Verguisd en vergeten (3 vols.) Harry A. Poeze.2007-01-01 Tan Malaka's levensloop is vaak in mysterie gehuld. In dit boek wordt dit grotendeels ontrafeld, zoals ook waar en door wie hij om het leven werd gebracht. Zijn prominente rol tijdens de Indonesische Revolutie—actief en als symbool—maken het noodzakelijk uitgebreid de politieke verwickelingen in de Republiek en in de verdeelde linkse beweging te beschrijven. In vele opzichten worden over doorslaggevende gebeurtenissen in de Revolutie nieuwe gegevens en visies verschaft.

The Universe is Intelligent. The Soul Exists. Quantum Mysteries, Multiverse, Entanglement, Synchronicity. Beyond Materiality, for a Spiritual Vision of the Cosmos. George Anderson.2019-08-24 Pages 270. Illustrated. The incredible discoveries of quantum physics are completely upsetting the assumptions of classical science. Today the technique allows amazing achievements. For example, the first quantum computers with almost unlimited computing capabilities are being realized. Some support the real

possibility of time travel. In addition to these innovations known to the general public, there are others less known but no less important. They are the novelties deriving from quantum studies, among which we can mention the superposition of states and the quantum collapse. The superposition of states confirms that the same particle can be found simultaneously in two or more places. The theory of quantum collapse confirms that the behavior of matter can be decided simply by observation. These are not assumptions, but principles verified experimentally. This book does not only deal with these innovations, but gives much space to more advanced theories. These are theories announced but not yet confirmed. Furthermore, the book also evaluates the most risky theories, provided they are scientifically based. For example, the book talks about the multiverse, or theory of parallel universes, proposed by the physicist Hugh Everett. In the same way the book speaks of non-locality. It is a psychic space totally independent of the laws of classical physics. As a result of non-locality, elementary particles, located at astronomical distances, behave as if they were one. This book also talks about the latest research by Roger Penrose, an unbelieving physicist, and Stuart Hameroff. According to these two scientists the soul exists and can be identified with quantum fluctuations. These fluctuations have the ability to survive the physical death of the body. If really the souls are condensations of quantum fluctuations, we can formulate a question: will it ever be possible to devise instruments that allow dialogue with these fluctuations? The book exposes the research of established scientists but without using any mathematical formula. The theories are exposed in a simple and understandable way to everyone. In this way everyone can discover the unsuspected aspects of the reality in which we live. It is clear that quantum physics is decreeing the end of materialism and the beginning of a new cultural phase, based on the collaboration between spirit and matter.

Onze voorouders in verschillende taferelen geschetst. Deel 5: De reisgenooten Jacob van Lennep.2022-08-12 Alhoewel de reeks *Onze voorouders in verschillende taferelen geschetst* begon als een manier om Jacob van Lenneps kortere werk te verzamelen, bevat dit laatste deel slechts één verhaal (van romanlengte). De reisgenoten begint in 1270, met een kruistocht als achtergrond. De kruistocht is geen groot succes geworden en het leger keert moeizaam naar huis terug, gedreven door honger en met allerlei tegenslagen onderweg. Onder hen bevinden zich ook enkele Nederlanders, met als voornaamste de ridderlijke Jonker Jan van Arkel. Rondom hem beweegt een bonte cast van avonturiers, die allemaal hun moment in de spotlights krijgen, met ingelaste verhalen. Daardoor krijgen we een afwisseling van romance en

avontuur, gebeurtenissen te land en ter zee, in het hier en nu en het recente verleden. Jacob van Lennep (1802-1868) was een Nederlandse schrijver, dichter, taalkundige, advocaat en politicus. Hij was de belangrijkste 19de-eeuwse schrijver van Nederlandse historische romans. Zijn bekendste titels zijn Elisabeth Musch en De roos van Dekama, allebei romans die belangrijke episodes uit de Nederlandse geschiedenis als achtergrond nemen. Van Lennep is ook de literatuurgeschiedenis ingegaan als de man die Multatuli's Max Havelaar op de markt bracht, in een politiek afgezwakte versie, tot grote woede van de auteur.

