De Sphaera of Johannes de Sacrobosco in the Early Modern Period Matteo

Valleriani.2020-01-01 This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

Divination on stage Folke Gernert.2021-02-08 Magicians, necromancers and astrologers are assiduous characters in the European golden age theatre. This book deals with dramatic characters who act as physiognomists or palm readers in the fictional world and analyses the fictionalisation of physiognomic lore as a practice of divination in early modern Romance theatre from Pietro Aretino and Giordano Bruno to Lope de Vega, Calderón de la Barca and Thomas Corneille.

Relatos para ratos Isidro Moreno Carrascosa.2018-06-06 Isidro Moreno no es autor monotemático. Su hábil pluma es capaz de abordar desde asuntos domésticos hasta futuristas pasando por escenas históricas a las que da su particular visión. Es capaz de captar siempre la atención del lector, desde la primera línea, con una muy cuidada prosa no exenta de un personal y fino humor. Su obra destila muchas veces la comicidad del absurdo que bebe de las fuentes de nuestros clásicos de mediados del pasado siglo. Rafael Olivares Seguí El primer relato que Isidro envió a nuestra querida Cincuenta palabras fue Ausencias. Quedó finalista aquel mes y poco más tarde saldría publicado en nuestra primera antología de relatos. Veréis, cuando uno recibe un relato de alguien nuevo, a menudo sucede una de dos cosas: pensar en secreto que no se le echará de menos si no regresa o, por el contrario, desear que produzca más, muchas más historias. A la vista está que Isidro cayó en la segunda categoría. Alejandro Garaizar Quien tenga la oportunidad de tener este libro en sus manos podrá comprobar que estas casi doscientas historias sorprenden y se salen de lo común, aunque provengan de lo cotidiano; el aderezo de lirismo, intensidad y recovecos las vuelve originales, unas perlas creativas que abarcan multitud de temas, con sorpresa final asegurada. A Musical Offering Luis Sagasti.2020-07-21 A lyrical celebration of storytelling, of childhood, and of the transformative power of music. Tracing a circular course that echoes Bach's Goldberg Variations, Luis Sagasti's second book to appear in English takes the guise of a musical Scheherazade, recounting story after story, vibrating to celestial harmonies. From the music born of the sun to the

music sent into space on the Voyager mission, from Rothko to rock music, from the composers of the concentration camps to a weeping room for Argentinian conscripts in the Falklands, *A Musical Offering* traverses the shifting sands of fiction and history.

Historia del dónde Tommaso Maccacaro, Claudio M. Tartari.2019-03-20 Una historia lúcida y deslumbrante de una de las búsquedas más esenciales e intemporales del ser humano: comprender los límites del mundo y encontrar el sitio que ocupamos en él. «¿Dónde estamos?» es una pregunta aparentemente trivial que se planteó el hombre desde que empezó a medir el espacio que lo rodea y a la que no ha podido responder de forma definitiva. En esta obra, el astrofísico Maccacaro y el historiador medieval Tartari nos proponen un recorrido sólido y revelador por esa búsqueda, señalando los hitos que en distintos momentos de la historia fueron clave para el desarrollo de la ciencia, la cultura y la percepción del mundo. Los autores nos conducen desde el vago espacio apenas percibido de un valle, como debía de ser el del *Homo erectus*, a los mitos cosmogónicos más arcaicos, pasando por los primeros sistemas de representación del mundo. En la Edad del Bronce los grandes imperios contaban con elaborados mapas conceptuales y las estrellas ya señalaban el camino. En la Antigüedad clásica los espacios celeste y terrestre aumentaron exponencialmente de tamaño. En la Edad Media se perfeccionan los instrumentos de cálculo para la navegación, hasta que el descubrimiento del Nuevo Mundo revoluciona la concepción del «dónde». En la Edad Moderna se descubren nuevos planetas y, en poco tiempo, algunas estrellas se convierten en galaxias, algunas teorías deforman literalmente el mundo y el «dónde» se vuelve elástico, asociado al tiempo, inmenso y cambiante.

Chasing Venus Andrea Wulf.2012-05-01 The author of the highly acclaimed *Founding Gardeners* now gives us an enlightening chronicle of the first truly international scientific endeavor—the eighteenth-century quest to observe the transit of Venus and measure the solar system. On June 6, 1761, the world paused to observe a momentous occasion: the first transit of Venus between the earth and the sun in more than a century. Through that observation, astronomers could calculate the size of the solar system—but only if they could compile data from many different points of the globe, all recorded during the short period of the transit. Overcoming incredible odds and political strife, astronomers from Britain, France, Russia, Germany, Sweden, and the American colonies set up observatories in remote corners of the world, only to have their efforts thwarted by unpredictable weather and warring armies. Fortunately, transits of Venus occur in pairs: eight years later, the scientists would have another opportunity to succeed. *Chasing Venus* brings to life the personalities of the eighteenth-century astronomers who embarked upon this complex and essential scientific venture, painting a vivid portrait of the collaborations, the rivalries, and the volatile international politics that hindered them at every turn. In the end, what they accomplished would change our conception of the universe and would forever alter the nature of scientific research.

