*Jehovah's Witnesses in Europe* Gerhard Besier, Katarzyna Stokłosa. 2021-08-18 The history of Jehovah's Witnesses in Europe has always been one of persecution. This third volume documents this history, turning eastward. For the first time, the circumstances of a religious minority under different political systems can be compared across the continent. The studies gathered here provide insight into the methods of repression used by governments and mainstream churches, the survival strategies of Jehovah's Witnesses, and their various experiences under Eastern European dictatorships. The initially cordial relationship with Jehovah's Witnesses that developed after 1990 has steadily reverted to religious discrimination, culminating in Russia's renewed ban of Jehovah's Witnesses in 2017 and the confiscation of their properties. By violating the universal human right of religious freedom, the same conditions that prevailed in the Soviet era have now returned to "modern" Russia: With severest discrimination and abusing jurisdictional procedures to reach their political aspirations, the State tries to crush a religious community. Against this background, it is all the more important not to turn a blind eye to the situation of religious minorities in Eastern Europe, but instead to take an honest public stance against it.

Truly multidisciplinary in its approach, chapters are written by experts in fields ranging from clinical pathology to internal medicine, surgery, ophthalmology, and dermatology, drawing the various specialties together to create a comprehensive picture of cytology's role in diagnosis and treatment of animal disease. Firmly grounded in the primary literature, the book focuses on companion animals, with special chapters for species with fewer publications. Chapters are logically organized by body system, with additional chapters on tumors of particular import and diagnostic decision making. The first two sections of *Veterinary Cytology* focus on cytology techniques, quality control, and special laboratory techniques. Subsequent sections are organ/tissue-based and reflect what is known about the canine, feline, and equine species. This is followed by chapters on non-traditional species, including exotic companion mammals, rabbits, cattle, camelids, non-human primates, reptiles and birds, amphibians, fish, invertebrates, and sheep and goats. The last section highlights some unique features of the applications of cytology in industry settings. The Biblical Cosmos Robin A. Parry.2014-10-08 Welcome to the weird and wonderful world of the Bible. When we read Scripture we often imagine that the world inhabited by the Bible's characters was much the same as our own. We would be wrong. The biblical world is an ancient world with a flat earth that stands at the center of the cosmos, and with a vast ocean in the sky, chaos dragons, mystical mountains, demonic deserts, an underground zone for the dead, stars that are sentient beings, and, if you travel upwards and through the doors in the solid dome of the sky, God's heaven--the heart of the universe. This book takes readers on a guided tour of the biblical cosmos with the goal of opening up the Bible in its ancient world. It then goes further and seeks to show how this very ancient biblical way of seeing the world is still revelatory and can speak God's word afresh into our own modern worlds.

Modelling Intelligent Multi-Modal Transit Systems Agostino Nuzzolo, William H. K. Lam. 2017-02-17  
The growing mobility needs of travellers have led to the development of increasingly complex and integrated multi-modal transit networks. Hence, transport agencies and transit operators are now more urgently required to assist in the challenging task of effectively and efficiently planning, managing, and governing transit networks. A pre-condition for the development of an effective intelligent multi-modal transit system is the integration of information and communication technology (ICT) tools that will support the needs of transit operators and travellers. To achieve this, reliable real-time simulation and short-term forecasting of passenger demand and service network conditions are required to provide both real-time traveller information and successfully synchronise transit service planning and operations control. *Modelling Intelligent Multi-Modal Transit Systems* introduces the current trends in this newly emerging area. Recent developments in information

technology and telematics have enabled a large amount of data to become available, thus further attracting transport researchers to set up new models outside the context of the traditional data-driven approach. The alternative demand-supply interaction or network assignment modelling approach has improved greatly in recent years and has a crucial role to play in this new context.

**Shutting the Door to the Kingdom of God** Eric Michael Wilson.2022-08-20 This book uses the New World Translation of the Holy Scriptures to prove that all the teachings of Jehovah's Witnesses concerning the Last Days and the good news of salvation are unscriptural. The author, an elder of Jehovah's Witnesses for 40 years, shares the results of the last ten years of his research into such Watch Tower teachings as the 1914 invisible presence of Christ, the overlapping generation doctrine, the failed prophecies of 1925 and 1975, the fact that the Governing Body had evidence long ago showing that 607 BCE was not the date of the Babylonian exile, and most important of all, the abundant evidence that the salvation hope offered to the JW Other Sheep is a Rutherford invention wholly without support in Scripture. He also shares his experience on how Witnesses who continue to believe in Jehovah and Jesus can move beyond JW.org without sacrificing their faith. This is a must-read for any Jehovah's Witness who is a seeker of truth and unafraid to put his or her beliefs to the test.

*Jehovah's Witnesses* George D. Chryssides.2016-12-05 From its origins in nineteenth century Adventism until the present day, the Watch Tower Society has become one of the best known but least understood new religious movements. Resisting the tendency to define the movement in terms of the negative, this volume offers an empathetic account of the Jehovah's Witnesses, without defending or seeking to refute their beliefs. George Chryssides critically examines the historical and theological bases of the organization's teachings and practices, and discusses the changes and

continuities which have defined it. The book provides a valuable resource for scholars of new religious movements and contemporary religion.

