Nuns' Chronicles and Convent Culture in Renaissance and

Counter-Reformation Italy K. J. P. Lowe.2003-12-04 This well-

illustrated and innovative book analyses convent culture in sixteenth-century Italy through the medium of three unpublished nuns' chronicles. It uses a comparative methodology of 'connected differences' to examine the intellectual and imaginative achievement of these nuns, and to investigate how they fashioned and preserved individual and convent identities by writing chronicles. The chronicles themselves reveal many examples of nuns' agency, especially with regard to cultural creativity, and show that convent traditions determined cultural priorities and specialisms, and dictated the contours of convent ceremonial life.

**Heart** Johannes Hinrich von Borstel.2017-06-03 “Describes the physiology behind the normal function of the heart with gusto and humor . . . well informed and accessible . . . a necessary book.”

—Readings In this lively and informative exploration of all aspects of the heart, Johannes Hinrich von Borstel offers a perfect mix of medical fact and amusing anecdote. A doctor, prospective cardiologist, and former paramedic—as well as a successful science-slammer—von Borstel relates his own experiences to provide a personal insight into the human side of heart medicine, while clearly explaining the science behind cardiac disease and healthcare for the heart. His many tips on how to give your ticker the best chance of enduring for as long as possible include one that will certainly be close to many people’s hearts: have more sex! Oh, and eat more vegetables. “Whether your heart is healthy

or not, everyone should read this book, because the author has truly put his heart and soul into it.” —Shelf Life “While von Borstel cautions against these excesses, his youthful enthusiasm and gusto for his subject makes for a lively read.” —The Sydney Morning Herald “An eminently readable book which strikes a very good balance between information and anecdote . . . should be of interest to anyone who wants to know what goes on ‘under the hood’ as it were, regardless of your level of anatomical understanding . . . this is a marvelous book.” —Yinspire

**Implicit Meanings** Professor Mary Douglas, Mary Douglas.2010-10-14 *Implicit Meanings* was first published to great acclaim in 1975. It includes writings on the key themes which are associated with Mary Douglas' work and which have had a major influence on anthropological thought, such as food, pollution, risk, animals and myth. The papers in this text demonstrate the importance of seeking to understand beliefs and practices that are implicit and a priori within what might seem to be alien cultures.

**The Biophilia Effect** Clemens Arvay, MSc.2018-02-01 Did you know that spending time in a forest activates the vagus nerve, which is responsible for inducing calm and regeneration? Or that spending just one single day in a wooded area increases the number of natural killer cells in the blood by almost 40 percent on average? We've all had an intuitive sense of the healing power of nature. Clemens G. Arvay's new book brings us the science to verify this power, sharing fascinating research along with teachings and tools for accessing the therapeutic properties of the forest and natural world. Already a bestseller in Germany, *The Biophilia Effect* is a book that transforms our understanding of our interconnection with nature—and shows us how to engage the natural world wherever we live for greater health, inspiration, rejuvenation, and spiritual sustenance.

Nutrition and Cardiovascular Health Paramjit S. Tappia,Heather Blewett.2020-06-17 There is unequivocal experimental, epidemiological, and clinical evidence demonstrating a correlation between diet and increased risk of cardiovascular disease (CVD). While nutritionally-poor diets can have a significant negative impact on cardiovascular health, dietary interventions with specific nutrients and/or functional foods are considered cost-effective and efficient components of prevention strategies. It has been estimated that nutritional factors may be responsible for approximately 40% of all CVD. Indeed, in one of the seminal studies conducted on modifiable risk factors and heart health (the INTERHEART study), >90% of all myocardial infarctions were attributed to preventable environmental factors with nutrition identified as one of the important determinants of CVD. There is an increasing public interest in and scientific investigation into establishing dietary approaches that can be undertaken for the prevention and treatment of CVD. This Special Issue provides an insight into the influential role of nutrition and dietary habits on cardiovascular health and disease, as well as their mechanisms of therapeutic and preventive action.

