Transforming Universities with Digital Distance Education Mark Nichols.2020-05-18 Transforming Universities with Digital Distance Education explores the ways in which higher education stakeholders can apply and leverage the benefits of online learning. Systems-wide access, scale and quality are achievable goals but require forms of teamwork and financial modelling beyond those at the instructor or programme level. This book’s organisational view tackles the systems and practices that will help senior managers and decision-makers guide an entire institution away from dysfunction—incremental progress, insufficient capacity, high costs and generic products—and towards the macro-level implementation and operations of effective online pedagogies.

Money in One Lesson Gavin Jackson.2022-01-20 'Superb' - Tim Harford, author of How to Make the World Add Up Money is essential to the economy and how we live our lives, yet is inherently worthless. We can use it to build a home or send us to space, and it can lead to the rise and fall of empires. Few innovations have had such a huge impact on the development of humanity, but money is a shared fiction; a story we believe in so long as others act as if it is true. Money is rarely out of the headlines - from the invention of cryptocurrencies to the problem of high inflation, extraordinary interventions by central banks and the power the West has over the worldwide banking system. In Money in One Lesson, Gavin Jackson answers the most important questions on what money is and how it shapes our world, drawing on vivid examples from throughout history to demystify and show how societies and its citizens, both past and present, are always entwined with matters of money. 'A highly illuminating, well-researched and beautifully written book on one of humanity's most important innovations' - Martin Wolf, chief economics commentator, Financial Times

Cross-border couples property regimes in action before courts. Understanding the eu regulations 1103 and 1104/2016 in practice María José Cazorla González, Lucia Ruggeri.2022-09-09 This book has the prime purpose of analysing practice through European and national case law from the entry into force of the Twin Regulations, adding hypothetical cases in some of the countries participating in enhanced cooperation that do not yet provide for the direct application of the Regulations, and resolving them by basing judgments on private international law. The European family today is diverse, and proof of this is the different models and their evolution in recent decades, with family relationships being based not only on those constituted by marriage but also on those formed by couples living together in a stable manner.

Rome Regulations Graf-Peter Calliess, Moritz Renner.2020-08-10 The law applicable to contractual and non-contractual obligations in cross-border civil and commercial matters in the European Union (EU) is the remit of the so-called Rome I and II Regulations that entered into force in 2009, supplemented by the Rome III Regulation of 2012 dealing specifically with divorce and legal separation. This article-by-article commentary - now updated to its third edition - has become a cornerstone resource in handling European cases involving conflict of laws. The occasion for publishing a third edition is that several landmark judgments on the conflict of laws have been recently rendered both by the Court of Justice of the EU and by domestic courts. Moreover, with Brexit, one of the largest European states will enter into a new form of relationship with the EU, which will specifically impact the conflict of laws. The effects of these major developments are reflected throughout the new edition’s extensively revised article-by-article commentary. The commentary, authored by leading scholars of conflict of laws and drawing on a wide spectrum of case law and scholarship, highlights, among much else, such long-term implications of the Rome Regulations as the following: principles of interpretation; limiting the effects of forum shopping; limiting the trade-restricting effects of the fragmentation of national private laws; ensuring the free movement of persons; enhancement of legal certainty and predictability; and potential solutions for an agreement-based Brexit. It provides black letter law as represented by the jurisprudence of the Court of Justice of the EU and the Member State courts, as well as the latest academic opinion. In the current era of globalization, where communication, transaction, and migration across borders have transformed from exceptional to omnipresent phenomena, the pressing question is no longer if the state has to grant access to justice in international situations but how that right can be implemented effectively. To this end, renowned conflict of laws scholars analyse every provision of the Regulations in a systematic and thorough manner, making them accessible to a broad international legal audience. The result is an indispensable companion for academics, judges, lawyers, and legal professionals in their day-to-day work.

Free Movement of Civil Judgments in the European Union and the Right to a Fair Trial Monique Hazelhorst.2017-02-27 This book examines the attainment of complete free movement of civil judgments across EU member states from the perspective of its conformity with the fundamental right to a fair trial. In the integrated legal order of the European Union, it is essential that litigants can rely on a judgment no matter where in the EU it was delivered. Effective mechanisms for cross-border recognition and the enforcement of judgments provide both debtors and creditors with the security that their rights, including their right to a fair trial, will be protected. In recent years the attainment of complete free movement of civil judgments, through simplification or abolition of these mechanisms, has become a priority for the European legislator. The text uniquely combines a thorough discussion of EU legislation with an in-depth and critical examination of its interplay with fundamental rights. It contains an over-view and comparison of both ECtHR and CJEU case law on the right to a fair trial, and provides a great number of specific recommendations for current and future legislation. With its critical discussion of EU Regulations from both a practical and a theoretical standpoint, this book is particularly relevant to legislators and policymakers working in this field. Because of the extensive overview of the functioning of the EU's mechanisms and of relevant case law it provides, the book is also highly relevant to academics and practitioners. Monique Hazelhorst is Judicial Assistant at the Supreme Court of the Netherlands. She studied Law and Legal Research at Utrecht University and holds a Ph.D. in Law from the Erasmus School of Law at Erasmus University Rotterdam.

This guide should prove valuable to scientists, engineers, and managers-companies, governments, universities, and consultants.

Mammalian Toxicology Mohamed Abou-Donia.2015-02-11 Mammalian Toxicology surveys chemical agents and examines how such chemicals impact on human health, emphasizing the importance in minimizing environmental exposure to chemical and physical hazards in our homes, communities

and workplaces through such media as contaminated water, soil and air. Starting with the basic principles on a wide range of toxic agents, this textbook describes how they enter the body, their mechanisms of action once inside, and strategies for diagnosis, prevention and treatment. Topics covered include: General principles of toxicology: pharmacological and toxicological principles underpinning the study of toxicology, risk assessments and mechanisms of cell death Disposition: routes of chemical exposures, entry into the body and various tissues, storage, metabolic biotransformation and elimination, with examples from various toxicants. Toxic agents: the occurrences, disposition in the body, health effects, toxic mechanisms, antidotes and treatments of a range of agents including pesticides, metals, solvents, gases, nanomaterials, food components and additives, pharmaceuticals, drugs of abuse, natural toxins, endocrine disruptors, radiation, and warfare weapons. Toxic effects: including neurotoxicity, developmental toxicity, immunotoxicity, teratogenicity, male and female reproductive toxicity, mutagenicity, carcinogenicity, pulmonary toxicity, cardiovascular toxicity, hepatotoxicity, gastrointestinal toxicity and cardiovascular toxicity Toxicology and society: epidemiological studies of chemical-induced diseases in human populations, and a vision for toxicology in the 21st century. Mammalian Toxicology is an essential primer for students of toxicology, biochemistry, biology, medicine and chemistry. It is also appropriate for professional toxicologists in research or regulatory affairs, and anyone who needs to understand the adverse effects of toxic agents on the human body.
