Tonovcov grad near Kobarid Slavko Ciglencečki. 1998-01-01 V vodniku je predstavljeno najdišče Tonovcov grad pri Kobaridu. Na strmem skalnem hribu nad Sočo so bili odkriti sledovi več prazgodovinskih dob, rimskega, poznoantičnega in zgodnjerednjeveškega obdobja. Izstopajo ostaline iz 5. in 6. stoletja n. š., ko je bila na hribu zgrajena velika naselbina z več kot dvajsetimi stanovanjskimi zgradbami in obrambnimi stolpi ob obzidju. Na vzvišenem osrednjem delu so bile raziskane tri odlično ohranjene zgodnjekrščanske cerkve z baptisterijem in dva zbiralnika za vodo. Podrobneje je predstavljena tudi velika stanovanjska zgradba s prizidkom, vetrolovom in ognjišči. Poznoantična naselbina je bila opuščena ob koncu 6. ali celo v prvi polovici 7. stoletja. Kasneje, okoli leta 800, je bila utrdba ponovno kratkotrajno poseljena. V vodniku opisane ostaline pomembno dopolnjujejo vedenje o skrivnostnem času odmiranja antike in preseljevanja ljudstev, ki je ključnega pomena za razumevanje nastanka slovenskega kot tudi mnogih drugih narodov sedanje Evrope. Vodnik je izšel še v angleški, nemški in italijanski različici.

Studying Peoples in the People's Democracies Vintilă Mihăilescu, Ilia Iliev, Slobodan Naumović.2008 Bulgaria and Serbia during socialism are outlined from many different points of view in this volume. Beyond local and personal trajectories the authors illuminate more general and comparative questions. Was there anything like a socialist anthropology, common to all three countries? Did Soviet and/or Marxist influences, in the discipline and in society in general, penetrate so deeply as to form an unavoidable common denominator of anthropological practice? The answers turn out to be complex and subtle. While unifying ideological forces were very strong in the 1950s, diversity increased thereafter. Anthropology was entangled with national ideology in all three countries, but the evidence nonetheless calls for polyphonic interpretations.

Georg Simmel and the Disciplinary Imaginary Elizabeth S. Goodstein.2017-01-04 An internationally famous philosopher and best-selling author during his lifetime, Georg Simmel has been marginalized in contemporary intellectual and cultural history. This neglect belies his pathbreaking role in revealing the theoretical significance of phenomena—including money, gender, urban life, and technology—that subsequently became established arenas of inquiry in cultural

theory. It further ignores his philosophical impact on thinkers as diverse as Benjamin, Musil, and Heidegger. Integrating intellectual biography, philosophical interpretation, and a critical examination of the history of academic disciplines, this book restores Simmel to his rightful place as a major figure and challenges the frameworks through which his contributions to modern thought have been at once remembered and forgotten.

Globally Speaking Judith Rosenhouse, Rotem Kowner.2008-05-22 This volume accounts for the motives for contemporary lexical borrowing from English, using a comparative approach and a broad cross-cultural perspective. It investigates the processes involved in the penetration of English vocabulary into new environments and the extent of their integration into twelve languages representing several language families, including Icelandic, Dutch, French, Russian, Hungarian, Hebrew, Arabic, Amharic, Persian, Japanese, Taiwan Chinese, and several languages spoken in southern India. Some of these languages are studied here in the context of borrowing for the first time ever. All in all, this volume suggests that the English lexical 'invasion', as it is often referred to, is a natural and inevitable process. It is driven by psycholinguistic, sociolinguistic, and socio-historical factors, of which the primary determinants of variability are associated with ethnic and linguistic diversity.

Nature, Justice, and Rights in Aristotle's Politics Fred D. Miller. 1995-06-01 In this landmark study of Aristotle's Politics Fred Miller argues that nature, justice, and rights are central to Aristotle's political thought. Miller challenges the widely held view that the concept of rights is alien to Aristotle's thought, and marshalls evidence for talk of rights in Aristotle's writings, arguing further that Aristotle's theory of justice supports claims of individual rights, which are political and based in nature. He also considers the relation of Aristotles politics to other parts of philosophy, in

particular to the teleological view of nature in the Physics and the theory of justice in the Nicomachean Ethics. Professor Miller examines in detail the constitutional applications of Aristotle's theory, including the correct constitutions of kingship, aristocracy, and polity (based in the common advantage), and the deviant constitutions of democracy, oligarchy, and tyranny (based in the advantage of the rulers). Aristotle's treatments of revolution and property rights are also covered, and the major presuppositions of his political theory are critically examined and related to current issues including the liberalism-communitarianism debate. This stimulating treatment of the Politics sheds new light on Aristotle's relation to modern political philosophy, in particular to natural rights theorists such as Hobbes and Locke. It will be of value to philosophers, political scientists, classical scholars, and anyone interested in the theoretical foundations of human rights.

