Contemporary Perspectives on Art and International Development Polly Stupples, Katerina Teaiwa. 2016-10-26 Visual artists, craftspeople, musicians, and performers have been supported by the development community for at least twenty years, yet there has been little grounded and critical research into the practices and politics of that support. This new Routledge book remedies that omission and brings together varied perspectives from artists, policy-makers, and researchers working in the Pacific, Africa, Latin America, and Europe to explore the challenges and opportunities of supporting the arts in the development context. The book offers a series of grounded analyses which cover: strategies for the sustainability of arts enterprises; innovative evaluation methods; theoretical engagements with questions of art, agency, and social change; artists' entanglements with legal and structural frameworks; processes of cultural mapping; and the artist/donor interface. The creative economy is increasingly recognized as a driver of development and this book also investigates the contribution made by the arts to the processes of international development, and considers how those processes can best be supported by development agencies. *Contemporary Perspectives on Art and International Development* gives scholars of Development Studies, Social and Cultural Geography, Anthropology, Cultural Policy, Cultural Studies, and Global Studies a contextually and thematically diverse range of insights into this emerging research field.

The Tomb Robber and King Tut Sarah Gauch. 2015-07-07 For years Mr. Howard has come to the valley near my village where the great pharaohs, the kings of Egypt, are buried in underground tombs. And for months I've pleaded with Baba, my father, to let me work with Mr. Howard, as he searches for a certain king's tomb—King Tut's tomb. Young Hassan wants nothing more than to help with the search. But Hassan's father is concerned. Their family is descended from 'tomb robbers'. Despite being honest farmers now, they're not fully trusted. Hassan could get into serious trouble. But Hassan is determined. Soon, he is working long, hard days filling baskets with sand, and baring the brunt of others who are suspicious of him. Just when Hassan is most discouraged, he spots something glittering where he's been working. And no one else has seen it yet. What should he do? *The Tomb Robber and King Tut* is an exciting imagining of the actual discovery of the boy king's tomb in the 1920s. Gorgeously illustrated by Allen Gurns, this book is for anyone intrigued by Egyptian history and the beginnings of King Tut's incredible fame.

The Unknown Tutankhamun Marianne Eaton-Krauss. 2015-12-17 The reign of Tutankhamun was of major significance in the history of ancient Egypt. Following Howard Carter's discovery of the king's tomb in 1922, the story of the boy who became Pharaoh, died young and was buried in splendor at the height of Egyptian civilization captivated generations. But there exists a wide discrepancy between that saga and what scholarship has discovered in the last few decades about Tutankhamun's reign. A truer story is revealed, not by objects from his tomb, but by statuary, reliefs, paintings, and architecture from outside the Valley of the Kings. Marianne Eaton-Krauss, a leading authority on the boy king and the Amarna Period, guides readers through the recent findings of international research and the relevant documentation from a wide variety of sources, to create an accessible and comprehensive biography. Tracing Tutankhamun's life from birth to burial, she analyzes his parentage, his childhood as Prince Tutankhaten, his accession and change of name to Tutankhamun, his role in the restoration of the traditional cults and his own building projects, his death and burial, and the attitudes of his immediate successors to his reign. Illustrated with color and black-and-white images, the book includes extensive endnotes and selected bibliography, which will make it essential reading for students and scholars as well as anyone interested in Tutankhamun.

Eurasia 2.0 Mikhail Suslov, Mark Bassin. 2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post-Soviet space with special focus on the new phenomenon of digital geopolitics, which is an overarching term for different political practices including dissemination of geopolitical ideas online, using the internet by political figures and diplomats for legitimation and outreach activity, and viral spread of geopolitical memes. Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice. Our authors consider new spatial sensibilities and new identities of global as well as local Selves, the emergence of which is facilitated by the internet. They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery. Developing Manuel Castells' argument that social activism in the digital era is organized around cultural values, the essays discuss new geopolitical ideologies which aim to reinforce Russia's spiritual sovereignty as a unique civilization, while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian-speaking diaspora or employing traditionalist rhetoric. Great Power imagery, enemy-making, and visual mappings of Russia's future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears. In the age of new media, however, this is being done with greater subtlety by mobilizing the grassroots, contracting private information channels, and de-politicizing geopolitics. Given the political events of recent years, it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors.