The Scientific Correspondence of H.A. Lorentz A.J.

Kox.2018-07-27 This is the second and final volume of Dutch physicist Hendrik Antoon Lorentz's scientific correspondence with Dutch colleagues, including Pieter Zeeman and Paul Ehrenfest. These 294 letters cover multiple subjects, ranging from pure mathematics to magneto-optics and wave mechanics. They reveal much about their author, including Lorentz's surprisingly active involvement in experimental matters in the first decades of his career. Letters are also devoted to general relativity, Lorentz's 1908 lecture on radiation theory, and his receipt of the Nobel Prize along with Zeeman in 1902. The letters are presented in their original language; Dutch originals are accompanied by English translations. A concise biography of Lorentz is also included.

Een zwarte vrijstaat in Suriname H.U.E. Thoden van Velzen, Wilhelmina van Velzen.2011-01-01 Een zwarte vrijstaat in Suriname vertelt de geschiedenis van de Okanisi in de achttiende eeuw. Het is een geschiedenis van hekserij en orakels, van knechting en ontsnapping, van opsporing en oorlog. Na jaren van strijd kwam de koloniale overheid tot de conclusie dat zij de Marrons niet onderwerpen kon en bood hun in 1760 een vrede aan die door de Okanisi werd geaccepteerd. Het sluiten van de vrede tussen overheid en Okanisi was de erkenning van de eerste 'zwarte vrijstaat' in Suriname.

History of the Literary Cultures of East-Central Europe Marcel Cornis-Pope, John Neubauer.2004-05-28 National literary histories based on internally homogeneous native traditions have significantly contributed to the construction of national identities, especially in multicultural East-Central Europe, the region between the German and Russian hegemonic cultural powers stretching from the Baltic states to the Balkans. History of the Literary Cultures of East-Central Europe, which covers the last two hundred years, reconceptualizes these literary traditions by de-emphasizing the national myths and by highlighting analogies and points of contact, as well as hybrid and marginal phenomena that traditional national histories have ignored or deliberately

The four volumes of the History configure the literatures from five angles: (1) key political events, (2) literary periods and genres, (3) cities and regions, (4) literary institutions, and (5) real and imaginary figures. The first volume, which includes the first two of these dimensions, is a collaborative effort of more than fifty contributors from Eastern and Western Europe, the US, and Canada. The four volumes of the History comprise the first volume in the new subseries on Literary Cultures.

Language in Action Johan van Benthem. 1995 Language in Action demonstrates the viability of mathematical research into the foundations of categorial grammar, a topic at the border between logic and linguistics. Since its initial publication it has become the classic work in the foundations of categorial grammar. A new introduction to this paperback edition updates the open research problems and records relevant results through pointers to the literature. Van Benthem presents the categorial processing of syntax and semantics as a central component in a more general dynamic logic of information flow, in tune with computational developments in artificial intelligence and cognitive science. Using the paradigm of categorial grammar, he describes the substructural logics driving the dynamics of natural language syntax and semantics. This is a general type-theoretic approach that lends itself easily to proof-theoretic and semantic studies in tandem with standard logic. The emphasis is on a broad landscape of substructural categorial logics and their proof-theoretical and semantic peculiarities. This provides a systematic theory for natural language understanding, admitting of significant mathematical results. Moreover, the theory makes possible dynamic interpretations that view natural languages as programming formalisms for various cognitive activities.

Fire Metaphors Jonathan Charteris-Black.2016-11-17 This detailed study of fire metaphors provides a deep understanding of the purposeful work of metaphor in discourse. It analyses how and why fire metaphors are used in discourses of awe (mythology and religion) and authority (political speeches and media reports). Fire serves as a productive and salient lexical field for metaphors that seek to create awe and impose authority. These metaphors offer a rich linguistic and conceptual resource for authors of mythologies, theologies, literature, speeches and journalism, and provide insight into the rich interplay of thought, language and culture. This book explores the purpose of fire metaphors in genres ranging from the Norse sagas to religious texts, from Shakespeare to British and American political speeches. Ultimately it arrives at an understanding of the rhetorical work that metaphor accomplishes in communicating evaluations and ideologies.
