Cultural Politics of Targeted Killing Kyle Grayson.2016-07-15 The deployment of remotely piloted air platforms (RPAs) - or drones - has become a defining feature of contemporary counter-insurgency operations. Scholarly analysis and public debate has primarily focused on two issues: the legality of targeted killing and whether the practice is effective at disrupting insurgency networks, and the intensive media and activist scrutiny of the policy processes through which targeted killing decisions have been made. While contributing to these ongoing discussions, this book aims to determine how targeted killing has become possible in contemporary counter-insurgency operations undertaken by liberal regimes. Each chapter is oriented around a problematisation that has shaped the cultural politics of the targeted killing assemblage. Grayson argues that in order to understand how specific forms of violence become prevalent, it is important to determine how problematisations that enable them are shaped by a politico-cultural system in which culture operates in conjunction with technological, economic, governmental, and geostrategic elements. The book also demonstrates that the actors involved - what they may be attempting to achieve through the deployment of this form of violence, how they attempt to achieve it, and where they attempt to achieve it - are also shaped by culture. The book demonstrates how the current social relations prevalent in liberal societies contain the potential for targeted killing as a normal rather than extraordinary practice. It will be of great use for academic specialists and graduate students in international studies, geography, sociology, cultural studies and legal studies.

Killing and Letting Die Bonnie Steinbock,Alastair Norcross.1994 This collection contains twenty-one thought-provoking essays on the controversies surrounding the moral and legal distinctions between euthanasia and letting die. Since public awareness of this issue has increased this second edition includes nine entirely new essays which bring the treatment of the subject up-to-date. The urgency of this issue can be gauged in recent developments such as the legalization of physician-assisted suicide in the Netherlands, how-to manuals topping the bestseller charts in the United States, and the many headlines devoted to Dr. Jack Kevorkian, who has assisted dozens of patients to die. The essays address the range of questions involved in this issue pertaining especially to the fields of medical ethics, public policymaking, and social philosophy. The discussions consider the decisions facing medical and public policymakers, how those decisions will affect the elderly and terminally ill, and the medical and legal ramifications for patients in a permanently vegetative state, as well as issues of parent/infant rights. The book is divided into two sections. The first, Euthanasia and the Termination of Life-Prolonging Treatment includes an examination of the 1976 Karen Quinlan Supreme Court decision and selections from the 1990 Supreme Court decision in the case of Nancy Cruzan. Featured are articles by law professor George Fletcher and philosophers Michael Tooley,

James Rachels, and Bonnie Steinbock, with new articles by Rachels, and Thomas Sullivan. The second section, Philosophical Considerations, probes more deeply into the theoretical issues raised by the killing/letting die controversy, illustrating exceptionally well the dispute between two rival theories of ethics, consequentialism and deontology. It also includes a corpus of the standard thought on the debate by Jonathan Bennet, Daniel Dinello, Jeffrie Murphy, John Harris, Philipa Foot, Richard Trammell, and N. Ann Davis, and adds articles new to this edition by Bennett, Foot, Warren Quinn, Jeff McMahan, and Judith Lichtenberg.

Killing in War Jeff McMahan.2009-04-23 Killing a person is in general among the most seriously wrongful forms of action, yet most of us accept that it can be permissible to kill people on a large scale in war. Does morality become more permissive in a state of war? Jeff McMahan argues that conditions in war make no difference to what morality permits and the justifications for killing people are the same in war as they are in other contexts, such as individual self-defence. This view is radically at odds with the traditional theory of the just war and has implications that challenge common sense views. McMahan argues, for example, that it is wrong to fight in a war that is unjust because it lacks a just cause.

Five Ways Patricia Can Kill Her Husband Leo Zaibert.2005 Structured around a striking conceit -- the murder of a husband by his wife -- this provocative book explores the heady relationship between mental states such as desires, beliefs, emotions, and above all, intentions -- along with the normative assessment of wrongdoing. Depending on Patricia's mental state and beliefs, her degree of guilt for killing her husband will vary. If, for example, she set fire to her apartment fully intending to kill her husband, she would be deemed more blameworthy than if the fire was an unavoidable accident. Culpability, the author argues, is commonly confused with other issues such as responsibility, accountability, and liability, but it is really concerned exclusively with the intentional mental states that exist in the mind at the point of action. Zaibert also offers a history of the theory of culpability, and gives a fascinating analysis of the beliefs and emotions associated with blaming others.

