Strategic Management of Technological Innovation Melissa A. Schilling.2017

Managing Technology and Innovation Robert Verburg,J. Roland Ortt,Willemijn M. Dicke.2006-06-19 Modern technology and innovation are vital to the success of all companies, be they hi-tech firms or companies seemingly unaffected by technology and innovation; whether established firms or business start-ups. This book focuses on understanding technology as a corporate resource, covering product development, design of systems and the managerial aspects of new and high technology. Topics investigated include: the internal organization of high technology firms the management of technology in society managing innovation dilemmas and strategies. The wide-ranging experience of the teachers and experts contributing to this book has resulted in an integrated, multi-disciplinary, textbook that provides an introductory overview to managing technology and innovation in the twenty-first century. This text is essential reading for students of business and engineering concerned with technology and innovation management.

Strategic Management of Technological Innovation MELISSA SCHILLING.2006-10-11 Strategic Management of Technological Innovation, 2e by Melissa Schilling is the first comprehensive, rigorous and yet accessible text for the Technology and Innovation Management course. Unlike other books, Schilling's approach synthesizes the major research in the field, providing students with the knowledge needed to enhance case discussion and analysis. The subject is approached as a strategic process, and as such, is organized to mirror the strategic management process used in most strategy textbooks, progressing from assessing the competitive dynamics of a situation, to strategy formulation, to strategy implementation. As a brief, affordable paperback, it is ideal to package with cases. Recommended case sets from the author are available through the Primis Custom Case Database or from the Harvard Business School Case Database.

Starts with One, It J. Stewart Black, Hal Gregersen.2008-01-10 Today, virtually every organization faces massive change. Unfortunately, change is extraordinarily difficult, and most attempts to initiate and sustain it fail. In *It Starts with One*, J. Stewart Black and Hal B Gregersen identify the core problem: changing individuals and the "mental maps" inside their heads must happen before you can change the organization. Just as actual maps guide people's footsteps, mental maps guide daily behavior. Successful strategic change for the organization is all about changing individual mental maps and behaviors first, because they are the organization. To change organizations, you must break through your own brain barrier—and help those around you do the same. One step at a time, *It Starts with One* shows how to do that: how to create new destinations, and new, more inspiring effective paths to sustainable change. Black and Gregersen systematically identify the brain barriers that stand in your way: failure to see, failure to move, and failure to finish. Drawing on their extensive experience consulting with world-class organizations, they offer integrated tools, strategies, and solutions for overcoming each of these obstacles. This edition offers even more effective tools, more guidance on leading change in globalizing environments, and more insight into changing your own mental maps...liberating yourself to transform your entire organization. Overcoming the failure to see Why organizations miss obvious market transformations—and what to do about it Breaking through the failure to move Why people fail to change even when they see the need—and how to break through this barrier Conquering the failure to finish Why change "stalls out" and how to maintain the momentum Anticipating change Why too often people let the need to change become a crisis before acting—to build to a crisis before acting—and how to create the capability to anticipate change, move when needed, and finish in the future without "being told" To Change the Organization, First Change the Individual. To Change the Individual, Read This Book! Seventy percent of organizations that seek strategic change fail. Organizations can't change because individuals don't change. Individuals don't change because powerful mental maps stand in their way. This book offers a powerful, start-to-finish strategy for helping people redraw their mental maps—and unleash their power to deliver superior, sustained strategic change. Thoroughly updated with new techniques, case studies, and examples, this book offers even more valuable insights for today's leaders and managers. Among the highlights: a detailed new discussion of how you must change in order to lead change...new guidance on leading change in global environments...and more integrated tools and solutions you can start using today!

Marketing of High-technology Products and Innovations Jakki J. Mohr, Sanjit Sengupta, Stanley F. Slater.2010 This title provides a thorough overview of the issues high-tech marketers must address, and provides a balance between conceptual discussions and examples; small and big business; products and services; and consumer and business-to-business marketing contexts.

