ACoRN: Acute Care of At-Risk Newborns Jill E. Boulton, Kevin Coughlin, Debra O'Flaherty.2021-04-08 The Acute Care of at-Risk Newborns (ACoRN) program trains health care providers to stabilize that most challenging and enigmatic of medical patients: the unwell newborn. Early assessment, intervention, and management of at-risk or unstable infants can be critical for their survival and long-term health. Clinical care standards and educational programs to address these requirements are needed. The ACoRN program provides a unique, prioritized, and systematic approach to newborn stabilization for health care professionals (HCPs) with any degree of experience. ACoRN-trained providers learn to gather information, prioritize, intervene appropriately, and deliver high quality care to at-risk and unwell newborns in any setting. Because research and practice have advanced dramatically in recent years, the need for a new ACoRN text, the program's centrepiece, became essential: hence the development of this new edition, which reflects current guidelines and evidence-based best practices. ACoRN teaches the concepts and skills required to stabilize unwell newborns through system-based algorithms ('Sequences'), each with its own chapter: - Respiratory- Neurology- Surgical Conditions- Cardiovascular- Fluid and Glucose- Jaundice- Thermoregulation- Infection The ACoRN mnemonic defines stabilization steps and chapter structure: Alerting Signs, Core Steps, Organization of Care, Response, Next Steps, and Specific Diagnosis and Management. Each chapter includes educational objectives, key concepts, learning points, and at least one case scenario with questions and answers to reinforce content and learnings. This book is written for any health professional who may be required to participate in the stabilization of sick or preterm babies within their scope of practice. The Canadian Paediatric Society (CPS) has worked to improve the health of children and youth since 1922. Backed by the expertise of more than 3,000 paediatricians, the CPS makes sure that parents and professionals have the best possible information about child and youth health and well-being. The CPS is also involved in advocacy, research and education for health care providers.

Haystack Full of Needles Louis Neal Irwin.2023-11-08 How do we store information in the brain? Is memory a thing in a place, like a specific molecule in a particular cell? Or does learning require a

process in a population, like neurons firing in a specific pattern for each experience? This combination of memoir and history tells the story of how the mechanisms of memory were gradually revealed, through biographical vignettes of the scientists who set out to solve the riddle of memory, including the author's own efforts as he was coming of age as a scientist. It shows how individual goals intertwine with the technologies at hand to push scientific knowledge forward, often erratically, and always in the context of social forces and private ups and downs. Not only a compelling personal story with the war in Vietnam, civil rights movement, and downfall of two presidents as backdrop, this is a lucid explanation of brain function for the nonscientist and valuable contribution to the history of science in the decades that saw neuroscience join molecular biology as the marquee biomedical accomplishments of the twentieth century

China and the WTO Deepak Bhattasali, Shantong Li, William J. Martin. 2004-07-09 China's accession to the WTO requires a great many specific policy reforms. However, if the best results are to be obtained, it is important that these reforms be implemented as part of a consistent development program, rather than simply by treating them as a recipe. To do this, policy makers must understand the range and nature of the policy changes required by accession, their implications for the economy, and the availability and effects of supporting policies. 'China and the WTO' analyzes the nature of the reforms involved in China's accession to the WTO, assesses their implications for the world economy, and examines the implications for individual households, particularly the poor. Its key objective is to provide the information that will allow policy makers to implement WTO commitments and formulate supporting policies to contribute strongly to economic development and poverty reduction. Individual chapters by leading scholars analyze the nature of the reforms in key areas, such as agriculture, services, intellectual property and safeguards and anti-dumping. These chapters form the building blocks for later chapters which analyze the implications of reform for the economy. The book also includes a series of studies that assess the implications for households, taking into account the social safety net policies applying in China, and the impacts of complementary policies in areas such as labor market reform and investments in human capital. Of interest to policymakers, academe and students studying international trade issues and to practitioners in the area of trade and development, 'China and the WTO' is a valuable addition to the wealth of information provided by the World Bank Trade and Development Series.