Killing Sacred Cows Garrett B. Gunderson, Stephen Palmer.2008 Our culture is riddled with destructive myths about money and prosperity that are severely limiting our power, creativity, and financial potential. In *Killing Sacred Cows*, Garrett B Gunderson boldly exposes ingrained fallacies

Yet most people are held captive in their financial lives by misinformation, propaganda, and lack of knowledge. Investors seeking financial advice in *The Little Book That Makes You Rich* will find this to be a must-read for anyone who wants to achieve their financial potential today.

The Ethics of Killing Jeff McMahan.2002-01-03 This magisterial work is the first comprehensive study of the ethics of killing, where the moral status of the individual killed is uncertain. Drawing on philosophical notions of personal identity and the immorality of killing, McMahan looks carefully at a host of practical issues, including abortion, infanticide, the killing of animals, assisted suicide, and euthanasia.

The Mechanics of Claims and Permissible Killing in War Alec D. Walen.2019-03-15 According to the dominant account of rights, there are two ways to permissibly kill people: they have done something to forfeit their right to life, or their rights are outweighed by the significantly greater cost of respecting them. Contemporary just war theorists tend to agree that it is difficult to justify killing in the second way. Thus, they focus on the conditions under which rights might be forfeited. But it

has proven hard to defend an account of forfeiture that permits killing when and only when it is morally justifiable. In *The Mechanics of Claims and Permissible Killing in War*, Alec D. Walen develops an alternative account of rights according to which rights forfeiture has a much smaller role to play. It plays a smaller role because rights themselves are more contextually contingent. They systematically reflect the different kinds of claims people can make on an agent. For example, those who threaten to cause harm without a right to do so have weaker claims not to be killed than innocent bystanders or those who have a right to threaten to cause harm. By framing rights as the output of a balance of competing claims, and by laying out a detailed account of how to balance competing claims, Walen provides a more coherent account of when killing in war is permissible.

Defensive Killing Helen Frowe.2014-10-23 Most people believe that it is sometimes morally permissible for a person to use force to defend herself or others against harm. In *Defensive Killing*, Helen Frowe offers a detailed exploration of when and why the use of such force is permissible. She begins by considering the use of force between individuals, investigating both the circumstances under which an attacker forfeits her right not to be harmed, and the distinct question of when it is all-things-considered permissible to use force against an attacker. Frowe then extends this enquiry to war, defending the view that we should judge the ethics of killing in war by the moral rules that govern killing between individuals. She argues that this requires us to significantly revise our understanding of the moral status of non-combatants in war. Non-combatants who intentionally contribute to an unjust war forfeit their rights not to be harmed, such that they are morally liable to attack by combatants fighting a just war.

The Killing State Austin Sarat. 2001-05-24 Over 7,000 people have been legally executed in the United States this century, and over 3,000 men and women now sit on death rows across the country awaiting the same fate. Since the Supreme Court temporarily halted capital punishment in 1972, the death penalty has returned with a vengeance. Today there appears to be a widespread public consensus in favor of capital punishment and considerable political momentum to ensure that those sentenced to death are actually executed. Yet the death penalty remains troubling and controversial for many people. *The Killing State: Capital Punishment in Law, Politics, and Culture* explores what it means when the state kills and what it means for citizens to live in a killing state, helping us understand why America clings tenaciously to a punishment that has been abandoned by every other industrialized democracy. Edited by a leading figure in socio-legal studies, this book brings together the work of ten scholars, including recognized experts on the death penalty and noted scholars writing about it for the first time. Focused more on theory than on advocacy, these bracing essays

open up new questions for scholars and citizens: What is the relationship of the death penalty to the maintenance of political sovereignty? In what ways does the death penalty resemble and enable other forms of law's violence? How is capital punishment portrayed in popular culture? How does capital punishment express the new politics of crime, organize positions in the culture war, and affect the structure of American values? This book is a timely examination of a vitally important topic: the impact of state killing on our law, our politics, and our cultural life.