**The European Convention on Human Rights** William Schabas.2015 The first complete article-by-article English commentary on the ECHR, with chapters devoted to each distinct provision or article, this commentary explores the substance of the rights, the workings of the Court, and the enforcement of judgements.

**The European Convention on Human Rights** William A. Schabas.2015-09-24 The European Convention on Human Rights: A Commentary is the first complete article-by-article commentary on the ECHR and its Protocols in English. This book provides an entry point for every part of the Convention: the substance of the rights, the workings of the Court, and the enforcement of its judgments. A separate chapter is devoted to each distinct provision or article of the Convention as well as to Protocols 1, 4, 6, 7, 12, 13, and 16, which have not been incorporated in the Convention itself and remain applicable to present law. Each chapter contains: a short introduction placing the provision within the context of international human rights law more generally; a review of the drafting history or preparatory work of the provision; a discussion of the interpretation of the text and the legal issues, with references to the case law of the European Court of Human Rights and the European Commission on Human Rights; and a selective bibliography on the provision. Through a thorough review of the ECHR this commentary is both exhaustive and concise. It is an accessible resource that is ideal for lawyers, students, journalists, and others with an interest in the world's most successful human rights regime.

*The First Century Aramaic Bible in Plain English (The Torah-The Five Books of Moses)* Rev. David Bauscher.2015-04-19 This is a prose English and very literal translation of the first five books of the Old Testament (The Torah). Aramaic was the language of Jesus and of 1st century Israel. The Peshitta Bible is the world's first entire Christian Bible. The Peshitta Old Testament is itself a translation of the Hebrew Bible completed in the 1st century AD, according to the available evidence. No Peshitta scholar places the Peshitta OT later than the 2nd century AD. As such, it gives an early look at the state of the Hebrew Bible at that time, since Aramaic and Hebrew are sister Semitic languages and about as close to each other as any two languages can be, sharing the same alphabet, writing, grammar, much vocabulary and even similar pronunciation of many words. Some of the original Old Testament is Aramaic, such as Daniel chapters 2 through 7 inclusive, and Ezra 4 through much of 7. It even appears in a verse of Genesis 31 and one verse in Jeremiah 10:11. 228 pages, hardback.

**A Blue Carbon Primer** Lisamarie Windham-Myers,Stephen Crooks,Tiffany G. Troxler.2018-11-16 Key features: Captures the historic context and recent developments in science and policy arenas that address the potential for coastal wetlands to be considered as significant contributors to carbon

sequestration Links multiple levels of science (biogeochemistry, geomorphology, paleoclimate, etc.) with blue carbon concepts (science, policy, mapping, operationalization, economics) in a single compendium Concludes with a discussion of future directions which covers integrated scientific approaches, impending threats and specific gaps in current knowledge Includes 7 case studies from across the globe that demonstrate the benefits and challenges of blue carbon accounting Written by over 100 leading global blue carbon experts in science and policy. Blue Carbon has emerged as a term that represents the distinctive carbon stocks and fluxes into or out of coastal wetlands such as marshes, mangroves, and seagrasses. The Blue Carbon concept has rapidly developed in science literature and is highly relevant politically, as nations and markets are developing blue carbon monitoring and management tools and policies. This book is a comprehensive and current compendium of the state of the science, the state of maps and mapping protocols, and the state of policy incentives (including economic valuation of blue carbon), with additional sections on operationalizing blue carbon projects and 7 case studies with global relevance.

Protection and Promotion of Freedom of Religions and Beliefs in the European Context Luca Paladini, Maria del Ángel Iglesias Vázquez. 2023-09-30 This book offers an in-depth analysis of a fundamental human freedom and a cornerstone of democracy: the Freedom of Religions or Beliefs (FoRB). The book focuses on the legal protection and promotion of FoRB in Europe because, in this context, exercising this right goes beyond a mere internal positioning in terms of legislation; rather, it is influenced by international and supranational case law, as well as the promotional activities of selected non-state subjects of international law. The content is divided into three sections: Part I on the European Convention of Human Rights, Part II on the EU, and Part III on other international actors. The first two Parts examine FoRB in its systematic aspects and “day-to-day” aspects. In

contrast, the third Part highlights the promotional activities carried out by the Holy See, the ILO, the Council of Europe (“beyond the Strasbourg Court”), and the OSCE to promote, recommend or otherwise support it. Overall, the volume highlights how the exercise of FoRB can be ensured via international and supranational legal protection (both normative and judicial) and via promotional activities aimed at encouraging and helping states guarantee tolerance and pluralism in their national legislation. The 16 main chapters offer a broad overview of the topic under investigation. Each contribution can be seen as a stand-alone study and, simultaneously, as a link in a chain of legal analysis that connects multiple FoRB-focused questions. The book offers a valuable tool for all readers with an academic or professional interest in FoRB and those who have to address the issue of how to protect this freedom. It is intended not only for academics who work in the field of law but also for legal practitioners (judges, lawyers, diplomats), human rights advocates, members of religious and spiritual communities, policymakers and students.

