli.2022-08-03 Confronting the past has become a byword for democratization. How societies and governments commemorate their violent pasts is often appraised as a litmus test of their democratization claims. Regardless of how critical such appraisals may be, they tend to share a fundamental assumption: commemoration, as a symbol of democratization, is ontologically distinct from violence. The pitfalls of this assumption have been nowhere more evident than in Turkey whose mainstream image on the world stage has rapidly descended from a regional beacon of democracy to a hotbed of violence within the space of a few recent years. In *Victims of Commemoration*, Eray Çayli draws upon extensive fieldwork he conducted in the prelude to the mid-2010s when Turkey's global image fell from grace. This ethnography—the first of its kind—explores both activist and official commemorations at sites of state-endorsed violence in Turkey that have become the subject of campaigns for memorial museums. Reversing the methodological trajectory of existing accounts, Çayli works from the politics of urban and architectural space to grasp ethnic, religious, and ideological marginalization. *Victims of Commemoration* reveals that, whether campaigns for memorial museums bear fruit or not, architecture helps communities concentrate their political work against systemic problems. Sites significant to Kurdish, Alevi, and revolutionary-leftist struggles for memory and justice prompt activists to file petitions and lawsuits, organize protests, and build new political communities. In doing so, activists not only uphold the legacy of victims but also reject the identity of a passive victimhood being imposed on them. They challenge not only the ways specific violent pasts and their victims are represented, but also the structural violence which underpins deep-seated approaches to nationhood, publicness and truth, and which itself is a source of victimhood. *Victims of Commemoration* complicates our tendency to presume that violence ends where commemoration begins and that architecture's role in both is reducible to a question of symbolism.

*Commemorating the Children of World War II in Poland* Ewa Stańczyk.2019-11-02 This book explores contemporary debates surrounding Poland's 'war children', that is the young victims, participants and survivors of the Second World War. It focuses on the period after 2001, which saw the emergence of the two main political parties that were to dictate the tone of the politics of memory for more than a decade. The book shows that 2001 marked a caesura in Poland's post-Communist history, as this was when the past took center stage in Polish political life. It argues that during this period a distinct culture of commemoration emerged in Poland - one that was not only governed by what the electorate wanted to hear and see, but

also fueled by emotions.

*Heritage under Socialism* Eszter Gantner,Corinne Geering,Paul Vickers.2021-10-15 How was heritage understood and implemented in European socialist states after World War II? By exploring national and regional specificities within the broader context of internationalization, this volume enriches the conceptual, methodological and empirical scope of heritage studies through a series of fascinating case studies. Its transnational approach highlights the socialist world's diverse interpretations of heritage and the ways in which they have shaped the trajectories of present-day preservation practices.

**The Routledge Handbook of Memory Activism** Yifat Gutman,Jenny Wüstenberg.2023-02-15 This Handbook is the first systematic effort to map the fast-growing phenomenon of memory activism and to delineate a new field of research that lies at the intersection of memory and social movement studies. From Charlottesville to Cape Town, from Santiago to Sydney, we have recently witnessed protesters demanding that symbols of racist or colonial pasts be dismantled and that we talk about histories that have long been silenced. But such events are only the most visible instances of grassroots efforts to influence the meaning of the past in the present. Made up of more than 80 chapters that encapsulate the rich diversity of scholarship and practice of memory activism by assembling different disciplinary traditions, methodological approaches, and empirical evidence from across the globe, this Handbook establishes important questions and their theoretical implications arising from the social, political, and economic reality of memory activism. Memory activism is multifaceted, takes place in a variety of settings, and has diverse outcomes - but it is always crucial to understanding the constitution and transformation of our societies, past and present. This volume will serve as a guide and establish new analytic frameworks for scholars, students, policymakers, journalists, and activists alike.

*International Courts and Mass Atrocity* Ivor Sokolić.2018-07-07 The extra-legal effects of international and domestic war crimes trials continue to puzzle researchers and practitioners. In the former Yugoslav states, the legacy of conflict and issues of transitional justice remains central in politics, society and culture. This book provides a new theoretical and methodological approach to one of these puzzles: why universal human rights norms become distorted or undermined when they reach local publics. It investigates the social and cultural contexts that transitional justice processes take place in by looking at how emotional everyday narratives can hamper the spread of norms in society. In Croatia, these narratives define how the public understands the rule of law, history and minority rights.