Strategic Management of Technological Innovation Melissa A. Schilling.2010 This edition offers: 1. Five new chapter opening cases: Blue-Ray vs. HD-DVD: a standards battle in high definition video; From PDA's to smartphones: the evolution of an industry; Bug Labs and the Long Tail; Organizing for innovation at Google; and Skull Candy: developing extreme headphones. 2. More balance between industrial products versus consumer products. More industrial product examples (such as electronic components, medical components, aerospace, and business software) and service examples (such as search and advertising services, news services, hotels, outsourced industrial design) have been included throughout the book. 3. More extensive coverage of collaborative networks in Chapters 2 and 8, including graphs of the global technology collaboration network; richer explanations and examples for the network externality graphs in Chapter 4; and more in-depth coverage of modularity in both products and organizational forms in Chapter 10. Chapter 11 has also been expanded to include Failure Modes and Effects Analysis (FMEA) to ensure that students are familiar with the most widely used new product development tools. (Back of Book)

The Algorithmic Leader Mike Walsh.2019-03-12 The greatest threat we face is not robots replacing us, but our reluctance to reinvent ourselves. We live in an age of wonder: cars that drive themselves, devices that anticipate our needs, and robots capable of everything from advanced manufacturing to complex surgery. Automation, algorithms, and AI will transform every facet of daily life, but are we prepared for what that means for the future of work, leadership, and creativity? While many already fear that robots will take their jobs, rapid advancements in machine intelligence raise a far more important question: what is the true potential of human intelligence in the twenty-first century? Futurist and global nomad Mike Walsh has synthesized years of research and interviews with some of the world's top business leaders, AI pioneers and data scientists into a set of 10 principles about what it takes to succeed in the algorithmic age. Across disparate cultures, industries, and timescales, Walsh brings to life the history and future of ideas like probabilistic thinking, machine learning, digital ethics, disruptive innovation, and de-centralized organizations as a foundation for a radically new approach to making decisions, solving problems, and leading people. *The Algorithmic Leader* offers a hopeful and practical guide for leaders of all types, and organizations of all sizes, to survive and thrive in this era of unprecedented change. By applying Walsh's 10 core principles, readers will be able to design their own journey of personal transformation, harness the power of algorithms, and chart a clear path ahead—for their company, their team, and themselves.

Quirky Melissa A Schilling.2018-02-13 The science behind the traits and quirks that drive creative geniuses to make spectacular breakthroughs What really distinguishes the people who literally change the world -- those creative geniuses who give us one breakthrough after another? What differentiates Marie Curie or Elon Musk from the merely creative, the many one-hit wonders among us? Melissa Schilling, one of the world's leading experts on innovation, invites us into the lives of eight people -- Albert Einstein, Benjamin Franklin, Elon Musk, Dean Kamen, Nikola Tesla, Marie Curie, Thomas Edison, and Steve Jobs -- to identify the traits and experiences that drove them to make spectacular breakthroughs, over and over again. While all innovators possess incredible intellect, intellect alone, she shows, does not create a breakthrough innovator. It was their personal, social, and emotional quirks that enabled true genius to break through--not just once but again and again. Nearly all of the innovators, for example, exhibited high levels of social detachment that enabled them to break with norms, an almost maniacal faith in their ability to overcome obstacles, and a passionate idealism that pushed them to work with intensity even in the face of criticism or failure. While these individual traits would be unlikely to work in isolation -- being unconventional without having high levels of confidence, effort, and goal directedness might, for example, result in rebellious behavior that does not lead to meaningful outcomes -- together they can fuel both the ability and drive to pursue what others deem impossible. Schilling shares the science behind the convergence of traits that increases the likelihood of success. And, as Schilling also reveals, there is much to learn about nurturing breakthrough innovation in our own lives -- in, for example, the way we run organizations, manage people, and even how we raise our children.