**Constitutional Dialogue in Common Law Asia** Po Jen Yap. 2015-07-16 In a comprehensive examination of the constitutional systems of Hong Kong, Malaysia, and Singapore, Po Jen Yap contributes to a field that has traditionally focussed on Western jurisdictions. Drawing on the history and constitutional framework of these Asian law systems, this book examines the political structures and traditions that were inherited from the British colonial government and the major constitutional developments since decolonization. Yap examines the judicial crises that have occurred in each of the three jurisdictions and explores the development of sub-constitutional doctrines that allows the courts to preserve the right of the legislature to disagree with the courts' decisions using the ordinary political processes. The book focusses on how these novel judicial techniques can be applied to four core constitutional concerns: freedom of expression, freedom of religion, right to

equality, and criminal due process rights. Each chapter examines one core topic and defends a model of dialogic judicial review that offers a compelling alternative to legislative or judicial supremacy.

*Putin's Propaganda Machine* Marcel H. Van Herpen.2015-10-01 Putin's Propaganda Machine examines Russia's "information war," one of the most striking features of its intervention in Ukraine. Marcel H. Van Herpen argues that the Kremlin's propaganda offensive is a carefully prepared strategy, implemented and tested over the last decade. Initially intended as a tool to enhance Russia's soft power, it quickly developed into one of the main instruments of Russia's new imperialism, reminiscent of the height of the Cold War. Van Herpen demonstrates that the Kremlin's propaganda machine not only plays a central role in its "hybrid war" in Ukraine, but also has broader geopolitical objectives intended to roll back the influence of NATO and the United States in Europe. Drawing on years of research, Van Herpen shows how the Kremlin built a multitude of soft power instruments and transformed them into effective weapons in a new information war with the West. /span

Reactions to the Law by Minority Religions Eileen Barker, James T. Richardson. 2020-12-30 Much has been written about the law as it affects new and minority religions, but relatively little has been written about how such religions react to the law. This book presents a wide variety of responses by minority religions to the legal environments within which they find themselves. An international panel of experts offer examples from North America, Europe and Asia demonstrating how religions with relatively little status may resort to violence or passive acceptance of the law; how they may change their beliefs or practices in order to be in compliance with the law; or how they may resort to the law itself in order to change their legal standing, sometimes by forging alliances with those with more power or authority to achieve their goals. The volume concludes by applying theoretical insights from sociological studies of law, religion and social movements to the variety of responses. The first systematic collection focussing on how minority religions respond to efforts at social control by various governmental agents, this book provides a vital reference for scholars of religion and the law, new religious movements, minority religions and the sociology of religion.

**Young's Literal Translation of the Bible** Young, Robert.2014-06-14 Young's Literal Translation of the Bible is, as the name implies, a strictly literal translation of the Hebrew and Greek texts (from the Textus Receptus and Majority Text). Compiled by Robert Young in 1862, he went on to produce a revised version in 1887 based on the Westcott-Hort text which had been completed in 1885. Young

died on October 14, 1888, and the publisher released a New Revised Edition in 1898. Young used the present tense in many places where other translations used the past tense- particularly in narratives. The Preface to the Second Edition states: "If a translation gives a present tense when the original gives a past, or a past when it has a present; a perfect for a future, or a future for a perfect; an a for a the, or a the for an a; an imperative for a subjunctive, or a subjunctive for an imperative; a verb for a noun, or a noun for a verb, it is clear that verbal inspiration is as much overlooked as if it had no existence. THE WORD OF GOD IS MADE VOID BY THE TRADITIONS OF MEN. [Emphasis in original.]" For example, the YLT version of Genesis begins as follows: 1. In the beginning of God's preparing the heavens and the earth-- 2. The earth hath existed waste and void, and darkness on the face of the deep, and the Spirit of God fluttering on the face of the waters, 3. And God saith, 'Let light be;' and light is. 4. And God seeth the light that it is good, and God seperateth between the light and the darkness, 5. And God alled to the light 'Day,' and to the darkness He hath called 'Night;' and there is an evening, and there is a morning---day one. Young's Literal Translation in the 1898 Edition also consistently renders the Hebrew Tetragrammaton (the four Hebrew letters usually transliterated YHWH or JHVH that form a biblical proper name of God) throughout the Old Covenant/Testament as Jehovah, instead of the traditional practice of LORD in small capitals, which was used in editions prior to 1898. Young's usage of English present tense rather than past tense has been supported by scholars ranging from the medieval Jewish rabbi Rashi (who advised, If you are going to interpret [this passage] in its plain sense, interpret it thus: At the beginning of the creation of heaven and earth, when the earth was (or the earth being) unformed and void . . . God said, 'Let there be light.') to Richard Elliott Friedman in his translation of the Five Books in The Bible with Sources Revealed (2002). There is a linked Table of Contents for each book and chapter.
