The Science of Meaning Derek Ball,Brian Rabern.2018-07-11 By creating certain marks on paper, or by making certain sounds-breathing past a moving tongue-or by articulation of hands and bodies, language users can give expression to their mental lives. With language we command, assert, query, emote, insult, and inspire. Language has meaning. This fact can be quite mystifying, yet a science of linguistic meaning-semantics-has emerged at the intersection of a variety of disciplines: philosophy, linguistics, computer science, and psychology. Semantics is the study of meaning. But what exactly is meaning? What is the exact target of semantic theory? Much of the early work in natural language semantics was accompanied by extensive reflection on the aims of semantic theory, and the form a theory must take to meet those aims. But this meta-theoretical reflection has not kept pace with recent theoretical innovations. This volume re-addresses these questions concerning the foundations of natural language semantics in light of the current state-of-the-art in semantic theorising.

So Long a Letter Mariama Bâ.2012-05-06 Written by award-winning African novelist Mariama Bâ and translated from the original French, *So Long a Letter* has been recognized as one of Africa's 100 Best Books of the 20th Century. The brief narrative, written as an extended letter, is a sequence of reminiscences —some wistful, some bitter—recounted by recently widowed Senegalese schoolteacher Ramatoulaye Fall. Addressed to a lifelong friend, Aissatou, it is a record of Ramatoulaye's emotional struggle for survival after her husband betrayed their marriage by taking a second wife. This semi-autobiographical account is a perceptive testimony to the plight of educated and articulate Muslim women. Angered by the traditions that allow polygyny, they inhabit a social milieu dominated by attitudes and values that deny them status equal to men. Ramatoulaye hopes for a world where the best of old customs and new freedom can be combined. Considered a classic of contemporary African women's literature, *So Long a Letter* is a must-read for anyone interested in African literature and the passage from colonialism to modernism in a Muslim country. Winner of the prestigious Noma Award for Publishing in Africa.

Meaning and Relevance Deirdre Wilson,Dan Sperber.2012-03-22 When people speak, their words never fully encode what they mean, and the context is always compatible with a variety of interpretations. How can comprehension ever be achieved? Wilson and Sperber argue that comprehension is a process of inference guided by precise expectations of relevance. What are the relations between the linguistically encoded meanings studied in semantics and the thoughts that humans are capable of entertaining and conveying? How should we analyse literal meaning, approximations, metaphors and ironies? Is the ability to understand speakers' meanings rooted in a more general human ability to understand other minds? How do these abilities interact in evolution and in cognitive development? *Meaning and Relevance* sets out to answer these and other questions, enriching and updating relevance theory and exploring its implications for linguistics, philosophy, cognitive science and literary studies.

Principles of Pragmatics Geoffrey N. Leech.2016-02-17 Over the years, pragmatics - the study of the use and meaning of utterances to their situations - has become a more and more important branch of linguistics, as the inadequacies of a purely formalist, abstract approach to the study of language have become more evident. This book presents a rhetorical model of pragmatics: that is, a model which studies linguistic communication in terms of communicative goals and principles of 'good communicative behaviour'. In this respect, Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric. He does not reject the Chomskian revolution of linguistics, but rather maintains that the language system in the abstract - i.e. the 'grammar' broadly in Chomsky's sense - must be studied in relation to a fully developed theory of language use. There is therefore a division of labour between grammar and rhetoric, or (in the study of meaning) between semantics and pragmatics. The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language. In this it builds on the speech act theory of Austin and Searle, and the theory of conversational implicature of Grice, but at the same time enlarges pragmatics to include politeness, irony, phatic communion, and other social principles of linguistic behaviour.

Culture and Media Rayson K. Alex,S. Susan Deborah,Sachindev P.S..2014-06-19 Indian ecocriticism has not yet adequately demonstrated the applicability of ecological/deep ecological/tinai principles to visual texts. *Culture and Media: Ecocritical Explorations* closes this gap at the most opportune moment. Though this volume accommodates ecologically oriented interpretations from several cultures across the world, it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately. The volume effectively challenges the major documents on ecocriticism and theory (published by international presses), which have been reluctant to give space to tinai criticism and theory that transcend Dravidian or Tamil boundaries. The day is not far when cinema of the world, shaped by tinai theory, will employ tinai hermeneutics to gain fresh insight, which, in turn, will feed into the processes of creation and production of relevant and great movies.

Semantics and Pragmatics Katarzyna Jaszczolt.2002 This is a comprehensive and wide ranging introduction to various approaches to meaning. The book contains a critical discussion of these approaches and gives accessible explanations of relevant terminology.

Semantic Leaps Seana Coulson.2001-01-29 *Semantic Leaps* explores how people combine knowledge from different domains in order to understand and express new ideas. Concentrating on dynamic aspects of on-line

meaning construction, Coulson identifies two related sets of processes: frame-shifting and conceptual blending. By addressing linguistic phenomena often ignored in traditional meaning research, Coulson explains how processes of cross-domain mapping, frame-shifting, and conceptual blending enhance the explanatory adequacy of traditional frame-based systems for natural language processing. The focus is on how the constructive processes speakers use to assemble, link, and adapt simple cognitive models underlie a broad range of productive language behavior.

Discourse and the Translator B. Hatim,Ian Mason.2014-06-17 Discourse and the Translator both incorporates and moves beyond previous studies of translation. Its logical and informative approach to the problems of translation ensures that it will be essential for all those who work with languages 'in contact'. Incorporating research in sociolinguistics, discourse studies, pragmatics and semiotics, the authors analyse the process and product of translation in their social contexts. Through this analysis, the book emphasises the importance of the translator as a mediator between cultures.

Introduction to African Religion John S. Mbiti.2015-01-14 In his widely acclaimed survey, John Mbiti sheds light on the survival and prosperity of African Religion in different historical, geographical, sociological, cultural, and physical environments. He presents a constellation of African worldviews, beliefs in God, use of symbols, valued traditions, and practices that have taken root with African peoples throughout the vast continent. Mbiti's accessible writing style sympathetically portrays how African Religion manifests itself in ritual, festival, healing, the human life cycle, and interplay with the mystical and invisible world. The account embraces foundational traditions, while touching on elements that spawn transitions, including migration, the spread of Christianity and Islam, political-economic development, and modern communication. This popular introduction leaves readers with informed knowledge of the riches of African heritage.

Meaning in Language D. A. Cruse.2004 A comprehensive introduction to the ways in which meaning is conveyed in language. Alan Cruse covers semantic matters, but also deals with topics that are usually considered to fall under pragmatics. A major aim is to highlight the richness and subtlety of meaning phenomena, rather than to expound any particular theory. Rich in examples and exercises, Meaning in Language provides an invaluable descriptive approach to this area of linguistics for undergraduates and postgraduates alike.
