**Last Child in the Woods** Richard Louv.2008-04-22 "The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable." —Richard Louv, from the new edition In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child's healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children's lives and the rise in obesity, attention disorders, and depression. Louv's message has galvanized an international back-to-nature campaign to "Leave No Child Inside." His book will change the way you think about our future and the future of our children. "[The] national movement to 'leave no child inside' . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a 'green hour' in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv." —The Washington Post "Last Child in the Woods, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation." —The Nation's Health "This book is an absolute must-read for parents." —The Boston Globe Now includes A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the

*Pediatric Liver Disease* M. M. Fisher. 2012-12-06 This was an important Symposium in a rapidly developing field of interest. It was designed to draw attention to areas which have been neglected in standard hepatology textbooks and to review areas of controversy. It was also meant to help bridge the communication gap between hepatologists caring for children and adults as well as between some areas of clinical and basic research. The Symposium was a substantial success. Unfortunately two of the twenty participants did not deliver a manuscript. The result is a publication which is late and which is not as complete as it should be. For this lateness and incompleteness the editors apologize most sincerely--especially to those participants who delivered their manuscripts on time but even to those who delivered their manuscripts late. Perhaps the most noteworthy feature of this publication is the fact that material presented in May 1980 is by no means out of date. Apart from the section on Viral Hepatitis, one of the most rapidly evolving fields of medicine, the context of the Symposium remains disturbingly current. The neglect continues, the controversies remain. We hope that this publication will help draw investigators into liver research, provide a useful point of reference for those in the field and stand as a monument to editors past, present and future, who have chased, are chasing and will chase manuscripts in vain.

*Common Liver Disease and Transplantation* Robert S. Brown. 2013 This book provides a review of liver diseases and transplantation that is comprehensive enough to provide an intellectual basis for the data, yet simple enough to be read and assimilated into clinical practice rapidly. The early chapters are summaries on topics such as early and late liver disease, workup and diagnosis, and pre- and post-transplant problems. The chapters that follow are liver disease-specific and cover the liver diseases physicians will encounter in their patients. The in-depth chapters provide disease-specific epidemiology and outcomes, as well as diagnostic tables and more detailed algorithms and management approaches. With two decades worth of teaching liver disease both formally as well as in rounds and informal chalk talks with residents and fellows, Dr. Robert S. Brown Jr presents a way to think about clinical liver problems with a simple algorithmic method.

**Liver Disorders in Childhood** Alex P. Mowat. 1979 Liver Disorders in Childhood ...

**Hepatitis and Liver Cancer** Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Prevention and Control of Viral Hepatitis Infections. 2010-04-23 The global epidemic of hepatitis B and C is a serious public health problem. Hepatitis B and C are the major causes of chronic liver disease and liver cancer in the world. In the next 10 years, 150,000 people in the United States will die from liver disease or liver cancer associated with chronic hepatitis B virus (HBV) or hepatitis C virus (HCV) infections. Today, between 800,000 and 1.4 million people in the United States have chronic hepatitis B and between 2.7 and 3.9 million have chronic hepatitis C. People most at risk for hepatitis B and C often are the least likely to have access to medical services. Reducing the rates of illness and death associated with these diseases will require greater awareness and knowledge among health care workers, improved identification of at-risk people, and improved access to medical care. Hepatitis B is a vaccine-preventable disease. Although federal public health officials recommend that all newborns, children, and at-risk adults receive the vaccine, about 46,000 new acute cases of the HBV infection emerge each year, including 1,000 in infants who acquire the infection during birth from their HBV-positive mothers. Unfortunately, there is no vaccine for hepatitis C, which is transmitted by direct exposure to infectious blood. Hepatitis and Liver Cancer identifies missed opportunities related to the prevention and control of HBV and HCV infections. The book presents ways to reduce the numbers of new HBV and HCV infections and the morbidity and mortality related to chronic viral hepatitis. It identifies priorities for research, policy, and action geared toward federal, state, and local public health

officials, stakeholder, and advocacy groups and professional organizations.