Build, Borrow, Or Buy Laurence Capron,Will Mitchell.2012 How should you grow your organization? Its one of the most challenging questions an executive team faces and the wrong answer can break your firm. So where do you start? By asking the right questions, argue INSEADs Laurence Capron and coauthor Will Mitchell, of Duke Universitys Fuqua School of Business and the Rotman School of Management at the University of Toronto. Drawing on more than two decades of research and teaching, Capron and Mitchell have found that a firms aptitude for determining the best resource pathways for its growth has a defining impact on its success. Theyve come up with a helpful framework, reflecting practices of a variety of successful global organizations, to help you determine which path is best for yours.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert,Erma Hermens,Marja Peek.1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Strategic Management of Technology and Innovation Robert A. Burgelman,Modesto A. Maidique,Steven C. Wheelwright.2001 This text has been written for a course in technology and innovation. It covers contemporary research by using a combination of text, readings, and cases. Based on reviewer response to a survey, the authors have updated many of the cases that instructors found outdated or lacking. Classic cases such as Claire McCloud have been kept, while newer cases such as Intel Corporation in 1999 have been added. There is also a strong set of readings from sources such as Harvard Business Review, California Management Review, and Sloan Management Review.

Platforms, Markets and Innovation Annabelle Gawer.2011-01-01 In her pioneering book *Platform Leadership* (with Michael Cusumano), Gawer gave us the strategy of building coalitions of customers, suppliers, and complementors. Now, she brings together a number of the leading researchers in the area of platform strategy to give us a book that will be a key reference for both practitioners and academics. Adam Brandenburger, New York University, US Annabelle Gawer s collected volume of research shows that a vibrant community of scholars has arisen around platforms and innovation. Each of the chapters is first rate, with top researchers offering some of their latest work. This will be an indispensable book for students of innovation and technology management everywhere. Henry Chesbrough, University of California, Berkeley, US Annabelle Gawer s *Platforms, Markets and Innovation* is the first serious exploration of the critical but subtle role that platforms play in business, society and our personal lives. As digital technologies penetrate every nook and cranny of the world around us, we rely on platforms to both help us use the new technologies, as well as to organize new markets of innovation that add applications on top of the platforms and make them far more valuable. Dr Gawer s excellent book is designed to help us understand the mysterious nature of platforms. It brings together the insights of twenty-four experts around the world who contributed to the fourteen chapters of the book. Dr Gawer s book is invaluable to anyone trying to understand the nuanced nature of platforms, and their implications for the evolution of innovation in the 21st century. Irving Wladawsky-Berger, IBM Academy of Technology, US The emergence of platforms is a novel phenomenon impacting most industries, from products to services. Industry platforms such as Microsoft Windows or Google, embedded within industrial ecosystems, have redesigned our industrial landscapes, upset the balance of power between firms, fostered innovation and raised new questions on competition and innovation. Annabelle Gawer presents cutting-edge contributions from 24 top international scholars from 19 universities across Europe, the USA and Asia, from the disciplines of strategy, economics, innovation, organization studies and knowledge management. The novel insights assembled in this volume constitute a fundamental step towards an empirically based, nuanced understanding of the nature of platforms and the implications they hold for the evolution of industrial innovation. The book provides an overview of platforms and discusses governance, management, design and knowledge issues. With a multidisciplinary approach, this book will strongly appeal to academics and advanced students in management, innovation, strategy, economics and design. It will also prove an enlightening read for business managers in IT industries.