Patterns of Commoning David Bollier, Silke Helfrich. 2015-11-06 What accounts for the persistence and spread of commoning, the

irrepressible desire of people to collaborate and share to meet everyday needs? How are the more successful projects governed? And why are so many people embracing the commons as a powerful strategy for building a fair, humane and Earth-respecting social order? In more than fifty original essays, *Patterns of Commoning* addresses these questions and probes the inner complexities of this timeless social paradigm. The book surveys some of the most notable, inspiring commons around the world, from alternative currencies and open design and manufacturing, to centuries-old community forests and co-learning commons - and dozens of others. *Syncrometer Science Laboratory Manual* Hulda Regehr Clark. 2000-01-01 This book introduces the 3 kinds of investigations that can be made with a syncrometer. In the first kind of investigation, you can detect entities in your body, taken as a whole. For example, mercury aflatoxin, Streptococcus pneumonia, Epstein Barre virus, orthophosphotyrosine, benzene. Such a test is not as sensitive as the organ test, described next, but for this reason allows you to select those entities most abundant in the body and therefore of special significance; in the second, you can identify which organs contain a particular entity. For example, the mercury may be in the kidney, the Streptococcus in the joints, and so on. This allows you to embark on a cleanup program for your body in a focused way. The syncrometer lets you monitor your progress. And finally, you can

detect entities in products. For example, lead in your household water, thulium in your reverse osmosis water, asbestos in your sugar.

**Barbarian Spring** Jonas Lüscher.2015-03-15 On a business trip to Tunisia, Preising, a leading Swiss industrialist, is invited to spend the week with the daughter of a local gangster. He accompanies her to the wedding of two London city traders at a desert luxury resort that was once the site of an old Berber oasis. With the wedding party in full swing and the bride riding up the aisle on a camel, no one is aware that the global financial system stands on the brink of collapse. As the wedding guests nurse their hangovers, they learn that the British pound has depreciated tenfold, and their world begins to crumble around them. So begins *Barbarian Spring*, the debut novel from Jonas Lüscher, a major emerging voice in European fiction. The timely and unusual novel centers on a culture clash between high finance and the value system of the Maghreb. Provocative and entertaining, *Barbarian Spring* is a refreshingly original and all-too-believable satire for our times.

### **"The Turk and Islam in the Western Eye, 1450-1750"**

James G. Harper. 2017-07-05 Unprecedented in its range - extending from Venice to the New World and from the Holy Roman Empire to the Ottoman Empire - this collection probes the place that the Ottoman Turks occupied in the Western imagination, and the ways in which this occupation expressed itself in the visual arts. Individual essays in this volume examine specific images or groups of images, problematizing the 'truths' they present and analyzing the contexts that shape the presentation of Ottoman or Islamic subject matter in European art. The contributors trace the transmission of early modern images and representations across national boundaries and across centuries to show how, through processes of translation that often involved multiple stages, the figure of the Turk (and by extension that of the Muslim) underwent a multiplicity of interpretations that reflect and reveal Western needs, anxieties and agendas. The essays reveal how anachronisms and inaccuracies mingled with careful detail to produce a Turk, a figure which became a presence to reckon with in painting, sculpture, tapestry and printmaking.

*Sheep Machine* Vi Khi Nao.2018 Poetry. Asian & Asian American Studies. Film. SHEEP MACHINE is a textual inscape, a poetically painted nonfictional pasture where mechanical violence and visceral fear coalesce into a kind of science prosody, a post-human panorama whose beauty lies in the ruins of reality it depicts. Influenced by Leslie Thornton's film of sheep feeding in a field as a conveyor belt of cable cars ascend and return from a mountain in the Swiss Alps, Vi Khi Nao takes perception into tumultuous terrains, into a pastoral-celestial void in which temporality is transcended, progress is a bourgeois invention, and god is a liability for our life spent in hunger and grazing. Vi Khi Nao's SHEEP MACHINE is grace said at the ontological last supper.

**Why We Love Dogs, Eat Pigs, and Wear Cows** Melanie

Joy.2020-08 An important and groundbreaking contribution to the struggle for the welfare of animals. -- Yuval Harari, New York Times best-selling author of *Sapiens: A Brief History of Humankind* The book offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist

Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term carnism to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows*, Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year.