Photographing Tutankhamun Christina Riggs.2020-09-20 They are among the most famous and compelling photographs ever made in archaeology: Howard Carter kneeling before the burial shrines of Tutankhamun; life-size statues of the boy king on guard beside a doorway, tantalizingly sealed, in his tomb; or a solid gold coffin still draped with flowers cut more than 3,300 years ago. Yet until now, no study has explored the ways in which photography helped mythologize the tomb of Tutankhamun, nor the role photography played in shaping archaeological methods and interpretations, both in and beyond the field. This book undertakes the first critical analysis of the photographic archive formed during the ten-year clearance of the tomb, and in doing so explores the interface between photography and archaeology at a pivotal time for both. Photographing Tutankhamun foregrounds photography as a material, technical, and social process in early 20th-century archaeology, in order to question how the photograph made and remade 'ancient Egypt' in the waning age of colonial order.

Plant Adaptations to Phosphate Deficiency Alex Joseph Valentine,Alejandra Zúñiga-Feest,Aleysia Kleinert,Pablo Cornejo,Vagner A.

Benedito.2021-05-18 Phosphate is an essential mineral to all plants, and its availability in soils is an increasing challenge for agriculture. Phosphate is abundant in soils but its biological availability is often low due to the complexes that it forms with soil minerals and compounds. The biological availability of Phosphate is further reduced in acidic soils, which represent approximately 40% of earth's arable agricultural lands. Agricultural systems compensate Phosphate deficiency with fertilizers coming from the mining of rock phosphate, which is estimated to exhaust within the next 50 years. For these reasons, Phosphate limitations in natural and agricultural ecosystems is going to become a global problem, and we urgently need to better understand how plants respond to Phosphate deficiency.

Epitranscriptomics: The Novel RNA Frontier Giovanni Nigita, Mario Acunzo, William Chi Shing Cho, Carlo Maria Croce. 2019-01-31 Following the formulation of the central dogma of molecular biology and the later discovery of classes of non-coding RNAs, the primary focus of Genetics was essentially on variation of DNA aiming at elucidating biological pathways perturbed in diseases. Recently, extensive attention has shifted towards the study of posttranscriptional RNA modifications occurring in both protein-coding as well as non-coding RNAs, revealing a novel and finer layer of complexity in gene regulation. This, in turn, has led to the birth of the novel field of 'Epitranscriptomics'. The recent increase of applications of high-throughput sequencing technology (HTS) has allowed the unprecedented opportunity to identify on a transcriptome-wide scale, millions of RNA modifications in human genes, counting today more than 140 distinct types such as: methylation (e.g. m6A, m1A, m5C, hm5C, 2'OMe) methylation (e.g. m6A, m1A, m5C, hm5C, 2'OMe), pseudourylation (?), deamination (e.g. A-to-I RNA editing). The scope of this Research Topic was to collect both reviews and research articles addressing the wet lab approaches and bioinformatics methodologies necessary to aid in the identification of novel RNA modifications and characterization of their biological functions. Among the articles embracing the aim of the Research Topic, we have collected four original research and methods articles, five reviews, and a technology article.

Harmonization and Development of Resources and Tools for Italian Natural Language Processing within the PARLI Project Roberto Basili, Cristina Bosco, Rodolfo Delmonte, Alessandro Moschitti, Maria Simi. 2015-01-14 The papers collected in this volume are selected as a sample of the progress in Natural Language Processing (NLP) performed within the Italian NLP community and especially attested by the PARLI project. PARLI (Portale per l'Accesso alle Risorse in Lingua Italiana) is a project partially funded by the Ministero Italiano per l'Università e la Ricerca (PRIN 2008) from 2008 to 2012 for monitoring and fostering the harmonic growth and coordination of the activities of Italian NLP. It was proposed by various teams of researchers working in Italian universities and research institutions. According to the spirit of the PARLI project, most of the resources and tools created within the project and here described are freely distributed and they did not terminate their life at the end of the project itself, hoping they could be a key factor in future development of computational linguistics.

Exhibitions Beyond Boundaries Harriet Atkinson, Verity Clarkson, Sarah A. Lichtman. 2022-12-01 After World War II, museum and gallery exhibitions, industrial and trade fairs, biennials, triennials, festivals and world's fairs increasingly came to be used as locations for the exercise of soft power, for displays of cultural diplomacy between nations and as spaces for addressing areas of social and political contestation. *Exhibitions Beyond Boundaries* opens with a substantial introduction to the key debates, followed by case studies that advance the field of exhibition histories both geographically and methodologically, focusing on postwar transnational exchange and the wider networks engendered through exhibitions. Chapters trace relations across Africa, Asia, Europe, the Middle East, the Pacific, and the United States of America, drawing on a range of approaches and perspectives, principally from art and design history but also from social, economic and political history, and museum studies. Featured case studies include the presentation of African-American Art at FESMAN '66 and FESTAC '77, the US's 1961 Small Industries Exhibition in Colombo, Israel's early appearances at the Venice Biennale, the Vatican Pavilion at the 1964-1965 New York World's Fair, and Hong Kong's Pavilion at Expo 70 in Tokyo.