The Second Wave Carnibal.2020-11-05 In a galaxy where humans play a deadly game of war with arms of mass destruction, three ships leave Earth on a mission to expand humanity's frontiers. As it is, it turns out that they are the last survivors of the species. Today, 5000 years later and after colonising half of the Milky Way, humanity once again stares into the abyss of its own extinction. However, in the past they could not count on her. Tanica is the unexpected product of 6000 years of genetic scheming and manipulation. She is Sejmet: The One They Await; yet at the same time SHE is much more. Her birth is humanity's response to the challenge of creating super humans that will help mankind start over anew. She also represents, however, a threat to the all-powerful Council, which implacably pursues all level three mutants and will, in the process, destabilise the very Galactic

Government in a deadly race across the galaxy. In Tanica's hands lies the salvation or destruction of the human race, even though she is still unaware of her full potential. She must face off against all comers in order to fulfil her own destiny.

Tiempo e historia: Una filosofía del cuerpo Alfonso Pérez de Laborda. 2003-01-09 «Seguramente cierro ahora una etapa de mi pensamiento que podría denominar de la 'prueba del deseo' y quisiera pensar que se debería abrir en este momento otra nueva, que podrá denominarse etapa de la 'prueba por el amor'. [...] Publicados en poco tiempo cinco libros, los paisajes se han de hacer otros. Será lo que, decía más arriba, podría denominarse etapa de la 'prueba del amor'. Me inclino a pensar que este nuevo curso de las cosas ha ido comenzando a producir aquí y allá algunos pensamientos, como en ensayos de prospectiva, de ampliación de horizontes; más aún, que los tres capítulos que constituyen la tercera parte de este mismo libro son ya pura apertura a esta nueva etapa, en la que el pensar se ha de tejer con varios hilos, entre los cuales están el de una 'filosofía del cuerpo', el de la apertura a la historicidad, además, por supuesto, del decisivo hijo rojo de la gloria de la belleza. Por eso, en estos pensamientos nuevos, acaso ha de ser sintomático de manera especial el que busca conjugar persona y belleza. [...] La vida es cosa curiosa. Ha podido llamar la atención a alguno el agradecimiento a quien me arrecogió. Pero la verdad es que nadie más se me ofreció para ello. Por eso se puede calibrar la profundidad del afecto». Tycho and Kepler Kitty Ferguson. 2013-01-31 The extraordinary, unlikely tale of Tycho Brahe and Johannes Kepler and their enormous contribution to astronomy and understanding of the cosmos is one of the strangest stories in the history of science. Kepler was a poor, devoutly religious teacher with a genius for mathematics. Brahe was an arrogant, extravagant aristocrat who possessed the finest astronomical instruments and observations of the time, before the telescope. Both espoused theories that seem off-the-wall to modern minds, but their fateful meeting in Prague in 1600 was to change the future of science. Set in one of the most turbulent and colourful eras in European history, when medieval was giving way to modern, Tycho and Kepler is a double biography of these two remarkable men.

Por qué soy comunista Alberto Garzón.2017-10-17 En los últimos años se ha hecho evidente que las crisis periódicas propias del capitalismo solo traen altos niveles de desempleo y desigualdad, desahucios y empobrecimiento, y una desestabilización política que afecta al conjunto de las instituciones. La irrupción de nuevos partidos, la desaparición o debilitamiento de los tradicionales y el renacimiento del nacionalismo son otros de sus efectos colaterales. Si a todo ello le sumamos la crisis ecológica, que pone de manifiesto que nuestras formas de producir, distribuir y consumir están destruyendo el planeta, el resultado es una tríada que sin duda está cambiando irremediablemente el mundo en el que vivimos. Por qué soy comunista reflexiona sobre todo ello y ofrece respuestas fundadas en la esperanza que nació de las entrañas de la parte más sufrienda del mundo: la clase trabajadora. Muchos de los derechos que hoy conocemos —como el sufragio universal o la propia democracia— fueron conquistas de organizaciones socialistas. Sin duda, otro mundo es posible si somos capaces de organizarnos de otra manera, pensando en común y utilizando los métodos y descubrimientos de la ciencia. Pero para ello no valen las ideas superficiales, los tópicos baratos o las ideologías acartonadas e inflexibles. Lo que necesitamos, reflexiona Garzón en este libro, es razón apasionada, teorías bien fundamentadas y una sensata actitud crítica hacia el sistema que nos gobierna.

The Object of the Atlantic Rachel Price.2014-11-30 The Object of the Atlantic is a wide-ranging study of the transition from a concern with sovereignty to a concern with things in Iberian Atlantic literature and art produced between 1868 and 1968. Rachel Price uncovers the surprising ways that concrete aesthetics from Cuba, Brazil, and Spain drew not only on global forms of constructivism but also on a history of empire, slavery, and media technologies from the Atlantic world. Analyzing Jose Martí's notebooks, Joaquim de Sousa's poetry, Ramiro de Maeztu's essays on things and on slavery, 1920s Cuban literature on economic restructuring, Ferreira Gullar's theory of the "non-object," and neoconcrete art, Price shows that the turn to objects—and from these to new media networks—was rooted in the very philosophies of history that helped form the Atlantic world itself.