Brand Touchpoints Aparna Sundar.2018 Brand touchpoints are used to reinforce the basic premise of branding, which is to distinguish brands from their competitors and remain memorable, ultimately keeping customers resolute in their allegiance. Information related through brand touchpoints increases brand familiarity, contributes to a brands value, improves attitudes towards a brand, and in general is essential to maintain an ongoing relationship with consumers. Given the role of brand touchpoints, a look at contemporary issues is warranted. *Brand Touchpoints* is a collection of chapters by academics, practitioners and designers on the current evolution of brand communication. The book looks at existing issues in the marketplace and ways to influence the branding process. First, the changing role of brand touchpoints is reviewed in terms of the move from physical assets such as stores, trucks, and outdoor billboards to digital applications. A foundational sense of how consumers develop inferences surrounding brand touchpoints is then explored. Following this, prescriptive models for building brands to enhance the effectiveness of brand touchpoints are proposed. Then the ability of tangible touchpoints such as product design, packaging, and other tangible aspects of the brand to inform macro branding is reviewed. A case is made for more research on multisensory aspects of a brand. Chapters in the final section of the book explore brand touchpoints as it influences microtrends of prosocial consumers, children and ardent sports fans. To conclude, novel linkages in brand literature that set up an agenda for future research as it relates to consumer culture is discussed. The diverse set of chapters in this book offer a well-timed, in-depth summary of the various academic literature and industry phenomenon. Chapters are contributed by leading academic and industry experts which include: Chris Allen, University of Cincinnati; Clarinda Rodrigues, Linnaeus University; Claudio Alvarez, Baylor University; Conor Henderson, University of Oregon; Dominic Walsh, Landor Associates; Doug Ewing, Bowling Green State University; Drew Boyd, University of Cincinnati; Frank R. Introduction to Financial Technology Roy S. Freedman.2006-04-24 The financial technology environment is a dynamic, high-pressured, fast-paced world in which developing fast and efficient buy-and-sell order processing systems and order executing (clearing and settling) systems is of primary importance. The orders involved come from an ever-changing network of people (traders, brokers, market makers) and technology. To prepare people to succeed in this environment, seasoned financial technology veteran Roy Freedman presents both the technology and the finance side in this comprehensive overview of this dynamic area. He covers the broad range of topics involved in this industry—including auction theory, databases, networked computer clusters, back-office operations, derivative securities, regulation, compliance, bootstrap statistics, optimization, and risk management—in order to present an in-depth treatment of the current state-of-the-art in financial technology. Each chapter concludes with a list of exercises; a list of references; a list of websites for further information; and case studies. With amazing clarity, Freedman explains both the technology side and the finance side of financial technology Accessible to both finance professionals needing to upgrade their technology knowledge and technology specialists needing to upgrade their finance knowledge

Corporate Entrepreneurship and Innovation Paul Burns.2020-02-15 Written by a highly regarded expert on entrepreneurship, this bestselling textbook provides an engaging and comprehensive overview of corporate entrepreneurship. Now in its fourth edition and fully revised throughout, this accessible text is structured in four key parts that cover everything a student needs to know about the topic. After an initial consideration of what constitutes corporate entrepreneurship and innovation, the author then guides students through the four pillars of entrepreneurial architecture: culture, structure, leadership and strategy. The third section focusses on the entrepreneurial mind-set, including how to encourage creativity, business ideas and developing concepts. Finally, the book draws attention to corporate venturing, examining venture teams, intrapreneurs, market development and the role of shareholder value. It is no longer sufficient for businesses to grow simply by cutting costs and taking over competitors. To achieve true success, organisations must avoid an ageing product or service portfolio to bring new, innovative ideas to market. Corporate entrepreneurship is inherently risky and therefore requires a fresh approach to strategy. The approach Paul Burns offers will successfully overcome barriers to launching new ideas, internal challenges of managing creativity and show how to foster an entrepreneurial culture. This is the go-to textbook for all students studying Corporate Entrepreneurship, Intrapreneurship or Corporate Venturing at undergraduate, postgraduate or MBA level. The book is also essential reading for courses on Strategic Entrepreneurship and Innovation. New to this Edition: - Fully revised and updated content throughout with new four-part structure - Brand new case studies in every chapter, featuring some of the world's highest profile companies from across the globe - A greater focus on innovation, including a new chapter on this topic at the start of the book - New chapters on 'Developing a Business Model', 'Managing Change' and 'Managing Risk' - New on-page glossary with key terms highlighted in the text and defined in the margins - New Activities and Group Discussion topics at the end of each chapter