Controversial and challenging, this book will change the way you think about food forever. An absorbing examination of why humans feel affection and compassion for certain animals but are callous to the suffering of others. - Publishers Weekly I think Gandhi would have loved *Why We Love Dogs, Eat Pigs, and Wear Cows*. For this is a book that can change the way you think and change the way you live. It will lead you from denial to awareness, from passivity to action, and from resignation to hope. - John Robbins, author of *Diet for a New America* and *The Food Revolution*

*Andrea Fraser* Andrea Fraser, Rhea Anastas, Alejandro Cesarco. 2019 This publication is a substantial archive and a singular point of entry into thinking with and understanding Andrea Fraser's work and reception. The interview format provides intimate insight into Fraser's self-positioning as a central aspect of her practice. By presenting the artist's voice as mediated through interlocutors ranging from professional peers to popular media, 'Collected Interviews, 1990-2018' uniquely contextualizes Fraser's practice in the artistic, institutional, and discursive fields in which she intervenes. As Fraser is engaged, challenged, and understood from diverse perspectives, readers learn as much about her artistic commitments from the artist's humor and affect as from her incisive analyses. The collection spans three decades, from the early 1990s to the present, and is organized chronologically with minimal editing. The collection's unmediated format allows Fraser's key ideas and themes to attain deeper resonance through repetitions and subtle differentiations over multiple conversations.

**Nuns and Nunneries in Renaissance Florence** Sharon T. Strocchia. 2009-10-19 An analysis of Renaissance Florentine convents and their influence on the city's social, economic, and political history. The 15th century was a time of dramatic and decisive change for nuns and nunneries in Florence. That century saw the city's convents evolve from small, semiautonomous communities to large civic institutions. By 1552, roughly one in eight Florentine women lived in a religious community. Historian Sharon T. Strocchia analyzes this stunning growth of female monasticism, revealing the important roles these women and institutions played in the social, economic, and political history of Renaissance Florence. It became common practice during this time for unmarried women in elite society to enter convents. This unprecedented concentration of highly educated and well-connected women transformed convents into sites of great patronage and social and political influence. As their economic influence also grew, convents found new ways of supporting themselves; they established schools, produced manuscripts, and manufactured textiles. Using previously untapped archival materials, Strocchia shows how convents shaped one of the principal cities of Renaissance Europe. She demonstrates the importance of nuns and nunneries to the booming Florentine textile industry and shows the contributions that ordinary nuns made to Florentine life in their roles as scribes, stewards, artisans, teachers, and community leaders. In doing so, Strocchia argues that the ideals and institutions that defined Florence were influenced in great part by the city's powerful female monastics. Winner, Helen and Howard R. Marraro Prize, American Catholic Historical Association "Strocchia examines the complex interrelationships between Florentine nuns and the laity, the

secular government, and the religious hierarchy. The author skillfully analyzes extensive archival and printed sources.”

*Methods for the Determination of Vitamins in Food* D.

Brubacher.2012-12-06 In the course of the project COST 91 \*, on the Effects of Thermal Processing and Distribution on the Quality and Nutritive Value of Food, it became clear that approved methods were needed for vitamin determination in food. An expert group on vitamins met in March 1981 to set the

requirements which these methods must meet. On the basis of these requirements, methods were selected for vitamin A,  $\beta$ -carotene, vitamin B1 (thiamine), vitamin C and vitamin E. Unfortunately, for vitamins B2 (riboflavin), B6 and D only tentative methods could be chosen, since the methods available only partially fulfilled the requirements set by the expert group. For niacin and folic acid some references only could be given because none of the existing methods satisfied these requirements, and for vitamin B, vitamin K, pantothenic acid and 12 biotin it was not considered possible to give even references. All methods were carefully described in detail so that every laboratory worker could use them without being an expert in vitamin assay. In October 1983 an enlarged expert group on vitamins approved the compilation of methods and approached a publishing house with a view to publication. The editors wish to thank Dr Peter Zeuthen, the leader of the project COST 91, for his interest in their work, and Mr G.