The Mangoes A.J.G.H. Kostermans.2012-12-02 The Mangoes: Their Botany, Nomenclature, Horticulture and Utilization provides a comprehensive discussion of existing mango species and their value in the common mango (*Mangifera indica*) industry. It covers mango species growing in very dry areas, like savannahs; species growing on inundated lands; at altitudes over 1000 m in the tropics and at higher latitudes outside the tropics; under monsoon climate conditions and under constantly wet conditions; and so-called wild species that compete in flavor with the common mango. The book begins with an overview of the genus *Mangifera*, covering distribution, ecology, morphology, and development. The remaining chapters discuss the phytochemistry and chemotaxonomy of the Anacardiaceae with special emphasis on *Mangifera*; conservation of *Mangifera* species; a historical overview of the development of knowledge of *Mangifera*; subdivision

of the genus; species of uncertain position; and excluded species. The book also includes a list of references along with indexes to scientific names, vernacular names, and collection numbers. The present text was written for horticulturists and mango growers. However, it may also be useful to scientific botanists, ecologists, students, and teachers.

Albania Miranda Vickers, James Pettifer. 2000-03 WITH A NEW POSTSCRIPT Situated between Greece on the south, the former Yugoslavia on the north and east, and the Adriatic Sea on the west, Albania is the country the world forgot. Throughout this century, Albania has been perceived as primitive and isolationist by its neighbors to the west. When the country ended fifty years of communist rule in 1992, few outsiders took interest. Deemed unworthy of membership in the European Union and overlooked by multinational corporations, Albania stands today as one of the poorest and most ignored countries in Europe. Miranda Vickers and James Pettifer take us behind the veil of former President Enver Hoxha's isolationist policies to examine the historic events leading up to Albania's transition to a parliamentary government. Beginning with Hoxha's death in 1985, Albania traces the last decade of Albania's shaky existence, from the anarchy and chaos of the early nineties to the victory of the Democratic Alliance in 1992 and the programs of the current government. The authors provide us with an analysis of how the moral, religious, economic, political and cultural identity of the Albanian people is being redefined, and leave no question that the future of Albania is inextricably linked to the future of the Balkans as a whole. In short, they tell us why Albania matters.

A Political Theory of Territory Margaret Moore.2017-08 Margaret Moore attempts here to offer a comprehensive normative theory of territory. The book provides an account both of the nature of rights to territory and of the nature of the right-holder, considering the arguments that might justify state territory as well as the appropriate relationship between the state, the people, and the land implied by that justificatory argument. After setting out the basics of the theory in the initial chapters, the author then compares her view to the main competing rival views (cultural nationalist and statist) and explains how her view handles the issues of boundary setting, corrective justice, natural resources, immigration and defensive rights. The volume provides the reader with a clear sense both of the existing state of the philosophical literature on territorial rights and of Moore's own views

Nobility, Land and Service in Medieval Hungary M. Rady.2000-10-27 The absence in medieval

Hungary of fief-holding and vassalage has often been cited by historians as evidence of Hungary's early 'deviation' from European norms. This new book argues that medieval Hungary was, nevertheless, familiar with many institutions characteristic of noble society in Europe. Contents include the origins of the Hungarian nobility and baronage, lordship and clientage, the role of the noble kindred, conditional landholding, the organization of the frontier, the administration of the counties, and the establishment of representative institutions.

Friends of Interpretable Objects Miguel TAMEN, Miguel Tamen. 2009-06-30 Tamen's concern is to show how inanimate objects take on life through their interpretation--notably, in our own culture, as they are collected and housed in museums. It is his claim that an object becomes interpretable only in the context of a society of friends. Thus, he suggests, our inveterate tendency as human beings to interpret the phenomenal world gives objects not only a life but also a society.

This is a comprehensive look at the stories that make up the Old Testament and the Jewish religion, including the folk tales, apocryphal texts, midrashes, and other little-known documents that the Old Testament and the Torah do not include. In this exhaustive study, Robert Graves provides a fascinating account of pre-Biblical texts that have been censored, suppressed, and hidden for centuries, and which now emerge to give us a clearer view of Hebrew

myth and religion than ever. Venerable classicist and historian Robert Graves recounts the ancient Hebrew stories, both obscure and familiar, with a rich sense of storytelling, culture, and spirituality. This book is sure to be riveting to students of Jewish or Judeo-Christian history, culture, and religion.

The Uralic Language Family Angela Marcantonio.2002-06-10 In this detailed survey of Finnish, Hungarian, Lapp and the other Uralic Languages, Angela Marcantonio shows there is in fact no scientific evidence to support the belief that they form a genetic family. Modern Art in Eastern Europe S. A. Mansbach.2001-02-05 This pioneering and award-winning study provides the world with the first coherent narrative of Eastern European contributions to the modern art movement. Analyzing an enormous range of works, from art centers such as Prague, Warsaw and Budapest, (many published here for the first time), S.A. Mansbach shows that any understanding of Modernism is essentially incomplete without the full consideration of vital Eastern European creative output. He argues that Cubism, Expressionism and Constructivism, along with other great modernist styles, were merged with deeply rooted, Eastern European visual traditions. The art that emerged was vital modernist art that expressed the most pressing concerns of the day, political as well as aesthetic. Mansbach examines the critical reaction of the contemporary artistic culture and political state. A major groundbreaking interpretation of Modernism, *Modern Art in Eastern Europe* completes any full assessment of twentieth-century art, as well as its history. *Modern Art in Eastern Europe* is the recipient of the 1997 C.I.N.O.A. Prize, awarded by La Confédération Internationale de Négociants en Oeuvres d'Art. The prize is awarded to defray the costs of publication in order to encourage publishers to produce manuscripts of particular merit and the works of younger art historians.