How to Commit the Perfect Murder David Elio Malocco.2015-02-18 Today, most murder crimes can be detected through DNA analysis and the assistance of forensic scientists like pathologists, toxicologists and ballistic experts. So, the question must be asked, can a criminal, using the knowledge of forensic science to their own advantage, reduce their percentage of detection, in order to commit the perfect murder? If a criminal knew exactly what investigators were looking for at a crime scene could they use that to avoid detection? Crime Scene Analysis is a documented and forensic process. Fortunately, most murderers do not approach their crimes in a scientific manner. But, if you thought like a forensic scientist, is it possible to commit the perfect murder? The idea of

committing the perfect murder, by which I mean, committing a murder and not being apprehended, is the ultimate intellectual challenge. A select few have endeavoured to put theory into practice. Some have succeeded. A few experts will reluctantly admit that there might be a way to get away with murder. They say it would require an undetectable weapon, a perfect location to commit the crime and an ingenious way to dispose of the body. There are many pitfalls a criminal can avoid by studying forensic science, just as there are many ways a poisoner can evade capture by studying toxicology. For example, did you know that the greatest source of evidence in a murder case is extracted from the victim's body? Forensic science will use an autopsy to determine the time of death; the victim's last meal; the manner of death; the weapon used; maybe even the actual weapon itself. Marks on the body will assist the pathologist in this regard. All of this information, pieced together, will bring them closer to catching the culprit. But there are ways to avoid this. There are ways of killing a person without leaving any marks on the body. There are ways to avoid leaving your DNA at the crime scene. There are ways to dispose of the body so that it will never be recovered, at least not in your lifetime. Even as you read this book, someone, somewhere is committing the perfect murder. They will never be caught and forensic science, although it has greatly enhanced detection rates, is not yet fool proof. Despite what you may have read elsewhere that the perfect murder exists only in Crime Fiction novels the fact is, that thousands of perfect murders are committed every year. Dr. Harold Shipman is the world's most prolific serial killer who killed over one thousand of his patients before making some some basic mistakes which resulted in his capture. It was only when his motive became one of greed that he was caught. Up to that point he had committed a thousand perfect murders. So yes, it is possible to commit the perfect murder. How? Well, let's say it's complicated

Means to a Kill Jon E. Lewis.1994

50 Ways to Die Jerry L. West.2011-06-01 *50 Ways To Die* is a compendium of death and sometimes violent crimes occurring in the county, and the social trends that surround them. West's research centered on records of Coroner's Inquest and microfilm of the newspaper, *Yorkville Enquirer*, both of which are archived at the History Center in York. The inquests records had not been studied until West began his research which coincided with members of the staff and volunteers were indexing. A great deal of appreciation is extended to Archivist Nancy Sanbet, her staff and the several volunteers who assisted. And a special thank you to Miles Gardner who gave the idea for this book by his *Murder and Mayhem in Old Kershaw*. This book gives accounts of murders, suicides, accidental deaths and gruesome infanticides, ending in 1929. West has randomly extracted more than twenty murders, some of which are still retold in local kitchens and living rooms. The list includes the 1929 chilling murder of Faye Wilson King by her husband, Rafe. This murder brought national publicity to the small western York County town of Sharon. Also included is the 1922 murder of playing children by a man angry over water in Clover, and the brutal murder of Johnny Lee Good in 1888. People of York County have murdered over women, food, liquor, money, slander and unpaid bills and they did it with planks, bare hands, guns, knives and even ironing boards. Sometimes these occurred on the spur of the moment with overheated blood and sometimes with cold calculation. While most crimes were white on white or black on black, the subject of race has been excluded expect in cases where mentioning it was for clarification. One thing is clear in many of these cases, justice came to some, and the times were certainly not safe for minorities, the poor, and children.
