Massey Ferguson 100 Series In Detail Michael Thorne. 2018-02-06
Following his well-received books in this 'In Detail' series on the Ferguson TE20 and the Massey Ferguson 35 & 65 models, author Michael Thorne turns his attention to the outstandingly successful and well-loved 100 Series of tractors. Of the 100 range, the most popular was and remains the 135. Half a million 135s were built at Massey Ferguson's factory in Coventry alone, with production overseas on top of this figure. Another big success was the larger, more powerful 165, with nearly 200,000 sold. This model, like the 135, is among the most popular and sought-after classic tractors today, although many 135s and 165s are still in active use around

the world, in spite of their age. The 100 range included a great number of other models, and in addition to the 135 and 165, which are given in-depth treatment here, important models described in detail are the 130, 148 Super-Spec, 168, 175, 185 and 188 Super-Spec. There is an extensive chapter on the implements available for the range, and another on conversions. Featuring 290 illustrations including detailed specially-commissioned colour photography of outstanding examples of 100 Series tractors, Massey Ferguson 100 Series In Detail offers an unrivaled store of knowledge for the owners and enthusiasts who care passionately about these tractors, and serves as a tribute to the people who made them.

Nordic Tractor, The: The History and Heritage of Volvo, Valmet and Valtra Justin Roberts.2017-11-07 The Nordic Tractor traces the history of tractor production in Sweden and Finland. The story goes back over 200 years to the 19th century when the industrial revolution was sweeping across Britain, and Sweden wanted to establish their own manufacturing powerhouses. This was an exciting and fast moving time for engineering and this book traces the ups, downs and eventual demise of some of the first manufacturers working to serve the particular needs of the agricultural and forestry industries in this densely forested and mountainous region. It then looks in depth at the companies who emerged from this, who learnt from their own and others' mistakes and built on the widespread technological advances of the time to build up names for themselves in Northern parts of Europe. Today, Valtra - now owned by AGCO - stands proudly as the last remaining agricultural tractor maker in Scandinavia, but The Nordic Tractor shows where their roots lie in the establishment and history of

companies such as Bolinder, Munktells, Volvo and Valmet, who all stood out as being major players in the Nordic region. Including over 100 photos, many of which have been previously unpublished, this book will appeal to those with a specific interest in Nordic tractors, Nordic engineering and general Nordic history as well as the general tractor enthusiast.

Massey Ferguson Tractor FE65-FE35 Pt 186 Michael Williams.1962

The Big Book of Massey Tractors Robert N. Pripps.2006 This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.

machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the Fergie lay in its lightness and utility, and also in the system of mechanized farming of which it was a part. Throughout the book, reference is made to the implements which lay at the heart of the system. Stuart Gibbard has won Tractor and Machinery magazine's award for the best British tractor book five years running.
